No Use Talking : This Beats Walking

The Bicycle with the C·C·M· TRIPLEX HANGER

Even Better Than Pre-War Quality

YOU can give C. C. M. Bicycles your strongest recommendation.

The materials used are fully up to the best pre-war standards.

The workmanship is equal to anything we turned out before the war.

In fact, the C. C. M. factory is working with even greater accuracy than before the war, some of the parts of present-day C. C. M. Bicycles and Hercules Coaster Brakes being made to closer limits than the delicate time fuses we manufactured for the British Government.

We stand behind every C. C. M. Bicycle with the strongest and fairest of guarantees—a guarantee that protects every dealer and every rider.

You couldn't ask for more in a bicycle than we give you in

There IS a Difference—

ALL CHISELS are *not* alike, even though they may look alike.

Pexto Chisels are forged from special crucible steel of extreme strength and toughness, by the best mechanics—men who have been making Pexto Chisels for many years.

The hardening and tempering is done by a special process and the fine sharp edge will last as long as proper care is given to it.

These chisels are furnished with the celebrated "mirror finish" and with the polished hickory handles make an exceptionally attractive tool.

Every tool is carefully inspected—giving the customer the assurance of Pexto Quality.

Let us send you a supply of our Chisel booklets which list and illustrate our entire line of chisels and draw knives.

HOBBS Manufacturing Company, Limited

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Suppose you write us to-day about Silkstone and other lines that will benefit your business? We know you want to satisfy customers and build permanent, lasting trade; Silkstone is one of a line that does that to perfection.

You can sell it because Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. It is economical, durable and satisfies good taste.

Let us show you that it is profitable to sell. If a thing sells well and pays the merchant well, you certainly want it working for you in your store, don't you?

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Burgess Batteries

Round Carton

Burgess No. 6 Ignition

Burgess Guarantee

Every Burgess product is fully guaranteed and you are protected by our unqualified agreement to replace any Burgess product which does not give satisfactory service.

Energetic, vigorous and enduring, this type of Burgess Battery is fully dependable for gas engine and open circuit work. Inspected, tested and guaranteed.

This reliable battery gives a service that delights consumers and establishes confidence in your store.

Burgess Uniplex Batteries

Burgess Packing

Eliminates fire hazard, insures against damaged goods from careless packing, saves space. Burgess packing is clean, sanitary, and labor-saving.

Burgess Uniplex Batteries are actually waterproof. This is the most serviceable of all types of dry batteries—easy to connect, handy to carry, and takes up little space. Burgess products are not sold by mail order houses.

Write for literature.

TWO SEASONABLE "SELLERS!"

The "Frost King"

STRONG

Made of sheet metal heavily galvanized (and so cannot rust). All parts bolted together (not riveted), so can be taken apart or repaired simply. Construction is first-class. Hinges are solid and stout.

SANITARY

No wood or other absorbent materials used —only galvanized sheet steel. Damp and odors and germ-breeding surfaces and corners entirely absent. Nothing to rust. Can be readily cleaned with hose or damp cloth.

PRICES AND SIZES

No.				
10—35	x 20	x 14	= $ 7.25	crated.
11—41	x 22¼	x 16	= 11.50	"
12—41	x 28	x 21	= 18.50	"
For White Enamel, Inside and Out				
10—35	x 20	x 14	= $ 8.25	crated.
11—41	x 22¼	x 16	= 13.00	"
12—41	x 28	x 21	= 20.50	"

THE 100% PERFECT REFRIGERATOR

Its marked ECONOMY is due to the unique system of circulation and ventilation by the admission of pre-cooled air. The warm air cannot get into the ice compartment until it passes through the "cooling chamber," and the cold air cannot warm up and melt the ice, after circulating, because it is driven off by the constantly descending current of pure cold air.

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

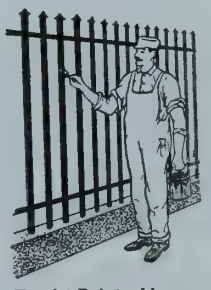
Plastic Elastigum Patching Cement

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

THE man who buys Barrett Products usually buys them through a dealer. The dealer carries them because he knows who makes them and what they *are*. He knows, also, that The Barrett Company's reputation throughout the Dominion is *his* reputation in his locality, and that it increases his sales, his profits, and his name for quality and fair prices.

Consumers are likely to judge you, Mr. Dealer, by the products you handle. Barrett Products on your counter will tell them that you are the man they want to do business with.

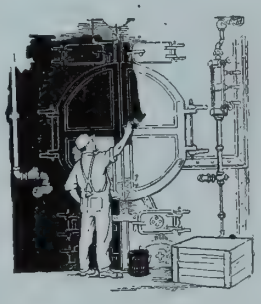
Farm impliments don't wear out—they rust out. Everjet prevents rust.



Everjet Elastic Carbon Paint

A black carbon paint for industrial purposes. No other paint on the Canadian market has ever enjoyed the same popularity and filled so many demands in the industrial world as Everjet, which was put on the market by our chemists less than ten years ago.

We manufacture no product which we can more thoroughly recommend. For use on all kinds of metal and wood, particularly on materials subject to severe conditions; for use on boilers, smokestacks, machinery, piping; in fact, metal work of all kinds. It is also used extensively for painting metal roofs. It successfully resists the corrosive action of acids, alkalies, fumes and vapors, and will wear stubbornly under the most adverse conditions.



It is being used extensively by big manufacturing concerns, railroads, etc., all over Canada, and has been endorsed by some of the most eminent engineers.

Put up in: 1-Gallon Cans, Lithographed (cases of one doz.), 5 Gallon Cans, ½-Barrels (about 20 gallons), Barrels (about 40 gallons).

Everjet Paint adds years to the life of outdoor metal work.

Everlastic Liquid Roofing Cement

FOR resurfacing old and worn-out "rubber" and prepared roofings, here's a winner!

Comes ready for use, is easy to apply and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.

Everlastic Liquid Roofing Cement is in a class by itself among roof repair materials.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment; Cross-cut, Hand, Buck and Circular Saws.

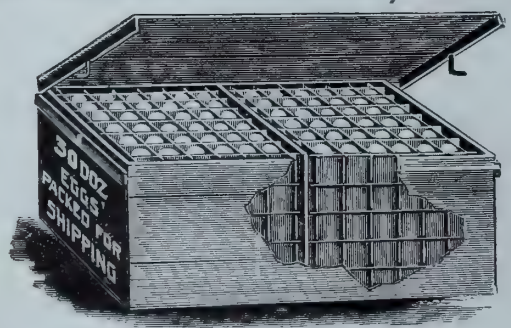
Ask for the Shurly Catalog.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS



No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

CURTIS AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment :

1—Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.

2—Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.

3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.

4—Fan flywheel cools cylinder; increases capacity.

5—Inspectable valves, light weight, large area.

6—Valves cannot drop into cylinder and wreck machine.

7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.

8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.

9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks

For Air, Gas and Liquid

We make these tanks of best quality copper, steel welded throughout and thoroughly tested under Air Pressure to 300 lbs. before leaving our factory.

Write for price list and further particulars. Send names of prospective customers to whom we may mail literature.

We also make baths, steel factory equipment, gasoline tanks, truck tanks, etc.

IT HAS BEEN SAID that half the money spent on advertising is wasted

That probably was true six years ago.

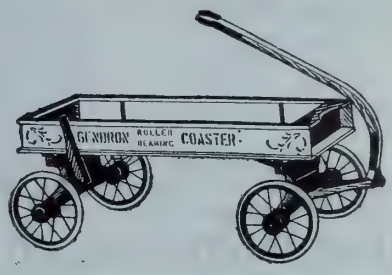
It certainly is not true now.

To the Audit Bureau of Circulations is due much of the credit for the difference.

Six Years Ago space was bought by guesswork. Now it is bought with a definite knowledge of circulation:—how many copies are printed, how they are distributed, how many paid for and how many given away.

The advertiser who does not protect himself by asking to see the A. B. C. reports of the publications he uses is reactionary and invites a return to the wasteful methods of former years.

Hardware and Metal is a member of the A. B. C. Its advertisers are fully protected.



If interested tear out this page and place with letters to be answered.

THIRD ASIATIC EXPEDITION
OF THE
AMERICAN MUSEUM OF NATURAL HISTORY
IN COOPERATION WITH THE
AMERICAN ASIATIC ASSOCIATION
AND
ASIA MAGAZINE

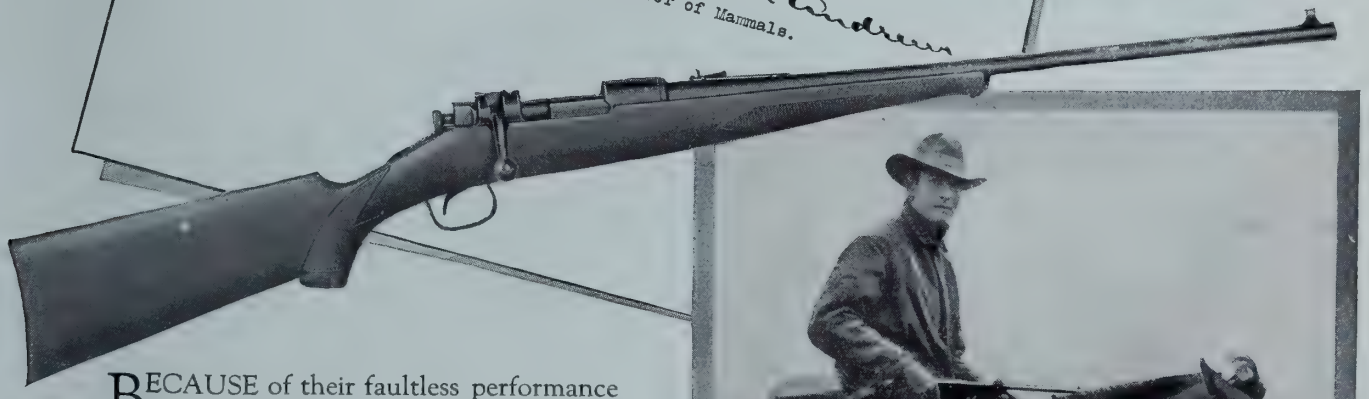
Address Correspondence to
ROY CHAPMAN ANDREWS, Leader
American Museum of Natural History
New York City, U. S. A.

November 30, 1920.

Savage Arms Corporation,
50 Church St,
New York City.

Dear Sirs:

Many thanks for your letter of November 29th. I have always had a very warm feeling for the Savage Arms Corporation, for I have found not only personally, but through my friends, that your policy has always been one of far-sightedness: moreover, your guns are exceedingly effective, and in the .250-3000 cartridge you have a splendid product. The astonishing shocking power of this cartridge has frequently accomplished for me what heavier bullets and higher charged ammunition have failed to do.



I am taking your Model 1920 Bolt Action .250-3000 on the Third Asiatic Expedition. It is just the gun for my purpose, as I consider it the best-all-round rifle obtainable, and an ideal saddle companion.

Very sincerely yours,

Roy Chapman Andrews

Associate Curator of Mammals.

BECAUSE of their faultless performance under conditions highly trying to ordinary firearms, because their dependability is proverbial, Savage Rifles are included in the equipment of the third Asiatic Expedition.

Savage Rifles and Firearms have been "the right arm" of many of the important scientific and explorative Expeditions of recent years.

ROY CHAPMAN ANDREWS
on his pony "Kublai Khan" with a Mongol Antelope.

"The Savage .250-3000 rifle did splendid work on the Mongolian plains where we seldom shot at less than 300 yards. I killed several running antelope at 450 yards and found that the great killing power of the Savage projectile made it ideal for this type of work".

TAKE UP THE SLACK IN YOUR PROFITS

—The DAYTON will help you

Immediately you place an International Dayton Hardware Scale at every convenient point on your counters, you begin to take up the slack in your profits.

A few months' use and the Daytons have paid for themselves.

After that, all they save is pure "VELVET."

The Dayton Hardware Scale has been described as "The most valuable piece of store equipment ever introduced into the Canadian Hardware trade."

As a service-giver and as a money-maker, it stands supreme.

Why?

The answer is: Scientific construction.

The scale buyer who looks for lasting results informs himself well on the essentials of true and perfect scale building. The specifications of the International Dayton Hardware Scale are the product of long experience. They have no weak points.

Every one of the Dayton specifications is worthy of study in itself. Here are a few of the points in which it excels all others: Rack and Pinion; oil tempered springs; Thermostat or Automatic Compensating device; Equalizing rod; ball bearings; leverage system; pivots; agate bearings; finish.

No hardware merchant can afford to be without the Help of the Counting Scoop in Stock-taking Time. It counts automatically nuts, bolts, screws or other small articles.

International Dayton Hardware Scales

Make the correct weight and correct value instantly visible. They knock out the underweight and overweight and become a medium of good will between merchant and customer.

Dayton Hardware Scale. Wire rack for use with this scale is shown below.

TRUE VALUE

Lies not so much in the price paid, as in the superior quality of the article purchased.

IT IS because of a widespread public belief in that truth—as applied to Furniture Polish and Mops—that Merchants find it easy to get the full sales prices for O-Cedar products. Because of our co-operation in this price maintenance, the storekeeper is confident of obtaining—on every O-Cedar Polish Mop and every can of O-Cedar Polish sold—the full profit which is his reasonable reward for the part he plays in marketing these high-grade goods.

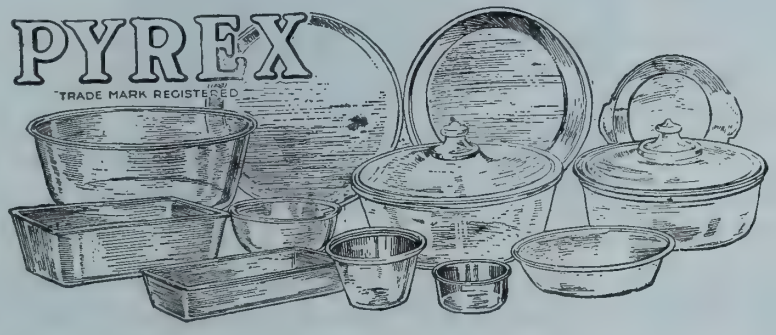
'RICE LEWIS' NEWS

June—*the wedding month*—will soon be here

FOR the next few weeks the order of the day, or rather the evening, will be showers for the June bride-to-be. This is your opportunity to get in on some good business while it's going. Silverware and Pyrex Ovenware are lines best suited to this purpose. Are your windows trimmed with such gift suggestions right now?

Let us sort your stock.

Community Plate



We carry a full line of flatware in the following patterns—"Adam," "Patrician," and "Sheraton," and can give prompt delivery. These patterns are proven good sales makers.

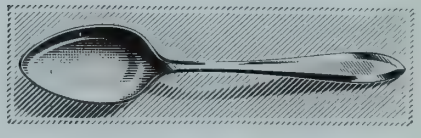
Rogers 1847

Our stock of Rogers 1847 flatware consists of such patterns as "Old Colony," "Cromwell," "Continental," and "Tipped." This is a quartette of standard lines which have ready sale.

PYREX Ovenware

We carry a full line of Pyrex in plain and cut, in separate pieces or sets.

The Gift Sets



For wedding gifts the Pyrex Gift Set is most acceptable.

Community "Patrician"

Ask the "Rice Lewis" Man for prices on Pyrex and Silverware.

IMPORTANT ANNOUNCEMENT

The Sheet Metal Products Co. of Canada Limited Are Appointed Sole Agents for Canada for the Puritan Oil Stoves

WE have completed arrangements with the Perfection Stove Company, Limited, of Sarnia, whereby we have obtained the exclusive rights to sell the Puritan Oil Stove in Canada.

The Canadian public are fully acquainted with the merits of the Puritan Oil Stove. It has been made in Canada and the United States by the makers of the New Perfection Oil Stove for many years.

It is almost imperative that every dealer should handle a line of Oil Stoves. He will realize how convenient and how much more economical it will be to be able to buy these nationally advertised Oil Stoves at the same time as he is sorting up on enameled ware and other sheet metal lines.

The Puritan Oil Stove (every part of which is made in Canada) operates on the blue flame principle. It is most economical on fuel. The most vital parts of the stove, that is, the combustion tubes, carry a five year guarantee. The stove has a real wick (interchangeable on New Perfection Stoves), a positive wick stop that is absolutely foolproof and burns with the flame right next to the pot. Every stove carries our guarantee and the guarantee of the makers

Our representatives will have the pleasure of submitting our proposal to the trade shortly. Meanwhile, full information, prices, etc., may be obtained from your jobber or from us direct. Orders should be placed early.

Used Universally--

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans, and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

IMPERIAL
FLOOR DRESSING

Imperial Floor Dressing is a great boon to storekeepers and dealers. It catches and holds at least 90% of the dust that would otherwise settle on goods and display shelves and detract from their appearance

Imperial Floor Dressing is a sanitary, wood-preserving preparation that definitely lays dust. It will not gum or evaporate, and it keeps floors and fixtures looking their best at all times.

Imperial Floor Dressing is conveniently applied and surprisingly economical. One gallon treats from 500 to 700 square feet. A single application is all that is needed for weeks.

Imperial Floor Dressing is a big seller for use in hospitals, churches, schools, billiard halls and institutions of every kind. Its use on your own floors is the best demonstration you can make. That alone will create a steady, profitable demand for this high quality dressing.

Ask the Imperial Oil salesman about Imperial Floor Dressing.

"Seafoam" Electric Washer

The Result of Twelve Years' Service
Seafoam Sales To-day are Satisfactory

Because dealers can offer a machine that will do the washing and wringing by power by the method proved the best by years of experience, and sell it at a low price which is within the reach of the average householder.

Cypress tub, highest grade reversible wringer, Robbins & Myers motor, which will develop ¼ horsepower and trouble-proof mechanism, concisely describes this all-Canadian made machine.

The "Seafoam" will give the best of service every wash day for many years. Twelve years on the market has proved this.

Dealers not already enjoying "Seafoam" profits should capitalize the opportunity of handling this commonsense, practical, washing and wringing machine, which will sell and satisfy.

Get Closer to that Customer —The Railway Repair Shop and "Rip" Tracks

THE railroads of the country are coming into the market for quantities of tools to repair broken and worn equipment. Thousands of locomotives, freight and passenger cars must be put in condition to render efficient service immediately.

Threaded parts are vitally essential to this railway repair work. There are millions of threads to repair, and new threads to cut. Every nut and bolt must fit snugly to withstand the strains and vibrations of heavy traffic—to prevent accidents.

Why not be first in this field with the GTD line of threading tools?

The railway repair shop needs "*Maxi*" Staybolt taps for renewing loose or broken staybolts.

GTD Patch Bolt and Mud Plug taps for boiler repairs.

A No. 5 *Little Giant* Screw Plate, GTD Reamers and GTD "*Lincoln*" Drills for repairing studs, frame braces, boiler pads and brackets, brake gear hangers, etc.

Also car repair tracks, or "rip" tracks should have:

A No. 5 *Little Giant* Screw Plate for repairing bolts and nuts *on the spot.*

"*Lincoln*" Drills and GTD Reamers for drilling and reaming the holes to be tapped.

We want to help you get this business. Will you meet us half way?

An Idea: Write us a letter giving the names of railroad repair shops or "rip" tracks near you. We will gladly supply you with material for reaching them by mail, and suggestions for following them up in person.

THE

HAPPY THOUGHT

FOUNDRY COMPANY

LIMITED

A New Name

The incorporation of the Happy Thought Foundry Company, Limited, marks the passing out of an old name, The William Buck Stove Co., Ltd.

Seventy years have passed since Wm. Buck commenced to build up his Range and Furnace organization. In the building of it he passed from experience to experience. The Buck Plant grew in size and prestige. It developed a Dominion-wide reputation.

Wm. Buck has passed away, but a new generation of employees learned his methods and practised them. Fundamentally his goods remained as reliable and as high in quality as they had ever been. The prestige of his organization carried on.

Inseparable from his name is the name of his leading products, "Happy Thought." This name is respected wherever mentioned. A Happy Thought Range carries with it the knowledge of unsurpassed quality and consistent operation.

The choice of the Happy Thought name for the reconstructed organization is based on the goodwill it has created and holds to-day. Its appeal to the consumer will be measured by the use you make of it.

We have illustrated here, the "Big Four"—The Happy Thought Cast, Steel and Combination Ranges and Pipeless Furnace. They are leaders in the complete Happy Thought line.

The Happy Thought Cast Range is made up of extra heavy castings. Its wonderful oven with the pyramids is well known; it is thoroughly ventilated. Flues are deep. Drafts five in number. Firebox with five cast iron linings. Registered design. Duplex grates. Polished top. With or without glass door and reservoir. Plain or decorated high closet, or cast high shelf.

THE

HAPPY THOUGHT

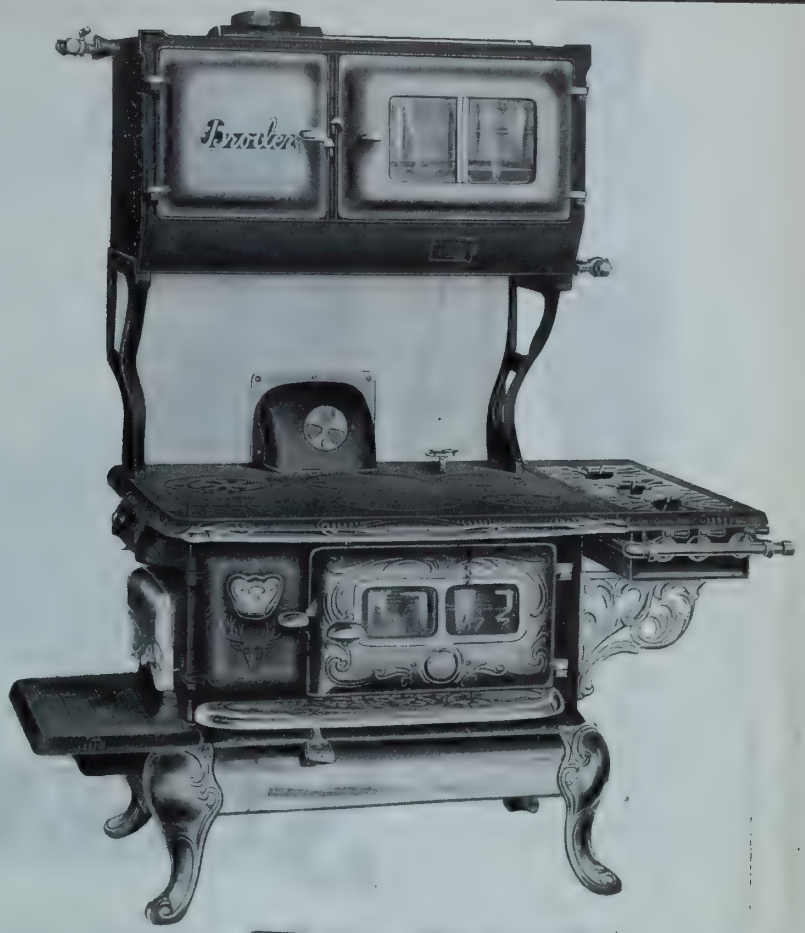
FOUNDRY COMPANY

LIMITED

A New Service

Happy Thought Steel Range has a striking appearance. A modern style of dress limits labor in cleaning. The firebox, built right, is deep and linings are in six pieces. Heavy duplex grates and dump wood grate—square steel oven with smooth, even interior—one rack. Drop oven door. Capacious cooking surface with six holes. Pipe collar at back. Six drafts ensure perfect control of fire. With or without reservoir and plain or decorated high closet. Thermometer.

Happy Thought Combination Range burns gas, coal or wood without change of any parts or the turn of a lever. Operates on same basis as separate ranges. Year round service. All sterling features of standard Happy Thought Cast Range retained in coal section. Gas section comprises two Ovens, broiling and baking, of ample size—cooking surface fitted with three star burners of regulation size.



White enameled splash back. Five sizes.

Happy Thought Pipeless Furnace is a proved heating system, using one register only. Cast iron front, heavy steel radiator. Two-piece firepot, corrugated on outside to increase radiating surface—cast ring above firepot preserves life of steel radiator. Four heavy triple-sided grates. Large feed door. Gas damper. Water pan, ample size and at correct height for refilling. Dust damper.

The Happy Thought line includes other leaders, as the Reliance Furnace, Britannia Steel Range, Golden Age combination gas and coal range, Radiant Home Baseburner, Happy Thought, Quebec Heater, etc.

Full information of our complete service or descriptive details of specified article gladly furnished on request.

Gets 15% More Wool

Retail Price:
Eastern Canada, $22
Western Canada, $23

Made in Canada

STEWART

No. 9 Ball Bearing Shearing Machine

This machine quickly pays for itself with the extra fleece from even a few sheep. Gets 15% more wool than hand blades. Leaves no ridges or second cuts. The wool is taken off in one unbroken blanket, with longer and better fibre, bringing top market prices. These convincing selling points are of interest to consumers and will make you many profitable sales.

Another source of steady, worthwhile profit for you is Stewart No. 1 Clipping Machines for horses and cows. The value of such clipping is very clearly realized now, and the interest aroused by many farm journals is driving home the idea of spring clipping. A clipped horse dries quicker, rests better and does more work. He is safer from coughs, colds, heaves and pneumonia.

Good displays bring quick, profitable sales.

Your Jobber has Stewart Machines—Order Now.

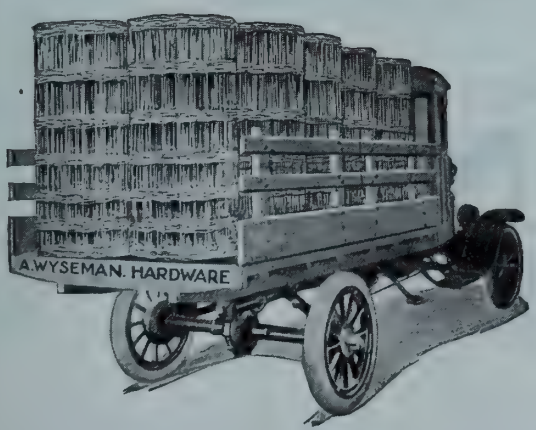
Are You Getting Your Share?

According to Government announcements farmers are each year removing more and more of the old snake and stump fences and replacing them with fences of woven wire.



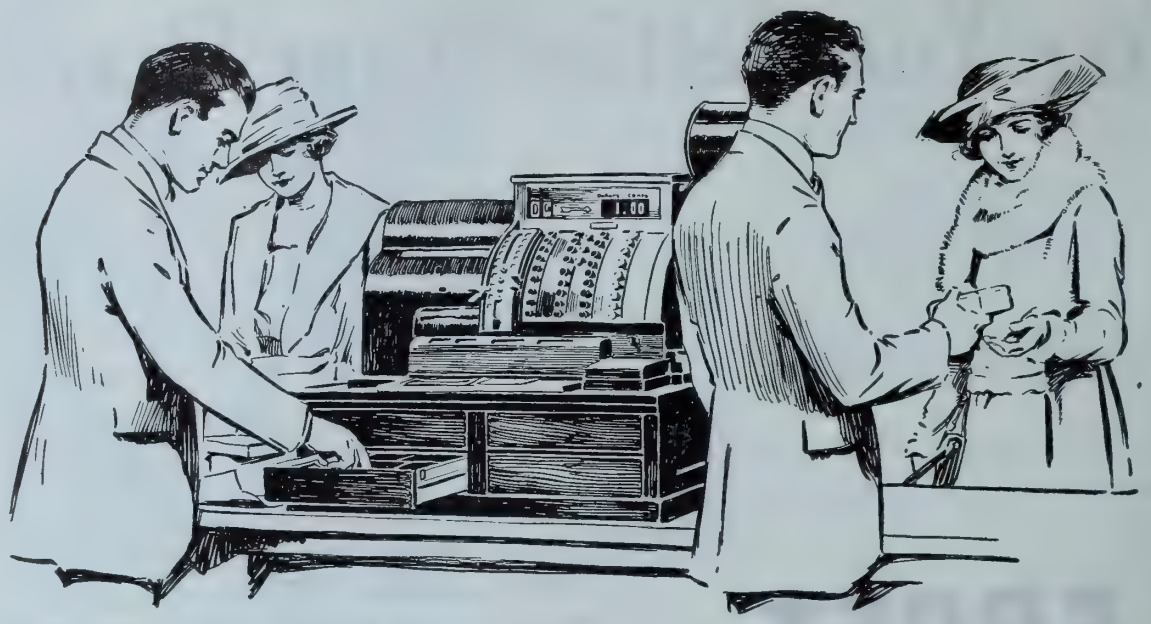
FROST

FENCE

Are you getting your share of this wire fence business? Have you a type of wire fence in your store that you *know* will satisfy the needs of your farmer customers? Do you carry a line of Frost Fences, or if not, have you considered the advisability of handling the Frost Fence?

Frost Fences are the answer to the farmers' demand for a fence combining strength, appearance and economy. The wire is tough and strong and the mesh is held together by the tight lock that grips as no other lock does. The stays are straight and evenly spaced, making a fence that is easy to stretch and which stands straight as an arrow, and it is truly economical for the wire used is full gauge No. 9—drawn in our own plant and heavily galvanized with high grade spelter.

Hardwaremen realize the opportunities of expansion that come through handling a product of superior qualities.



Frost Steel and Wire Company

Clerk D is making change from his cash drawer. The amount of the sale is shown at the top of the register. The other clerk is handing change and parcel to the customer. He made change from his own cash drawer.

A separate cash drawer for each clerk

This makes clerks more efficient because:

1. Each clerk is responsible for the business he handles.
2. In case of error it shows who made the mistake.
3. It gives each clerk credit for the work he does.

An up-to-date National Cash Register with separate cash drawers measures the ability of each clerk.

Up-to-date National Cash Registers are made with any number of cash drawers, from one to nine

We make cash registers for every line of business

DOORS & HARDWARE
KASEMENT
SKRENE DORE CO
TORONTO
PATENTED 1916-1917-1918

What Every "KASEMENT" Dealer and Salesman Should Know

Sizes—"Kasement" doors are made sufficiently oversize to allow for fitting the nominal size openings, thus a 2′ 8″ x 6′ 8″ "Kasement" door will fit a 2′ 6″ opening. The same door will fit a 2′ 6″ x 6′ 6″ opening quite as satisfactorily, providing there is room on the door casing, as is usually the case on all frame houses; on brick houses with the narrower hanging stiles, it is advisable to use the proper size "Kasement" door.

Ledge—"Kasement" doors should be hung with the "LEDGE" side in. The "Ledge" is provided to allow for easily planing down when necessary to fit the door casing.

Tenons—The two tenons on the bottom of the door should be cut off unless a "Kasement" Extension Bottom is to be used.

Non-Sagging—"Kasement" doors are constructed better than ordinary doors; they have 26 genuine mortise-and-tenon joints—they cannot possibly pull apart and are guaranteed NOT TO SAG.

Hardware—"Kasement" doors are supplied with complete sets of "Kasement" Hardware put up in individual cartons. They can be hung either right or left-hand, and there are three holes already bored in each stile for the hinges.

Hinges—The three screw-hook hinge parts should go in the door and the three corresponding screw-eyes in the door casing.

Wrench—There is a blank eye with each hardware set which is to be used as a wrench for turning in the hinge hooks and eyes.

Spring and Chain—The coil spring should be attached either to the first rail from the top or the centre rail—wherever the pull is needed; always attach the chain end to the door casing (not the door); the chain serves to take the strain off the spring when door is opened wide.

Lock—Place the gate or lock-eye at a lower angle than the hook—this makes it impossible to lift the door off from the outside when hooked.

Something Brand New

A Big Profit for You

LIQUID VENEER MOP POLISH

Goes Twice As Far

Here is a wonderful new polish made by the "LIQUID VENEER" People.

It will renew any dusting or polishing mop as it has never done before. When used on floors it will show remarkable results at once, not only making them spotlessly clean, but bringing out the original polish and luster in a surprising manner.

And you can offer your customers this wonderful polish with our strong money back guarantee. They must be satisfied in every way or you are authorized to refund their money. We, in turn, will reimburse you for any so returned.

Liquid Veneer Mop Polish does not displace the regular Liquid Veneer which has been sold throughout the world for over twenty years. It is a wonderful companion product and will double the cleaning, dusting and polishing possibilities of all dusting and polishing mops.

Packages and retail prices are as follows:

4 oz. 30c bottles, cartoned. 32 oz. $1.25 tin cans.
12 oz. 60c bottles, cartoned. 64 oz. $2.00 tin cans.
128 oz. $3.00 tin cans.

You are missing something big if you don't ask your jobber about Liquid Veneer Mop Polish.

Liquid Veneer Products are Made in Canada.

ATKINS

STERLING QUALITY SAWS

REASONS WHY YOU SHOULD SELL ATKINS STERLING QUALITY SAWS

Sterling Quality Steel is our exclusive formula, and the best saw steel made

Atkins Hand Saws are ground the two-way taper, that is, the cutting edge is the same thickness while the back tapers evenly from the handle to the point and from back to the cutting edge. See illustration.

Segment Grinding

Atkins Cross-Cut Saws are Segment Ground. This gives our saws clearance with very little set. The illustrations show the difference between Atkins process of SEGMENT GRINDING and the imitation.

The Imitation

Atkins Sterling Quality Steel receives our special process of Gas Tempering, which makes it tough and stiff, without being brittle. This is the reason why Atkins Saws will hold an edge longer.

Sell Atkins Saws and you will learn the meaning of "The Finest on Earth."

A Little Figuring on Your Prospects

When a new storekeeper starts up in your town, do you sell him the figures for his name and number? Do you supply the Town Council or the Reeve with the figures for numbering the houses? When a new apartment house, school, hotel, or public building is built, do you contract to supply them with room numbers? Business like this soon establishes you as a progressive hardwareman. Niagara embossed sheet metal, aluminum, or brass, figures and letters, come in eight sizes and seven finishes. A quality line that pays a profit.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

What the Sale of Dominion .22's Means to *You*

Over 8,000 Canadian boys—members of Dominion Marksmen—are shooting .22 calibre cartridges today. Seven cartridges for each target! Think what this means. Figure out the sales possibilities in your territory alone.

These eight thousand boys are now officially recognized by the Dominion Rifle Association and each Dominion Marksman will become a permanent user of ammunition.

Think what **this** means.

Dominion .22 sales today mean sales of other Dominion Ammunition in years to come. Be sure your stock of .22's is complete—short, long, long rifle—smokeless and lesmok. Be sure the "D" is on each cartridge.

Order from your jobber today.

Further Amend Firearms Legislation

First Reading Given Bill to Amend Legislation Relieving British Subjects From Responsibility of Securing Permits — Hardware Merchants Think Legislation Will Even Then be Inadequate

A NEW aspect has been given the involved legislation in regard to the sale and ownership of firearms and other weapons by the introduction in the House of Commons, Ottawa, this week of an amendment to section 118 of Bill 83. This section has been outlined in previous issues of Hardware and Metal, pointing out that every one is guilty of an offence and liable on summary conviction to a penalty not exceeding one hundred dollars and costs or to imprisonment for three months, or to both fine and costs and imprisonment who:

> "(a) not having a permit on form seventy-six has upon his person, elsewhere than in his own dwelling house, shop, warehouse, counting house, or premises, or is carrying concealed, a sheath knife, bowie knife, dagger, stiletto, metal knuckles, skull cracker or other offensive weapon that may be concealed upon the person;
>
> "(aa) has in his possession any cannon, machine gun, rifle, gun, revolver, pistol, bomb or other firearm, or any air gun or any device or contrivance for muffling or stopping the sound of the report of any firearm, without having a permit therefore which permit may be issued in the same manner, by the same persons, and as near as may be in the same form, as in the case of the other permits referred to in this section; provided that no British subject shall be required to obtain a permit with respect to any shot gun now owned by him."

The proposed amendment repeals section (aa) as above and substitutes the following:

> "(aa) being an alien, has in his possession any pistol, rifle, shot-gun, revolver, firearm or offensive weapon without having a permit therefore which permit may be issued in the same manner, by the same persons, and as near as may be in the same form, as in the case of the other permits referred to in this section."

The effect of this amendment, if adopted, will be to relieve British subjects from any responsibility for securing permits for the possession of pistols, rifles, shot-guns, revolvers, firearms or other offensive weapon.

This matter was discussed by Hardware and Metal with a number of hardware merchants and as a result it is difficult to see that the amendment if adopted will do much to relieve the situation. The British subject will be relieved from the necessity of securing a permit but how is he going to prove he is a British subject when purchasing the weapon or when hunting with it in the wilds? It would be almost as onerous a duty for him to secure personal identification as to secure a permit for the rifle.

Aimed at Aliens

Another point brought out was that the legislation was evidently aimed at aliens. What then of the unscrupulous person who might be bribed to purchase a weapon for an alien or possibly lend an alien his weapon?

Chiefs of Police in various parts of the country have pointed to the necessity of the police knowing where every offensive weapon is located in the district. The only evident way to secure this condition is to register the sale of every weapon whether it be sold to British subject or to alien.

Asked regarding the chief points of contention raised by customers it was stated to Hardware and Metal by certain merchants that the regulation which makes it necessary to secure a separate permit for each weapon, and the regulation which limits the permit to the district under the jurisdiction of the issuer, are the two points which come in for the most protest. Obviously these objections could be dealt with without changing the necessity of all purchasers securing a permit.

Retailers and Wholesalers Make Representations

Informal representations were made recently to the Department of Justice by some retailers and wholesalers in regard to firearms legislation and when the Government was requested to lift the ban on small calibre sporting rifles they were informed that the great majority of crimes were committed with rifles. Hardware merchants were surprised to hear that Government records show this to be the case. It was recommended to the Government that if the permit system was to be enforced that all British subjects owning shot-guns be compelled to take out permit the present legislation exempting British subjects who owned shot-guns prior to the introduction of the Act would cause much confusion where police were enforcing the law. It is difficult to see what proof the police could get if they doubted that the British subject in question had owned his shot-gun prior to the legislation being enforced. It was furthermore recommended that a maximum permit fee of 50 cents be allowed.

Lose on Tourist Trade

In discussing the matter hardware merchants bring out a number of interesting points. It was stated, for

Continued on page 36.

Explosives Regulations Are Amended

Hardware Merchants Relieved of Necessity of Keeping Records of Ammunition for .22 Cadet Rifles and Shot Gun Cartridges

HARDWARE and sporting goods merchants throughout Canada will learn with considerable satisfaction that the Federal regulations governing explosives have been amended in such manner as to relieve them of the necessity of keeping records of ammunition for .22 cadet rifles and shotgun cartridges. Dealers, however, must continue to keep records of ammunition for ordinary sporting rifles and cartridges for pistols.

Section 8 of the regulations which dealt with this particular matter has been rescinded and the following substituted in lieu thereof:

"Any person who is authorized to have in his possession explosives of any class and for other than his private use shall keep a record of his receipts of all such explosives, and also of his sales and issues, giving particulars of the persons from whom received and to whom issued, with the dates of each transaction, together with the quantities and descriptions of the explosives so transferred; and this record shall be open to the inspection at any time of inspectors of explosives. Dominion or provincial police officers or others deputed by properly constituted authority, provided that such record will not be required in respect of the sale or issue of manufactured fireworks (Class 7, Division 2) or of safety cartridges (Class 6, Division 1) as set forth L.P.C. 469, dated 1st March, 1920, other than those for use in rifles, pistols or revolvers with a diameter of bore exceeding 0.23 inch calibre."

Propose To Amend Fertilizer Act

Provision Made for Better Marking of Packages Containing Commercial Fertilizer — Tendency to Use Cheap Material

SECOND reading has been given in the Federal House of Commons at Ottawa to a bill to amend the Fertilizer Act, providing for the better marking of the packages in which commercial fertilizers are sold so that the purchaser may know just what he is buying and whether he is getting value.

In moving the second reading, T. W. Caldwell, Victoria, stated that when a fertilizer manufacturer applied for a registration number the Act provided that he must inform the department of what materials his fertilizer was made, but when he sells it he does not have to state on the package from what source the chemicals are derived. It was pointed out that in the making of a commercial fertilizer the best results are obtained from a combination of nitrate of soda, sulphate of ammonia and tankage. A fertilizer composed of 4 per cent. ammonia, made of nitrate of soda, would not last more than a month or six weeks because it is so soluble that it leaches away in the soil and evaporates if it comes into contact with the air.

At present, nitrate is cheaper than sulphate or tankage to give the same amount of ammonia and it was thought quite possible that the tendency is to use the cheapest material, nothwithstanding the fact that it will not give as good results. "I should just like to quote an extract or two so that the House will realize the necessity for a farmer knowing what he is getting when he buys fertilizer," said Mr. Caldwell. Previous to the war, when fertilizers were cheap we had very little complaint about poor fertilizers, but we have to-day now that prices are high. The tendency seems to be, when prices are high, to use cheaper substitutes in order to make a higher profit.

In the case of mixed fertilizers the manufacturer must state what proportion of phosphoric acid is available in his fertilizer. The Act says:

In the case of bone meal, tankage or other organic products and basic slag, the phosphoric acid shall be stated as total phosphoric acid unless it be desired to state available phosphoric acid also.

That is the Act as it stands. It is not desirable, from the fertilizer manufacturers' point of view, to state the available phosphoric acid, because the farmer who buys mixed fertilizers has the statement of the available phosphoric acid in that, and he is inclined to think when he buys bone meal, tankage, or basic slag that the amount of acid stated is the available phosphoric acid. As a matter of fact it is not, and it is not in the interests of the manufacturer or the dealer to state the available phosphoric acid. I desire to have the Act read as follows:

In the case of bone meal, tankage or other organic products, and basic slag, the phosphoric acid shall be stated as total phosphoric acid and the available phosphoric acid shall also be stated.

I do not see that this phraseology would entail any hardship, because it merely asks them to state the contents of their material and to show how much is available to the farmer. It is nothing but fair that this should be done.

AMENDS FIREARMS LEGISLATION

Continued from page 35

instance, that many tourists visit Canada during the hunting seasons to shoot game. There is a source of much revenue to railways, hotels and to the Fish and Game departments of the various provinces. Under even the amended regulations the tourist would be compelled to secure a permit as an alien, and if the issue is to remain so beclouded as at present such tourist traffic will not be encouraged. It was further pointed out that no question of game protection was involved and that the regulations would bring no revenue to the Government; the only ones who would make anything were local officials with power to issue permits who would levy a charge for same.

In adopting the stringent legislation re firearms it was stated that some such action was necessary in view of the increase in crime and the Bolshevik tendencies in certain quarters. It was pointed out by one merchant that the legislation re permits, will not prevent Bolsheviks getting firearms. At the present time there is a regulation which states that firearms cannot be brought into the country until the importer has secured a permit for import. Criminals would certainly not bring in weapons through the Customs Department, but would smuggle them in and smuggling firearms is already an offence.

"Imagine Bolsehviks armed with .22 calibre rifles or any ordinary sporting rifle opposed to military units armed with rifles shooting .303 British cartridges?" suggested another, drawing attention to the fact that the crime wave has proved the futility of endeavoring to keep firearms from criminals by means of legislation. The law as it stands, and even with the suggested amendment is one which results in much confusion and expense to sportsmen, it fails to bring revenue to the Government and it is apparently no safeguard against the depredations of the criminal.

A deputation of hardware merchants headed by Nelson Mills, of the Mills Hardware Co., Hamilton, recently visited Ottawa and suggested amendments to the legislation regarding firearms as follows:

1. That section 118 of the Criminal Code, subsection (aa), be amended, so that a British subject should not be required to obtain a permit under form 76 for a shotgun, or, failing this,

(a) That this section be so amended that a British subject shall be required to obtain a permit with respect to any shotgun now owned by him.

2. That section 118 of the Criminal Code, subsection No. 22, be amended, so that a British subject being the owner of a permit should be entitled to carry his shotgun or sporting rifle into any district in the Dominion of Canada, without being subject to any further obligation, and that the owner of such license be not required to renew annually.

3. That a maximum fee of 50 cents be charged for each license.

50 % of Business Over the Telephone

By Paying Special Attention to "Phone Orders" and Being in His Store Himself to Answer Most of These, A. R. A'Bear, 155 Fairmount Ave., Montreal, Has Had Rapid Development in Retail Trade.

General view of the hardware store of A. R. A'Bear, Montreal, showing the large counter space devoted to displays of aluminumware, electrical appliances and utensils for household use. A good sized paint stock is also carried as shown on the shelves at the rear. On the leftare shown baby carriages, rolls of linoleum, etc.

"DO you get much of your business over the telephone?" asked Hardware and Metal of A. R. A'Bear, of 155 Fairmont Avenue, Montreal. "Yes; I can conservatively say that 50 per cent. of my retail trade is ordered over the telephone," replied the manager and owner of the above hardware store.

When interviewing Mr. A'Bear in regard to his methods of retailing, telephone interruptions were very numerous and each time a notation would be made, then he would resume conversation, explaining what he considered present day requirements in the retail store. Two telephones are placed on the main retail floor, one at the office (which is centrally located, and the other at the main serving counter). "If I have work to do this morning in my office, I use my office telephone, if serving my customers behind the counter I can use it from there, and between the two, personal attention can be given these valuable customers."

Asked if he did much of the "clerking" himself, Mr. A'Bear stated that when not outside getting business he could generally be found with the men he employed behind the counter, paying attention to his share of the customers passing through his front door. Although situated in a large city, the trade of this store is much the same as can be found in a large town, being out fairly well from the heart of the city. Therefore, the personal interest and attention bring better results than they would in a location where the transient trade figures to a great extent.

Lets None Get By Him

"The telephone works both ways, if I receive an order, part of which I can not fill, my competitors are called and if they stock the article or articles, my delivery car goes and gets them and they are delivered along with the order." This practice has secured good results and has infused in minds of the customers the slogan, "A'Bear has it."

Truck Delivery and Personal Car

While use of the auto delivery is made, Mr. A'Bear's personal car is often also in use. More so in the evenings when the farther and more out-of-the-way deliveries have to be made. One instance was stated where 100 lengths of knocked-down stove pipes were taken out one evening last fall and they were put together at an outside point and delivered in the various small quantities to the respective customers. Outside business is very often brought to the store by this same method. If there is a prospective buyer of paint, a stove, roofing, a washing machine, or other lines of hardware, a personal endeavor is made by

Paint trade is a considerable item in the business of A. R. A'Bear, Montreal. Paint business has been increasing each year in this store and this development is said to be due largely to the use of frequent window displays linked up with other selling effort. Furniture polish, metal polish, brushes, etc., are also featured as seasonable lines for a Spring display.

personal calling and very often the sale is made.

Price Cutting, By No Means

"Price cutting is considerably more detrimental than beneficial to all concerned, especially so in these times of re-adjustment," said Mr. A'Bear. "If people are under a certain depression to-day, some even curtailing their buying, displaying and advertising merchandise this month at a certain price, then the following month showing the same articles at reduced prices, perhaps far below replacement values, is not bettering the situation, but is rather assisting the public to a firmer belief that by holding off they will benefit by even lower prices. No, not price cutting, but give the people service, with prices based on a fair profit making margin, coupled with quality and high grade merchandise to sell, and the loss of customers will be unknown. There may be certain commodities in the average hardware store, which perhaps through it being a dull season for that particular line, are slow moving. If so, a small concession as to lower prices could be made on these lines assisted by an extra sales effort."

One of the Early Bird Type

Mr. A'Bear might be classed as one of the above, judging from his window displays and inside store showings. For some weeks, paints and varnishes, carriages and go-carts, and house-cleaning needs have been well in front. "If I show the people by my early window trims that these articles are for sale in my store, these same goods are not forgotten when the time is really on hand to buy. If I delay, and am behind the other fellow, people are going to enquire, and no doubt buy where they have seen the goods displayed," stated Mr. A'Bear. Deliveries of seasonable merchandise are based on this plan. Spring and Summer goods are mostly in now and on display.

Paint and Varnish Sales Increased Each Year

This was due, Mr. A'Bear thought, to the fact that special attention was given in the advertising, and by following up prospects. Methods of advertising include: the local papers, the city telephone directory, wooden yard sticks, and submitting to his paint manufacturer a very complete mailing list. Another means of conveying a paint message was by enclosing a color card with a wrapped parcel, it may be an outside paint card, floor paint or perhaps a varnish stain card. The telephone directory was considered very good as 90 per cent. of his customers, the majority living in apartments, had their telephone. Timely window displays, with the display helps furnished by the paint manufacturers, assisted these outside methods, and increasing results were always obtained.

Collections

This is a most important subject to-day. The monthly rendering system is followed in this store and works out fairly well. A suggestion was made by Mr. A'Bear that if the highest salaried man employed in a retail store was the book-keeper, it might prove a very profitable addition to the staff. A man devoting all his time to the books could have at his finger tips the financial position of the concern. Again, accounts carried perhaps by a personal friend could be collected by the book-keeper as a business method, at the end of each month, where the owner himself may show some hesitancy before approaching this friend. To use Mr. A'Bear's own words might explain the situation of a great many merchants to-day. "In the busy months money tied up is not felt, but in quiet months you fear the results."

Household Lines Featured

On entering the store one is confronted by display counters and tables. These are frequently used for the displaying of aluminum and granite ware utensils, electric heaters and other electric appliances. These constitute the array of articles that are, in the opinion of this retailer, seasonable and in demand during the spring months. Directly behind these and in prominent view from the street is the paint department. Sales from this section being large and different lines of inside paints and varnishes being sold even through the Winter months, a separate counter is located between the display tables and the paint shelving. The shelf hardware has its position along the opposite wall, so that by the above arrangement easy access is obtainable to staple articles selling from month to month.

Linoleums, Etc., Shown

At the rear and on an elevation of a few feet are stocks of the household needs variety, such as tinware, graniteware, brooms, washing machines and wringers, floor oilcloths and linoleums, etc. Mr. A'Bear is considering bringing this elevated section to the same level as the front store, as he is of the opinion that even larger and better business could be obtained from these wares if they were more in view of his customers, and by lowering the floor this would be remedied. Directly under this elevated section is the basement and warehouse, where roofing, glass, oils, white leads, ochres, spades, shovels, garden tools, etc., are carried, accompanied by the surplus stocks.

Boys' Trade in Nails, Bolts, Screws, Etc.

Kingston Hardware Dealers Find Boys are Large Users of Such Lines—Parents Encourage Children's Industrial Leanings

KINGSTON.—Can you find a boy who is not fond of a hammer and some nails?

If you can, then he is indeed a funny kind of a boy. A representative of Hardware and Metal found that in Kingston, at least, all the nails do not find their way to contractors, builders and the average citizen who wants to fix up his fence or do odd jobs around his premises. The little boys are doing their "bit" to keep the nail factories working.

"You would be surprised to see the number of youngsters who come into my shop for five or ten cents worth of nails," remarked one hardware merchant. "I have had men and women tell me that their boys would rather have money to buy nails than candy. It does sound rather funny, but it is the case. I had a mother in here the other day who said that her boy, about seven years of age, told her that he would like to have a good strong hammer and some nails. The family had some old boxes in the back yard, to be used for fuel, and the lad was anxious to break up the boxes and make something for himself. In this particular case, the youngster had in view the turning out of airplanes, and although they were rather crude models he turned out, it is stated that the little fellow had the right idea, and with his hammer and nails found something to keep him out of mischief and at the same time amuse himself and give him something to think about."

Encourage Children's Industry

"I would far rather get hammer and nails for my lad," said another mother to this hardware merchant, "because I think that too much candy is bad for children. I think my lad has had enough nails in the back yard to almost sink a ship. It is funny where they all go to, but the boy has had a lot of amusement, and at the same time he is doing something useful, and I do not begrudge him the money spent for the nails."

But it is not in nails alone that the hardware man finds the boy to be a good customer. They come in for bolts, screws and nuts for express wagons and other purposes.

This is the time of the year that the boys are taking to all these things, even though mother has a carpet for them to beat or a number of messages for them to run.

Investigation by Hardware and Metal shows that the boys are certainly good customers for the hardware stores.

Status of Sheffield Cutlery Trade

Trade Stocked With Poorly Made Pocket Knives—Competition of German Goods in Pocket Knives But not in Table Cutlery

FOR the purpose of a review, Sheffield's cutlery trade may be divided into four sections—pocket knives, tableware, razors and scissors. It is usual for firms to be engaged in the manufacture of articles comprised in all four groups, with one particular division as their specialty.

In pocket knives the present demand is perhaps 30 to 35 per cent. that of 1913. In this branch the labor accounts for fully 80 per cent. of the cost of production, and as wages generally in the cutlery trade have advanced 125 to 200 per cent. over those paid in 1913 the resultant finished article is more than doubled in price. Also in the pen and pocket knife lines the retail trade is stocked up with poorly made articles. In razors and scissors the demand is slightly less than 50 per cent. that of 1913. The labor in each of these lines is responsible for 65 to 70 per cent. of the total production costs. Here, as in the pocket cutlery, increasing labor costs have pushed up the retail price. As in pocket cutlery so in razors and scissors the market was swamped in 1919. Retailers who for the four previous years were able to get only a part of their orders filled, gave large orders; in some instances they later cancelled or found themselves overstocked with inferior goods. Competition of German goods is another factor operating to restrict buying.

In table cutlery and those knives used in crafts and industry the demands approximate those of 1913. Here wages account for 70 per cent. of the production costs. Much the same condition pertained in regard to overproduction in 1919. In the table cutlery trade, however, the manufacturers have never had to fear German competition, because German standard patterns do not conform to the British ideas and the German manufacturers have never specifically made goods for the British market.

Use of Machinery in Various Sections

In the past machinery was not used extensively in the manufacture of pen and pocket knives. However, it is an admitted essential for the future, and the plants must be operated not only to decrease cost, but to increase production.

Most razors are ground by machinery. These machines are of Sheffield manufacture and were introduced extensively into the trade shortly before the war. Fininshing, however, must be done by hand, so machine development in this branch is unlikely. Hand-forged scissors are a thing of the past. They are now all drop-forged on the German plan. The American innovation of welding a thin strip of high-quality cutting steel to the edge of cast blades has never found favor with the Sheffield manufacturer, as he contends that in this method the construction cost exceeds the cost of making the blades of good steel throughout.

In the table cutlery division the blades are generally machine forged. The best table-grinding machine on the market is an American product, the English patents for which were acquired by a firm of cutlery manufacturers who will only sell to their competitors at a high price, plus a payment of royalties on the output. In consequence, few Sheffield firms have adopted this machine. Just prior to the war a leading cutlery manufacturer purchased a German patented table-grinding machine. During the war he obtained permission from the British Government to manufacture a number, and they were sold throughout the trade locally. They did fairly good work, but the general opinion is that they are not so efficient as the American machine.

Labor Situation—Domestic and Foreign Markets

The unions are strong, doubly so, in that the handcraft portion of the industry requires an apprenticeship of many years. There are approximately 16,000 persons employed in the various branches of the cutlery trade in Sheffield. The average wage per week is £3 10s. ($17.02 at par) as against 30s. ($7.29), the prewar wage. It is true that the men on piecework are able to earn £5 or even £6 per week, but these are the exceptionally skilled and rapid workers.

In 1913 Sheffield exported cutlery to the value of £900,000. It is estimated that in 1920 the value was £1,500,000. This does not mean a greatly increased trade for prices were practically double

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, APRIL 30, 1921

A REPORT from Montreal that a hardware store was robbed of sixteen revolvers, presumably by members of a local crowd of desperadoes, emphasizes the necessity of hardware merchants taking precautions against robbery in view of the fact that the drastic firearms legislation has closed almost every other source of purchase by these gangsters and they can only resort to stealing weapons.

* * *

MUCH OF the progress of the past decade or two is due to the improvement in facilities for transportation and communication. In a country covering such a great expanse as does Canada, the importance of these elements cannot be overestimated. Thus there is full accord with the principle which has governed the granting of a revision of telephone rates, providing such revision is to provide funds necessary for the maintenance of efficiency.

* * *

THE idea of applying a tax of 1 per cent. on the country's gross sales is not new. For 30 years it has operated in Mexico with marked success; for 16 years it has been working in the Philippines and the final analysis is that the natives there pay their taxes without realizing it. Canada has a Gross Sales Tax Law which is now likely to be extended and Czecho-Slovakia, the only war nation in Europe that lived up to its budget last year, can credit a similar taxation policy with that remarkable achievement.

* * *

CANADA'S investment in its electrical industry during the year 1919 amounted to nearly fifty million dollars, paying nearly ten million dollars in wages to employees and using materials costing fifteen million dollars. Goods to the value of thirty-four million dollars were turned out including stoves, heaters, irons, fans, fuses, lamps and heavier articles such as dynamos, motors, etc. These statistics give some idea of the growing importance of the electrical industry in Canada and should make any hardware merchant proud to be associated with an industry of such importance.

The Hardware Trade

AN extensive survey of conditions in the hardware trade in Canada reveals the fact that quite a large number of merchants are enjoying substantial increases in turnover on the basis of figures for the month of March and for the first three months of this year ending March 31. Where business has shown little signs of recovery it is evident that this condition is largely the result of local conditions. A large number of hardware merchants representing all parts of Canada were heard from in this survey and the fact that in some cases opinions from the same district showed great variation would seem to indicate that the few adverse conditions mentioned are of a very local nature.

In British Columbia some merchants report that the sawmill and logging supplies business is being affected to some extent by high freight rates. In some parts of the prairie provinces hardware merchants report that the products of the farm are in some cases being sold at less than their cost of production and that the farmer is therefore reluctant to buy hardware which has not, as he claims, declined in the same proportion. From parts of the Eastern provinces come reports that builders are holding up activity expecting lower prices on building supplies.

A number of interesting points were brought out in the statements made by various merchants. One of these was to the effect that the housewife is the easiest customer to sell to-day. There are a great many possible reasons for this condition, but it may also be affected by various local circumstances.

In most cases merchants report a good demand for seasonable goods immediately needed and the recent price declines on many lines are said to have had a stimulating effect. Where trade is largely with factory employees the recent slackness in industrial activity has had its effect upon certain lines of hardware, notably lines not classed as "necessities."

Increases in turnover ranging up to 40 and 50 per cent. are reported by a number of merchants though profits are not as great in proportion as last year. One Ontario merchant reports a bigger sale for seasonable lines in the first three months of this year than at any time in his history. Paint is said to be moving well owing to seasonable requirements and recent declines in price.

It may take a little time for these local adverse conditions to be eliminated but it is encouraging to note that such conditions are not general. A policy of "work and produce" combined with close attention to business will enable the hardware merchant to rapidly establish a return to normal conditions in the trade. Already improved buying sentiment is reported in the majority of cases.

Firearms Legislation

SOME heated words are being directed by hardware merchants at the legislation concerning the purchase and ownership of firearms in Canada. An amendment given first reading this week in the House of Commons relieves British subjects from the responsibility of securing a permit, though aliens are still so responsible. In discussing this matter with hardware merchants a number of weaknesses have been shown up as a result of their varied experiences and it is highly doubtful if the amendment now proposed will remedy the trouble. Looking at the matter in a broad way it is difficult to see that such legislation will or has had any effect upon the criminal classes against whom it is directed and its futility as a means of keeping arms from groups of agitators appears to be a weak argument in view of the fact that the military forces in Canada are equipped with rifles so powerful that such agitators equipped with the small calibre rifles whose sale is being restricted could be kept at great distance and rendered powerless. Meanwhile, the legislation is causing much irritation to sportsmen and merchants. It is not bringing any revenue to the Government and it has had little effect in curtailing violence.

Favors One Per Cent. Turnover Tax

Taxation Committee of Toronto Board of Trade Propose Abolition of Business Profits War Tax and Present Income Tax, Replacing Them With Turnover Tax and New Graduated Income Tax

TORONTO, ONT. — Recommending that the business profits war tax should be abolished, the present system of income tax repealed, and the special war tax, in so far as it affects sales should also be done away with, the taxation committee of the Board of Trade brought down its report at its meeting this week. In place of these forms of taxation it is suggested that a turnover tax of one per cent. be levied on all commodities, and a graduated system of income tax be put into force on all forms of income, no matter how derived. The proposed turnover tax of one per cent. affecting all branches of trade and industry is directly the opposite of that proposed by the Dominion Retail Merchants' Association, who assert that the only fair method of collecting this tax is at the source of supply.

The resolution was not passed at this meeting. Much discussion, for and against, took place. Another meeting will be held next Tuesday, when the matter will again be considered.

Hugh Blain, of Eby-Blain, Ltd., offered in amendment that a tax of five per cent. should be placed on goods at the original source, the factory. He cited the case of wholesale grocers, stating that it had been proven that nearly all of them operated on a profit of less than half of one per cent. on their turnover. "How can we take a one per cent. tax away from that?" he asked.

The Committee's Report

The report in the main points out that the Business Profits War Tax was levied as a war measure largely with the object of securing a portion of the extraordinary profits in many cases made from the manufacture of munitions and other war materials, and that both the Business Profits War Tax, and the Income Tax as at present administered are unduly onerous and complicated and some features of them are fundamentally unsound.

The Board of Trade fully recognizes that provision must be made for the raising of revenue sufficient to provide not only for the necesssary expenditure arising out of the war—i.e., war pensions and interest charges on Canada's war debt, but also for the reduction within a reasonable time of the heavy burden of debt incurred because of the war.

But it is desirable that every resident of Canada should contribute equitably and fairly towards the raising of the necessary revenue. The requirements of a good tax system are that it be fair to all; that the burden be universally distributed, and that collection be simple and easy, instead of being complicated and irritating.

The Resolution Proposed

The Board of Trade of Toronto is of the opinion, and respectfully submits that as it is now over fourteen months since peace was signed with Germany, the Business Profits War Tax should not be re-enacted and that—for many reasons, a few of which are set out below under their respective headings — the Special War Tax in so far as it affects sales, and the Income Tax as at present administered should be repealed, and in lieu thereof the Board would suggest the following systems of taxation:—

(a) Turnover or Sales Tax on all commodities.
(b) Graduated Income Tax.

Turnover or Sales Tax

This tax as at present administered is not sufficiently broad in its operation. The Board therefore suggests in lieu thereof the following:—

A Turnover Tax on all goods, wares and merchandise imported into Canada, manufactured in Canada, produced in Canada, or traded in in Canada; such tax to be paid monthly by all manufacturers, wholesale merchants, jobbers, retail merchants, traders, pedlars and dealers in any such goods, wares or merchandise. The rate suggested for this tax is 1 per cent. on the turnover of each of said manufacturers, merchants, etc.

With the object of encouraging agricultural pursuits said Turnover Tax should not be levied on farmers in respect of their products, nor should it be applicable to goods exported from Canada, or goods imported into Canada, for process and export.

Take Out Licenses

In order that this tax may be effectively collected and that no dealers in such goods, wares and merchandise may escape same, the Board is of the opinion that all manufacturers, wholesale merchants, jobbers, retail merchants, traders, pedlars, and other dealers in any such goods, wares or merchandise—with the exception of individual farmers disposing of their own products—should be required to take out a license authorizing them to transact such business, the cost of such license to be a nominal sum, say $1.00 per annum. Every such company, partnership or person taking out such license should be required to keep a record of the transaction or transactions of the business done under such license. At the end of each month every such licensee should be required to send a remittance for 1% of the amount of such sales to the nearest tax collector with a statement of the volume of such sales for the month.

Income Tax

The present Income Tax is unduly onerous and complicated, especially the surtax and supertax features thereof, and in the case of large incomes practically amounts to confiscation. This is undesirable as it will tend to discourage the flow of outside capital into Canada and will probably result in driving capital therefrom.

The calculation necessary to determine the amount due in respect of income under the present system is very intricate and is frequently misunderstood by the average person, with the result that there will inevitably be friction and dissatisfaction on the part of the public generally.

The Board therefore suggests in place of such tax a graduated Income Tax, to be assessed, levied, and paid upon the income during the preceding year of every person residing or ordinarily resident in Canada or carrying on any business in Canada, a graduated tax, to be assessed, levied and paid upon the incomes of the preceding year, in accordance with a schedule incorporated in the resolution. This table begins with an income of over $1,000 and not over $5,000, on which a tax of 1 per cent. should be levied with a minimum of $10 per year. The percentage increases by halves of one per cent. up to incomes of between $95,000 and $100,000, on which 18½ per cent. should be paid, or a minimum of $17,576. From this figure on to incomes of between $900,000 and $1,000,000 the percentages on each step of $50,000 increase by 1 per cent. graduations, giving a 40 per cent. tax on incomes of the last sub-division, or a minimum amount of $400,000 as annual tax.

Suggested Exemptions to Income Tax

1. In the case of unmarried persons, widows and widowers without dependent children, $1,000 per annum.
2. In the case of all other persons $3,000 per annum.
3. $300 for each of the following dependent relatives, viz.: — Mother, father, grandmother, grandfather, child, grandchild, sister or brother.
4. Income Tax paid to countries other than Canada, provided however, that all income derived from sources out-

News of Western Canada

Organization Is the One Standard

President Vancouver Branch R. M. A., Talks on Organization as the Only Way to Improve Conditions

VANCOUVER, B.C.—J. T. Crowder, president of the Vancouver branch, Retail Merchants' Association, spoke to the retail merchants at a luncheon during the recent retail merchants' convention on the subject, "Your Troubles Are Ours." Mr. Crowder has given a great deal of attention to retail merchandising conditions on the Pacific Coast, and although a druggist himself speaks with authority on the affairs of other trades as well.

"Until the merchants come into an association 100 per cent. there is a very slim chance of their improving their trade conditions," said Mr. Crowder.

"The doctors, the dentists, the plumbers, the engineers, the electricians have all reached the stage of association work when they can legislate for their profession or trade. For many years the doctors have maintained such a strong organization that the 'weak-sisters,' the quacks, and charlatans have been eliminated from their ranks. So strong have they become, and so well have they safeguarded the health of the public, that any others attempting to set up as healers find that unless they can convince the medical profession that they have attained a high state of excellence in their profession and have proved the efficiency of their methods, they stand a very great chance of being restrained, by law, from practising.

"The plumbers, the steamfitters, the electricians all have a part in the regulations governing their work. The druggists recently provided a splendid example of successful association work tending to the protection of the association's members.

"Recently an old-established firm of druggists on Main Street, Vancouver, was forced to vacate owing to the building having been sold. The new owner of the building proved to be an Oriental. Members of the profession noticed that all the signs were left on the windows and over the door. The next move was that an Oriental was putting in a stock of patents, toilet articles, tooth brushes, etc., and was, apparently, figuring on 'carrying on' with as near an approach to a drug store as he could do without employing a qualified druggist.

"The move was anticipated, however, but the druggists, who drafted an amendment to the Pharmacy Act, sent a delegate over to Victoria, where parliament was in session and managed to have the necessary amendments incorporated in the act. Now that Oriental has had to take all the signs off the store. Chinese are in other lines of business in great numbers, but not in the drug business.

"The new reading of the act is rather comprehensive:

> "'It shall be unlawful for any person to practise, or attempt to practise the profession of a chemist and druggist, or chemist, or druggist, or pharmacist, or apothecary, or dispensing chemist, or dispensing druggist, or pharmacy, or drug store, or drug dispensary, or drug department, or other words of like import, or any sign, title or advertisement implying or calculated to lead people to infer that the person using same is registered under this act in the province of British Columbia, without having . . . . certificate as licentiate of pharmacy, etc.'

"To give you an idea of the difference that such protection makes," said Mr. Crowder, "let me instance a case in one of our up-country towns:

"As was the case in the instance already given, the building in which a white merchant and a white druggist were conducting their business was sold. The purchaser was Chinese. Now, the drug signs are all down, and the Chinaman cannot carry on a business in any way calculated to resemble a drug business but the old signs of the merchant are still up, and a Chinaman carries on the other merchant's line of business.

"What are the qualifications of a merchant? What are they? At present the only qualification is the desire to be a merchant immediately, and a small amount of cash or credit. In Vancouver anyone, of any color, can find an empty store, pay $10 to the city of Vancouver, and he is a merchant.

"The better day will dawn for the retail business, when the merchants are organized to the point of establishing a standard by which those desirious of entering the business can be judged by the authorities issuing the license to do so. When the merchants have organized sufficiently, the license inspectors will grant licenses to such as have proved according to standards set by the organized merchants their fitness to conduct business."

Western Notes

Luseland, Sask.—Z. L. Harlow is taking charge of the Farmers' Hardware Store.

* * *

Zelma, Sask.—F. D. Kettles, hardware, has been succeeded by Standard Hardware Co., Ltd.

* * *

Hatton, Sask.—McPherson Bros. at Hatton, Sask., would be glad to receive catalogs from manufacturers and hardware jobbers to replace those lost in their recent fire.

* * *

Hatton, Sask.—McPherson Bros.' hardware store has been burned down. Very little stock was saved but the loss was covered by insurance. McPherson Bros. immediately secured a lease on another building and placed orders for stock for immediate shipment.

Saskatoon Man Talks on Electric Heating

Winnipeg, Man.—More than 200 members of the Canadian Credit Men's Association, the Winnipeg Lumbermen's Exchange, and the Western Retail Merchants' Association heard Henry Gauvin, of Saskatoon, speak on house-heating problems.

Mr. Gauvin described the frost proof houses electrically heated which he has built in Saskatoon, and pointed out that construction of buildings of that type could be more easily undertaken in Winnipeg, where electric power costs less than half what it costs in Saskatoon. Electric heating had been economical in the Saskatchewan city, he said. It ought to be still more so here.

British-American Oil Company To Camrose

Camrose, Alta.—The British-American Oil Co. is coming to Camrose. They have arranged for a site on the spur and will likely be located near the other warehouse and tanks. They intend to proceed at once with the erection of a warehouse and two storage tanks. Along with what is here the new tanks will make a total of 260,000 gallons capacity at Camrose.

Commence Buying When Prices Stiffen

Ontario Branch C.M.A. Ask Labor to Contribute to Workmen's Compensation — Hardware Manufacturers Elected to Office

AT the annual meeting of the Ontario Branch Canadian Manufacturers Association, held in Hamilton, Ont., a demand was made that Labor be made to contribute a share to the liability under the Workmen's Compensation Ast. As evidence that compensation for accidents is becoming a heavy tax on industry in Ontario John R. Shaw, Woodstock, retiring chairman, stated that the total amount awarded for compensation during 1820 was $7,780,145.25 as against a total of $4,192,859.93 during 1919. The increase was said to be due largely to the increased benefits provided for under the amendments to the act. Benefits awarded totalled $26,000 per day and about half a million workmen were under the protection of the act. Mr. Shaw estimated that over 100,000 people each year received some part of their maintenance from the benefits provided.

Worst Soon to be Over

Forecasting what the immediate future held in store for Canada, Mr. Shaw ventured the opinion that the worst would soon be over. He adhered to the well-grounded belief that 1921 would see a large flow of immigration, with all that that meant. Business was gradually settling down to its normal grooves, which, after all, was the most satisfactory token one could look for. The efficiency and the productivity of labor had also increased, due to the inducements of recent unsettled conditions, and these factors would have an important bearing on production and the costs thereof. All these factors, he had emphasized, were conducive to a healthy revival, and would work toward a marked improvement of the present situation, he thought.

Analysis of Cause.

"The change," said Mr. Shaw, "which has occurred during 1920 has been an inevitable result of the inauguration of the process of deflation. Just as in the stock market buying is done on a rising market and selling on a falling market, so in the case of commodities. As long as prices were moving upward there was an irresistible tendency to buy, and this worked right through from the ultimate consumer to the manufacturer.

"When the pyramid had reached a certain height and the speculators in raw materials began to feel the turn was about due, a selling movement began, slow at first, but steadily gathering momentum. Prices receded right along the line, and then the reverse of what might naturally have been expected occurred. Lower prices, instead of inducing buying, caused an almost complete cessation of buying.

"Precisely as in the stock market, the public refused to buy on a falling market. And they will continue to stay out of the market until prices once more harden."

Protest Tax on Electricity

A resolution that was adopted protested against the proposed tax of $2 per horsepower on electric power. This tax, it was held, was an attempt to unjustifiably check the development and popularity of electric power, and should not be approved of by the Government.

Officers Elected

Officers were elected as follows: Chairman of the Ontario division, W. C. Coulter, Toronto; vice-chairman, Arthur W. White, London. Executive Committee—H. Barrett, Paris; W. R. Breyfogle, Peterboro'; George Brigden, Toronto; W. Cowan, Galt; G. H. Douglas, Hamilton; H. W. Fleury, Aurora; E. H. Gurney, Toronto; Fred. Hatch, Whitby; J. G. Hossack, Toronto; B. J. McCormick, Welland; C. G. McGhie, St. Catharines; G. M. McGregor, Ford; Thomas Roden, Toronto; H. D. Scully, Preston; J. R. Shaw, Woodstock; John Taylor, Guelph; H. J. Waddie, Hamilton; C. R. H. Warnock, Galt.

Representatives to the Executive Council—H. Bertram, Dundas; W. R. Breyfogle, Peterboro'; Wm. Gartshore, London; F. S. Hodgins, Kitchener; R. W. Leonard, St. Catharines; G. M. McGregor, Ford; R. O. McCulloch, Galt; R. S. McLaughlin, Oshawa; M. R. Meldrum, Niagara Falls; W. C. Phillips, Kingston; G. S. Rutherford, Kitchener; H. M. Snyder, Waterloo; T. J. Storey, Brockville; J. M. Taylor, Guelph; R. Thomson, Carleton Place; C. H. Waterous, Brantford; A. W. White, Toronto; J. R. Shaw, Woodstock; J. F. MacKay, Ingersoll.

Warns Retailers re Advertising Law

Fradulent Advertising Act in Canada Rendered Useless Owing to a "Joker"

UNDER the caption, "Canada's Fraudulent Advertising Law," Printers' Ink comments editorially in a recent issue on the fight the Retail Merchants' Association of Canada is waging to have the Federal statute regarding false advertising made more stringent and more effectively enforced.

This editorial also gives a warning to the Canadian merchants to avoid repeating the mistake made by their brethren in the United States.

The article in full reads: "The Retail Merchants' Association of Canada is wrestling with the problem of fraudulent advertising, and its efforts will be watched with much sympathetic interest on this side of the border. The Fraudulent Advertising Act which was passed by the Dominion Parliament in 1914 has been found practically barren of results, due to the inclusion of the word 'knowingly' and the lack of any organization specifically entrusted with its enforcement. Now the association is endeavoring to amend the law, and has asked the Government to appoint an inspector to pass on violations and conduct prosecutions.

"If our Canadian friends will be guided by ten years of experience in the enforcement of similar laws on this side of the border, they will abandon their present attempt to modify and limit the effect of the word 'knowingly,' and make a determined effort to secure its elimination from the law altogether. For experience has amply demonstrated that this seemingly innocent word, no matter how it may be qualified by additional verbiage, is ever the chosen refuge of scoundrels. It renders it necessary to prove or to disprove what was in somebody's mind at an indefinite moment in the past. And when it is limited or modified by additional clauses, it simply places upon the courts the additional task of deciding what was in the minds of the legislative body which passed the law."

Better Tone in Steel Market

Sentiment in iron and steel is more cheerful due, however, more to an improving outlook than to actual new business which remains at a low rate, says the Iron Trade Review. Expected wage reductions by the Steel Corporation, it is believed, will further clarify the situation. The demand from the automobile industry is the feature but this very fact illustrates the poor distribution of buying. Where normally this industry does not furnish more than 5 per cent. of the market, its present absorption of tonnage is several times that amount. The sluggish movement of the heavier lines works against any material expansion of general operations. Sheet conditions, which are most directly affected by automobile demand, reflect the clearest signs of betterment. In the Mahoning valley, sheet production this week is up to 43 per cent., the best record since early January. Releases are now being received at their reduced prices and enabling the Steel Corporation mills to maintain or slightly increase their operations.

The composite market average index of the Iron Trade Review this week is $43.73 compared with $43.85 last week and $44.57 for the corresponding week a month ago.

Events in the Trade

Business Change

Guelph, Ont.—Cronk & Buchanan, hardware, has been sold to J. P. Hammill.

Incorporation

Smarts' Brockville Furnaces, Ltd., has been incorporated to manufacture and deal in stoves, furnaces, etc.

H. T. White, who has represented Stewart & Wood, Toronto, for many years, is seriously ill at his home in Toronto.

* * *

John Irwin, vice-president and general manager, McArthur-Irwin, Ltd., Montreal, is in Philadelphia and Atlantic City this week, accompanied by Mrs. Irwin.

* * *

A. C. Gibb is calling on the trade in Ottawa this week, representing Alexander Gibb, metal broker, Montreal.

* * *

Col. Robt. Starke is back in his Montreal office, having spent the last two weeks in Atlantic City.

* * *

Mr. Harkness, of the sales staff of Crane Limited, Montreal, has been transferred to the Ottawa branch, assuming his new duties next week.

* * *

John Richardson, of Richardson & Bureau, factory representatives, is leav- Montreal this week on a trip through the Western provinces to Vancouver, calling on the jobbing trade.

Ontario Government May Go Into Cement Business

Hon. F. C. Biggs, Minister of Highways, told the legislature that cement in Canada cost $3.20 a barrel of 350 pounds, with a small discount for payment within 30 days. In fifteen States of the United States, he said, cement could be obtained for $2.12 a barrel of 376 pounds.

Hon. Howard Ferguson asked if the Government was contemplating going into the manufacture of cement.

"It is under consideration," replied the Minister. "I am strongly of the opinion if we wish to develop highways in Ontario with success, there must be something done to manufacture cement in more liberal quantities and at better prices."

Western Ontario News

The Wallaceburg Brass & Iron Co., Wallaceburg, Ont. moved into its large new factory addition this week. The new building is 50 by 60 feet and is two stories in height.

* * *

W. L. and Garth Kennedy, of Wheatley, Ont., have purchased the general store of J. McDowell and took over the business this week.

* * *

Everything is ready for the opening at Windsor, Ont., on Monday evening of the first annual exhibition to be held under the auspices of the Border Cities Builders' Association. The exhibits include a wide line of merchandise and materials required in house building and a feature of the show will be a model bungalow. Many of the firms supplying builders' hardware, roofing, paints, etc., are making exhibits.

* * *

James Rouatt of Bayfield, Ont., has taken a position with the Bayfield Hardware Co.

* * *

Percy Cranston of the George A. Stanley Hardware, Lucan, Ont., leaves shortly to take a position with the Imperial Oil Company.

* * *

James Evans, Jr., of Waterford, Ont., left on Monday for Drinkwater, Sask., where he will learn the hardware business with his uncle, James Anderson.

* * *

Fire which is believed to have originated from a heater in the basement, caused damage of $200 in the paint shop of C. E. Loomis at St. Thomas, Ont.

* * *

By the will of John K. Darch, harness manufacturer, who died at London, Ont., recently, his estate of $54,500 is left to his brother, Wm. F. Darch, who was his partner in the business.

* * *

St. Thomas Metal Signs, Limited, St. Thomas, Ont., is negotiating with the council for a lease of the old power house and plans to remodel and fit it up as a factory.

* * *

The Patterson Engineering and Construction Company, of Windsor, E. F. Patterson, manager, is preparing plans for a new type of bungalow to be constructed of reinforced concrete and steel. The company plans to erect 100 of such dwellings. The floors are to be of concrete over which oak will be laid. Each home is to contain six rooms and bath.

* * *

Thieves who gained entrance through a cellar window went through the hardware store of Christie Bros., Ltd., at Owen Sound on Tuesday last and got away with considerable merchandise. On Tuesday evening the hardware store of Creeper and Griffin was broken into and $10 in cash stolen.

Hold "Dollar Week"

London, Ont.—Merchants of Wheatley, Ont., have obtained such excellent results from Dollar Day sales that they are trying the plan out on an extended scale and are holding a "Dollar Week" from April 30 until May 7. The event is being widely advertised in the district as "The Wheatley Dollar Week," and fifteen of the town merchants have gotten together and are getting out a special paper filled with attractive offerings of merchandise and called "The Week Special Store News." A copy was mailed to every home in the district. Among the firms co-operating in the big "drive" for business are T. S. Derbyshire and Allan Lynn, hardware merchants. Both arranged an exceptionally attractive list of seasonable offerings for the special paper and both backed their advertising by attractive window displays and store arrangements.

Demonstrate Electric Ranges

A most successful demonstration of electric ranges was given on Thursday and Friday of this week at the store of the St. Marys Hardware Co., St. Marys, Ont. The firm used double column space in the local paper for a week before to announce the demonstration and the result was a large attendance of housewives. The ranges made a splendid showing and the numerous questions asked regarding efficiency, economy of operation, installation costs, saving of food and similar queries showed the keen interest the women took in the work. Sales of electrical grills and stoves have been steadily increasing in St. Marys and with the extension of the hydro lines into the district round about now that more power is available excellent prospects are presenting themselves for increased business.

Provide Electric Soves on Instalment Plan

London, Ont.—One of the most novel plans that has been presented here in some time is contained in a notice of motion to come before the city council at its next meeting. The mover is Ald. George Wenige. If his plan goes through the council will provide the public utilities commission with a line of credit which will enable them to sell 10,000 electric stoves on easy payments. Ald. Wenige's plan is to give citizens a chance to secure a really high grade electric stove by paying $3.50 per month. This charge is to cover both the payment for the stove and the electricity used. He claims that if $100,000 is advanced to the utilities commission it will be sufficient. He has a double end in view, first, to defeat a local proposal for increased gas rates, and, second, to secure permanent customers for the additional hydro that will be forthcoming shortly.

London merchants who discussed the proposition with Hardware and Metal, while admitting the distinct novelty of the plan and its advertising value, are inclined to doubt whether it is sound business ethics to pursue such a scheme. If followed out it might result, they fear, in a somewhat dangerous precedent being created and one which would eventually cause complications.

Helping Sell Ammunition

An effective method of co-operating with the dealers carrying ammunition was outlined in an interesting talk given by E. M. Putnam, advertising manager of Canadian Explosives, Ltd., and subsidiary companies, at a meeting of the Montreal Publicity Association.

After generalizing on the consumer advertising done, Mr. Putnam went into the details of work with the dealer. Illustrations of the newspaper and trade paper advertising were displayed, as well as the many attractive cut-outs, counter cards and window displays which are distributed to every dealer upon request. Stress was also laid on the fact that these multi-colored displays not only serve to help in the sales of ammunition, but they attract to the store men who will become purchasers of many other lines.

Board of Inspectors to Stop Bad Wiring

Upon the request of officials of the Canadian Electrical Trades Union, Chas. Swayze, Labor member for Niagara Falls, will introduce a bill in the Legislature to set up a board of examiners to examine contractors, journeymen and inspectors engaged in the business of placing, installing, maintaining, repairing and inspecting any conduits of any description carrying any electrical conductor equal to or higher than the voltage prescribed in the wiring regulations of the Ontario Hydro-Electric Commission.

It is proposed that the board shall have for its members an electrical contractor, a journeyman mechanic and another engaged in practical electrical work.

Canadian Tank & Pump Co. Open New Premises

The Canadian Tank and Pump Company, Ltd., has opened up general offices, warehouse and showrooms in Toronto at 119 Adelaide Street West, occupying the first floor and basement of

A. W. CLARK,

appointed manager the Canadian Tank & Pump Co., Ltd., which has opened up general offices, warehouse and showrooms in Toronto.

the building at that address. This firm is the Canadian branch of the Wayne Oil, Tank & Pump Company of the United States. The latter firm had a Canadian factory at Woodstock, Ont., up until about three years ago, but this is said to be the first real attempt of the company to market its products direct to the Canadian trade and as a Canadian incorporated company.

A. W. Clark, manager of the Canadian firm, was for two years district manager for the U. S. company at Denver, Colorado, prior to which he had been city salesman and district manager respectively at Boston, Mass. Mr. Clark has just returned from a trip to Ottawa and is highly satisfied with the prospects for business in Canada. He stated to Hardware and Metal that prospects in opening up a new office had never been better and that not only were there good possibilities, but there was a splendid selection of salesmen to choose from in organizing a sales staff. A staff of 35 salesmen will be representing the Canadian firm when organization is completed in another eight weeks.

Kingston News

KINGSTON.—Hardware & Metal has been advised that the hardware merchants at Napanee and Gananoque will fall in line with Kingston in the action taken by the local merchants a short time ago to co-operate to do away with bad debts.

* * *

Hardware merchants here state that the cold and wet weather of last week retarded business in the sale of spring goods. With warmer weather a brisk sale in garden tools is looked for, also in lawn mowers, garden hose, etc.

* * *

One hardwareman reports a brisk sale of poultry netting, showing that the poultry men are getting at their usual spring repair work.

* * *

Percy Chown, hardware merchant, underwent an operation for appendicitis this week at a local hospital.

* * *

A good deal of activity is looked for in the building trade here this summer. Already work has been commenced on a number of houses of the smaller type, and this will help the hardware business.

* * *

"I was surprised to see that there was so much building in course of construction," remarked a hardware man to Hardware & Metal. The work is mostly on smaller houses.

* * *

Kingston, Ont.—Simmons Bros. were awarded the contract for the tinsmithing in connection with the furnaces in the school buildings. The board of education is now calling for tenders for the seats required in the new Robert Meek school, which will be ready for the fall term.

Clean Up Week in Kingston

Kingston.—Ald. Allan Stround, chairman of the City Health Committee, proclaimed this week as "clean up week" for Kingston, and the local hardware stores took advantage of this to put forth in prominent displays all the tools necessary to carry out the work.

The local hardware men are making special displays of garden tools, drawing attention to the fact that the man around the house must make a general survey of his backyard to see what vegetables and flowers he can plant to beautify his place; pointing out that it is wonderful what a square yard of soil will produce and that perhaps he will need a hoe, rake, cultivator, wheelbarrow or spade.

A special appeal is also being made to the farmers to keep down the weeds so that the vegetables will come up.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

STRATFORD MFG. COMPANY

A new catalog, No. 6, has just been issued by the Stratford Mfg. Co., Ltd., Stratford, Ont., covering the various lines of woodenware manufactured by them. The catalog is well got up and each article manufactured is clearly and finely illustrated by clear cuts. A wide range of goods is described and shown and new lines have been added since the issue of the last catalog.

Some of the lines included are library tables in different styles and sizes, tea wagons, pedestals, costumiers, smoker stands, folding tables, folding draft screens, writing desks, lawn and verandah swings, folding chairs and seats of different descriptions, camp cots, bookracks, etc., as well as the more usual lines of woodenware such as step and extension ladders, ironing boards, etc. Readers of Hardware and Metal are invited to write for a copy.

"TYCOS"—ROCHESTER

An illustrated booklet of 32 pages, about 7 x 10 inches, under above title is issued quarterly by the Taylor Instrument Companies, Rochester, N.Y., manufacturers of thermometers, compasses and other instruments. Various articles of interest appear in this booklet as well as useful hints and helpful dealers suggestions. The Canadian branch of the Taylor Instrument Companies, located at 110-112 Church St., Toronto, Ont., have lately installed a Repair and Service Dept. in connection with this sales office. The firm state that competent instrument makers have been engaged who are thoroughly equipped with apparatus for overhauling and testing pyrometers, barometers, thermometers, and other kindred instruments. This Dept., it is believed will fill a want, as hitherto all repairs have had to be sent to the factory at Rochester entailing delay. Inquiries and visits are invited from persons interested in the use of these instruments.

"DODD" INVALID BED

The Port Arthur Structural Iron Works, Ltd., Port Arthur, Ont., have issued a booklet illustrating and describing the "Dodd" invalid metal bed which they are manufacturing. This bed is stated to have been strongly recommended by the medical profession, and as far as is known, is the only one of its kind.

BARBER PATENTED GAS BURNERS

The Cleveland Gas Burner and Appliance Co., 3702-04 Superior Ave., Cleveland, Ohio, have issued a booklet dealing with the Barber patented gas burners for artificial and natural gas. The booklet shows the Barber in different types and combinations of units suitable for a variety of purposes from heating residences, apartment houses, schools, churches, stores, etc., as well as for industrial and commercial use in heating, annealing and baking appliances for manufacturing institutions. The principle of the burner is concisely described together with instructions for installing and operating.

"A RECORD OF A GREAT ENTERPRISE"

Under the above title a booklet has been compiled by the United Brassfounders and Engineers, Ltd., Cornbrook, Manchester, England. While the booklet describes and illustrates the contribution of munitions and material to the Allied cause during the late war, it contains a good deal of interesting matter to those engaged in the selling or installing of steam and water fittings. The "Ubel" line is a wide and varied one and a few of the lines include valves, cocks, pressure and vacuum gauges, and lubricating devices. Views of five of the factories processes of manufacture are given. The booklet is splendidly got up on good paper are shown and illustrations of some of the and is printed in colors, with fine illustrations. The Canadian agents are W. H. Cunningham & Co., 269 West Richmond St., Toronto, Ont.

DOOR HANGERS, HINGES, ETC.

The N. Slater Co., Ltd., Hamilton, Ont., have published an illustrated sheet about 2 feet by 3 feet, printed on stout glazed paper, in which are shown many of the numerous lines of door hangers, track for same, and hinges and door fasteners of various description. A space has been left in the bottom corner for the dealer to put in his name and the idea is that by hanging this sales help up in a prominent position in the store increased business in the sales of garage outfits and barn and stable door furniture will result. The sheet comes folded through the mail and any reader of Hardware and Metal desiring one is requested to send a card to the firm at the above address.

EVERJET ELASTIC CARBON PAINT

A new booklet has been published by the Barrett Co., Ltd., Toronto, Ont., on Everjet elastic carbon paint, and is ready for distribution. The booklet describes the uses and advantages of this carbon paint for many purposes besides metallic roofings. The directions for use and quantities required for different work are also dealt with.

Autographed typed letters are sent out by the Specification Department of the Barrett Co. in which attention is drawn to the depreciation which is going on all the time in roofing, and a staff is maintained at the Barrett Company's expense who without obligation on the part of the owners of buildings, factories, etc., are prepared to conduct an examination and report on present condition and submit specification for repairing if necessary.

FLINT ARCHITECTURAL FINISHES

Under the above title the Flint Varnish & Color Works of Canada, Ltd., with head office at Montreal, Que., have published an exceedingly handsome booklet in which the different interior and exterior wood finishes, paints, varnishes and enamels made in their factories are described in detail. The use of each product, together with packages put up in and directions for applying are fully dealt with. The booklet, 9 x 11 inches, is printed in colors on excellent paper and the illustrations giving suggestions for interior decoration are beautifully done.

MEMORIAL NUMBER "STEPHENS' PAINT NEWS"

The most recent issue of Stephens' Paint News, a house organ published by G. F. Stephens & Co., Winnipeg, is entitled a Memorial Number and is devoted to the late G. F. Stephens, late president of the firm. A biographical sketch of the late Mr. Stephens, by M. F. Christie, is followed by an appreciation of deceased, written by the editor. A few of the last tributes from a number of prominent social and business friends are included. The issue is suitably printed in purple and black.

MODERN WOOD FINISHING

The Bridgeport Wood Finishing Works, 21 East 40th St., New York City, owned and operated by the E. I. DuPont De Nemours & Co., of which the Flint Varnish & Color Works, of Canada, Ltd., are a subsidiary company, maintain and operate a service department in New York and other cities for the assistance of architects, builders, contractors, painters, decorators, or anyone who is building, in planning the best decorative treatments for interior woodwork, doors, walls and floors. A booklet, size 8½ x 11 inches, printed in colors and containing 68 pages, describes in detail this feature and service and besides gives full and concise directions for the finishing of different varieties of wood. The uses and possibilities of the various forms of building lumber are covered thoroughly and the natural grains and finishes of different wood, are illustrated by the aid of 128 colored cuts.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

K. B. AUTO JACKS

The Cochrane Hardware Co., Ltd., Copper Cliff, Ont.—Kindly inform us of the name of the firm making K.B. auto jacks?

Answer.—Kinzinger, Bruce & Co., Ltd., Niagara Falls, Ont.

STOCKING STRETCHERS

W. C. Stearman, Vancouver, B.C.—Can you give us the address of manufacturers of wood stocking stretchers?

Answer.—Burton & Baldwin Mfg. Co., Ltd., Hamilton, Ont.

BARREL DEALERS

J. C. Wanless, Chatham, Ont.—Can you give us the address of dealers of used empty barrels?

Answer.—Shea Bros., 45 Duchess St., Toronto; H. A. Ball, 239 Bathurst St., Toronto; J. Sheppard, 46 Jarvis St., Toronto; J. M. Stuart, 340 Dufferin St., Toronto; Vail & Sheppard, 457 Adelaide St. W., Toronto.

EUREKA GARDEN TOOLS

J. H. Laroche, St. Croix, Que.—Kindly tell me where I can procure Eureka garden tools?

Answer.—The manufacturers are the Eureka Planter Co., Ltd., Woodstock, Ont.

X-RAY STOVE POLISH

D. W. Kennedy, Penetanguishene, Ont.—Can you tell me where I can procure X-Ray stove polish?

Answer.—Groceries, Ltd.; Thos. Kinnear Co.; Eby, Blain Co., Ltd., all of Front St. E., Toronto, Ont.

HOSPITAL STERILIZERS

The R. T. Holman, Ltd., Summerside, P.E.I.—Kindly advise us of the names of Canadian manufacturers of steam operated hospital sterilizers?

Answer.—Our information is that there are no manufacturers of these goods in Canada. They can be procured from Ingram & Bell, Ltd., McCaul St., Toronto, Ont. Some U.S. manufacturers are the following:—Hospital Supply Co., 55 5th Ave., New York, N.Y.; Castle & Wilmot Co., Rochester, N.Y.; American Sterilizer Co., Erie, Pa.

HYDRATED LIME AND HARD WALL PLASTER

Lacombe & Fils, Limitee, Sherbrooke, Que.—Kindly give us a list of the manufacturers of hydrated lime and hard wall plaster?

Lime Hydrated

Answer.—The Alabastine Co., Ltd., Paris, Ont.*; Albert Mfg. Co., Hillsborough, N.B.*; Christie Henderson & Co., Ltd., Toronto, Ont.; Elora White Lime Co., Elora, Ont.; Hastings Quarries Co., Actinolite, Ont.; Laurentian Stone Co., Ottawa, Ont.; The Ontario Plaster Co., Ltd., Paris, Ont.*; Standard Lime Co., Joliette, Que.; Standard White Lime Co., Ltd., Guelph, Ont.; Stinson-Reeb Builders Supply Co., Ltd., Montreal, Que.*; Toronto Plaster Co., Ltd., Toronto, Ont.; Manitoba Gypsum Co., Winnipeg, Man.*; Pacific Lime Co., Ltd., Vancouver, B.C.; Windsor Plaster Co., Windsor, N.S.*

Plaster, Hard Wall, and Plaster Paris

Alex. Bremner, Ltd., Montreal, Que.; The Iona Gypsum Co., Ltd., Iona, N.S.; Canada Lime & Builders' Supply Co., Montreal, Que.; Dominion Gypsum Co., Ltd., Winnipeg, Man.; Keystone Wall Plaster Co., Ste Therese, Que.; Newport Plaster Mining & Mfg. Co., Windsor, N.S.; Albert Parsons, Walton, N.S.; Wright & Co., Inc., Hull, Que. Also firms in first list marked with a *.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of May 4, 1901:

"Since The SherwinWilliams Co. erected their Canadian varnish factory in Montreal, some five years ago, they have been trying to gain for the products of this branch of the business a reputation equal to that held by The Sherwin-Williams paints. Mr. Ballantyne, manager of the Canadian division is proud in the confidence that the efforts of the firm have not been in vain."

* * *

"Hamilton & Sutton, hardware dealers, Keyes, Man., have been succeeded by Hamilton & Thurston."

* * *

"G. E. Knechtel & Co., have purchased a hardware stock in Rosthern, N.W.T.,"

* * *

"J. W. Husband, hardware dealer, Wallaceburg, Ont., has admitted his son, D. A. Husband, under the style of J. W. Husband & Son."

* * *

"Two tanks of the Dominion Iron and Steel Co. and their contents, about 300,000 gallons of coal tar, were destroyed by fire April 30th. The loss is fully covered by insurance."

* * *

"The Sydney Hardware Co., Ltd., have been incorporated with $25,000 capital. The new company will be managed by Messrs. Dana & McLennan who are now engaged in the retail hardware business in Sydney."

* * *

"Nicholas Flood Davin, the Ottawa correspondent of the Toronto News, gave in a recent issue a brief and interesting sketch of Col. Prior, one of the hardwaremen who sits in the House of Commons."

* * *

"At the regular monthly meeting of the Toronto branch of the Retail Merchants' Association of Canada, the trading-stamp situation was discussed at length. The legislation recently passed by the Ontario Legislature empowering municipalities to prohibit merchants from giving trading stamps to be redeemed by a third party or concern was considered so satisfactory that a resolution was unanimously adopted asking the city of Toronto council to pass a by-law to this effect."

Little Ordering of Fruit Jars

Shortage May Exist at The Ripe Fruit Season —Little Likelihood of Easier Prices

MONTREAL.—"Up to the present we have no way of determining the demand for jars for this season. Jobbers have not placed their orders as yet, apparently expecting lower prices," said a large manufacturer of fruit jars and containers to Hardware and Metal.

It was explained that the supply for the coming season was at this time made up and in storage ready for the demand to open, but unlike past years, there was no telling whether ample stock was already manufactured to meet the requirements of the approaching canning months. Last year in July a large jobbing house was the first to complain of a shortage, and it came at a time when the housewife was right in the middle of her fruit canning. A delay was caused and although some were fortunate in obtaining extra jars in time, there were many localities that suffered. "The same situation may prevail this summer if our present stocks are inadequate for a rush in the later months," continued the informant.

Prices Will Remain Firm

"Our paper cartons cost us from 30 to 35 per cent. more than last year, and this is a big factor in the marketing of fruit jars. At the same time the cost of production, including both labor and raw materials, were at the peak when our present stocks were manufactured last December. We made a reduction the middle of February this year on all our brands, and we are now sacrificing on our profits of the year previous. With these conditions, there is little likelihood of lower prices throughout the coming season."

The Retailer Is Now A Factor That Must Be Reckoned With

"Business as Usual" Held Up as a Slogan at Second Annual Meeting of Retail Merchants' Association of Charlottetown, P.E.I.—Officers Elected

CHARLOTTETOWN, P.E.I. — The second annual meeting of the Retail Merchants' Association of this city proved to be a very successful affair. It took the form of a combined banquet and business meeting and was not only well attended but proved in all ways to be most interesting and successful.

The president, S. A. Macdonald, in presenting his annual report, referred to the successful efforts of the Retail Merchants' Association in having the luxury tax repealed. He also strongly denounced Government interference in business.

Misleading Reports Sent Out

"Some selfish interests in Canada," he said, "have made a business of sending press despatches broadcast throughout the land portraying conditions that do not exist and, as a consequence, have been misleading the public. From information received throughout the province, conditions are such as to cause no alarm, and would seem to justify us in adopting that well-known slogan, 'Business as usual'."

He then referred to the activities of the board during the year with regard to improved fire alarm system, daylight saving, summer half holiday, grant to Exhibition Association, etc. It was his privilege September last to attend the annual convention of the Retail Merchants' Association of Nova Scotia and Prince Edward Island, held in Kentville, N.S. They had problems to solve there such as early closing, etc., matters mastered in Charlottetown long ago, he said. He was surprised to note that in the little town of Shubenacadie, N.S., all the retail stores open for business at half-past six in the morning.

Comments on existing conditions in trade were made in addresses by John McLeod and James Robertson.

J. C. Doyle, the general secretary for Nova Scotia and Prince Edward Island, reviewed at the outset of his speech the activities of the Dominion Board during the year. In this connection he read extracts from the address of President Banfield at the Dominion Convention of the Retail Merchants' Association held at Vancouver, and also extracts from the Dominion secretary's report. The need of closer co-operation between all classes of retail merchants in Canada was among the matters dealt with.

Mr. Doyle read a long list of various measures which the association was instrumental in passing. These included the Bankruptcy Act; amendments to False Advertising Act; fixing Thanksgiving Day November 11; Fire Insurance Act; amendments to Adulteration Act; war stamps on patent medicines; prohibiting the sale of goods on Government property, etc.

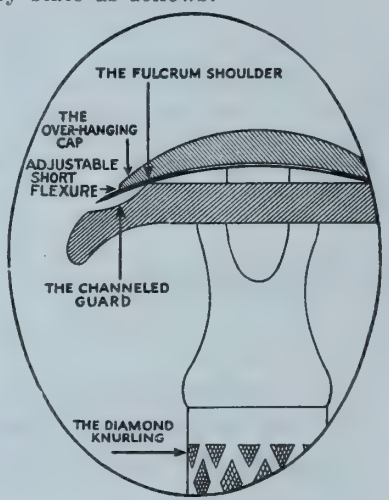
New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

"3" IN "1" WAXER AND POLISHER

A new household labor saving device under the above title has just been put on the market, and is being manufactured by Braun & Bonnick, Ltd., 86 John Street, Toronto, Ont. The "3" in "1" has been designed with the idea of enabling the user to wax and polish the floor in one operation without stooping or getting the hands soiled with the wax.

The "3" in "1" revolves on the handle and one side forms the waxer and finisher and the reverse side the polisher. To use, wax is placed on the cork surface, cloth is placed over and clamped down. The weight of the device forces the wax through the cloth and the result is said to be a thin, uniform coating free from lumps or streaks. It is claimed that a saving of wax is effected as any not used adheres to the cork surface and can be scraped off and used again. After polishing with the brush a soft cloth can be clamped on waxer surface and a quick finish given. Bumpers on ends and rubber guards protect the furniture from being scarred. The



"3 in 1" Waxer and Polisher

weight of the "3" in "1" is 15 pounds, not too heavy for a woman to use and the fact that the whole operation can be performed without stooping has caused it to meet with instantaneous approval.

NEW GILLETTE SAFETY RAZOR

The Gillette Safety Razor Co. of Canada, Ltd., are now placing on the market the new improved Gillette safety razor. In describing the new design they state as follows:

New Gillette Razor

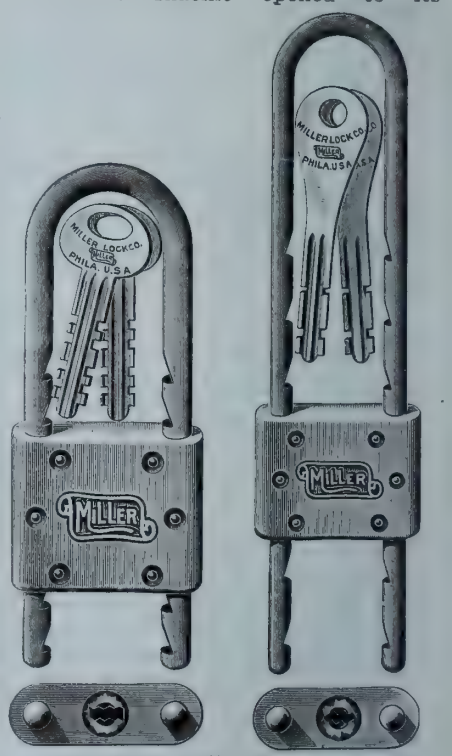
The fulcrum shoulder and overhanging cap provide straight edges acting on the blade to produce an adjustable short flexure, which results in a straight and extremely rigid shaving edge in all positions of adjustment. The channeled guard underlying the adjustable blade edge enables the adjustment to be changed without sensibly altering the angle at which the razor is held in shaving, and also leaves the entire edge free to the beard while guarded from the face. All parts are made with micrometric precision in strict conformity with measurements determined by Gillette technical experts after exhaustive research and thousands of shaving tests.

The distinctive diamond knurling is used exclusively on the new improved Gillette safety razor.

The new razor retails at the same price as formerly, while new sets featured are the "Bostonian," opening the cover of which automatically raises tray containing razor and blade box, and the "Tuckaway," which is compact in a case the size of the ordinary cigarette case.

CANADIAN POCKET KNIVES

Pocket cutlery of Canadian make, the output of the Canada Cutlery Co., Kingston, Ont., is now being placed on the market, and is thought to compare very favorably with imported knives in appearance. The material used in their making is also stated to be of a high standard, the blades being of the first quality steel.



The jack knives are shown in a full line, ebony and black horn handles, iron and brass lined, in 3-inch, 3¼-inch and 3½-inch sizes. Penknives, which will not be marketed until around June 1, are of the two blade sleeve board pattern, with and without bolsters, in all coverings.

NEW MILLER PADLOCKS

The Miller Lock Co., Philadelphia, Pa., are offering to the trade two new padlocks which are especially adapted for the auto accessory trade. These new locks are manufactured of cast brass.

No. 44 is 1¾ inches in size. The inside dimension of the shackle opened to its greatest distance is 5½ inches by 15-16 inch and is adjustable to 1 inch—16 key changes—packed one lock in individual cartons, six cartons in metal edge box.

No. 45 is 2 inches in size. The inside dimension of shackle opened to its greatest distance is 4¼ by 1⅛ inches and is adjustable to ⅝ inch. There are 64 key changes. One lock packed in individual carton, 6 cartons in metal edge box.

New Miller Locks

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT GLANCE

REDUCTIONS are noted this week in wrought pipe, wood handles, carpenters' and farriers' tools of various types, some makes of night latches, door bolts, plated butts, carriage hardware, mirrors, emery cloth and Canada plate.

There is an indication that price declines are slowing up on some lines and a somewhat firmer tone is visible on lead products, rope and glass. Linseed oil has stiffened and turpentine has advanced again this week. Basic lines such as bar iron and steel, sheets and plates are held at recent declines. A better tone is felt in ingot metals, and tin and lead have advanced in price. While there has not been much increase of business as the result of the change in prices of the Steel Corporation, the situation appears somewhat steadier since prices are considered to be stabilized. Some reductions have been made in prices of rolled steel products by U.S. mills and railroad and boat spikes, chain, rivets, etc., are lower. No new developments are reported on pig iron and the demand is still light.

A steady increase is reported by wholesalers in spring business and paint manufacturers state that orders are very satisfactory. The demand for heavy hardware is light and fitful. Collections are stated to be good.

Montreal Markets

MONTREAL, April 28.—Price changes this week cover many lines of tools and smaller hardware, the chief features are the selling basis of wrought pipe and the reduction in wood handles. List No. 51 is now issued on piping, showing a varied reduction on all sizes. Handles are reduced from 8 to 12 per cent. Stanley tools are under a revised list with lower prices on many lines, also Millers Falls braces. Farriers' tools show a decline of 12½ per cent. Mirrors and some lines of carriage hardware are also lower. Plumbers' oakum now sells for $3.75 per 50-lb. bale. Solders are advanced one cent per pound on all grades.

Prices on the heavier goods are fairly steady with the exception of black sheets, which are a little easier. Business remains quiet in these lines, while jobbers state seasonable lines are brisk.

Mirrors are Reduced

Montreal.

There has been a reduction of about 10 per cent. made on mirrors in all sizes of arch top, Louise and X.L.

Millers Falls Braces Reduced

Montreal.

A reduction of 10 per cent. is made in carpenters' braces made by Millers Falls Company.

Stanley Tools Revised

Montreal.

Carpenters' tools made by the Stanley Rule & Level Co. are now quoted on a revised list, with reductions of approximately 5 to 10 per cent. made on the many lines.

Door Bolts and Butts Revised

Montreal.

A new revised price list has been issued by the Canada Steel Goods Co., Ltd., showing slightly lower prices on such lines as plated butts, door bolts, barrel bolts, etc.

A Revision in Fittings

Montreal.

A revision on some lines of pipe fittings is made. There is no notable change in prices, however, while the demand is keeping up fairly well. Stocks are in very good shape in all sizes. Following are present quotations:

Cast iron fittings	20%
Bushings, cast	30%
Do., malleable	30%
Flanges	27%
Plugs	22½%
Flange Unions	20%
Malleable Unions	40%
Dart Unions, black	29%
Do., galv.	8%
Nipples, ⅛ to 4 in. close and short	40%
Do., long	50%
Do., 4½ to 8 in., close and short	30%
Do., long	40%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 26

Add 10%.

No Change in Bars

Montreal.

Quotations on iron and steel bars remain at decline of last week, bar iron selling at $3.70 base. It is thought by jobbers that the market will be much steadier since the adjustment of quotations from the United States mills. There is still a light demand, with stocks reasonably heavy in the different warehouses. Following are quotations at recent decline:

Common bar iron, 100 lbs.	3 70
Refined iron	5 20
Iron finished machinery steel	3 75
Mild steel	3 70
Band steel	3 70
Single reeled machinery steel	5 75
Spring steel	5 00
Sleighshoe steel	3 70
Tire steel	3 90
Toe calk steel	4 60
Harrow tooth steel	3 85
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE.—Refined iron is aproximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Coal Oil and Gasoline Held

Montreal.

There has been no change made in coal oil or gasoline since the reduction of 2 cents on coal oil last week, this now being quoted at 26 cents. Motor gasoline is selling at 39 cents, higher grade at 44 cents.

Nail Demand Fair

Montreal.

The demand for wire nails this season might be stated as fair in comparison with last year. Although a continued movement is shown, it is of small orders. Building construction will have a good effect on the demand when this commences in earnest, as dealers are continuing to buy only for immediate requirements. Prices remain at the decline of two weeks ago, wire nails selling at $4.55 base, cut nails $5.10 base.

Eavetrough in Good Demand

Montreal.

Eavestroughing, conductor pipe and conductor elbows are now in good demand. Manufacturers and jobbers are looking for these lines to be active from now on, particularly as dealers held off in their buying during the early months of this year, the time that bookings are

generally forwarded. Quotations are holding at lists prepared early in the year.

Metal Lath Now Selling

Montreal.

Metal lath is now moving to several dealers throughout the country where building has commenced. Sales are still small, but as this product is controlled entirely by the building activity, an improvement is looked for as the season opens. Quotations are the following:

METAL LATH—Painted, 26 gauge, sq. yd., 35c; 24 gauge, 39c; 23 gauge, 45c. Galvanized, 11c per sq. yd. extra. Discount 10%.

Decline in Plumbers' Oakum

Montreal.

Plumbers' oakum has been lowered in price, and it is now selling for $3.75 per 50 pound bale. Broken quantities ten cents a pound.

Sheets Slowly Improve

Montreal.

Among the jobbing circles a slight improvement in sales of sheets is reported. There is still room for greater activity, however, at this time of year. Different jobbers express the opinion that prices will in all probability remain fairly steady for some little time. Reports from the United States mills are that a much better feeling is now manifest since the recent adjustment of prices. Present quotations are as follows, shown with a range in most cases:

PLATES—		
10 gauge	5 25	6 25
12 gauge	5 30	6 30
14 gauge	5 45	6 45
16 gauge	5 55	6 55
BLACK SHEETS—		
14 gauge	5 45	6 45
16 gauge	5 55	6 55
18-20 gauge	6 15	7 15
22-24 gauge	6 25	7 25
26 gauge	6 35	7 35
28 gauge	6 50	7 50

.. Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANIZED SHEETS—		
U.S. Standard—		
10¾ oz.	8 75	9 75
28 gauge	8 25	9 25
26 gauge	8 00	9 00
22 to 24 gauge	7 85	8 85
20 gauge	7 65	8 65
18 gauge	7 65	8 65
16 gauge	7 50	8 50
14 gauge	7 50	8 50
12 gauge	7 50	8 50
English Standard—	Queen Head	Fleur-de-Lis
28 gauge	10 00	9 25
26 gauge	9 75	9 00
24 gauge	9 15	8 60
22 gauge	8 80	8 15
18 and 20 gauge	8 10	8 00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

No Change in Corrugated Sheets

Montreal.

There are no changes to report on quotations of galvanized corrugated sheets. The demand continues to improve and dealers anticipate some steady business now that the building season has opened, stocks being very low throughout the country. Following are the unchanged quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Carriage Hardware Down

Montreal.

A reduction of about 10 per cent. has been made on some lines of carriage hardware, including axle clips, shaft couplings, felloe plates and axle clip yokes.

Farriers' Tools Reduced

Montreal.

Farriers' tools have been reduced about 12½ per cent. This covers turning, rounding, fitting and driving hammers, pincers, hoof paring nippers and pick-up tongs.

Reduction in Handles

Montreal.

Hickory, oak, ash and maple handles show a reduction in price this week, also hay fork, hoe, rake, shovel and manure fork handles. Following are the new quotations, whiffletrees, doubletrees and neckyokes also being covered by the change in the plus percentages:

All hickory handles, list plus 20%; all oak, ash and maple handles, list plus 10%; hay fork, hoe, rake, shovel and manure fork, list plus 10%; whiffletree, doubletrees and neckyokes, list plus 20%; wood rakes, list plus 10%; horse pokes, list plus 10%.

Wash Boards: A Correction

Montreal.

In last week's market report the new lower price on glass washboards was given as $8.25 per dozen. This was an error and should have read $8.75.

Fair Movement in Range Boilers

Montreal.

Range boilers are moving in small orders, one and two being forwarded where dealers last year were buying in quarter and half dozen lots, but orders are numerous and general throughout the country. Quotations are practically unchanged, although on the 30 gallon standard boiler prices are $12.00 and $12.50. On the electric welded the same size is selling from $10.50 to $11.50 for the standard and $14.65 for the heavy. Following are quotations on all sizes:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	12 50	15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Solders Advance One Cent

Montreal.

A much firmer market is shown on lead products this week, and an advance of one cent per pound is made on all solders. There has been a firmer tendency prevailing the past few weeks, but this is the first advance made on any of the products. Pig lead continues to show strength in the primary market, and it is generally believed that the bottom has been reached. Following are quotations:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 35
Zinc sheets, casks	0 13
Do., broken lots	0 13½

Scrap Market Dull

Montreal.

There is little improvement in the scrap market, and it remains very dull. The recent action of the United States steel mills is looked upon with interest, and is hoped to locate a demand for many scrap metals. Some dealers are of the opinion that an improvement is close at hand. Following are nominal quotations:

DEALERS' BUYING PRICES.	
Automobile tires	0 75
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 03½
Light copper	0 08
Lead, tea	0 02
Heavy copper	0 10½
Wrought iron, R. Rd., No. 1, per gr. ton.	12 00
Malleable scrap (ton)	11 50
Pipe scrap (ton)	8 00
Stove plate, per ton	18 00
Heavy melting steel	8 50
No. 2 busheling	4 00
Boiler plate	11 00
No. 1 machinery cast, per gr. ton	$25.00 28.00

Canada Plate is Reduced

Montreal.

Although the present time is an off season for Canada plate, and there is little moving, prices show a reduction this week. The outlook for fall trade is very bright, the scarcity of last year now well overcome, and prices will no doubt be considerably lower. The English plates will be on the market at very reasonable prices, these being of very high quality. The present reduction brings the 60 sheet boxes down to $9.00 and the 52 sheet $8.75.

New Lower Pipe Prices

Montreal.

A new list, No. 51, has been issued and is effective from April 25th on steel and wrought pipe. ⅛-inch pipe remains unaffected, and the reductions on ¼-inch up vary in amount, the previous basing having been changed. Small reductions are made on wrought pipe from the 1-inch size up. The following is the new list.

Price List No. 51. April 25th, 1921.

Standard Buttweld Pipe S/C

Per 100 feet.

Size	Steel Blk.	Steel Galv.	Gen. Wrot. Iron Blk.	Gen. Wrot. Iron Galv.

Ingot Metals Continue Firmer

Toronto.

The ingot market this week continues to show an improvement, and the sentiment seems decidedly better. Buyers are also more interested in the different lines, and although this might be stated as being only a seasonable condition, it is significant that a better feeling now exists, also very welcome when the past quiet months are taken into consideration.

TIN.—Tin has been quite strong in London, having touched the highest point since last February. Although this has eased off in the last few days, the market remains firm. The local price has advanced to 39 cents.

COPPER.—Little can be said of copper this week, the market remains firm and little change is looked for. Electro is quoted at 18 cents, casting at 17½ cents.

SPELTER.—This metal has been quite strong, especially in the United States, where it has touched 5 cents, East St. Louis. The market seems strong owing to the better demand from the galvanizers. Local price unchanged at 8½ cents.

LEAD.—Lead continues firm in London and in U.S.A. the trust price has been advanced 10 cents per 100 pounds. It is hardly expected prices will go much higher at present. Local price unchanged at 6¾ cents.

ANTIMONY.—This metal is slightly stronger in New York, but the demand remains quiet, there is no change in the local price, 6½ cents for Chinese and 8½ for high grade English.

ALUMINUM.—Aluminum is still dull on the market, with price unchanged at 35 cents.

Toronto Markets

TORONTO, April 28.—The chief features of the markets this week are the reductions on wood handles and the new lower pipe list. The new list on handles shows a change in discounts and a reduction on practically all handles including axe handles, garden and harvest tool handles and neck yokes and whiffletrees, etc. Wrought iron pipe as well as steel has been reduced this time, making the first change in this in nine months. A considerable decline has taken place in the price of Yale night latches. Minor reductions include some lines of tools, emery cloth and wheelbarrows. A firmer tone is reported in primary rope markets. A weaker tendency is evident in brass plumbing goods. Lead products are holding firm. Nails are in better demand. Sheets, plates, bar iron and steel are still slow and little change in prices is reported. The waste market is still sluggish. A better tone is reported in metals with tin and lead firmer and advanced. An encouraging increase in sales of seasonable lines is reported by wholesalers and collections are said to be much improved.

Firmer Tone in Rope Markets

Toronto.

Prices are held unchanged on rope and binder twine. The greater part of the booked orders are reported to have gone forward, and late orders and sorting up requirements are being placed now. Wholesalers look for a steady movement throughout the season as stocks of retailers are usually small. There is a considerably firmer tone in hemp and sisal markets and prices of the latter have been advanced in primary markets. The export duty of 1½ cents placed on this commodity by the Mexican government has also strengthened prices. Manufacturers while not expecting any advance in rope and cordage prices at present state that should the market still further advance there will be no other option but to increase present prices. Quotations will be found on the current market pages.

Weakness in Brass Goods

Toronto.

No changes are reported on the standard lines of valves and compression work but the market appears to be in an unsettled condition and a revision in some lines would not seem unlikely. Business continues rather uneven and is "up and down." Wholesalers state that stocks are in fair condition. The following are the nominal quotations:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	25%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	10%
J.M.T. C.	15%
J.M.T. Gate Valves	15%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Wrought Pipe is Lower

Toronto.

Prices have been reduced on pipe and the new list effective April 25 shows a decline on both steel and wrought pipe. The reductions are stated to follow the lines of those made by the Steel Corporation, which was reported in last week's market report, and the declines vary on different sizes. It will be noted that wrought pipe is included in the reductions this time and this is the first change since July, 1920, although steel pipe has been reduced twice since that time. The following is the new list:

Price List No. 51. April 25th, 1921.

Standard Buttweld Pipe S/C
Per 100 feet.

Size	Steel Blk.	Steel Galv.	Gen. Wrot. Iron Blk.	Gen. Wrot. Iron Galv.
⅛ in.	$ 6 50	$ 8 50	$	$ ....
¼ in.	4 71	6 81	5 91	8 01
⅜ in.	4 71	6 81	5 91	8 01
½ in.	6 16	7 78	7 95	9 48

25 P.C. Decrease in Yale Latches

Toronto.

Prices have been reduced on Yale night latches and these are approximately 25 per cent. lower in price now.

Sleigh Bells Are Lower

Toronto.

Prices are issued on sligh bells for next winter's delivery and are approximately 10 per cent. lower than last season.

Wood Handles Are Reduced

Toronto.

Discounts have been changed on wood handles and all hickory handles are now list plus 20 per cent instead of plus 35 per cent. Fork, rake, hoe and shovel handes are approximately 10 per cent. lower, also neck yokes, whiffletrees and doubletrees. Ash and maple pike poles remain unchanged at list plus 30 per cent. The following is the new discount:

On hickory handles, plus 20%.
Maple cant hook and peavy handles, plus 10%.
All fork, hoe, rake, shovel handles, and malleable D, plus 10%.
Maple and ash pike poles, plus 30%.
All doubletrees, whiffletrees and neck yokes, plus 10%.
All other handles and goods, plus 10%.

Canadian Screwdrivers Lower

Toronto.

Screwdrivers of Canadian make have been reduced in price and are stated to be cheaper than the imported lines.

Garment Hangers Reduced

Toronto.

Wire garment hangers are reduced in price and are now selling at about 10 per cent. less.

Wax Paper Declines

Toronto.

A reduction of about 12½ per cent. has been made in the price of waxed paper in rolls and it is now quoted at $3 for 100 rolls; 12 sheets to roll.

Gas Mantles Are Down

Toronto.

There has been a decline of about 5 per cent. in the price of gas mantles of the Lindsay type.

Lower Mop Prices

Toronto.

With the decline in the price of cotton goods further reductions have been made in string mops and dish mops. String mops are from 10 to 15 per cent. lower and dish mops about 20 per cent. less.

Gasoline Down 2 Cents

Toronto.

Gasoline prices are down two cents per gallon and motor grade is quoted at 36 cents. Coal oil is held at the change made last week and quotations are 25 to 28 cents according to grade. The demand for both products continues to show increase.

Iron and Steel Holding

Toronto.

Wholesale dealers in iron and steel report their prices are unchanged. On some lines a small increase of demand is noted but taken generally sales are still light. In United States markets the majority of buyers look on the price of iron and steel commodities as settled for some time to come and are buying according to needs but new buying is said to be very light. Present pig iron production is said to be at the rate of one-third of capacity. The following are the current quotations on iron and steel bars here and the trend is downwards.

Common bar steel, 3-16 in.	$ 4 50
Common bar steel, ¼ in. and heavier	4 00
Common bar iron, 3-16 in	4 50
Common bar iron, ¼ in. and heavier	4 00
Angle base	4 10
Horseshoe iron	6 00
Tire steel	5 95
Band steel	4 50
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	23 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	4 50
Norway iron	15 00
Toe caulk iron	6 70
Hoop Steel	6 00

Compass Saws Lower

Toronto.

A reduction has been made in the price of some lines of compass saws and these are now being quoted at $2.75 per dozen.

Better Nail Demand

Toronto.

A better demand for wire nails is reported. With an increase in new building there would be a still better movement of nails as present stocks are recognized to be considerably below normal. Wire nails are held at the recent decline and are quoted at $4.65, base, per keg. Cut nails are $5.60 per keg, base.

Spring Clothes Pins Reduced

Toronto.

A line of spring clothes pins has been reduced and are quoted from 85 to 90 cents per gross now.

Pipe Fittings Held

Toronto.

No further changes have been made in the quotations on pipe fittings and these remain at the price announced two weeks ago. Not much difference is noted yet in sales and although sorting up orders are reported to be a trifle more numerous they remain small. The following are present quotations:

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%
Do., ⅛ in., 2½ to 4 in.	35%
Flanged Unions	20%
Dart Unions, blk., ¼ to 2 in.	29%
Do., ⅛ in., 2½ to 4 in.	14%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., long, ⅛ in. to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, ¼ in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B	0 23	0 32½
Class C	0 15	0 23

Improved Sales on Corr. Sheets

Toronto.

The demand for corrugated sheets is reported by some wholesalers to be showing considerable improvement. At this season of the year there is a quantity used for building garages and for roofing and other jobs. The bulk of the trade is being done in the lighter gauges. Prices are held unchanged and are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Leather Dog Collars Lower

Toronto.

There is a good sale now for dog collars and assorted lines of leather collars on cards are on the market, priced at $2.25 to $3.75 per dozen.

Eavestrough in Good Demand

Toronto.

A better demand is reported for eavestrough and conductor pipe and considerable outside repair work is being done and sales of these goods are showing an increase. This applies also to crimped and corrugated elbows. Prices are unchanged and are to be found on the current market pages.

Range Boilers are Unchanged

Toronto.

There is not much change reported in range boilers and sales usually are for present needs. Quotations remain the same and are the following:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$12 50	$15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Soil Pipe Still Slow

Toronto.

Sales of soil pipe and fittings are reported to be showing a slight increase as the season advances, but there is not much increase looked for until new construction and building activity shows an improvement. Prices are holding unchanged and are as per current market pages.

Boiler Tubes Easier

Toronto.

The demand for boiler tubes is still light and "scrappy." Prices have gradually eased and lower quotations are being made without definite reductions. The following quotations are current:

	Per 100 feet.	
1 inch	26 50	....
1¼ inch	27 50	....
1½ inch	28 00	....
1¾ inch	30 00	....
2 inch	30 00	25 00
2¼ inch	33 00	29 00
2½ inch	44 50	32 00
3 inch	49 00	40 00
3½ inch	65 00	44 50
4 inch	85 00	55 00

Lead Products Firm

Toronto.

There has been no further change in the price of lead and zinc products and sales are reported to be fairly steady if not large. The primary pig lead markets in the United States are slightly firmer although prices are not advanced. Stocks of lead and zinc are ample for present rate of consumption but production is less, and the undertone is stronger. The following are the present quotations:

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 34
Do., strictly, lb.	0 24
Do., commercial, lb.	0 22
Do., guaranteed, lb.	0 27
Do., wiping, lb.	0 22
Zinc sheets, per lb.	0 16

No Change in Sheets

Toronto.

Prices on sheets and plates generally are held unchanged since the last report and continue to show some variations. Business is reported to be light and though some improvement is shown here and there it is still "spotty." New business continues to be light on United States markets, and though the amount of business put through at the new prices is small sellers express no doubt that the prices will hold for some time as neither the Steel Corporation nor the independents seem disposed to reduce prices further at the present time. The following are the nominal quotations here:

PLATES

10 gauge	from $5 00 to $6 00
12 gauge	5 05 6 05
14 gauge	5 10 6 10
16 gauge	5 20 6 20

BLACK SHEETS

14 gauge	5 10 to 6 10
16 gauge	5 20 6 20
18-20 gauge	5 75 6 75
22-24 gauge	5 80 6 80
26 gauge	5 85 6 85
28 gauge	6 00 7 00

Prices shown are for full cases. An extra charge of from 25c per 00 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	8 60 to 9 60
U. S. 28	8 20 9 20
U. S. 26	7 90 8 90
22 and 24	7 75 8 75
18 and 20	7 60 8 60
16	7 45 8 45
12 and 14	7 40 8 40

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Waste Materials Sluggish

Toronto.

The condition of the waste markets is still sluggish and the consuming demand shows no quickening. Buying is largely hand to mouth and few dealers look for much improvement for a while. Signs of improvement have not been lacking but manufacturers using waste have large stocks on hand. Prices are mostly easy but holders are waiting for higher prices and are not pressing sales. The following are nominal prices for fairly large quantities:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	19 00 20 00
Yellow brass	6 50 7 50
Red Brass	10 00
No. 1 machinery cast	24 00 25 00
Heavy melting steel	13 50 14 50
Heavy Copper	10 50 11 00
Scrap zinc	3 75 4 25
Light brass	4 00 4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50 14 50
Scrap pipe	8 00 9 00
Heavy lead pipe	4 00 4 50
Old rubbers, boots and shoes	2 00 2 50
Overseas lumbermen's rubber boots	1 50 2 00
Auto tires	0 50 1 00
Solid tires	0 75 1 25
Tea lead	1 75 2 00

Better Tone in Ingot Metals

Toronto.

There is a better tone to metals this week, but the demand is not well defined and ingot metals are still very irregular. Tin has advanced 2½ cents, lead is firmer, copper, however, is disappointing to sellers and is weaker. Spelter is more active and more demand is shown for the other metals.

TIN.—This metal has advanced 2½ cents per pound on local markets. United States markets are higher on an advance of £6 in London and an advance of one cent in sterling exchange. A fair amount of speculative buying is reported. Quotations here are 38½ cents.

COPPER.—Consumers are reported to be in the market for copper but are not very anxious to close orders as lower prices are reported. Foreign buying lacks animation in United States markets and a light domestic consumption is reported. The trend is towards weakness but prices are unchanged here at 18 cents for casting copper.

LEAD.—There is an improved demand for this metal and the tone is firmer on home markets and in the United States, but London markets eased off and prices dropped 7s. 6d. to £20 15s. for spot. Prices here advanced 25 cents to $6.25.

SPELTER.—This has been the most active metal in the market and on United States markets has registered advances each day. Producers are not disposed to quote ahead. English markets are also firmer. Quotations here are unchanged at $7.25.

ANTIMONY. — Increased inquiries have developed more strength on United States markets in this metal. Quotations locally are unchanged at 8 to 9 cents.

ALUMINUM.—An improved demand is noted and prices generally are unchanged. The local price is 30 cents.

London Markets

LONDON, April 28.—The chief price change this week is the reduction made in wood handle quotations, including all hickory handles, harvest and garden tool handles, cant-hook, and peavy handles as well as neck yokes, whiffletrees, etc. Garden wheelbarrows are quoted lower. Reductions have also been made in the prices of washboards, emery cloth, steel squares, and glaziers' points.

Business on the whole has been fair although the wet weather experienced last week set things back a bit. Sales on all seasonable lines such as garden tools, lawn mowers, screen wire cloth, doors and windows, poultry netting, etc., are good and collections are holding up well.

Linseed Oil Price Holds

London, Ont.

There has been no change here in the price of linseed oil this week and last week's quotations of 77 cents in single barrels still holds. There is a good movement just now and sales have much improved. The following are present quotations:

Linseed Oil.	Raw.	Boiled.
1 to 2 barrels, per Imp. gal.	0 77	0 88
3 to 5 barrels, per Imp. gal.	0 76	0 79
6 to 9 barrels, per Imp. gal.	0 75	0 78

Less barrels, add 15 cents per gallon.

Turpentine Advanced 5 Cents

London, Ont.

Turpentine prices advanced 5 cents per gallon as was forecast in last week's report. There is a very good demand at present. The following is the present quotation:

1 barrel lots, per Imp. gallon	0 95
2 to 4 barrel lots, per Imp. gal.	0 94
5 gal. lots, per Imp. gal.	1 10

White Lead Sales Good

London, Ont.

Sales of white lead in oil are good at the present time and orders are more numerous each week. Prices are holding unchanged and the following are current quotations:

	Tons.	Less Tons.
Pure, per 100 lbs.	$14 95	$15 30
Elephant, per 100 lbs.	15 45	15 80

Nails Are More Active

London, Ont.

With the opening up of the building season there is more activity in nails and the demand is increasing. The wire nail base is held at $4.65 per keg, and the cut nail base at $6.

Rope Sales Improved

London, Ont.

Rope sales are improving, although they are still lighter than other seasons. Booked orders are now being forwarded. There has been no change in prices and quotations are still the following:

Pure Manila, 24½c lb. base; Beaver Manila, 20c; New Zealand Hemp, 20c; Sisal, 18c.

Paris Green Going Forward

London, Ont.

Booked orders for Paris green are now being shipped. Prices remain unchanged from the figures announced at the opening of the season and are the following:

½ lb. pkgs., 52c per lb.; 1 lb., 50c; 25 lb. drums, 48c; 50 lb. drums, 46c; 100 lb. drums, 46c; 250 lb. kegs, 44½c; 600 lb. barrels, 44c.

Emery Cloth Declines

London, Ont.

There has been a reduction in the price of emery cloth, and it is now being quoted at list plus 33 1-3 per cent. The old quotation was 52½ per cent. on list.

Roller Skates Selling Well

London, Ont.

Roller skates are enjoying a good demand this spring and good sales are being made. The price on the No. 3 Union Hardware Co. make with plain steel wheels is $1.55 per pair. The No. 5 with ball bearing wheels is quoted at $3.65 per pair.

Wash Boards Down 10 P.C.

London, Ont.

A reduction of about 10 per cent. has been made in the price of some lines of wash boards, and the following are the new quotations:

Zinc "Globe, per dozen	$5 85
Glass "Diamond King," per dozen	7 90
Pony, per dozen.	2 70

Wood Handles Are Reduced

London, Ont.

A decline of approximately 10 per cent. has been made in the price of wood handles, and the following are the new quotations at lower levels:

All hickory handles, list, plus 20%.

Fork, hoe, rake, shovel, spade, and manure fork handles, list, plus 10%.

All oak, maple, and ash handles, list, plus 10%.

Maple cant-hook and peavy, list, plus 10%.

Maple and ash pike poles, list, plus 30%.

All carriage goods, doubletrees, whiffletrees, and neckyokes, list, plus 10%.

Garden Wheelbarrows Lower

London, Ont.

Slightly lower prices are being quoted on garden wheelbarrows and the following are the new quotations:

No. 0, $5.25 each; No. 1, $6.35; No. 2, $6.35; No. 5, $6.75; No. 6, $6.75.

Carpenters' Squares Decline

London, Ont.

Reductions have been made in the prices of some lines of steel carpenters' squares and the declines approximate 10 per cent.

Glaziers' Points Lower

London, Ont.

Zinc coated glaziers' points are now quoted a little lower and the new price is 12 cents for ½-pound packages.

Good Demand For Netting

London, Ont.

The demand continues active on galvanized wire poultry netting and the Canadian make is selling at list plus 10 per cent. for both the 1-inch and the 2-inch mesh.

Screen Wire Cloth Moving

London, Ont.

The demand for screen wire cloth is keeping up well and sales are good at present. The black painted cloth is quoted at $3.50 per 100 square feet.

Harvest Tools Move Well

London, Ont.

Harvest tools are moving nicely now and shipments are going forward of booked orders. The garden and harvest tools are selling at list less 50 and 10 per cent. and spades and shovels, which are also in good demand, at list less 35 per cent.

Fair Sales on Mowers

London, Ont.

Lawn mowers are moving out now in fair quantities and a good season is expected. Sales on the Taylor-Forbes make and the Brockville line are being made as follows:

Taylor-Forbes Make—Woodyatt, list, less 10%; Star, list, less 10%; Empress, list, less 15%; Daisy, list, less 15%.

Brockville Make—"K," C, and BB, net list.

Screen Doors & Windows Selling

London, Ont.

Sales on screen doors and screen windows are active now and these goods are moving out well. Prices are held unchanged at previous quotations.

Spring Hinges in Demand

London, Ont.

There is a good demand for screen door spring hinges and the following are the prices on some of the better known lines:

No. 20 or No. 200, Japd., doz. pr.	$2 50
No. 44 or equal, loose pin, Jpd., doz. pr.	3 00
No. 50 Double Acting, Japd., doz. pr.	7 00

Coiled Door Springs Selling

London, Ont.

Coiled door springs for use on screen doors are also selling well now and are quoted as follows:

No. 2, 75c doz.; No. 3, 85c; No. 4, 95c; No. 5, $1.10.

Quotations on Sprayers

London, Ont.

At this time of the year merchants are getting in their stock of sprayers and syringing pumps and there is a very good sale on these lines. The following are prices on some of the better sellers:

Eureka Make—No. 112 Tin Well, $6.75 doz.; No. 114, Glass Jar, $10.00; No. 110 Galvanized Compressed Air, $7.75, each; No. 111, Brass Compressed Air, $10.00 each.

English Brass Garden Syringes—1½ x 18 in., $24.50 doz.

Garden Shears Selling Well

London, Ont.

There is a good demand for hedge or garden shears, also for sheep and grass shears. These lines are moving well now and the following are some of the prices:

English Hedge or Garden Shears—8 in. plain, $1.75 pair; 8 in. notched, $2.00; 9 in. plain, $2.00; 9 in. notched, $2.25.

English Sheep and Grass Shears—No. 5G x 6 in., bent, $10.35 doz.; 5G x 6½ in., bent, $10.85; K20 x 6½ in., bent, $13.75; BBA x 7 in., straight, $28.50.

American Grass Shears—No. 4, $4.00 doz.

Cultivators and Drills Sell

London, Ont.

Cultivators and drills for market and truck gardens are in demand now. Quotations on some of these are as follows:

Cultivators—No. 4, $5.50 each; No. 8, $6.75; No. 10, $7.25.

Seed Drills—No. 1, $11.25 each; No. 2, $13.75.

Wrought and Steel Pipe Reduced

London, Ont.

Reductions have been made in prices of wrought and steel pipe and the new list is as follows:

Price List No. 51. April 25th, 1921.

Standard Buttweld Pipe S/C

Per 100 feet.

Winnipeg Markets

WINNIPEG, April 28.—Several important price changes have been made this week in hardware commodities. Window glass, tin-plate, sheet zinc, anvils, box vises, cut nails, wrought iron washers, leather belting, lamp chimneys, lantern globes and candle wick packing are all reduced in price. Wrought and steel pipe are again lowered.

Although declines continue to be made in various lines there is a steadier tendency in the primary markets.

Business is improving gradually and orders being received by wholesalers and manufacturers make a better showing every day.

Candle Wick Packing Declines

Winnipeg.

The price has been reduced on candlewick packing and it is now selling at 48 cents per pound.

Lamp Chimneys Lower

Winnipeg.

Prices have been lowered on crimp top and Rochester lamp chimneys and following are this week's quotations:

Crimp Top—	Case Lots.	½ Cases.	Doz. Lots. Per Doz.
No. 1	$13 00	$7 00	$1 70
No. 2	10 80	6 00	1 90
Rochester—			
No. 2, per dozen			$2 40
No. 3, per dozen			3 50
Belgian—			
No. 00, per dozen			3 60
Pittsburgh Mammoth—			
No. 89, per dozen			5 00

Lantern Globes Decline

Winnipeg.

The prices have been reduced on lantern globes and these are quoted as follows: Cold blast and short lantern globes, any quantity at $1.50 per dozen. Railroad lantern globes, plain, at $2 per dozen.

Sheet Zinc Reduced

Winnipeg.

The price of sheet zinc has dropped 7½ cents and it is now selling at 17½ cents per pound.

Anvils Reduced

Winnipeg.

The prices have been reduced on blacksmiths' anvils and are quoted this week as follows:

Vulcan—No. 5, $11.70 each; No. 7, $13.95; No. 8, $15.30; No. 9, $17.10; No. 10, $18.90; No. 11, $20.70; No. 12, $22.50; No. 13, $24.40; No. 14, $26.10; No. 15, $27.90; No. 16, $29.70.

Peter Wright—60 to 79 lbs., 28c per lb.; 80 lbs. and over, 26c; 80 lb. Clip horn, 27c.

Window Glass Reduced

Winnipeg.

A reduction has been made again in the price of window glass, but it is expected that the bottom has been reached and no surprise would be felt if glass prices were to advance again before long. Quotations now in effect are the following:

16-oz., 100-ft. cases—0 to 25, $7.50 per case; 26 to 40, $9.22; 41 to 50, $9.98; 51 to 56, $10.30; 61 to 70, $10.70.

21-oz., 100-ft. cases—25 to 40, $14.18 per case; 41 to 50, $14.86; 51 to 60, $15.82; 61 to 70, $16.42; 71 to 80, $17.18; 81 to 85, $19.78; 86 to 90, $20.74; 91 to 95, $22.98; 96 to 100, $27.58.

Leather Belting Reduced

Winnipeg.

Prices on leather belting have been reduced another 10 per cent. and following are the new quotations:

Agricultural, 15, 10, 10 and 10% off.
Standard, 15, 10 and 10% off.
Extra, 15 and 10% off.
Leather Logging, 15, 10, 10 and 10% off.

Tinplate is Down

Winnipeg.

The prices have been lowered on tin plate and following are the new quotations:

In full boxes—	
1C, 20 x 28, per box	$23 75
1C, 20 x 33, per box	28 50
1X, 20 x 28, per box	27 00
1X, 20 x 33, per box	33 50
In half boxes—	
1C, 20 x 28,	12 50
1C, 20 x 33	14 75
1C, 20 x 39	18 00
1X, 20 x 28	14 00
1X, 20 x 33	17 25
1X, 20 x 39	20 50

Morris Box Vises Reduced

Winnipeg.

The prices have been lowered on Norris solid box vises and are as follows:

35 lb., $12.40 each; 40 lb., $13.00; 45 lb., $13.75; 50 lb., $14.50. 55 lb. and larger, 28c per lb.

Wrought Iron Washers Reduced

Winnipeg.

The prices of wrought iron washers have been lowered again this week and the following prices are now in effect:

	Case Lots.	Less.
3-16	$15 50	$16 00
1/4	13 70	14 20
5-16	12 90	13 40
3/8	12 00	12 50
7-16	11 30	11 80
1/2	10 90	11 40
9-16	10 80	11 30
5/8	10 70	11 20
3/4	10 60	11 10
7/8	10 50	11 00
1	10 50	11 00
1 1/8	10 50	11 00
1 1/4	10 70	11 20
1 3/8	10 70	11 20
1 7-16	10 70	11 20
1 1/2	10 70	11 20

Linseed Oil Unchanged

Winnipeg.

The price of linseed oil remains the same as last week and is $1.05 per gallon for raw and $1.08 for boiled.

Turpentine: No Change

Winnipeg.

The price of turpentine has not changed this week and is still quoted at $1.30 per gallon in barrel lots.

Cut Nails Are Lower

Winnipeg.

The price of cut nails has been marked down 50 cents per keg and they are now quoted at $7.25, base, f.o.b. Winnipeg.

Pittsburgh Markets

PITTSBURGH, April 28.—Steel prices as a whole are considered to be stabilized, both the independents and the Steel Corporation quoting the same prices, and there is believed to be small possibility of any further reductions in the near future. If the Corporation were disposed to reduce wages there might be a chance of some declines in prices, but even that is only a bare possibility. As regards the independent mills, it is stated that they have had enough of price cutting for some time.

A few manufactured steel products are showing some reductions, and included in these are track and boat spikes, rivets and chain. It is noted that these products have a larger spread above the raw material than formerly. Very little new business is being booked and most of the present business comes in the form of release of previous orders.

PITTSBURGH, April 28.—Practically the whole steel market is now equalized as between the Steel Corporation and independents, as both parties are quoting the same prices, and the market may also be considered stabilized since there is very little chance that in the near future the Steel Corporation will reduce its prices farther or that the independents will cut prices.

Steel prices are now quotable as follows:

Billets	$37.00
Slabs	38.00
Sheet bars	39.00
Small billets	39.00
Forging billets, f.o.b. Pittsburgh or Youngstown	42.00
Rods, Pittsburgh	48.00
Bars	2.10c
Shapes	2.20c
Plates	2.20c
Hoops	2.75c
Wire	3c
Wire nails	$3.25
Standard steel pipe	62½ per cent. basing discount
Blue annealed sheets	3.10c
Black sheets	4c
Galvanized sheets	5c
Tin plate	$6.25

The Steel Corporation

As to the future of prices, it is plainly the present policy of the Steel Corporation not to reduce its prices farther, until conditions change fundamentally. The Corporation would hardly reduce prices farther without reducing wages, and it does not desire to do this, at least at present. There is a possibility that it would be disposed to reduce wages after two adjustments now in abeyance are made, these being wages and working conditions on the railroads and in the building trades respectively. However, even at that the Steel Corporation might modify its wages considerably without furnishing a basis on which a reduction in its selling prices could be predicated, because it contemplates at some time eliminating the twelve-hour day, though not necessarily by replacing it with a straight eight-hour day as carelessly assumed and commonly reported, and in that way incomes of men might be reduced without the wage cost of producing steel being made less. The Corporation has absorbed several large items as it is. The Industrial Board prices of March 21, 1919, being regarded as fair, the Corporation has:

(1) Absorbed the wage advance of February 1, 1920.

(2) Has absorbed the freight rate advances of August 26, 1920.

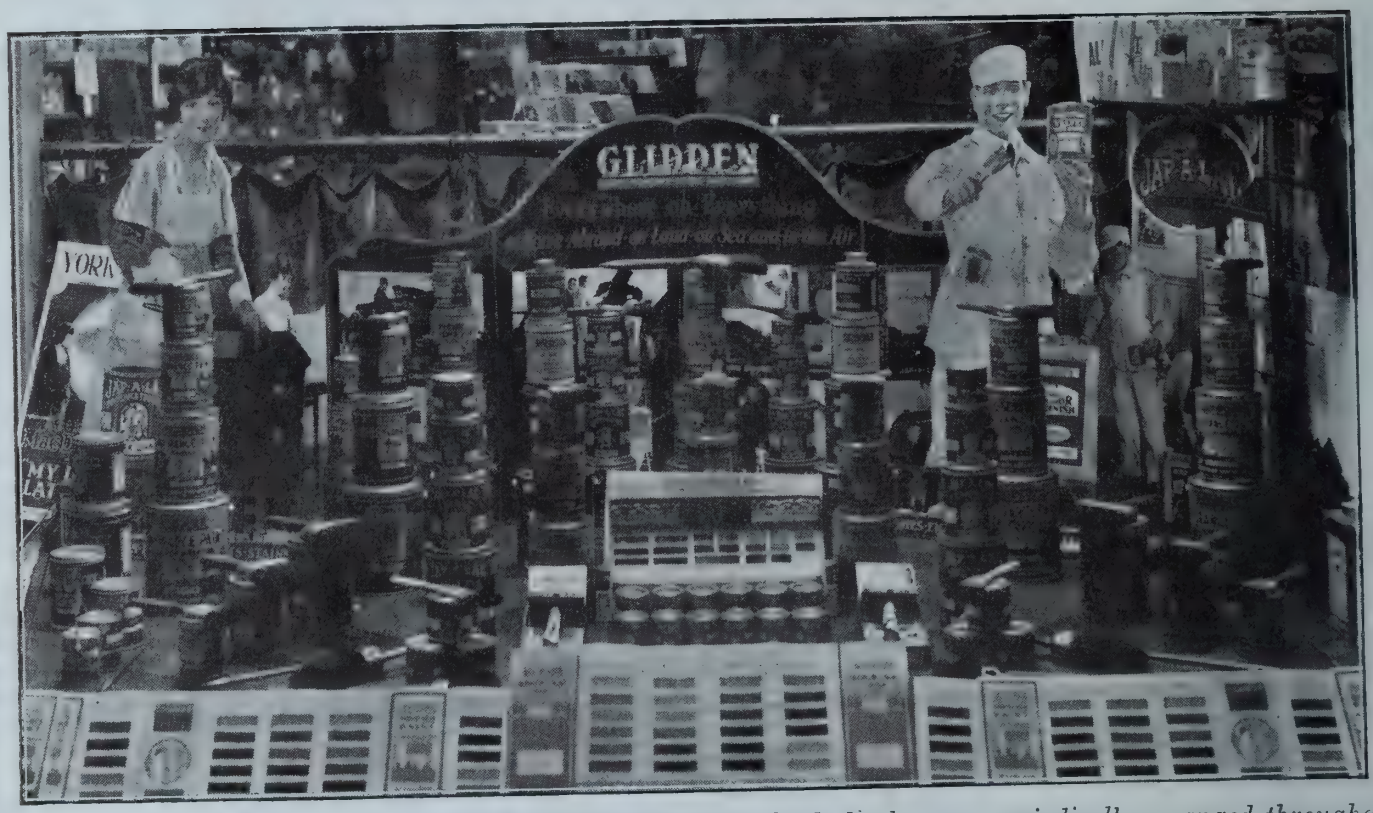
(3) Has absorbed the recent reduction made in its selling prices from the Industrial Board schedule.

The Independents

The independents are in no mood to indulge in another crusade of price cutting, for several reasons. The recent cutting, from about the beginning of February to the early part of April, did not bring them much business, and it is plain now that there is not a great deal of business to be had, not enough to give them an economical operation. If they had a light operation at present prices and could get a full operation by cutting prices slightly it would pay as their costs would be greatly reduced, but the additional business, if any at all additional could be secured, would not give them enough lower cost to justify the concessions. This is the theory, one that all the independents subscribe to now, but, of course, it does not follow that the independents will never cut prices again. They may become restive after a time, or suspicious of each other.

Manufactured Steel

Some manufactured steel products, made from the regular rolled steel products of the mills, have lately been reduced, and a little summary may here be given, the following prices being those now accepted as representing the market:



Standard railroad spikes	3.30c
Small spikes, ½, 7/16 and ⅜-inch.	3.65c
5/16-inch.	4.25c
Boat and barge spikes	3.85c
Track bolts	4.50c
Cold finished steel bars	3.10c
Cold rolled strip	5.50c
Button head structural rivets	3.50c
Cone head boiler rivets	3.60c
Chain, 1-inch proof coal	6.35c

Some of these prices are more or less in keeping with the prices of the rolled products from which they are made, but others show much larger percentage spreads above the raw material than obtained before the war. That is probably true of the majority of things made from steel, so that the ultimate buyer, who is the real consumer, does not get the full benefit of reductions the steel mills have made. While the steel mills never think of criticizing their customers in a matter of this sort, it is obvious that the actual consumption of steel, if to any extent it is regulated by the price the consumer must pay, is not entirely subject to the dictation of the steel mills, in their making of prices at which they will sell their products. In some quarters outside the trade, including some banks and John Skelton Williams, former controller of the currency, there has been criticism of the steel mills for not reducing prices, on the ground that the steel producers could broaden the

Trebles Paint Trade in Two Years

Some Important Points in Developing a Household Trade in Paints, Varnishes and Specialties—Emphasizing the Preservative Quality of Paint in Some Concise Illustrations—Much Need for Information to be Given Customers

Paint display by Staples' Hardware, Yonge St., Toronto. Such displays are periodically arranged throughout the year and the argument advanced by the display is supported by the paint department itself which faces the customer immediately upon entering the store. During the busy paint season displays such as this are arranged every second week. This store's trade is largely of the household variety, the windows are largely relied upon for new business and "satisfied customers" are relied upon to spread the word among the housewives of the district. Brushes are always shown in conjunction with the paint displays and generous use is made of color cards.

THE paint business of the Staples Hardware, Yonge Street, Toronto, has trebled in the past two years, according to the statement of Mr. Staples made to Hardware and Metal. The present proprietor of this business took over the store about two years ago at a time when the trade was somewhat run down through inattention and it was to this problem that attention was devoted. The class of trade in the district has been studied closely and steps taken to secure the maximum amount of business from customers and prospects.

Mr. Staples early found that his trade was to be largely of the household variety, which he claims to prefer on the ground that it is cash business and one providing the merchant with a better opportunity of establishing personal relations with his customers. Several changes were effected in order to cope with this class of trade; a complete range of such lines as stove bolts had not formerly been carried, nor, according to the proprietor, are the smaller sizes carried by other stores in the vicinity. He has put in a stock of the smaller size bolts in order to complete the line and finds a good sale for them.

Paints For All Household Use

One of the most important changes made was to devote more attention to the sale of paints, varnishes and specialties, with special regard to their use in the household. To this end the paint department was moved to the shelves at the front of the store and right where the customer's eye rests on entering the store. The paint stock is kept in this location throughout the year and it has amply repaid the special attention given it.

Paint displays are arranged frequently during the best painting seasons and periodically throughout the whole year. During the best seasons a paint trim is arranged about every other week and good use is made of the windows, as will be noted from a glance at the window illustrated herewith.

Mr. Staples prefers to handle one good line of paint in which he has the utmost confidence with a fairly complete line of specialties for household use. He stated to Hardware and Metal that he believes the staff has more enthusiasm where one standard line is being carried and pushed. He is of the opinion that where more than one line is carried it is not only difficult to maintain a complete stock throughout the range of colors and sizes, but it has been his experience that where a second line is carried the customer will invariably ask "which is the best." Mr. Staples states that the salesman is then put in the position of having to declare in favor of one or the other and the result is likely to set up in the customer's mind a prejudice against the line not favored by the salesman.

In the case of this store, space at present is limited and this has been another reason why a complete range of more than one line of paints could not be stocked.

Selling Health by the Canful

Paint and Varnishes help to keep the home in a healthy condition by their cleansing effect on the walls, ceilings and woodwork of the house. Every time you sell a can of "Tile-Like" or "Morelustre Enamel," you not only help to beautify the home, but aid the occupants in retaining good health.

The Brush Department

Do Not Hide Brushes in The Drawer

Much Selling Effort Now Being Put Forth on Paints—Brushes Can Well Be Linked Up With This — See That Customer Has The Necessary Tools to Do a Good Painting Job

PAINT-UP and Clean-Up campaigns are being held in many cities throughout Canada at present and other campaigns are under way to educate the public to the intelligent use of paint and varnish for preservative purposes. In linking up with all this enthusiastic effort at present the hardware merchant should keep before him the increased possibilities of such business by giving due attention to sales of brushes. After the customer's interest has been aroused and he has been brought to the place where he agrees to purchase a can or two of paint and to go about painting his house, his barn or finishing the floors, woodwork, walls or other part of the house interior, it will not be a good plan for either the customer or the merchant to let him go at the job without the proper tools necessary to produce the desired result. If he has not the right brush for the job in hand the result may be far from satisfactory.

A paint article in this issue indicates the importance of giving the customer definite information regarding the application of the paint. Here is where a few arguments favoring a certain type of brush may be worked in to good advantage. The experience of that and other hardware merchants has shown them that many customers are of the opinion that any brush will do for the job and that one brush may be used for all jobs. The solution is to get the brush display out where it will be seen, to line it up with all the sales effort on paints and to give personal attention to advocating the right type of brush with all sales over the counter.

Certain hardware merchants interviewed recently by Hardware and Metal have found such effort to be well rewarded while others are just now coming to a realization that hiding brushes in drawers will not sell them. The next few weeks should be active ones in the sale of brushes and now is the time for the merchant who has failed to give brushes the attention they deserve, to change this policy, for any attention given in this line brings good rewards in many ways.

TREBLES PAINT TRADE

Continued from page 56

The Best Advertisement

In his experience Mr. Staples has found that satisfied customers are one of his best advertisements. In the class of trade with which he deals this is likely to be more of a factor than in certain other cases, though it is always important. This hardware store caters to a large number of housewives in the district and among these women there is bound to be a certain amount of social intercourse. If one housewife customer is well satisfied with a painting job which she may have done with paints purchased at Staples' Hardware she is very likely to say so at some time to her next door neighbor, and there is no telling where this process ends.

In this connection an important factor has been that of giving information over the counter in regard to the method of application, color combinations, etc.

"No hardware merchant can know too much about paints," remarked Mr. Staples, pointing out that after his long years in the hardware business he yet could learn something on many of the points brought up by customers in the paint department. He endeavors to pass on to customers as much information regarding the ingredients and purpose of various paints and specialties so that they may become intelligent users of paint.

Education Makes Bigger Paint Sales

He is of the opinion that education will bring about bigger paint sales and is endeavoring to do his utmost to show customers the preservative value of paints. He believes the underlying idea of the "Save the Surface" campaign is good in so far as it is educational. In his own particular case he applies the idea in many different ways in order to demonstrate it more clearly. For instance, he will quote the example of the ship which sails the lakes or ocean, pointing out that ships of wood or iron can be in commission for years and years without their frames becoming weakened through rust or rot. He points out that this is due solely to the preservative qualities of paint. It is truly a strong example of what it means to protect the surface whether it be against water or against the destructive properties in the air or other elements such as snow and rain.

Mr. Staples stated that the paint trade was opening up earlier this year than last year and from present indications he expects business in this line will be active.

The illustration shows a typical paint window in the Staples Hardware. Attention is given these displays to make them as effective as facilities will allow because the windows are relied upon to a great extent in creating new business in paints and household lines. Floor finishes, wall finishes, specialties for finishing furniture, stove pipes, automobile finishes, varnishes and stains for furniture, etc., all receive a big sale in this store largely through the suggestions passed over the counter by the salesman. Such arguments as the high price of furniture, requiring better protection, the refinishing of the house floors now that the wet weather is past, the brightening up of the woodwork, and the walls, etc., are used to good advantage. Brushes are always linked up with paint sales and suggestions made as to the best size and type of brush for the job in hand. It has been found that many customers are inclined to think any brush will do and one brush will do for all purposes whether it be a big job or a small one. Ample use is made of color cards and other such literature and sample cards and cans are kept at one side of the counter where they can be easily referred to.

Hardware and Metal Is Valuable

At the conclusion of the discussion regarding paint trade Mr. Staples made mention of the value to the hardware merchant of Hardware and Metal in providing him with the selling ideas so much needed at present and in giving him prices to enable him to keep a close check upon his invoices.

PLAN CENTRAL BODY

Believing that interchange of community ideas between merchants and customers will materially assist in building up business and develop the district, the Bloor and Bathurst Streets Business Men's Association, of Toronto, Ont., recently held the first of a series of midnight frolics in Allen's Bloor Street Theatre. The event was a pronounced success and the entertainment furnished was out of the ordinary. M. E. Stanfield, the president of the association, in a brief address stated that a movement was under way to organize a central body composed of representatives of the various district business men's associations throughout the city for the purpose of assisting in making Toronto one of the premier retail centres of the Dominion.

ESTABLISHED 1856

Boeckh's Brushes Are Rubber Set

More than that, they are the very best brush made, and they're Canadian made. The fullness and the quality of bristles are unequalled. The Boeckh rubber set process is an absolute safeguard against the bristles coming out. Boeckh Brushes are perfectly made

And Absolutely Guaranteed

Which means that the dealer takes no risk whatever in handling Boeckh Products, because we stand right behind him. We are prepared, and fully qualified in every way, to give the retail hardware merchant all reasonable support and co-operation. Steady Improvement in Turpentine

Prices Not Expected to go as Low as Some had Feared — Further Advances May Occur if Export Trade is Stimulated — Rosins Advanced

THE underlying tone in the spirits of turpentine market has very perceptibly changed for the better in the past two or three weeks. The former season closed with a very pessimistic feeling, not at all unnatural with the country's business in the depressed condition it was and with the foreign prospects dubious, says the Naval Stores Review. But by degrees a more hopeful sentiment has crept in—not a glowing optimism, by any means—not a hope of great and radical changes, but a hope that, after all, prices were not going as low as some had feared, so that as a result to-day those who talked of 40-cent turpentine, or cheaper, express the belief that it may not go below 45 cents this season, or even get back to that figure. This in itself is a very encouraging symptom. No trade can recover as long as pessimism weights it down.

The lifting of the cloud is the first precursor of better times in business and no one disputes that the cloud has been slightly lifted over the naval stores' world. The London turpentine market retains its recent improvement, with the weekly deliveries continuing heavy, averaging over 2,000 barrels, and as a result of the absence of recent importations stocks of American turpentine are rapidly diminishing. While no inquiries are yet reported indicating nearby purchases for that market, it is felt that early May will bring in some orders for shipment that month. It is not believed that the orders will be large, though the London dealers are expected to pursue a conservative policy in buying, awaiting the heavier movement of the crop before entering the market in a liberal way for future requirements. Whether the prospect of the English demand has any bearing on the advances of this week on the markets on this side is not known, but one large export house has apparently been chiefly instrumental in putting up values and as other exporters are not believed to have any considerable holding of turpentine some short interests might be developed before long if receipts are temporarily lessened by the cold weather. The domestic demand is slow in improving, but it does not take much demand to absorb the April or early May receipts, and if there is any material foreign demand in the next few weeks the market may enjoy a very healthful stimulus and see further advances in prices. The knowledge of this may be what is bringing some domestic consumers in just now for spirits for their nearby needs.

Rosins Advance

Rosins have also been advanced this week. The producers are evidently holding back some of their new rosins in the woods, as indicated by the disparity in receipts of them and of turpentine. Factors and producers holding their old crop rosins strongly and producers able to keep back some of the current crop of rosins tends to strengthen the domestic markets. Everything indicates that any declines below the low levels of this month will be resisted. Everyone knows that when rosins were selling at $3.50 it was equivalent to giving a bonus to the buyer to take the stuff off the producers' hands. Even though the present crop is made more cheaply than that of the past few years it cannot be made so cheap as to sell commons at $3.50 without a loss. It is beginning to be doubted by those who were ultra-pessimistic some time back that rosins will go to the lowest figures of recent weeks again. In other words the belief is spreading that the bottom has been reached and is now in the past. While it is true that the spring activity so far is not comparable to what has been seen in previous years the trend of business is toward betterment, no matter how gradual the upward movement may be in demand and values.

E. D. Reed Received Appointment

E. D. Reed has been appointed manager of advertising and trade sales for Scarfe & Co., Ltd., Brantford, Ont. Mr. Reed was the special reresentative of the Standard Paint Co., of Montreal, some twelve years ago, later becoming connected with Messrs. Lowe Bros., whose line he introduced into Western Ontario and the Western provinces. For a short time he was located in Ottawa. He subsequently left that firm to accept a position with the Martin-Senour Co. as assistant sales and advertising manager. For the past few years Mr. Reed was merchandising manager for the Hamilton Advertising Agency, planning the Canadian Kiddie Kar campaign, McKinnon dreadnaught tire chain campaign and later becoming manager of the advertising and dealer help department of the F. F. Dalley Corporations, Ltd., of Hamilton.

ED. REED,

Passing of the Luxury Tax

One of the greatest boons to the business of the country was brought about by the Retail Merchants' Association; this was the removal of the Luxury Tax. Mr. Doyle also referred to the Welfare Fund of $50,000 which is to be established.

After remarks along other lines Mr. Doyle emphasized the fact that manufacturers, the Government and wholesalers are beginning to realize the strength of the retailers, and to find that they are a factor to be reckoned with.

The following officers for the ensuing year were elected:

President—J. P. Gordon.
Vice-president—B. W. LePage.
Secretary—W. A. Stewart.
Treasurer—Sixtus McLellan.

PRESENT STATUS OF SHEFFIELD CUTLERY TRADE

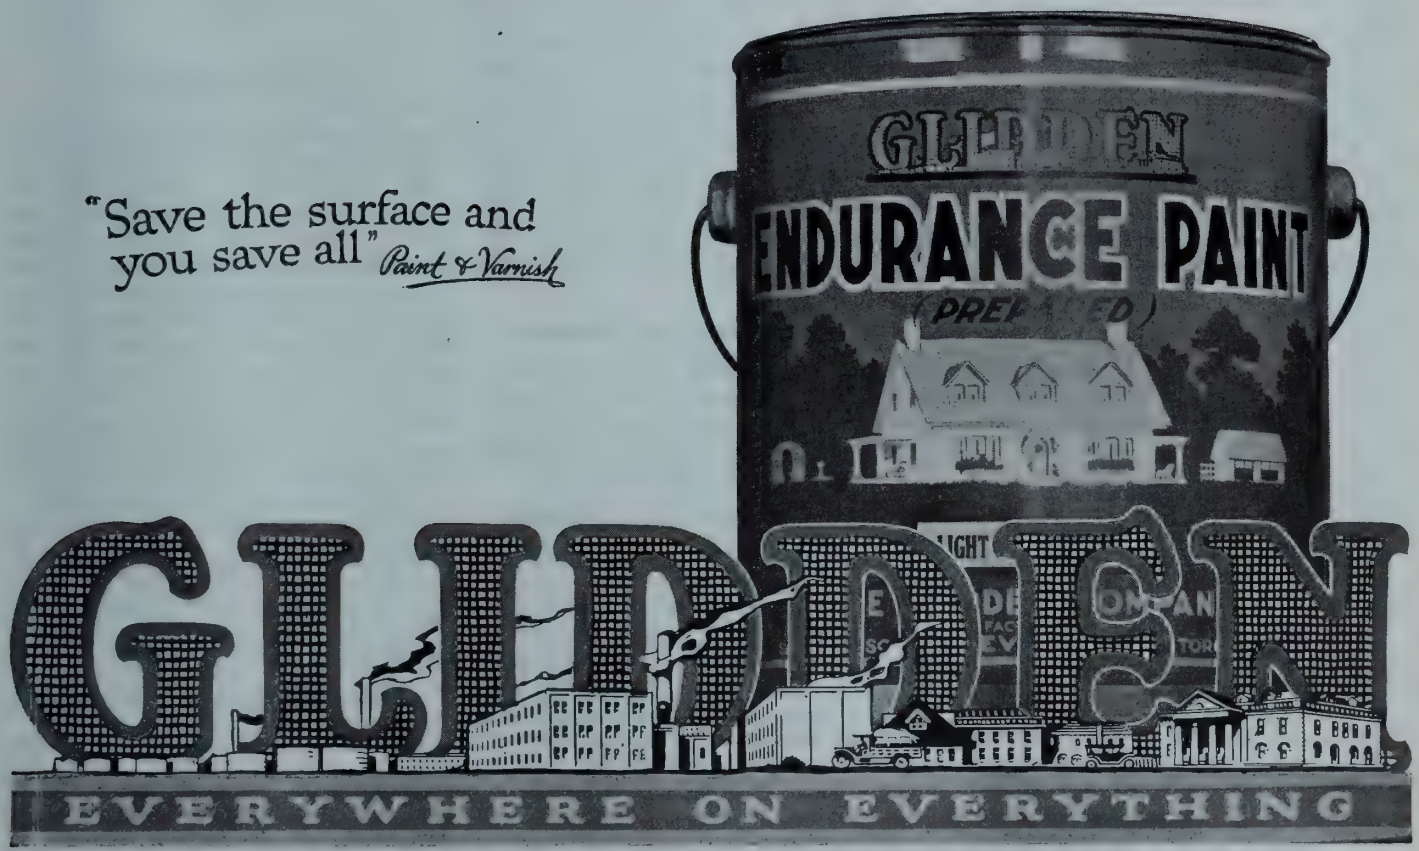
Continued from page 39

those of 1913. The home market is buying from 10 to 15 per cent. of the 1913 trade. Foreign markets are more inclined to stock up today, and it is claimed that their demands are 40 to 50 per cent. greater than those of 1913. Sheffield's best markets for cutlery are Australia, Canada, British South Africa, India, the United States, South America, and Russia. In these markets there have been many cancellations—it is estimated that the aggregate amounted to something like £750,000.

Financial Situation of the Industry—Industrial Research

Capital is scarce and the banks are not disposed to grant extensive credits. Five firms have already gone into an amalgamation called the Sheffield Cutlery Manufacturers, Ltd. There is not, however, much probability that this pooling will spread to any considerable extent for the reason that little capital is required to move small stocks, and the finished parts are readily obtained and can be assembled with a small capital outlay.

It's Well Advertised



Glidden Endurance Paint is well known among paint users. They know its high quality and are asking for it. Glidden Advertising is continually telling the Glidden story and winning customers for Glidden dealers.

The great popularity of Glidden Endurance Paint makes it a profitable line for you. It means quick turnover and quick turnover means money in your cash register. Don't crowd your shelves with unknown brands that move slowly. Glidden Endurance Paint is in constant demand and a source of continued profit.

Put in a supply of Glidden Endurance Paint at once. Its popularity and reliability will prove a valuable asset to your business. Write for the Glidden Dealer's Proposition.

Weekly Paint Markets

Montreal

MONTREAL, April 28.—The feature of the paint market this week is the advance in linseed oil prices, raw now being quoted from 79 to 81 cents in one barrel lots, boiled with the usual advance of 2½ cents over raw. Turpentine is also firmer, and an advance of 3 cents is noted. This is the first advance in either of these products for a considerable period. White lead in oil and putty are holding unchanged, also shellacs. Window glass is still unsettled but a better feeling is beginning to show. A gradual improvement continues in paints and varnishes and manufacturers are looking forward to a good year despite the fact that orders are smaller than usual. Prices on all products are steady.

Linseed Oil Advances

Montreal.

This week has shown a decided improvement in linseed oil, as a result quotations are approximately 12 cents a gallon higher. Raw oil has reached 79 cents in one barrel lots, some firms quoting as high as 81 cents, with the usual advance over raw for boiled oil. At the beginning of the week for three consecutive days the market continued to show strength and it was on these days that the 12 cent advance was realized. In the last two days, one crusher states, signs of weakness were again manifest, while others claim a stronger tone continues and a further advance of two cents was made, hence the varying in present prices. The unsteady market and continued easing of prices has now been drawn over a considerable period, when a low record of 67 cents was reached last week. However, a much healthier situation is now in evidence and the low figures of last week are thought to have hit rock bottom. Present quotations are the following:

LINSEED OIL—	Raw		Boiled	
1 to 2 barrels ..	0 79	0 81	0 81½	0 83½
5 to 10 barrels .	0 77	0 79	0 79½	0 81½

Turpentine Firmer

Montreal.

An advance of three cents per gallon was made on turpentine this week. This resulted from higher quotations from Savannah, where a much firmer market prevails. The demand in the South has improved very materially in the past two weeks, both foreign and United States consumption now increased. It is generally believed that figures of last week, when 87 cents was quoted, were lowest that will be shown for some time at least. The new crop, that in April, May and June appears on the market, will have little effect toward weakening the market, there being more likelihood of this being held for higher prices than are now quoted. Present quotations are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	0 90
2 to 4 barrel lots	0 87
Broken lots	1 00

White Lead Still Active

Montreal.

A good business continues to be done in white lead in oil, with no change made in quotations. With the future trend in all likelihood downward, dealers continue to buy light for actual requirements. Stocks in the hands of corroders are now reported comparatively light for this season. While quotations are $14 in five ton lots, $14.50 in one ton lots, and $14.85 for less quantities, lower prices are said to be obtainable for large quantities.

Putty Demand Limited

Montreal.

There is a limited demand for putty, small sorting orders being filled. Any increased activity at present will depend on building construction, as otherwise this season is not looked upon as being the time of year for any great movement. Prices remain steady as follows:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Shellac Shows No Change

Montreal.

No change has been made in shellacs, with a sorting demand being experienced. Following are present prices:

Orange shellac, in barrels, $3.50; in one gal. jugs, $3.80; white, in barrels, or 5 gal. jugs, $3.85; in one gal. jugs, $4.25.

Glass Expected to be Steadier

Montreal.

While the situation in window glass is practically unchanged, a better feeling is expected in the not far distant future. The price cutting and unsettled condition that has prevailed for the past few months has now lessened to a great extent and quotations are now on a much more equal basis. The Belgian market continues to show firmness, the general opinion being that higher levels will be reached from this source. Montreal list, less 50 per cent., is the general quotation while slightly better prices are obtainable for quantity.

Paris Green Now Shipped

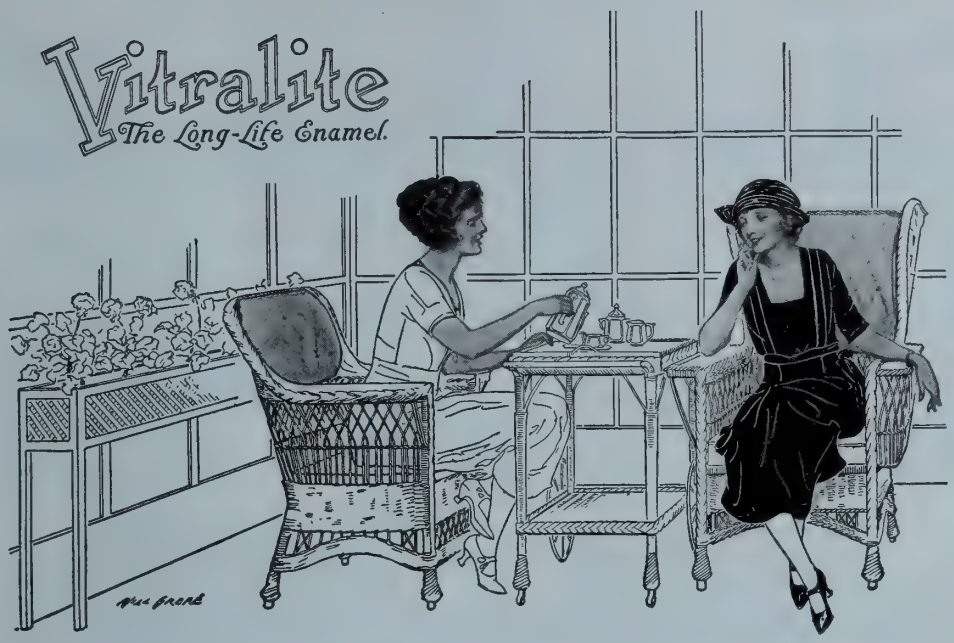
Montreal.

This season's supplies of Paris green have been shipped to those dealers who had placed their orders, but it is said that many retailers are holding back and this will cause an extra spurt when the retail sale commences. Quotations that were given out early in March are unchanged, and will be found on current paint market page.

Paints, Paint Specialties and Varnishes

Montreal.

Paint manufacturers now firmly believe that business for this season will be done in smaller shipments than in previous years, and are apparently satisfied with this method that dealers have adopted. However, when the season closes, a good year is anticipated, as dealer stocks are lower and consumption of paint is very promising at present. Varnishes are showing a fair amount of activity, confined, as is paint, to smaller orders. There are no price changes reported on any products.



Toronto

TORONTO, April 28.—Reports from different paint manufacturers and dealers show a healthy and encouraging increase in business in almost all lines despite some setbacks caused by wet weather. Smaller and more frequent orders from their customers cause manufacturers more work both in the shipping end and in the office but they have in most cases been able to cope with the demand. Prices are fairly steady in all lines and few changes are apparent. News from Belgium indicates that the market there on window glass is stiffer and prices have been advanced by Belgian manufacturers who have also curtailed production. It seems probable that it may cause an advance in prices here at a future date. Linseed oil is held at last week's price, but turpentine has advanced another 5 cents.

Better White Lead Demand

Toronto.

The demand for white lead in oil continues to steadily improve. Sales are reported to be increasing though dealers as a rule are buying in small quantities. No change is made or is ex-

Salesfolk Who Draw No Salary

Tommy, Betsy, and their friends are selling Vitralite Tints for you every day. Just because their work costs you nothing, don't make the mistake of overlooking their persistent efforts.

Reaching the better-class homes of your community through such quality magazines as the Atlantic Monthly, Century, Country Life in America, Harper's, House Beautiful, Review of Reviews, Scribner's and World's Work, the Tommy and Betsy advertisements are developing a call for Vitralite Tints as great or greater than the demand for the incomparable white Vitralite. This is no season to miss quality sales — if Vitralite Tints are not in your stock, write for the introductory proposition.

PRATT & LAMBERT VARNISH PRODUCTS

pected in prices and quotations on standard grade pure lead are $14.95 per 100 pounds in ton lots and $15.30 per 100 pounds in smaller lots.

Mixed Paints Moving Well

Toronto.

Paint manufacturers generally profess to be satisfied with the condition of affairs and the amount of business being done at the present time. Taken altogether there is a steady increase in the sales of almost all lines. And despite the setbacks on account of wet weather outside painting is going ahead exceedingly well and dealers report good business. Prices of all commodities continue to hold firm and no changes are expected.

No Changes in Putty

Toronto.

Putty is held unchanged in price. Sales are light and an increase of activity in new building construction is needed to make much of an improvement in the present demand. The following are current quotations:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

Belgian Glass List Advanced

Toronto.

No changes have been made in quotations by wholesalers on window glass, and 50 per cent. off new list is the prevailing quotation. At the same time the situation in the Belgian market is firmer. This was expected and was forecast in the last Hardware and Metal market report. It is stated that the Belgian manufacturers' prices have been advanced nearly 30 per cent. Although it is possible that this may not affect prices here for the present, owing to stocks on hand being fairly large, some importers state that they look for a firmer market with higher prices ruling as the season advances. Some good-sized orders are reported to have been placed on the Belgian markets especially for United States importers. The Belgian manufacturers are reported to be curtailing production to a great extent and if the present output is found to be too much and is not absorbed are prepared, it is stated, to still further decrease the production. The sales here of window glass are still of a small variety and little buying except for present needs is reported.

Red Lead Unchanged

Toronto.

There has been no change in red lead prices and the English genuine in casks is quoted at $13 per 100 pounds, smaller casks or kegs at $14 and in small quantities at 15 cents per pound. The tendency is stated to be for lower prices and with the opening of navigation in the St. Lawrence, which is earlier this season, some reductions are expected.

Linseed Oil is Held

Toronto.

No changes have been made this week in the price of linseed oil and quotations remain as last week at 77 cents for single barrels, raw. The demand is reported to be improving, although there is little buying except for immediate shipment. The flax seed market is fluctuating considerably and has been materially strengthened by the export of large quantities from this country to the United States in view of the expected increase in tariff duties. Little change is shown in Argentine markets. The future tendency of linseed oil is still very uncertain and crushers are unwilling to express any opinion on the subject. Quotations are the following:

LINSEED OIL.	Raw.	Boiled.
1 to 2 barrels, per gal.	0 77	0 80
3 to 5 barrels, per gal.	0 76	0 79
6 to 9 barrels, per gal.	0 74	0 77

Less barrels, add 15 cents per gal.

Turpentine Advances 5 Cents

Toronto.

Turpentine prices have been advanced 5 cents and it is now quoted at $1. Little change is noted in Southern markets and the reports on the new crop being gathered in the South will not be known definitely for a little time yet. Strong efforts have been made, it is stated, to limit the production this season. Quotations are the following:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 00
2 to 4 barrel lots	0 99
5 gallon lots	1 15

FAVORS ONE PER CENT. TURNOVER TAX

Continued from page 41

side of Canada must be included with income derived within Canada when computing the total income of the taxpayer for the purpose of this tax. Provided further that in any event the taxpayer's income tax shall not be less than if computed on income derived from Canadian sources alone.

Business Profits Tax

To this tax as administered up to the present there are the following serious objections:—

(a) It encourages extravagance in business methods.

(b) It seriously discourages enterprise and initiative.

(c) It particularly militates against the young man by taxing energy, effort and efficiency.

(d) It discourages new enterprises because the man with small capital or the man who requires to borrow receives a very small return for his risk and work, while the man with sufficient capital is loath to venture it, because in times of prosperity the Government shares largely in the profits of such ventures but is not prepared to assume its proportion of the losses in times of depression.

(e) Such tax may have serious and dangerous results to the taxpayer because of his inability in times of depression such as the present—where stocks in trade have greatly depreciated in value and are in some cases a drug on the market—to realize sufficient cash therefrom with which to pay said tax and at the same time meet his current obligations.

Should Not Be Re-enacted

The Board firmly believes for the above and other reasons that a business profits tax in any form is detrimental to the best interests of Canada, and that the business profits tax should not be re-enacted.

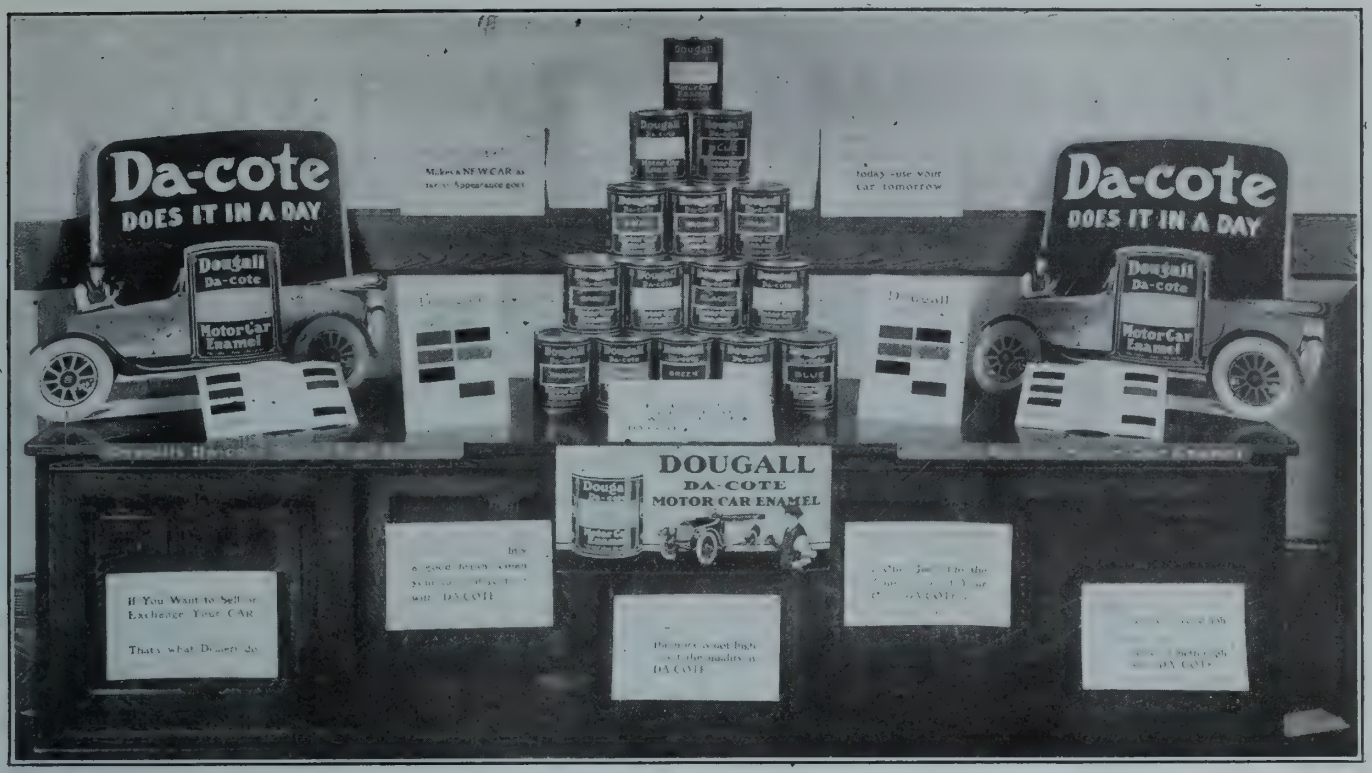
The Board is of the opinion that if the recommendations herein submitted are adopted by the Government, a much larger sum will be collected with much less friction than by the present methods, that there will be less attempted evasion of the taxes because of their fairness and the ease with which the amount of the various taxes may be determined, and that as a result capital will flow into business channels.

The Board is further of the opinion that the forms of taxation herein suggested should be known as "war taxes" and that the revenue derived therefrom should be applied as follows:

(a) In payment of interest on Canada's war debt and of war pensions.

(b) In reduction of the principal of Canada's war debt.

PITTSBURGH MARKETS



Continued from page 55

consumption by reducing their prices. This criticism, it will be seen, is not altogether well directed.

Orders

The independents seem to have corralled a fair-sized lot of business as they were withdrawing their old prices and advancing to a somewhat higher level, and this is giving them a somewhat better operation for a time, say an average rate for the independents as a whole of about 40 per cent. of capacity, against about 32 per cent. in March and 30 per cent. in both February and January. Since prices were equalized the independents have booked very little fresh business, and they are hardly likely to just at present, considering particularly the fact now developed that in some commodities the extreme prices done were much lower than the prices commonly quoted. Before the readjustment, for instance, carload lots of black sheets were quoted at 3.75c and carload lots of galvanized at about 4.75c, but it is now admitted that sales were made at many dollars a ton below these figures. The buyers involved, therefore, will hardly be in haste to make additional purchases at the 4c and 5c prices now being quoted.

As to the Steel Corporation, it is booking very little absolutely new business, and does not expect to do so. Its business must come in the form of releases against orders previously suspended, and in specifications against old contracts.

This Window Display Will Pull Sales For You

A window display like that pictured above tells the Da-cote story to the passer-by.

It beckons coaxingly to the automobile man. It reminds him—and just at the time when he wants the car to look her best—that Dougall Da-cote **applied by himself** will make the most shabby, weather-worn car look NEW again.

For Dougall Da-cote is specifically made for the "home" painting of Automobiles. A creamy brilliant enamel that anybody can apply and be well satisfied with results. Made in Black and White, and eight popular colors.

Try out a Da-cote window display. One like the above is easy to set up and is complete in itself. It will swing a big part of the Spring Da-cote demand to your store.

A Real Bicycle For A Real Boy

A Real Seller For A Real Dealer

HERE'S the bicycle that boys have long wanted and parents have long wished for.

A bicycle that looks and is a real man's bike and yet can be adjusted so that a boy of nine can ride it as comfortably as the youth of twenty. It's the bicycle the boy won't outgrow.

A real bicycle dealer does not need to be told that this **18-inch Curved Bar Model** will be a big seller. He can see its big selling features himself.

This model has the "Triplex" Hanger, the Hercules Brake, and all the other splendid C. C. M. features.

Your line is not complete without the C. C. M. 18-inch Curved Bar Model.

The 18-inch Curved Bar Model.

Liquid Granite Recognized By Master Painters

as the Best

Floor Varnish Made

After sixty years' test of quality, there is more Liquid Granite used than any other preparation made for a similar purpose.

The Luxeberry Painter says:

"Painters judge by experience, and experience has taught me, that, for a beautiful, durable floor finish which gives satisfaction to everybody, Liquid Granite has no equal."

A varnish that satisfies the painter and the public is always in demand, guaranteeing repeat orders and increasing sales for dealers handling Liquid Granite.

RED STAR WASHER

5 POINTS OF EXCEPTIONAL MERIT

1

RUNS SO EASILY

A slight pressure sends the flywheel spinning and a child can run the machine. Solidly mounted mechanism, spiral-shaped machine-cut gears and a double set of ball bearings cause it to respond to a gentle touch.

2

RUNS SO QUIETLY

The solid, compact mechanism keeps all gears in perfect alignment, eliminating friction and noise.

3

LASTS SO WELL

It runs as well after years of use as when new. Widely-spread and ample bearings endure comfortably the strains of hard work.

4

LID SO EASY TO LIFT

You can raise the dolly from among the clothes before you lift the lid, making the lid easy to raise. This adjustable dolly adapts itself to the load and washes the clothes without injury.

5

SO CONVENIENT TO STORE

The legs and the operating mechanism are detachable, so that the machine can be shipped in a compact crate which is easy to store, and can be set up quickly and easily for use.

From coast to coast of Canada, and in England too, this is the popular washer. It is quite as popular with the dealer as with the consumer because it sells easily.

If you haven't handled the Red Star, try it. Put the washer on display near the front of your store. Your lady customers will try the handle. They will marvel that it moves so easily and where a washer is needed a sale is made. The washer sells itself.

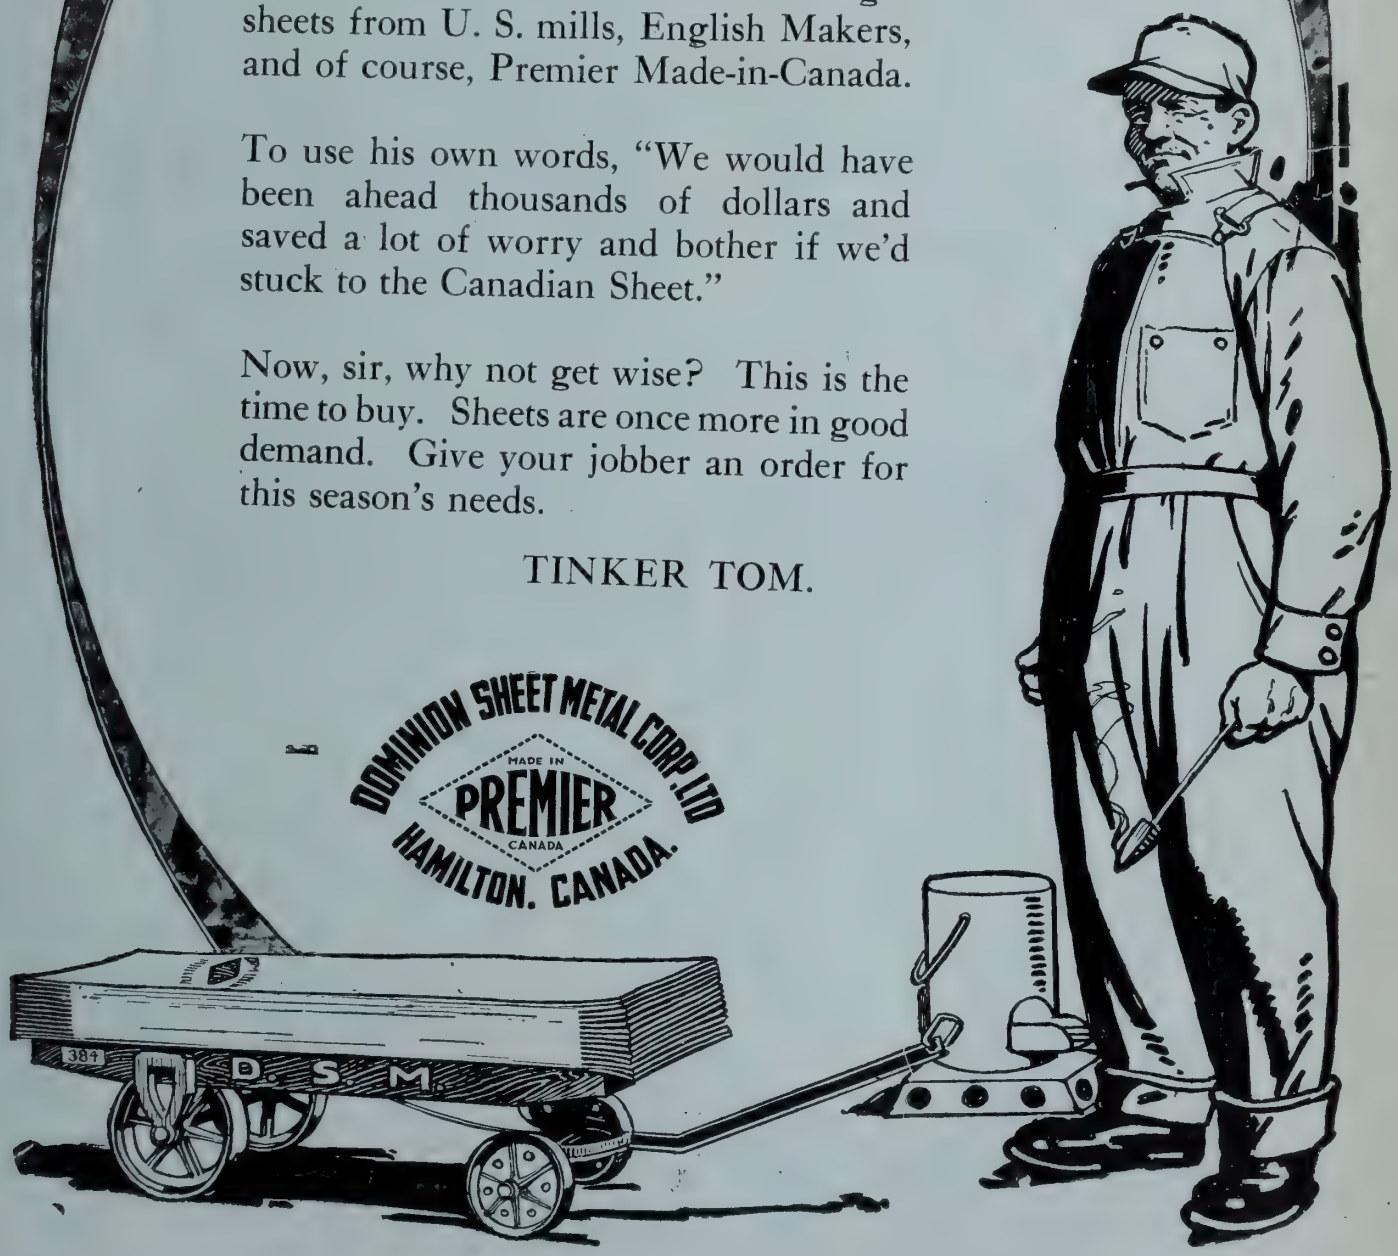
TINKER TOM'S TALKS.

No. 309



We talked to one of the shrewdest buyers in the sheet metal business the other day about prices of Galvanized Sheets. In the last six months his house has bought sheets from U. S. mills, English Makers, and of course, Premier Made-in-Canada.

To use his own words, "We would have been ahead thousands of dollars and saved a lot of worry and bother if we'd stuck to the Canadian Sheet."

Now, sir, why not get wise? This is the time to buy. Sheets are once more in good demand. Give your jobber an order for this season's needs.

TINKER TOM.

DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Stop! Prepare for Spring with

Kyanize

KY-AN-IZE

Kyanize will make floors and furniture look like new, and a cloth with warm water will keep them looking spick and span. Kyanize is the most durable finish ever made. Can be supplied in clear and eight popular colors.

Kyanize Motor Car Enamels are easy to apply, dry hard in a short time, with a beautiful lustre that lasts. Made by the celebrated Kyanize Process, they color and varnish in one operation. Nine beautiful, permanent colors, also a rich, lustrous black.

One of the many well-known lines which progressive manufacturers have placed with the J. H. Ashdown Hardware Company, Limited. The various offerings of hardware are carefully checked up by us and only those lines are offered to our customers that we can confidently recommend. Kyanize is one of these and we recommend it to retail hardware merchants as a reliable, salable line.

The Ashdown Service Backs It

WHEN EVERY PUBLISHER has a complete and efficient system of record and knows positively the facts regarding the circulation of his paper—

And when every publisher is willing to give these facts to advertisers without dissimulation—

It will be because every publisher is a member of the Audit Bureau of Circulations.

But all publishers have not an efficient system of records and all are not guileless.

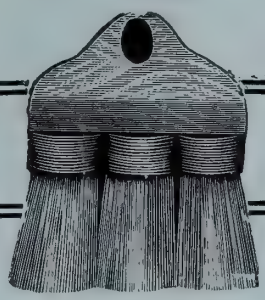
To protect themselves against unfair competition and to inform advertisers in regard to their business methods, "above board" publishers join the Audit Bureau of Circulations. Advertisers know that no unfair publication can qualify for membership.

Every straightforward paper may belong to the A.B.C.

Most of them do belong.

Hardware and Metal is one of them.

If interested tear out this page and place with letters to be answered.



THE Meakins Catalogue is a sure guide to successful brush business. In its many illustrated pages may be found brushes for every purpose, from scrub brushes to paint brushes.

We will gladly mail this complete catalogue on request. Make this season a record for sales in your brush department. You can do it with the Meakins line.

Meakins Brushes

Meakins Brushes not only sell well and bring good profits, but they actually multiply business through the more-than-satisfactory service to the consumer.

This quality of pleasing the consumer is based on sound merit. Meakins Brushes are made from selected materials by skilled workmen. The bristles of Meakins Painters' Brushes are securely fastened by our Rubber Set process—a convincing point that closes sales.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Barrett Roofings, Cements Industrial Paints etc.

THE name "Barrett" on a product helps to build up your reputation for honest merchandise at fair prices.

The goods here described are made by Canada's oldest and largest manufacturers of roofings and industrial specialties and are endorsed by thousands of satisfied users in all parts of the Dominion. Our big advertising campaign is daily creating a demand for Barrett products. Here are two popular sellers.

Plastic Elastigum Patching Cement

THE plastic cement of a thousand uses—tough, elastic, adhesive, waterproof. Easy to apply and sticks obstinately to both wet and dry surfaces.

Unequalled for patching holes and leaks in roofs of all kinds and for repairing flashings, relining gutters, stuffing cornices, lining cisterns, etc. Its life and elasticity are unaffected by changing temperatures. It *stays tight* throughout the most severe weather conditions.

Plastic Elastigum is a popular repair material for which dealers will find a tremendous demand this year.

Comes in 1-lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, ½ barrels (about 300 lbs.), and barrels (about 600 lbs.)

Relining a gutter with Plastic Elastigum

Everlastic Liquid Roofing Cement

FOR renewing the life of old and worn-out prepared and "rubber" roofing, Everlastic Liquid Roofing Cement is positively without an equal. It is easy to apply and forms a new wearing surface that is smooth, tough, waterproof and so durable that it makes the old roof good for several years of extra service.

If you want to save money for your customers you should sell them this remarkable Barrett Product.

It comes ready for use in packages of various sizes, ranging from 1-pint cans to 40-gallon barrels.

Anyone can apply it.

55 Years of Service

GIVING YOUR
Painter Customers
A BETTER SERVICE

That is the policy of the aggressive retailer; always on the lookout to get the **best** for his customers.

SIMMS **Better** Brushes—give **Better** service.

They are more durable and do not shed their bristles.

The big feature is their rubber setting, which keeps the bristles from coming out; its composition will stand any bad usage, without the loosening or destroying the **brush.**

By stocking up on SIMMS Brushes—you give to your customers **the Better Service,** and incidentally secure for you the **extra** trade and goodwill which accompanies the sale of **all** SIMMS products.

Feature **SIMMS** Paint and Varnish Brushes with your paint displays.

This is the season to sell Brushes.

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

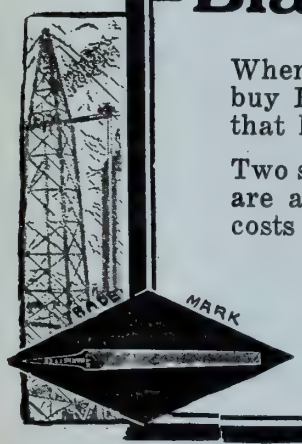
CARTER'S

Always Recommend



CARTER'S GENUINE DRY RED LEAD

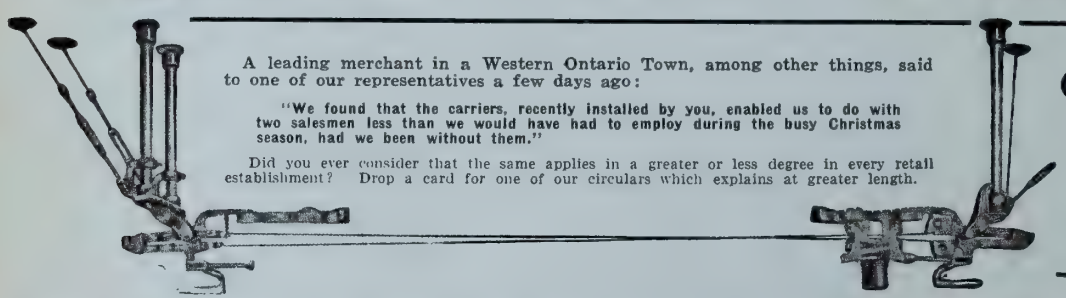
It is worth recommending. A highly oxidized and very finely ground Red Lead that is always pure, always uniform and very economical. The best protection paint for metal work, railway and marine work, steam pipes, etc.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are of a similar high quality. Write for prices and particulars.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montrea

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.



Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

A leading merchant in a Western Ontario Town, among other things, said to one of our representatives a few days ago:

"We found that the carriers, recently installed by you, enabled us to do with two salesmen less than we would have had to employ during the busy Christmas season, had we been without them."

Did you ever consider that the same applies in a greater or less degree in every retail establishment? Drop a card for one of our circulars which explains at greater length.

We tell 'em---
You sell 'em!

In the shops and factories and building operations of the country, two generations of America's finest mechanics are teaching the younger men to know Starrett Tools, and to demand them.

And in the publications that mechanics read, Starrett advertising month in and month out steadily hammers home the story of Starrett Tool quality and service.

Starrett Tool advertisements and Starrett Tool users are helping Starrett dealers everywhere to make sales—and more sales.

We tell 'em—you sell 'em. Look over the new Starrett catalog, No. 22 "M. A.," and stock up.

AHM System

Are You Selling Mileage?

Formerly motorists were content to accept any tire with a familiar name, without much thought or care about service.

Now the same men are buying mileage—buying it with the keenest determination to get the last yard of mileage for every cent invested.

Observing dealers quote this fact as the reason for the persistent and growing demand for Ames Holden "Auto-Shoes," which are miles better in performance than ordinary tires.

How many miles better, may be judged from the fact that the bulk of sales are coming in from the districts where road conditions are worst—where a 10,000-mile performance seems unbelievable.

Then the Ames Holden "Auto-Shoe" guarantee appeals to buyers of mileage. It's such absolute protection against defective material or workmanship. It permits adjustments without argument or red tape.

Altogether there are scores of reasons why you should sell Ames Holden "Auto-Shoes"—sell mileage. The best one from your point of view, being the generous policy which takes care of your interests very largely. Let us tell you about it. Write.

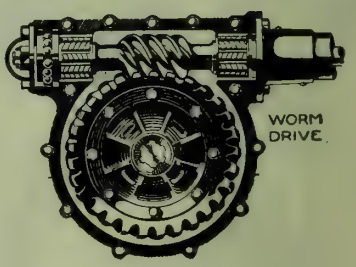
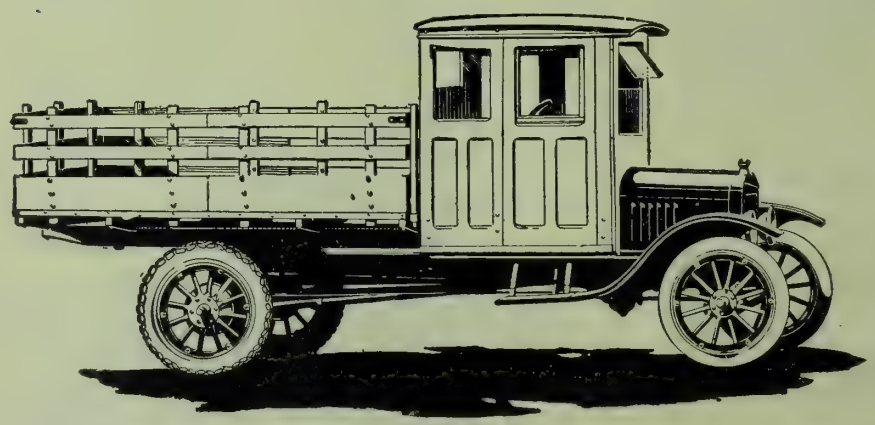
More Speed—A New Gear

for



Ford Truck



THE 7-1 Standard Worm-Gear used exclusively on the Ford Truck was designed for carrying *heavy loads* under all conditions. It has proved entirely satisfactory.

Experience has shown, however, that owners operating on smooth country roads or city pavements with light bulky loads often desire to operate at a speed of over 15 miles per hour.

To meet this condition we have designed a new gear which permits greater road speed without undue increase of engine speed. Equipped with the new gear your Ford Truck will develop a speed of from 20-25 miles per hour.

The New 5-1 Gear is now optional equipment on all Ford Trucks, or can be obtained from Ford Dealers and Service Stations for Ford Trucks now in operation.

Price $750
(Chassis only)

F.O.B. Ford, Ontario, not including 2% Federal Tax.

Starter and Electric Lighting $100 Extra.

Why Transmission Oil--

Motorists and tractor owners are fast waking up to the fact that where leakage can be prevented **transmission oil is always preferable to grease.**

It is only the oil in grease which actually lubricates. Right there is your big argument for Imperial Polarine Transmission Oil—the **all-oil** transmission and differential lubricant.

The dealer who points this out to his trade renders real service. He builds confidence and satisfaction that helps sell every line he handles. Besides he identifies himself with the campaign of education which is every day swinging his customers around to the use of transmission oil.

Start pushing Imperial Polarine Transmission Oil. Your sales will go up by leaps and bounds. Your margin of profit on every sale will be larger than on ordinary grease, too. Ask the Imperial Oil salesman about it.

Our new booklet, "Automotive Lubrication," is a big dealer help. Write to 56 Church Street, Toronto, for your copy.

CRANK-CASE SERVICE
WE SELL IMPERIAL Polarine

Imperial Polarine Crank-Case Service stimulates business for the dealer. It attracts new customers and brings more trade from old ones. Take the opportunity to entrench your business solidly. Establish Imperial Polarine Crank-Case Service and advertise the fact to car owners in your community.

Renovating Supplies for Automobiles

This is the season of the year when car owners "dress up" their automobiles for the summer months. The items illustrated below are only a few selected at random from among our varied stock and which car owners require NOW. There are hundreds of good selling lines shown in our 1921 Catalogue which Hardware Dealers can put on their shelves and turn over quickly at an attractive profit.

Rub-R-Tite Top Dressing

This preparation will renew, re-dye and waterproof mohair, imitation leather (pantasote) and rubber tops. It dries very quickly and the material remains pliable and elastic.

No.	Size Tin	Top Material
7559	12-oz.	Dark Mohair.
7560	25-oz.	Dark Mohair
7561	12-oz.	Pantasote and Rubber
7562	25-oz.	Pantasote and Rubber

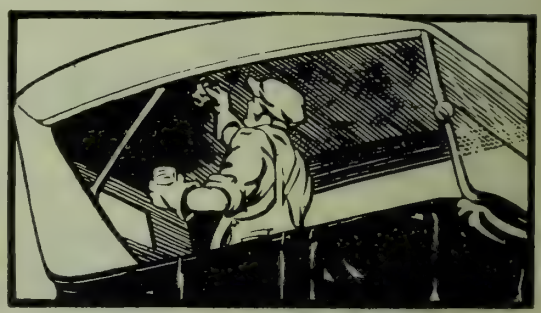
Type of Top	Price Per Tin
Runabout or small car	$0.85
Large car	1.50
Runabout or small car	.85
Large car	1.50

Leath-R-Like

For imitation leather cushions. Provides a rich, pliable and elastic finish, toughens the fabric and leaves a leather-like surface.

No. 7566—**Price**, 12-oz. tin for runabout and small touring car, **$1.00.**

No. 7567—**Price**, 25-oz. tin for large touring car, **$1.75.**



Rub-R-Tight Top Patches

A permanent mend for worn tops. In just a few moments you can apply a waterproof self-cementing, neat, strong, permanent patch. Comes in sheets 12 in. long by 3¼ in. wide. You can cut a section to cover the hole or tear.

No. 7568—**Price**, for mohair tops, per sheet, **50c.**
No. 7569—**Price**, for rubber, pantasote, or leather tops, per sheet, **50c.**

Cov-R-Blak Top Lining Dye

Applied with a sponge, Cov-R-Blak renews the top's lining by re-dyeing it a neat black. It is quick, easy work—no necessity of removing the top. Will cover all spots, stains, streaks and grime. Cov-R-Blak is made only in fast black color. A 12-oz. tin is sufficient for either a roadster or touring car top.

No. 7565—**Price**, 12-oz. tin Cov-R-Blak, **$1.50.**

Never-R-Stitch

For cementing celluloid lights to curtains. Requires no sewing or stitching.
No. 7570—**Price**, 1-oz. tin, **35c.** No. 7571—**Price**, 12-oz. tin, **$3.00.**

Nev-R-Chip Engine Enamel

Furnished in black or gray colors. Air drying, with a strong, lasting finish.
No. 7580—**Price**, 12-oz. Tin Nev-R-Chip Engine Enamel, black, **$1.00.**
No. 7581—**Price**, 12-oz. Tin Nev-R-Chip Engine Enamel, gray, **$1.00.**

B. S. A.

No. 4 Sporting Rifles

Lee-Enfield Action
Calibre .303

The B.S.A. Sporting Rifle illustrated has the same action as the famous British Service Rifle which proved so superior in the firing lines of France. In extremely cold weather the bolt always functions, a feature thoroughly appreciated by many veteran hunters where the mercury is well below zero. The Lee-Enfield action is famous for its ability to work smoothly under the worst conditions of mud, dirt or sand.

This sporting model combines the rugged strength of the military arm with the grace and beauty of the purely sporting weapon. The fore-end is shortened and lightened. The small of the stock has been curved into a handsome, comfortable pistol grip, neatly checkered.

Altogether this is a most appealing rifle for the hardwareman with shooting customers who understand and need high-powered rifles.

SPECIFICATIONS:

LENGTH, over all 45 in.—WEIGHT, 7 lb.—BARREL, 25 in. Enfield Rifling—ACTION, Lee-Enfield bolt pattern with safety catch on left side—MAGAZINE, 5 or 10 shot—STOCK, walnut, shot-gun, sporting stock in half pistol grip, checkered—Length from trigger to end of stock 14¼ ins.—SIGHTS, Back 100 yards fixed, folding leaves 200 and 300 yards, tangent leaf 400 to 1,000 yards—Front, bead—All parts strictly interchangeable.

"The Spectre"

By Guy Morton

"LONGREEN was not a quibbler.

"'I am sorry, Grimley' — he came straight to the point—'but we are compelled to dispense with your services at the end of the month. Turner's for the past six months has been having a terrible pull. We got overstocked on the rising market and now, with the market falling every day and getting more and more into the customers' hands, we have to retrench or crash. We have chosen to retrench. Every stick of decorative employment is being cut out of the store. . . .'"

What Spectre? The Spectre of Unemployment—a spectre which all too many have encountered during the past few months. If you have not personally encountered this spectre, so graphically described in its causes and consequences by Guy Morton, you may count yourself amongst the fortunate, but there will be no doubt as to your interest in his story. If you have encountered it, nothing can stop you, once you start this story, from reading it to its unusual and constructive conclusion.

It is a great piece of fiction, told by the same author who wrote "Personality Plus" in the March 15th MacLean's.

Ten Others

"The Drama of Our Great Forests": Life and Love Return— *By Arthur Heming*
This is the seventh installment in Mr. Heming's wonderful account of life in our northern forests and pictures the fascination of real romance in the wilds.

"Have Faith in Our Nationals"— *By Agnes C. Laut*
There is no use always knocking, says Miss Laut. By a constructive policy of immigration and settlement, some of these deficits can be vastly reduced.

"Conversation vs. Closure"— *By J. K. Munro*
Premier Meighen is struggling against great odds to carry through some constructive legislation. According to Mr. Munro, they are really not getting anything done at Ottawa—and he tells how they do it in his masterly, pungent, pithy, witty fashion.

"She Wasn't a 'Type' So She Became a Directress"— *By Edith M. Cuppage*
The story of a B.C. woman who wanted to get into the movies—and got there, despite everything, in the administrative side.

"Heads Million Dollar Corporation"— *By Dorothy G. Bell*
The story of a Canadian girl who went to the States with an idea that she might become a dancer, but has made for herself a niche as head of a million dollar financial corporation.

"Our Own Mediterranean"— *By Elton Johnson*
What's what at the present time in regard to the movement which is on foot to make ocean ports of our Great Lake ports.

"Making Good on Four Ambitions"— *By Sinclair Laird*
The story of W. S. Bullock, a member of the Provincial Legislature of Quebec Province, who did not know his multiplication table at 19 and is now a leading educationalist.

"Pawned"— *By Frank L. Packard*
This masterly story of a triple regeneration is drawing swiftly to its conclusion; John Bruce and Crang meet again at death-grips.

"The Gates of Tien T'ze"— *By Leslie Howard Gordon*
The first "gate' is entitled "The Gate of Wu" and starts off this thrilling, absorbing, melodramatic story with several full pages of gripping adventure.

"The Cage of Iron"— *By William Merriman Rouse*
A story of an old man who thought he could take into his own hands the vengeance which the Creator intended should be left for Himself.

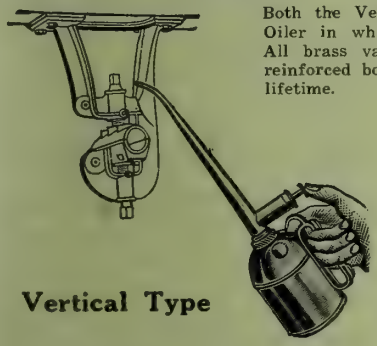
Order Northland Skis

Now for Next Season. Prices Are Down

New world's record jump is 229 feet. Made by Henry Hall, February 9, 1921, at Revelstoke, B.C., on Northland Skis.

Northland Ski Mfg. Co.

St. Paul, Minn.



FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

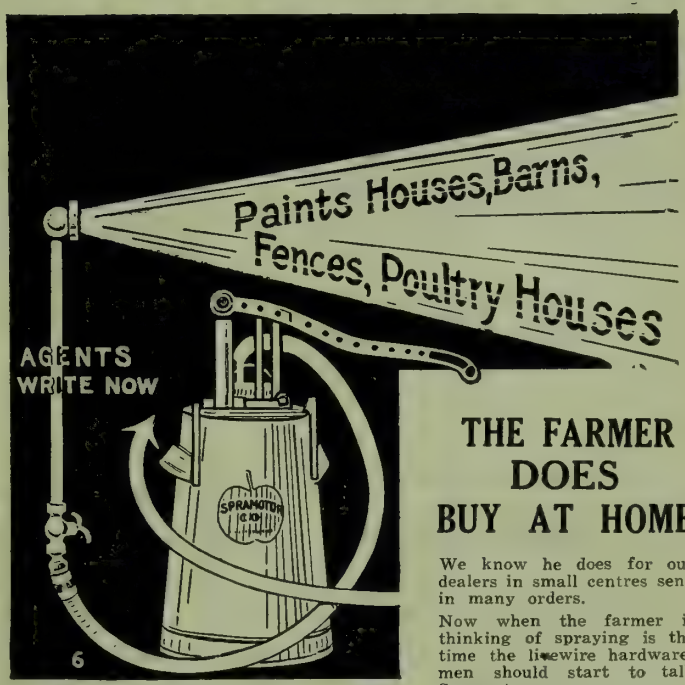
Be Good to Your Customers —and Yourself

(This advertisement tells you how to do both at the same time)

D-B CARBON REMOVER

Saves **your customer** time and money; it cleans a carbonized 4-cylinder engine in 30 minutes, by a chemical process which pulverizes the carbon at the first explosion, and then passes it out through the exhaust. **It does not harm the metal in any way.**

YOU do not take any chances when you sell **D-B Carbon Remover.** First because of its exceptional quality, second—because of our sales plan, which is an absolute guarantee to you and your customers.



We want you to offer all your customers a can on trial—**give it to them. If they find it unsatisfactory** to return it, and the trial will cost them nothing. Then WE WILL PAY YOU RETAIL VALUE for all cans that are returned for such a reason.

This is our Sales Plan, Mr. Dealer. You can readily see that it is based on quality of the goods. We know that **D-B Carbon Remover Cans never** come back as unsatisfactory.

AUTO JACK Says: "It's a Good Plan."

GOODELL-PRATT
1500 GOOD TOOLS

A New Hand Drill

No. 1616

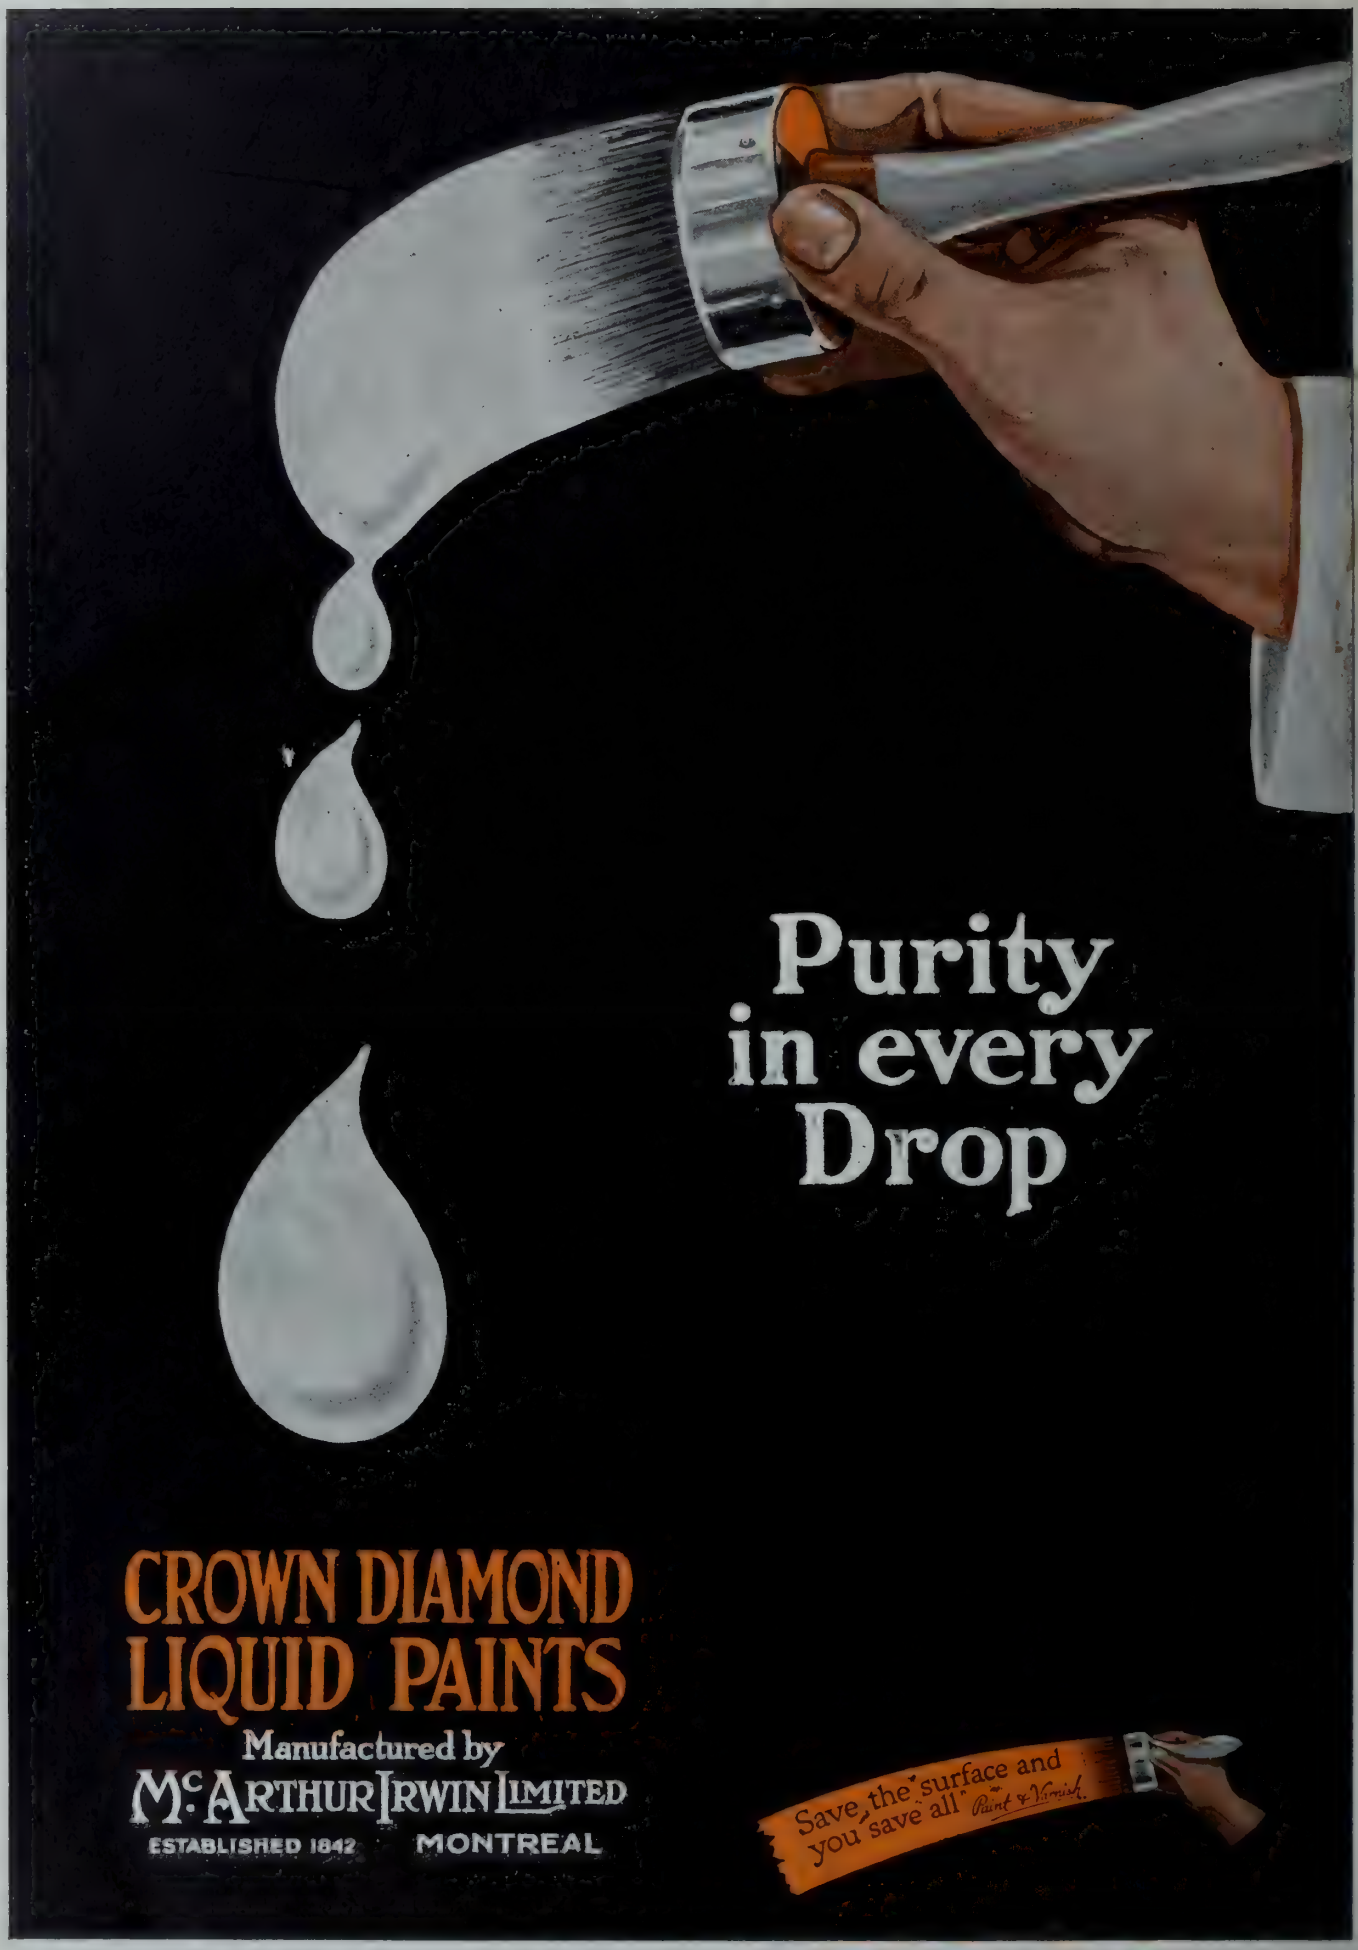
That's Going to be a Big Seller

THIS new Goodell-Pratt Hand Drill is altogether different in design and construction from any other similar tool and has features that will be appreciated by particular mechanics.

The smooth, clean-cut appearance and freedom from unnecessary attachments will do much to increase its popularity.

Some of its Features

The frame is aluminum, which gives as great strength as iron but is much lighter in weight. All gear teeth are machine cut and the pinion is steel. The steel spindle runs in ball thrust bearings, which reduce friction. Chuck capacity ⅜ of an inch.



The low price of this high-grade drill insures its immediate success.

ALWAYS IN DEMAND

But doubly so at this season

YOU should be able to sell a good Floor Mop such as this to fully half the women who enter your store this month.

Even those who have one may feel they should get better house-cleaning results with a **new** one.

To those who have not yet experienced the satisfaction of using the O-Cedar Polish Mop, point out how well it is made—the fine grade of cotton yarn and drill used—how strongly it is sewn.

But, above all, explain that it is treated with O-Cedar Polish—that is the outstanding reason for its unique success in changing dull, lifeless floors to bright, sparkling, mirror-like surfaces.

O-Cedar Products are readily recognized as "good value." They are sold at reasonable prices—and the customer cheerfully pays the full sales price which we ask our dealers to quote.

CHANNELL LIMITED

UNIVERSAL

Solid Steel Nickel Plated Cutlery

High in Quality Low in Price

HIGH in quality—low in price was once a business paradox. UNIVERSAL quantity production without quality reduction turns a paradox into a truth. Here is a line made of crucible forged steel and handsomely nickel-plated. Knives with solid handles—blades edged for clean cutting. Knives and forks carry handsome decorative patterns and are similar in size, weight and appearance to expensive grades of silver-plated flatware.

THE only thing cheap about this cutlery is its price. That is ridiculously low. But it includes a good profit for you. And you can sell this line on quantity basis—in gross lots or more. Compared with ordinary tinned ware, UNIVERSAL Nickel-Plated Steel Cutlery looks like a basket of peaches alongside a peck of potatoes. It has quality in appearance—delivers quality in service.

QUICK Lunch Rooms, Hotels, Boarding Houses, Excursion Steamers, Street Carnivals, Circuses, Boys' and Girls' Camps, County Fairs—wherever food is served to hungry hordes there is a wholesale market for this line. Then, too, there are thousands of modest homes where UNIVERSAL Solid Steel Cutlery will look better and last longer than ordinary cutlery with wood or bone handles.

Write for details about this new line. The quality will surprise you. The prices will surprise you more.

Landers, Frary & Clark - New Britain, Ct.

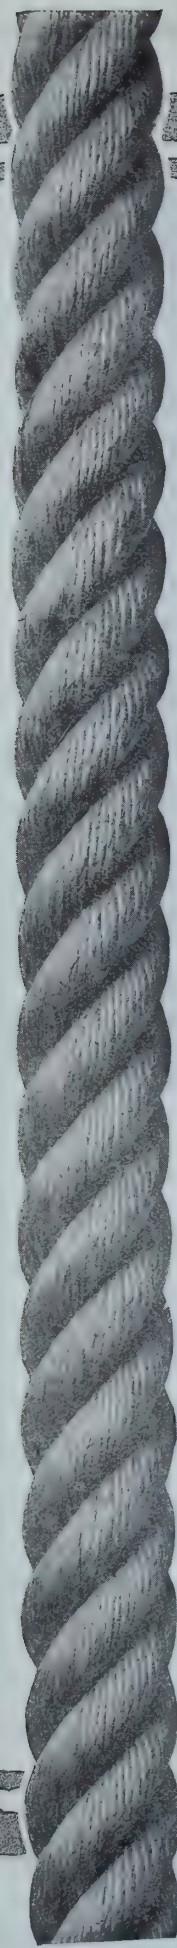
Hatch

Garage Door Outfits

To be reliable, serviceable and efficient, a set of garage hardware doesn't have to cost almost as much as the automobile. The Hatch Garage Door Outfit has all the qualities the heart could desire in a dependable outfit—yet it is low priced. Low priced, that is, for the high quality. Try it on your own garage; then you'll realize why the customers are delighted.



The Set Includes:

3 Special Swivel Door Rollers; 22 feet of Track; 3 Pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

No. 1914 Square Trolley Hanger

End View of 1915 Track

The Duke

No. 1914 Hanger and No. 1915 Track

This is the wonderfully popular seller. It has the 1915 track with the special feature that protects it from weather—ice, snow, and other accumulations that might impede the action.

The Round Running Bed Makes the Duke the Easiest Seller in the Market

The square track hanger with four-wheeled trolley, when operated on round grooves, eliminates friction and gives perfect balance and ease of operation.

Order Hangers, Track and Brackets: 1914 Hangers, packed one pair in a carton with bolts for erecting; 1915 Track supplied in 4, 6, 8 and 10-foot lengths; 1915 Track Supports.

Ask for the New Catalog.

The Finest One-Register Furnace on the Market

Jewel Pipeless Furnace

A Successful Heating Appliance

The success is very natural, based, as it is, on exceptional merit, and following where the reliable Jewel Furnaces have already blazed the trail. The efficient Jewel Pipeless has the same splendid qualities that have made the name "Jewel" famous throughout the Dominion.

Real Serviceable Heating

is the primary requirement for homes, schools, churches and other buildings. The Jewel Pipeless gives real, serviceable heating. The Furnace has two casings, the outer casing acts as a Cold Air duct, the inner casing as a Warm Air Flue.

The Duplex Register is directly over the furnace. The Outer Section is for admitting *Cold Air*, the Inner Section for delivery of *Warm Air*.

The casings can be made suitable to any cellar.

A postal request will bring full information and prices.

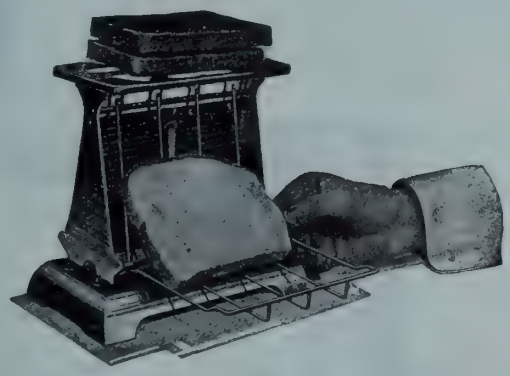
Westinghouse



Electric Appliances for the Home

Type H Iron

Tell your customers that this iron is practically indestructible, having very few parts, and no delicate pieces to get out of order.

Explain that heat radiation from the top is prevented by dead-air space between the heat-storage plate and the iron shell, so that most of the heat is retained at the ironing surface, and whatever heat is not being taken by the ironing surface is stored in the heat-storage plate; this retention of the heat making the iron stay hot longer.

Turn-Over Toaster

Also tell your customers about the Turn-over Toaster; how it makes toast right on the dining-room table; how the toast is turned by simply turning an insulated knob, there being no danger or burning the fingers.

Demonstrate this "turn-over" feature, consisting of a swinging rack on either side, hinged at the bottom, making it unnecessary to touch the bread from the moment it is first put on the rack until it is taken off toasted.

Mention how the flat surface on top of the toaster may be used to keep the toast hot, or to heat plates, keep the coffee pot warm, etc.

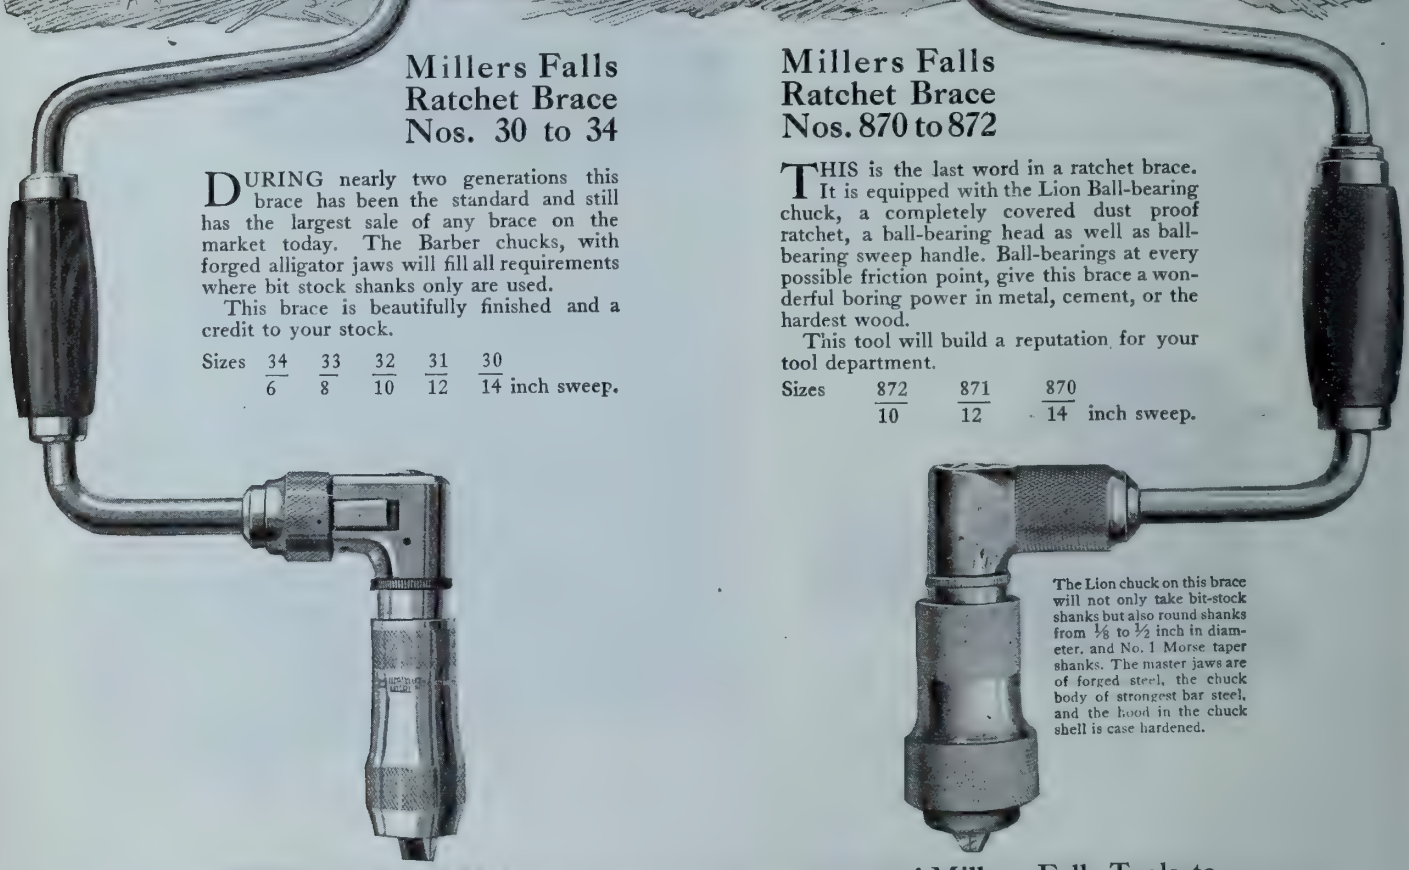
Millers Falls Tools

Carpenters Will Need These Bit Braces For Spring Building Work

Millers Falls Ratchet Brace Nos. 30 to 34

DURING nearly two generations this brace has been the standard and still has the largest sale of any brace on the market today. The Barber chucks, with forged alligator jaws will fill all requirements where bit stock shanks only are used.

This brace is beautifully finished and a credit to your stock.



Sizes 34 33 32 31 30
6 8 10 12 14 inch sweep.

Millers Falls Ratchet Brace Nos. 870 to 872

THIS is the last word in a ratchet brace. It is equipped with the Lion Ball-bearing chuck, a completely covered dust proof ratchet, a ball-bearing head as well as ball-bearing sweep handle. Ball-bearings at every possible friction point, give this brace a wonderful boring power in metal, cement, or the hardest wood.

This tool will build a reputation for your tool department.

Sizes 872 871 870
10 12 14 inch sweep.

The Lion chuck on this brace will not only take bit-stock shanks but also round shanks from ⅛ to ½ inch in diameter, and No. 1 Morse taper shanks. The master jaws are of forged steel, the chuck body of strongest bar steel, and the hood in the chuck shell is case hardened.

YOUR stock should contain a complete assortment of Millers Falls Tools to insure your getting your share of the demand that will come with spring and summer building. Ask us for suggestions on what you should carry.

Make The Housewife Your Friend For Life

"Takes Out The Drudgery With The Dirt"

SELL her a Miss Simplicity. That will do it because Miss Simplicity is such a wonderful help on wash-days. Indeed, in every sale you render a personal service that will be appreciated more and more with each succeeding week, and you place in the home a standing reminder of your store and of your service.

You can capitalize on the saving in health, strength, laundry and linen bills, effected by Miss Simplicity. Every sale increases goodwill. Every sale makes other sales easy. Miss Simplicity is indeed a business builder.

Miss Simplicity will satisfy your most exacting customer. It is thoroughly well-made; good workmanship; finest materials; mechanically perfect. Yet it is quite simple to operate, washes clothes clean, and what is especially important, sells at a strictly reasonable price.

Write for our splendid dealer proposition. You will be pleased at the splendid profits and liberal guarantee we offer. Make your store headquarters for Miss Simplicity. Let Miss Simplicity increase your friends and your business.

We will supply you with attractive advertising material to help boost Miss Simplicity sales. Full particulars will be sent with our offer.

Can a Hardware Dealer Sell Tires?

Is a Hardware Dealer too busy to give his customers reasons why it pays to buy the **BEST** Tires?

Considering the profit there is in tires, should a hardware dealer not be prepared to **PUT THE TIRE ON THE WHEEL** for his customer? Think it over.

If any hardware dealer wants to handle tires—a line that sells easiest because it gives most service, let him sell

"Gutta Percha" Tires

CORD and FABRIC

There should be good sales for a good tire through the Hardware Trade.

GOODELL-PRATT
1500 GOOD TOOLS

No. 111

Screw Drivers
Automatic and Plain
83
Sizes and Kinds

The completeness of the Goodell-Pratt line of Automatic and Plain Screw Drivers does away with the necessity of carrying several brands—still you can fill all the screw driver requirements of all of your customers.

A complete line of one make means quicker turnover from a smaller investment in stock.

Goodell-Pratt Automatic Screw Drivers are famous for power and strength. They are very efficient, great time and labor savers, and most useful in the factory, workshop or home tool kit.

Goodell-Pratt Plain Screw Drivers are made of the best materials obtainable, the blades will not turn in the handle and every one is tested to break a screw head within its capacity.

Tool Makers' V Blocks

They are a part of the machinist's equipment of handy tools. Used on small, fine layout work that requires great accuracy. Inspectors find them of great value in taking measurements in connection with a surface plate or knee. The everyday mechanic uses them for milling, drilling, etc.

Their general usefulness makes them a big seller and a profitable source of revenue.

Standardize Superior Wrenches

Standardize your stock—don't carry a miscellaneous assortment of wrenches made here, there and elsewhere. Concentrate on "The Wrench People's" standard Superior line and save the inconvenience and the many items of expense always connected with the handling of numerous brands.

For nearly half a century Williams' Superior Drop-Forged Wrenches have been leaders and mechanics everywhere realize this. That's what makes all of them a good proposition for you to handle—one good tool sells another.

Furnished in a great variety of patterns and sizes—a wrench for every purpose—the most complete line on the market. Drop-Forged Wrenches, Screw Wrenches, Stillson Wrenches, "Bull Dog" Wrenches, Adjustable Wrenches, "Vulcan" and "Falcon" Chain Pipe Wrenches, etc., etc.

Our new catalog describes them fully—it will help you to standardize Superior Wrenches.

DROP-FORGINGS

An Important Message to all Dealers in

PYREX

Oven Ware

PYREX SALES DIVISION

CORNING GLASS WORKS

CORNING, N. Y.

We are advising all dealers that present prices on Pyrex Oven Ware are guaranteed against decline for the balance of this year's requirements.

We are practically the only institution which was willing to eliminate their profit and maintain prices when it would have been easy to advance with the demand during the past five years, and we believe our customers appreciate the holding of our prices **then** and will be glad to learn **now** that Pyrex is one line they can purchase with confidence and without fear of a price slump.

We will now accept orders for shipment throughout the year.

April 15, 1921.

Advertising material, folders, window trims, display cards, electrotypes furnished to all dealers on request.

Here's Another Pexto Wrench

No. 45 Polished; No. 045 Semi-Finished

No. 45

AN ADJUSTABLE ANGLE WRENCH, that is sure to appeal to mechanics, automobilists, garage-men and the trade in general.

The adaptability of the tool is so evident that it will require but a few words to demonstrate its usefulness and that it will replace a number of solid wrenches.

The finish and general makeup of the wrench are such that it will attract attention wherever displayed.

It is a Pexto Product and that alone will recommend it to critical buyers of good tools.

Let your jobber have a generous order, they will be rapid sellers.

If you have not received a copy of our new No. 20 catalog, let us mail you one. You will find it interesting and instructive.

Get Closer to that Customer — the Blacksmith and Small Repair Shop

HAVE you considered the blacksmith and the small repair shop as live prospects for threading tool sets? Here is an opportunity for a very profitable slice of new business.

To these men who spend their lives among tools, the GTD line will need but little explanation — except for the important present-day necessity of *buying them in sets.*

Look up this trade. Give them a convincing argument in favor of keeping a complete assortment of thread-repair and reaming tools constantly at hand.

Explain to them the "set" idea as for example:

No. AA4—*Little Gicnt* Screw Plate for magnetos, generators and other small machine screw threads.

No. 312—*Little Gicnt* Screw Plate for automobile, tractor, wagon and general thread-cutting from ¼" to 1" diam. (both USS and SAE threads).

A No. 709 set of GTD Bit Brace Taper Reamers for automotive, wagon repairs, etc.

A No. 473 set of GTD Hexagon Rethreading Dies for dressing-over crossed and rusted threads from ¼" to ¾" diam. (both USS and SAE threads).

The GTD line includes the above sets and many others which will appeal readily to any busy blacksmith or repairman. Be sure to emphasize the value of buying them by the set.

A practical idea: We want to help dealers get this "set" trade: Send us a letter giving the names of the blacksmiths and small repair shops in your neighborhood and we'll mail out at once the descriptive material you need to get them interested.

GREENFIELD TAP AND DIE CORPORATION

Shorn by Hand Blades

Showing Wool Secured by a Stewart Machine After the Sheep Was Hand Shorn

Sell the STEWART No. 9 Ball Bearing Shearing Machine

It Gets 15% More Wool

Without Tired Hands and Swollen Wrists

Two definite, convincing points for your customers: With the Stewart No. 9 Shearing Machine they get all the wool and suffer no sore, tired arms. The machine shears fast, works easy and gets 15% more wool. The wool also comes off in one long fleece, even fibred, and brings highest market prices.

The Stewart No. 9 Ball Bearing Shearing Machine is perfection in hand-operated equipment—the result of years of experiments and manufacturing experience.

The Stewart No. 9 sells fast and profitably. Sheep owners in your territory are abandoning hand blade shearing; it costs them money. In looking for money-saving equipment they quickly take to the Stewart No. 9 Shearing Machine.

If you've overlooked the possible sales of Stewart Machines up to now, get one jump ahead of your competitor; arrange an attractive window display and cash in big. Our advertising in Canada's leading farm journals will bring customers to your store.

Your jobber has a stock and will ship at once.

Three Special Reasons Why You Should Order Your FREEZERS Now

(1) We can ship more promptly now than when the big demand is on.

(2) Transportation is better now.

(3) Hot weather is sure to come. So will the rush for Freezers, all along the line, from user to dealer,—to jobber,—to us. But we cannot supply every demand promptly the last minute. Be wise in time, get your stock now while the getting is good. Be ready to supply your customers the moment they are in a humor to buy. If you hesitate now you may lose later. We venture to guess that your stock is low, so there is every good business reason why you should prepare in time. Place your order with your jobber now—you cannot lose.

What We Are Doing For Dealers

DEALERS who handle our line of Electrical Appliances will reap the benefit of an especially forceful advertising campaign. The advertisements are now appearing in the best daily newspapers in the bigger cities from Montreal to Vancouver.

These newspapers include such widely distributed journals as the Montreal "Gazette," Toronto "Globe," Toronto "Mail & Empire," Toronto "Daily Star," Hamilton "Spectator," Brantford "Expositor," London "Free Press," Winnipeg "Free Press," Winnipeg "Tribune," Regina "Leader," Calgary "Herald," Saskatoon "Star," Edmonton "Journal," and Vancouver "Province."

Strong selling ads. will also appear in Toronto "Saturday Night."

The total circulation of these papers is 686,433.

Each paper will be read by approximately four people. Each advertisement, therefore, will tell its story to 2,745,732 prospective buyers of New Canadian Beauty Electrical Appliances!

Our new set of window cards are being shipped to our dealers. They were designed and painted by real artists. They are beautiful and effective.

We have also produced leaflets for consumer distribution which go into fine details about the various Canadian Beauty Appliances. These we supply to dealers in the quantity desired. Dealers are also most enthusiastic about these little sales helps.

Please remember that this is not just an empty promise. The campaign we have outlined will be carried out to the letter. We believe in giving our dealers every possible encouragement and support.

Write at once for our liberal plan, literature, prices, etc.

Revisions in Law re Offensive Weapons

Department of Justice Has Acted on Protests of Hardware Merchants and Others re Offensive Weapons Legislation — Initial Amendment re Aliens is Withdrawn

THE initial amendment to the legislation regarding ownership and sale of firearms in Canada, as outlined in April 30 issue of HARDWARE AND METAL, has now been withdrawn and new revisions substituted by the Department of Justice. It will be noted that the revised regulations follow out some of the recommendations made by the delegation of hardware merchants who waited upon the Minister of Justice in connection with this matter. These recommendations were also outlined in the issue referred to. Under the revisions a British subject is not required to have a permit for a rifle or shotgun which he owned on the first day of July, 1920, and which he has owned continuously since then. The necessity of having permits for certain weapons on display in museums, or as souvenirs in the home, is also removed. The retailer who is licensed to sell firearms is still responsible for seeing that all purchasers have a permit, and he must keep records of that permit and sale as outlined. Permits are to be secured by owners of firearms on the basis of the district in which they expect to use such weapons, for permits are good only within the jurisdiction of the person issuing them.

The Bill amending section 118 of the Criminal Code is as follows, "permit" meaning a permit granted by one of the authorized agents of the Department of Justice and "weapon" including any device or contrivance outlined.

License for Importing and Selling

By the revised regulations every one is guilty of an offence and liable to a fine and imprisonment who without a license, after December 31, 1920, imports, brings or transports into Canada, or manufactures or deals in, sells to, barters with, gives or lends to any person, any of the following weapons or of similar kind:—any cannon, trench-mortar, machine-gun, rifle, gun, revolver, pistol, or other firearm or any air-gun, any device or contrivance for muffling, stopping, concealing or disguising the sound or flash of the discharge of a firearm or air-gun, any explosive, poisonous, stupefying or disabling bomb or similar device, any sword, sword-blade, bayonet, pike, pike-head, spear, spear-head, dirk, dagger, stiletto, bowie-knife, or sheath knife or similar contrivance, any metal knuckles, skull-cracker, slung-shot, sandbag or any similar device.

Penalty is provided for any one who not having a permit or not being otherwise excepted has upon his person in his possession any of the mentioned weapons. Penalty is also provided for one who, whether he has or has not a license or a permit as required, sells to, barters with, gives or lends to, a person who has not a permit therefor any weapon of the kinds mentioned. The dealer is also penalized who in case of a sale neglects to keep a record of such sale, the date thereof, the name of the purchaser, such sufficient description of the weapon sold as may be necessary to identify it, the date and place of grant of the permit and the name and office of the person who granted the permit, or who neglects to send a duplicate of such record by registered mail to the person who granted such permit or neglects to endorse upon such permit the date and place of sale, the said description of the weapon and the name of the vendor.

Penalty is furthermore provided for the one who, being authorized to grant a permit, grants it without keeping a duplicate as a record or who having granted a permit, fails to keep any record received by him of sales of weapons, devices or contrivances to the holder thereof. The issuing of a permit without lawful authority is also penalized.

Exemption

Exemption from the necessity of securing a permit is provided for members of the naval, military, air or

Linking Up With the "Save the Surface" Campaign

On pages 50-61 of this issue will be found a number of suggestions as to how the hardware merchant can most effectively link up with the "Save the Surface and You Save All" campaign. The intelligent co-operation of the trade along lines suggested will no doubt help not only to increase the sale of paints and varnishes, but to encourage the customer to a higher appreciation of the real value of these products. On those pages will be found suggestions for the advertising and the showcards, suggestions for window and store displays and a number of brief points which will help in dealings with various prospective customers.

militia forces, Royal Canadian Mounted Police, peace officers, public officer, or immigration officer, who by law is permitted to have in his possession such weapon. A sailor is allowed to have a sheath-knife or clasp-knife. No permit is needed for a bona fide sale by a manufacturer of weapons or a wholesale dealer if a license is held and sale is made to a bona fide dealer who is licensed to buy such weapons and who has an established place of business for such dealing.

British subjects do not require a permit for a rifle or shot-gun owned on the 1st of July, 1920, and owned continuously since then. No permit is required to have in a museum or other public building on or for exhibition as souvenirs, war-relics, specimens, or types of invention, any weapon of the kinds mentioned. No permit is required for any person to have in his possession, on any premises occupied by him as his residence or as his office, any weapon of the kinds mentioned excepting metal knuckles, skull-cracker, slung-shot, sandbag or similar device, provide such weapons are obsolete, not usable for their purpose and merely kept as a souvenir or war-relic.

Who May Issue Permits

Permits may be issued by the following officers, upon sufficient cause being shown for the need of firearms:—Any officer of the Royal Canadian Mounted Police, superintendent or other head officer of provincial police, or stipendiary or district magistrate, or sheriff, or chief constable of any city, incorporated town, district or municipality, or any person authorized under the laws of any province to grant licenses or permits to carry firearms. Form 76 will be used and permits will be good for a maximum of twelve months, good only within the jurisdiction of the person issuing the permit.

Special penalties are provided for the person who has upon his person or in his possession any weapon which is concealed or disguised or who, being masked or disguised, has upon his person or in his possession any weapon.

Following is the form of permit:

Form 76

Weapon Permit

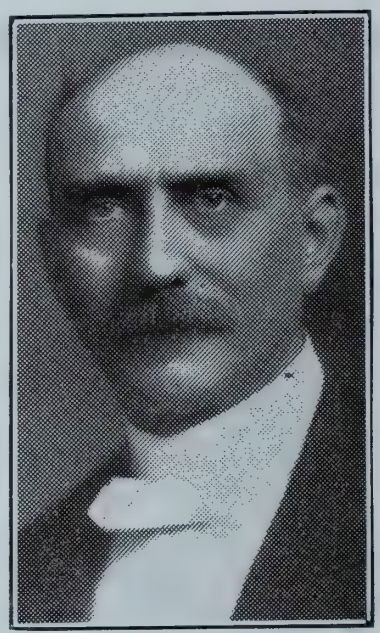
(name of place of issue and date)

Permission is hereby given to..... of..... to ("have upon his person or in his possession" or "to have in his possession" as the case may be..... (character of weapon).....for..... (insert duration of permit and county, city, town or other limits within which permit is to be in force).

Reason for granting permit

Name and office of person issuing permit.

This bill amending the regulations regarding firearms has been introduced by the Department of Justice as result of protests received from various interests in the country and it is expected to be enforced at an early date.



Parking Regulations Hamper Trade

Ottawa Merchants Oppose Practice of Forbidding Parking of Automobiles on Main Thoroughfares

OTTAWA, Ont.—Ottawa merchants are taking a determined stand against the growing practice in the larger municipalities of forbidding the parking of automobiles in the main thoroughfares. A considerable number of the merchants attended a meeting this week in the rooms of the Retail Merchants' Association and entered an emphatic protest against a recent order of the police commissioners prohibiting the parking of cars on Sparks Street. The former regulation was that cars might be parked on Sparks Street for ten minutes.

The merchants were almost unanimously against the new regulation, claiming it was a great detriment to trade. A large number of people who did casual shopping when they were permitted to let their cars stand outside, do not seem to be buying as much now. Merchants in the centre of each block are considerably more affected, it was found, than those in or near the corners.

It was agreed to have a strong deputation wait on the police commissioners at their next meeting and ask that the new regulations be cancelled.

H. T. WHITE,

Vice President Stewart & Wood, Ltd., Toronto, and formerly Western Ontario traveller, whose death is announced elsewhere in this issue.

THE MEN BEHIND THE COUNTER

Nelson Mills, Hamilton, Ontario, President Ontario Retail Hardware Association and also vice-president of the Mills Hardware Company, Limited, who operate two hardware stores at Hamilton, Canada, has urged that Hardware and Metal continue the department for the Men Behind the Counter. This department as our readers know ran for a considerable time under the heading of the Clerks Department. Inquiries among many of the largest hardware employers in Canada have proven beyond a doubt the great value of a department of this kind and the salesmen behind the counter have also urged the continuation of this department.

We are therefore glad to announce that in an early issue Hardware and Metal will commence a special department for the men behind the counter and we shall appreciate any suggestions from our thousands of readers throughout Canada as to how this department can be made most interesting and instructive for them. The new department will commence in an early issue.

Sale of Ross Rifles Delayed by Gov't.

Quite a number of offers have been made the Government for the purchase of various quantities of Ross rifles, many of which are stored in the arsenals at Lindsay and Quebec. The offers have been in lots running from 100 to 10,000, the latter being the largest quantity for which a bid was received. It is considered that having regard for general conditions now existing throughout the world that it is not now a good time to sell these rifles, hence the reason for storing them. The Government hopes to be able to convert many of these rifles so as to make them serviceable in cadet and other training.

About 200,000 rifles were returned to Canada at the end of the war, none of which were Ross rifles. Of this number about 40,000 are now being overhauled. These rifles will be used in connection with the annual training.

Steel Corporation Cuts Wages

A reduction of about 20 per cent. in wages for day labor, effective May 16, and an equitable adjustment of other rates, including salaries, at the plants of the United States Steel Corporation, was announced by Elbert H. Gary, chairman of the Corporation. It is estimated that between 150,000 and 175,000 employees of the Corporation will be affected by the cut.

Roughly, this will affect a reduction in the payroll, calculated on the present number of employees, of not less than $150,000,000 annually.

Developing a Household Hardware Trade

Women Shoppers a Big Factor in Buying and Influencing Buying of Household Hardware—Directory System, Rest Room, Smallwares Table, Etc., Features to Encourage Women Shoppers in George Stambler Hardware, Winnipeg—Gasoline Pump Draws Auto Accessory Business

Interior view of the George Stambler hardware, Winnipeg, Man., showing some of the special facilities provided to help women shoppers and to feature household lines to interest such trade. The smallwares table can be noted in the centre of the store. Sewing machines are also included among the housefurnishings lines. Large cards suspended from the ceiling direct the customer to the department required. Note the modern display fixtures used and the special compartments for tools provided in the first showcase on the left.

So firm a believer is George Stambler, hardware merchant, Winnipeg, in the use of special tables to concentrate smallwares, that in his new store special provision has been made for such a department. It will be noted in the illustration shown herewith that a table is located in the centre of the store on which are grouped in baskets a number of lines of kitchenware and other small furnishings, each plainly marked with a price ticket. Mr. Stambler's experience has been that customers centre much attention on this table, handling the various lines and trying out any new utensils which may be shown. This table sells a good deal of smallwares and Mr. Stambler finds the idea has proved a good revenue producer.

This merchant prefers to stock lines which have a more or less standard reputation through extensive advertising, for his experience has proved that such lines give best satisfaction. He watches the trade papers closely for indications of which are the most widely advertised lines and also for any new lines coming on the market.

"Everything for the Home"

In so far as advertising is concerned Mr. Stambler puts great faith in his local newspaper advertising, supported with circulars and the use of signboards. On all his advertising matter appears the slogan, "Everything for the Home." He has found that concentrating upon a household hardware business, including such lines as sewing machines, phonographs, wall paper, etc., and endeavoring to link up more closely with the housewife in business, has produced good returns.

Prominent in the displays of this store, and located near the front entrance, is an effective showing of automobile accessories, which this store finds a profitable line. Mr. Stambler states that one of the best means of encouraging automobile accessory business is to have a gasoline tank in front of the store. The store is located on a main road leading

"Shopping Week" Aids District Merchants

District Hardware Stores Enjoy Good Efforts Of Business Men's Association — Endeavors To Stimulate Local Purchasing

OF particular interest to hardware merchants is the novel manner in which local business was greatly stimulated by the Roncesvalles District Business Men's Association of Toronto. The idea of a special district shopping week, from April 30 to May 7, was conceived by this body and embarked upon with collective effort and concentrated action. That the movement has been attended with success of a very satisfying nature is evident from interviews of Hardware and Metal with local hardware merchants in this district.

Lying in a suburb of Toronto, the problems of the Roncesvalles district merchants are decidedly similar to those confronting retailers in many other districts, with the added difficulty of securing local trade which is easily attracted to the larger stores in the heart of the city.

Stimulant to Business

Attractive window displays, local advertising, special daily and weekly bargains in seasonable articles, good value and courtesy as permanent business getters and evening street parades were among the drawing cards instituted.

A. V. Guest, of the Guest Hardware Store, reports the movement to be a good stimulant to business generally. As a direct incentive to local purchasing, Mr. Guest concentrated on the following lines: tin boilers, brooms, force cups, toilet paper, hand saws, roller skates and garden hose.

"A good success," is the verdict of J. A. L. Doherty, of Doherty Hardware Co. Commencing the first day with a demonstration of varnish Mr. Doherty concentrated on fresh articles each day, including aluminum ware, pocket knives, casseroles and garbage cans. Percentage reduction of prices, lasting for the full shopping period, was another feature contributing to the success attained.

Seasonable Slogan

"May time is paint time" was the business slogan adopted by the Burns Hardware. Novel bargains in the way of paint and brushes were the basic features of this store display. Daily bargains in seasonable goods and attractive window displays with good lighting effects were other aids to trade expansion.

"A fine thing for local business" was the manner in which Mr. Burns summed up the situation.

The aid of local bands, gay street banners and weekly paper news were among the collective advertising efforts of the association. Window displays and the distribution of handbills covers the methods adopted. The committee in charge, as well as the storekeepers, are generally enthusiastic over the success which has attended this innovation.

DEVELOPING A HOUSEHOLD HARDWARE TRADE

Continued from page 37

from the centre of the city to the popular summer resort district and much business has been secured from campers and picnic parties traversing this road. In order to link up the accessories with the gasoline trade window displays of accessories are kept on most of the time. Motorists while waiting to have gasoline and oil tanks replenished are attracted to the window by the display and then it is up to the display to sell the motorist some line which he needs. For this class of trade Mr. Stambler points out that it is necessary to select the stock to be shown in the window with much care. The best lines to show are those which the motorist, while on the road, may be able to use to advantage or which he may require urgently in case of accident. Window cards can be used to advantage in suggesting some such lines.

Summer Resort and Picnic Trade

Requirements for the summer resort and picnic party are also frequently shown in the windows to appeal to such tourist traffic. Paints and varnishes for refinishing the summer cottage, kitchen utensils and other furnishings, campers' supplies, etc., are lines which can also be featured in this trade.

Electrical trade has been developed rapidly in this store and a man is employed the year round to handle sales and installations. Electric fixtures are displayed in the centre of the store, being suspended from the ceiling. These are wired so that they may be shown as they will appear in use.

As mentioned, Mr. Stambler pays particular attention to women shoppers, believing that they actually purchase or influence the purchase of a large percentage of lines featured in his store. In order to make a stronger appeal for this class of trade Mr. Stambler has fitted up a "rest room" for the use of the women. Easy chairs, rugs, etc., are provided and a home-like atmosphere makes the rest room a favorite resort.

Special attention has been given the lighting arrangements in this store in order that it may at all times be brightly illuminated. Mr. Stambler believes that a well-lighted store is a much more attractive place to deal at than a poorly lighted one, and while arrangements have been made for the admission of plenty of natural light, good facilities are also provided for the use of adequate artificial light when needed. The store office is elevated at the rear of the store as will be noted. Here the bookkeeping staff is located away from the noise and distraction of the store.

Gives Customer the Benefit

Speaking to Hardware and Metal in regard to prevailing business conditions and the best means of maintaining turnover during these conditions, Mr. Stambler stated that he is immediately revising prices to the lowest possible levels, whenever revisions are made by the wholesaler. He believes in giving the customer the benefit of any price concession in the interests of a bigger turnover.

Mr. Stambler has been in the hardware business for ten years, during which time his efforts to become intimately acquainted with people in his community have been successful. His store is well established and well regarded in his community to-day and Mr. Stambler owes much of his success to the friendly relations which exist between himself and his clients. The present store was completed only a few months ago and it has 40 feet frontage with a depth of 120 feet. It is several times the size of the store previously occupied and is ample evidence of how this business has been developed.

Modern store fixtures are used throughout, as will be noted in the illustration. Polished showcases indicate attractive displays of silverware, cutlery and cut glass. In the first showcase will be noted a series of small drawers with open fronts, each containing displays of various tools. This allows of a good display and facilitates handling where it is necessary to put the articles on the counter for the closer examination of customers. It will be noted that cards are suspended from the ceiling indicating the various departments such as "Sporting Goods," "Tools," "Shelf Hardware," "Builders' Hardware," "Paints," etc. These cards assist customers in immediately finding their way to the department they require.

A good trade is done in travelling goods, and a display of club bags, suitcases, etc., will be noted on the top of the wall cases. Saws and other tools are shown in glass-fronted cabinets in the wall cases. Small drawers containing the shelf hardware stock are used, with samples of each line affixed to the front of the drawer so as to provide a display and facilitate the finding of lines required.

FREE ICE TO PURCHASERS OF REFRIGERATORS

A. J. Freiman, Rideau Street, Ottawa, offered one month's ice supply free to purchasers of advertised refrigerators on Saturday. Prices of the special lines were $33, $36.50, $37.50 and $42.

For the May Advertising

The first issue of Hardware and Metal each month will carry suggestions for the local advertising of retail hardware merchants for that month. Illustrations and descriptive matter will show how other merchants are developing seasonable trade. These will deal only with those lines which are particularly seasonable and will supplement the advertising suggestions shown from time to time elsewhere in the respective issues.

A GREAT many hardware lines become seasonable during the month of May and they are therefore specially suitable to feature in the May advertising. The layout shown on this page illustrates a wide range of spring lines which the hardware store can feature at this time.

For the sporting goods department one of these ads. announces the opening of the trout season at the beginning of May. A complete list of fishing requirements is outlined. This plan of making the ad. timely is effective in drawing favorable attention.

Wheel Goods For Children

Now is the season for the children to get in long hours of play and the ad. by M. Weichel & Son, Ltd., Waterloo, Ont., illustrates a number of lines which should be popular with the kiddies at this season. Wagons, roller skates and other wheel goods can be featured in the advertising during this month.

Spring gardening requirements are now seasonable. The ad. by W. T. McArthur & Co., Vancouver, B.C., is attractively illustrated and shows a wide range of garden tools. There is a brief description of each line accompanied by some suggestions as to the use of the various tools and prices are quoted.

Refrigerators Reduce Cost of Living

An ad. on refrigerators by W. H. Thorne & Co., St. John, N.B., deals with the matter from an effective standpoint. It demonstrates that the cost of living can be kept down by protecting food with the use of a refrigerator, in addition to making for health in the household. In the approaching warm weather, while living costs are still fairly high, this argument can be advanced with good results.

June, the bride's month, is approaching and toward the end of May advertisements can be used to set forth the various lines of silverware, cut glass, brass goods, etc., which make suitable gifts and which can be supplied by the hardware store. Merchants are paying increasing attention to gift trade during recent years and in many cases substantial business has been developed along this line. The ad. by Sumner Co., Moncton, N.B., points out that many people are already wondering what they are going to give the prospective bride or groom for a wedding gift. A display of a wide range of such lines in the hardware store will help them to make up their minds.

Lawn Mower Time

An ad. is devoted to spring hardware by the Manville Hardware Co., Ltd., Prince Albert, Sask. This ad. illustrates garden tools, screens, house paints, wall finishes, etc., pointing out that it pays to keep the home well painted and that it is easier to stop the fly than to swat him.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, MAY 7, 1921

STATISTICS quoted this week by the Federal Government showed that while there were 100,000 marriages in Canada in 1920 there were only 11,000 new houses built. This is evidence of much potential business for the hardware trade and it gives substance to the claim of many in the trade that when relative conditions become more normal business will come with a rush.

* * *

IT HAS been figured approximately that the reductions in gasoline and oil since last summer mean a reduction in the season's bill for these items to each motorist of twenty dollars. Here is a talking point for the hardware merchant whose motorist customers still complain of high costs as a reason for curtailing use of their cars.

* * *

HARDWARE merchants and tinsmiths who took out or renewed licenses as manufacturers placed themselves in the category of a manufacturer and must continue to collect 2 per cent. sales tax on all articles manufactured by them and return this amount to the Government periodically, at least until such time as the test case decides the matter otherwise. The only way to have avoided this collection of sales tax and the necessity of making returns was to have taken the advice outlined in these columns some months ago stating that merchants would be safe in declining to take out such licenses.

"Save The Surface"

HARDWARE merchants can link up to advantage with any special effort such as the "Save the Surface" campaign, designed to increase the sale of paints, varnishes and other hardware lines. In this issue will be found a number of suggestions as to how the hardware merchant can link up with the "Save the Surface" campaign and help to impress upon his customers the great saving which can be effected by the adequate use of paint and varnish. There is a great need for paint throughout this country and the active co-operation of the hardware trade along these lines should result in not only an increase in paint and varnish business, but a more intelligent regard for the value of these products on the part of the customer.

U. S. Emergency Tariff

EMERGENCY tariff legislation now before the United States Senate will, if adopted, have a considerable effect upon Canadian agricultural products. The original Fordney Bill about which there was much discussion was vetoed by ex-President Wilson but the Republican administration now in power has fathered the bill. Introduced by Senator Young, it has had its first reading in the U.S. Senate this week. It requires three readings and will therefore not be ready for enforcement for a week or ten days at least.

Among the products affected is flax seed and as this product is largely imported by the United States from Canada for the purpose of making linseed oil, it is interesting to note just what the effect will be. Government records show that these imports for eleven months ending February, 1921, totalled 1,337,333 bushels, valued at $3,461,675. The United States has for some time been Canada's biggest customer in flax seed and in the period mentioned the U.S. bought all the flax seed exported from Canada.

For some weeks there has been a big movement of Canadian flax seed to the United States, evidently with the idea of escaping the increased tariff, soon to be applied. The present duty on this product is 20 cents per bushel and the recommendation is that this be raised to 30 cents. The increase of 10 cents a bushel would have meant $133,733.30 added to the cost of the Canadian flax seed set down in the U.S. One obvious result will be the increasing of costs of producing linseed oil in the U.S. unless Canadian seed is kept out by the higher tariff barrier. In this connection it has been recognized for some time that Canadian seed is of such a superior quality as to make it highly desirable in the U.S. for making linseed oil.

New Firearms Legislation

PROBABLY influenced to some extent by the representations made by hardware merchants, the Department of Justice has introduced new legislation governing the ownership and sale of firearms and other weapons in Canada. The recent amendments to the original bill have been withdrawn in favor of the new legislation.

Under the revised regulations some of the points which formerly caused friction have been eliminated. British subjects are relieved of the necessity for securing a permit for rifle or shot-gun owned by them on July 1, 1920, and owned continuously since that time. No permits are necessary for such weapons shown in museums or kept in the home as souvenirs, providing the latter are obsolete.

The new regulations, on the whole, are not much less stringent than the first bill though a number of points are clarified. The new legislation appears to have conceded a few points while at the same time retaining for the government a close watch on the sale of offensive weapons.

The greatest hardships under this law are likely to fall upon farmers and settlers who are located a distance from officials authorized to issue permits and for their sake the issuing of permits should be simplified as much as possible.

This law still remains a "statute law" and only effective if enforced by local police departments.

Helping to Return to Normal

THE reduction this week of approximately twenty per cent. in the wages of employees of the United States Steel Corporation recalls to mind the statement made at the time of the last revision of steel and iron prices, to the effect that further reduction in prices could only follow a reduction in wages. The reductions to date have had the effect of steadying the market to some extent, though little new business has been forthcoming. It has been suggested that the large buyers have sensed some such action and are awaiting still more favorable prices. The wage action has had the effect of strengthening the stock of the Corporation and it would appear as though the result might be considerable. The wage cut is estimated to reduce the cost of steel by about $4 per ton. If further price reductions are made in the Corporation schedule the independent mills may be left at a disadvantage unless the new prices still leave a margin for the latter, owing to the fact that higher costs must be met by the independents in steel producton.

Events in the Trade

Business Changes

Montreal.—J. O. Gaboury (Est. of), hardware, has dissolved.

Toronto.—A. G. Esplen has sold hardware business to Frank Heyworth.

Hanover, Ont. — Bruce Sutherland, manager of the Hanover Cotton & Woollen Mills, enters the hardware firm of H. Cross & Sons, the new firm to be known as "Cross & Sutherland Hardware Co., Ltd." The new firm will operate two stores. They have purchased the Lenenham Block in Durham, and will open up a new hardware business there, and will continue the business in Hanover carried on by H. Cross & Sons.

L. W. SIMMS

President of T. S. Simms & Co., Ltd., St. John, N.B., who has been elected chairman of the Maritime Division, Canadian Manufacturers Association.

New Firms

Durham, Ont.—J. H. Harding is commencing a hardware business.

Toronto.—A. L. Greenside is commencing a hardware business in this city.

Incorporations

Powers of the Torrington Co., Ltd., have been extended to include the manufacture of vacuum cleaners, spokes, nipples, pedals, screws, carpet sweepers, wire products, etc.

Compagnie d'Importation du Canada, Ltee., has been incorporated with capital of $125,000, head office in Montreal, to manufacture and import and deal in paints, pigments, varnishes, hardware, toys, glassware, etc.

Obituary

The death in New York of Ambrose Monel is announced. He was the first president of the International Nickel Co., resigning in 1917. At the time of his death he was vice-president of that company and a director of the International Corporation of Midvale Steel. He was inventor of the Monel process of treating steel.

The death of Henry Thomas White, at his home, Toronto, removes one of the oldest and most widely known commercial travellers covering Western Ontario. The late Mr. White was born in London, England, sixty-six years ago. Coming to Canada as a boy of thirteen, he settled in this city, which, with the exception of a period of two years in Winnipeg, had been his home ever since. He was vice-president of Stewart & Wood, Ltd., with which he had been associated for thirty-five years. During that time he had been their travelling representative in Western Ontario.

Personal

Louis McLain has disposed of his interest in the firm of Louis McLain Co., Ltd., Toronto. Future plans are not yet announced.

H. Stewart, manager the Gourock Ropework Export Co., Ltd., Montreal, is on a business trip to Boston Mass., this week.

The sympathy of the trade is extended John Richardson, buyer at Caverhill, Learmont & Co., Montreal, in the loss he has sustained in the death of his mother last week.

C. K. Godfrey will cover the territory for Lewis Bros, Ltd., Montreal, from Toronto east to Kingston, calling on the retail trade for auto accessories.

A. D. Buchanan, formerly of Cronk & Buchanan, Guelph, Ont., has joined the sales forces of Lewis Bros., Ltd., taking over the territory of J. P. Hammill.

Dr. C. O. Fairbank, of the hardware firm of VanTuyl and Fairbank, Petrolea, Ont., has returned after spending some weeks in California looking after his oil interests and will sail for England on May 14.

Edmund F. Conway, one of the new members of the board of directors of Canada Foundry and Forgings, Ltd., has been associated with the foundry business in Montreal for some years, latterly as president and managing director of St. Lawrence Iron and Foundry Co., Ltd.

J. Thurston Smith, secretary-treasurer, Lewis Bros., Ltd., Montreal, has recovered sufficiently from his automobile accident of a few weeks ago to allow him to again assume his duties for a few hours each day. However, Mr. Smith is still on crutches and it will be a few weeks yet before he has fully recovered.

Col. Robert Starke, Starke-Seybold Co., Montreal, has left for New York and Atlantic City. While in New York he will seek further arrangements that are being made for the convention of the American Iron, Steel and Heavy Hardware Association to be held in Montreal this year on June 7, 8 and 9. Further announcement will be made of the convention in a later issue.

W. S. FISHER,

Enterprise Foundry Co., Sackville, N.B., who at the annual meeting of the Maritime Division, Canadian Manufacturers Association, was nominated for election to the presidency of the C.M.A. at the forthcoming annual general meeting in Quebec.

Hardware Stores Change Premises

Havelock, Ont.—The two local hardware stores have been busily engaged in moving to each other's premises. W. B. Ritchie & Son purchased the store occupied by A. J. Peeling, after that gentleman had purchased the building occupied by them.

News of Western Canada

Should Take Advice of Authorities

Bankers and Business Men Who Have Travelled Are in Best Position to Advise Canada's Course of Action, Says B.C. Manufacturer

"BRITISH COLUMBIA, like all other countries, is going through a period of adjustment. This had to be expected sooner or later, and the surprising thing is that the slowing down process did not come sooner," said J. R. Duncan, Vulcan Iron Works, Ltd., Vancouver, B.C., in a recent interview. "I feel that we have had too much Government control and the deferring of the evil day, so to speak, has made matters so much worse. I am not a pessimist, however, and believe that everything will work out for Canada's good, so rich in natural resources is the country and comparatively more highly developed mechanically than ever it was. We should take the advice of our bankers and men who have travelled in other countries in Canada's interests, and who genuinely believe in Canada's possibilities. This means aggressive missionary work to increase our export business, and the putting of our own raw materials into the finished product at the point of supply of the said raw material, making Canada's resources productive in labor and wealth from start to finish.

"Canada is financially sound, and after travelling through Europe recently, I feel that we, as a nation, have much to be grateful for. Let our optimism be that of working and watching. Delivery of materials is satisfactory and prices are gradually declining to a stage that should interest purchasers. Labor is efficient and anxious to do its part. Wages can only decline with the cost of living; volume being low we are just maintaining a nominal crew. The outlook is satisfactory and the slightest revival would mean a gratifying state of affairs for us. The stabilizing of the lumber and pulp industries would improve our position. Prices on the finished products are declining. Deflation, to my mind, is not complete and only the pressure of natural laws will bring this about. We have made valuable connections in the Orient and our outlook, from an export standpoint, is decidedly interesting.

"Speaking generally, the outlook for 1921 is by no means worse than it has been on many occasions before the war had shaken the whole fabric of business. The European situation is gradually improving. The people of the United States have elected their Government. People have not been purchasing and they must resume at an early date, which must necessarily mean work. Work means wages; fair wages mean contentment.

"Speaking specifically of British Columbia, both the Dominion and Provincial Governments have many important works to go on with, works which will become an asset not only to this province but to the Dominion."

New Ship Chandlery Firm in British Columbia

Vancouver, B.C.—C. G. Hemeon and L. R. Pickard have opened a new ship chandlery warehouse at 311 Cordova St., Vancouver. Mr. Hemeon has been associated with the wholesale hardware firm of McLennan McFeely & Co., Ltd., for the past twelve years, being in charge of the ship's stores department. Previous to coming to British Columbia Mr. Hemeon was associated with the firm of E. K. Spinney, of Yarmouth, Nova Scotia. Mr. Pickard comes from Eugene, Oregon.

Mr. Hemeon mentioned to Hardware and Metal that he would be pleased to receive manufacturers' catalogues of all kinds of ship's stores.

Prepare For Ashdown Social Activities

Winnipeg, Man.—The annual meeting of the Diamond "A" Social Club was held at the offices of the J. H. Ashdown Hardware Company recently and the following officers were elected:

Hon. president, J. H. Ashdown; hon. vice-president, J. N. Nivin; president, J. Fleming; first vice-president, G. Wood; second vice-president, D. Sutherland; third vice-president, Miss Marr; secretary, F. R. Johnstone; treasurer, Miss Hurley; chairman of executive, A. Metcalf; baseball convenor, L. Hunter; football convenor, A. McCallum; tennis convenor, Miss Leach; hockey convenor, G. Tetlow; curling convenor, J. MacKay; bowling convenor, D. Sutherland; quoits convenor, J. Marr; dancing convenor, W. Robinson; whist convenor, J. Baillie; social convenor, J. Hesford.

Reports from the different officers show that the club is in a flourishing condition, both as to finances and membership. It is intended that teams will be entered in the Mercantile baseball and football leagues.

Western Notes

A. G. Carpenter, of Crandall, Carpenter & Read, Winnipeg, is on a business trip to Sackville, N.B., visiting his principals, Charles Faucett, Ltd.

Red Deer, Alta.—L. Warwick, late of the Day Hardware and McPherson Bros. staff, has left to accept a position at Delia, Alta.

Western C. M. A. Officers.

Winnipeg.—W. G. Fraser was chosen as chairman of the Prairie Branch of the Canadian Manufacturers Association at the annual meeting here. J. W. Ackland was elected vice-chairman. D. J. Dyson, the retiring chairman, in presenting his report, declared that he believed the unemployment situation, which never was as serious in the West as in the East, had passed the worst period.

Death of Pioneer Western Hardware Merchant

Vancouver, B.C.—John A. Flett, head of the hardware firm of J. A. Flett, Ltd., is dead after an illness of several months. Deceased had been identified with the hardware business practically the whole of his sixty-two years. Prior to coming to British Columbia he conducted a business in North Dakota. Years ago Mr. Flett was the proprietor of several hardware stores in Vancouver but eventually sold them all except the one at 339 Hastings Street.

Manitoba Net Profits Tax

Winnipeg.—An amendment to the Provincial Corporation Taxation Act providing for the levying of a two per cent. tax on the net profits of any business for the last business year ending with the six months before or after December 31, 1920, was passed by the Committee on Law Amendments. Hon. Edward Brown, Provincial Treasurer, intimated that this was but a temporary measure, applicable to this year only. The bill was reported.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRINCIPAL declines evident this week are on coal oil and some lines of carpenters' tools, namely planes, levels and screwdrivers. Minor changes are reported in jack chain, resin and oakum, while soldering coppers, sash weights, mops and whips also show reductions. Linseed oil prices are likely to increase and turpentine has again advanced.

The principal basis lines remain unchanged. Sheets and plates, bar iron and steel, are maintained at last week's quotations, also pipes and fittings. Prices are steadier in metals and manufactured steel products. A 20 per cent. reduction in wages by the U.S. Steel Corporation is announced. It has been the opinion that wage reductions would have to be made before lower steel prices could be made effective. A better tone is evident in such lines as lead products, glass and rope. White lead is reported active with no change in price. Paints and varnishes are moving well and sales in these products are quoted as very satisfactory. Business has been opening up along seasonable lines but demand is generally spasmodic. The market is considered as gradually settling with few important changes having been recorded.

Montreal Markets

MONTREAL, May 4.—The market changes this week are almost entirely confined to the smaller lines with the exception of boiler tubes where easier prices on some sizes are given. Two important reductions are noted, one on Yale night latches and the other on gasoline and coal oil. Yale latches are down approximately 25 per cent. Gasoline and coal oil show a reduction of 2 cents a gallon. Certain lines of whips are lowered, also brass and steel jack chain, the latter now selling on a new net list. White's mop wringers have new prices.

The markets on the different heavier goods are more stable than they have been for some time although corrugated sheets are reported unsteady. Sheets, bar iron and steel, pipe, pipe fittings, range boilers and lead products are all unchanged in prices. Ingot metals are holding.

Of interest this week, connected with the heavier lines of iron and steel, is the announcement of a 20 per cent. reduction in wages with the U.S. Steel Corporation. Whether this will immediately affect the local market is considered questionable.

Whip Prices Lowered

Montreal.

Whips of the Lay Whip Co. make are reduced in price, the reduction amounting from 5 to 10 per cent. on the different qualities.

Yale Night Latches Reduced

Montreal.

A reduction of approximately 25 per cent. has been made in Yale night latches. At present this affects the latches only, other locks and padlocks remaining unchanged.

Roofings and Papers Hold

Montreal.

There is little indication of any change in roofing or insulating papers quotations at present. Prices of the raw materials are holding firm, and the demand has increased very favorably in the month of April over the first three months of the year. Taking from January 1st sales are also favorable in comparison with last year.

School Slates Revised

Montreal.

To those interested a revised price list is out on school slates with the following new net prices quoted:

SCHOOL SLATES—5 x 7, 1.50 per doz.; 6 x 9, $2; 7 x 11, $2.50; 8 x 12, $2.90; 9 x 13, $3.25.

New List on Jack Chain

Montreal.

A new price list is issued on jack chain, both steel and brass, and following is the new net list, showing a slight reduction from former quotations.

S.W.G. No.	STEEL Sgle. link	STEEL Dble. link	BRASS Sgle. link	BRASS Dble. link
7	1 10	1 40	6 35	7 50
8	95	1 15	5 25	6 15
9	90	1 05	4 25	5 15
10	80	95	3 50	4 75
11	70	85	2 80	3 77
12	65	72	2 30	3 20
13	60	65	1 92	2 50
14	55	60	1 60	2 05
15	50	58	1 25	1 60
16	48	53	1 00	1 32
17	45	51	84	1 10
18	40	48	70	90
19	40	45	60	76
20	40	45	55	72

Gasoline and Coal Oil Down

Montreal.

Both gasoline and coal oil are reduced in price this week. Motor gasoline now sells for 37 cents; higher grade, 42 cents. Coal oil is quoted at 24 cents.

Corrugated Sheets Unsteady

Montreal.

While the list on corrugated sheets remains unchanged, a very unsteady situation is apparent. On the two lightest gauges the quotations show a considerable range among the different wholesalers. These are practically the only weights selling, the movement said to have improved very much in the past two weeks. Following is the list:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Limited Sale for Range Boilers

Montreal.

No change is noted in quotations on range boilers, the sale of which is still limited to small quantities. The electric welded boiler is selling fairly well, particularly in the 30 gallon size, the price of which is slightly lower than the riveted boiler. Following are quotations:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	12 50	15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Ware Sales Have Improved

Montreal.

The last two weeks has shown a marked improvement in all wares, par-

ticularly dairy supplies. Stocks are really low throughout the country and dealers have found it necessary to stock a little heavier to meet the demand that is bound to come at this season. While galvanized ware was reduced considerably two weeks ago, other wares, such as tinware, stamped ware and enamelware show no signs of any price changes at the present time.

White's Mop Wringers Revised

Montreal.

A change in quotations on White's mop wringers has been made, following being the new net prices: No. 1, $45.00; No. 2, $31.00; No. 3, $38.00 dozen.

Pipe Fittings Unchanged

Montreal.

Quotations on the different pipe fittings are unchanged, with sorting orders still coming in. Stocks are in good shape in all sizes. Following are quotations:

Cast iron fittings	20%
Bushings, cast	30%
Do., malleable	30%
Flanges	27%
Plugs	22½%
Flange Unions	20%
Malleable Unions	40%

Do., long	50%
Do., 4½ to 8 in., close and short	30%
Do., long	40%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 10%.

Wrought Pipe Sales Irregular

Montreal.

Wrought iron and steel pipe is now selling under list No. 51, coming into effect last week. The sales are said to be irregular, one week showing good quantities moving, the next being rather slow. This demonstrates the buying method that merchants have adopted, purchasing only as the demand requires. Stocks are quite heavy in the different jobbers' warehouses. Following is list No. 51:

Price List No. 51. April 25th, 1921.

Standard Buttweld Pipe S/C

Per 100 feet.

Size	Steel Blk.	Steel Galv.	Gen. Wrot. Iron Blk.	Gen. Wrot. Iron Galv.

10 in.	3 03	3 85	4 02	4 76

Rope Prices Are Firm

Montreal.

Although the booked orders for rope were disappointing this year, the sorting up demand is now quite favorable. This is the result of low stocks among the retailers. Navigation supplies are still light, and a big improvement is hoped for along this line during the summer months. However, there is a much better feeling in the rope markets than there was in the earlier months of the year, with a firmer tendency on the outside markets.

Binder twine is held unchanged at quotations given in March.

Stove Bookings Backward

Montreal.

Bookings on stoves and heaters for fall delivery are reported backward, dealers no doubt anticipating lower prices. Speaking with a large manufacturer this week, Hardware and Metal was informed that lower prices were not thought probable for the fall and winter trade, wages and high freight rates offering the chief obstacles toward a lowering. The present demand has been fairly good for certain lines of cook stoves, particularly of the combination type.

Sheets Show No Change

Montreal.

Quotations on both black and galvanized sheets show no change this week. There is still quite a range in prices among the wholesalers, due to the past unsettled conditions in the United States markets. Although the general opinion seems to be that a more stable market will prevail, it is interesting to note that the U. S. Steel Corporation announce a 20 per cent. cut in wages. This coming into effect on the middle of the present month will in all probability reflect on present prices in the near future. The local demand is still reported light, and one wholesaler expressed his view that in all likelihood buying among the merchants would continue from hand to mouth throughout the summer months. Following are quotations:

PLATES—		
10 gauge	5 25	6 25
12 gauge	5 30	6 30
14 gauge	5 45	6 45
16 gauge	5 55	6 55
BLACK SHEETS—		
14 gauge	5 45	6 45
16 gauge	5 55	6 55
18-20 gauge	6 15	7 15
22-24 gauge	6 25	7 25
26 gauge	6 35	7 35
28 gauge	6 50	7 50

Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANIZED SHEETS—		
U.S. Standard—		
10¾ oz.	8 75	9 75
28 gauge	8 25	9 25
26 gauge	8 00	9 00
22 to 24 gauge	7 85	8 85
20 gauge	7 65	8 65
18 gauge	7 65	8 65
16 gauge	7 50	8 50
14 gauge	7 50	8 50
12 gauge	7 50	8 50

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	10 00	9 25
26 gauge	9 75	9 00
24 gauge	9 15	8 60
22 gauge	8 80	8 15
18 and 20 gauge	8 10	8 00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Steadier

Montreal.

There has been no further change in prices on bar iron and steel since the reduction of two weeks ago, bar iron being quoted at $3.70 base. Although the market might be stated as being much steadier in the past few weeks in the United States mills it is interesting to note the 20 per cent. reduction in wages announced by the U. S. Steel Corporation. Buyers, up to the present, are not placing their orders above actual requirements, and with this wage cut made it does not offer much inducement to buy heavily for the present at least. There is a continued sorting demand locally, jobbers believing the buying will be done in small orders well through the summer months. Following are present quotations:

Common bar iron, 100 lbs.	3 70
Refined iron	5 20
Iron finished machinery steel	3 75
Mild steel	3 70
Band steel	3 70
Single reeled machinery steel	5 75
Spring steel	5 00
Sleighshoe steel	3 70
Tire steel	3 90
Toe calk steel	4 60
Harrow tooth steel	3 85
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE.—Refined iron is aproximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Boiler Tubes Revised

Montreal.

A revision has been made in quotations on boiler tubes, and slightly lower prices are given on the best selling sizes, while the slow sellers are unchanged. The movement is reported slow, mostly in small orders for repair work. Following are the revised prices:

BOILER TUBES—	Seamless	Lapweld
1 inch	$26 00	$25 00
1¼ inch	27 25	26 00
1½ inch	26 25	27 00
1¾ inch	29 75	27 00
2 inch	29 25	22 90
2¼ inch	33 00	26 00
2½ inch	41 75	28 00
3 inch	49 25	35 00
3½ inch	63 50	40 75
4 inch	85 00	51 75

Lead Products are Firm

Montreal.

Firm prices are continuing on lead products, but no advance is made since the change to higher prices on solders last week. With the continued strength of pig lead on the primary markets any changes in the near future are likely to be on the upward trend. A marked improvement in sales is reported in the last two weeks. Present quotations are as follows:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 35
Zinc sheets, casks	0 13
Do., broken lots	0 13½

Little Change in Waste Materials

Montreal.

Little change is noted in the market for scrap metals, although heavy lead has stiffened with a ¼ cent advance in price. Machinery cast, stove and boiler plates on the other hand are again lowered, with a very dull market on these, the condition of the steel industry having its effect. Following are nominal quotations:

DEALERS' BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 03¾
Light copper	0 07¾
Lead, tea	0 02
Heavy copper	0 10½
Wrought iron, R. Rd., No. 1, per gr. ton.	12 00
Malleable scrap (ton)	11 50
Pipe scrap (ton)	8 00
Stove plate, per ton	16 00
Heavy melting steel	8 50
No. 2 busheling	4 00
Boiler plate	10 00
No. 1 machinery cast, per gr. ton	24 00

Ingot Metals Remain Steady

Montreal.

The ingot metal market this week remains steady with comparatively few changes in prices. Considering the situation in England prices have held remarkably well; however, should the strike continue much longer it may mean a shortage in some lines.

TIN.—Although this metal has eased in London owing to lessened consumption, the market here remains firm owing to scarcity of supplies. The shortage here and in New York has resulted in slightly higher prices, and it is now quoted at 40 cents.

COPPER.—Copper shows little change in London or New York, and a see-saw market will probably be in evidence for the next month or two. No change is made in quotations, electro 18 cts., casting 17½.

SPELTER.—The recent advance in spelter in East St. Louis seems to have come to a halt, temporarily at least. London is also easier. The future of this metal depends to some extent on the outcome of negotiations with Germany. Price unchanged at 8½ cents.

LEAD.—Lead continues to advance both in London and the U.S.A., although statistics tend to show the advance cannot be maintained. The trust price was advanced again this week and the situation seems strong. Consumption, however, is only fair and a reaction would not be surprising. Quotations are slightly higher at 7 cents.

ANTIMONY. — Antimony seems to show a little more activity with little change in quotations. Should a duty be imposed in U.S.A., prices would no doubt advance. Chinese is quoted at 7¾ cents, high grade English 8½ cents.

ALUMINUM.—Aluminum is slightly easier this week, and is still dull on the market. Local price, 34 cents.

Toronto Markets

TORONTO, May 5.—Minor reductions are again evident on the market this week, but nothing of an outstanding nature has been recorded. The principal items showing a decline are, gasoline and coal oil. Oakum is also down, and one size of range boilers has a small reduction. Some lines of carpenters' tools are lower, namely screwdrivers, planes and levels. Soldering coppers show a decline, while reductions are noted in pack chain, sprinklers, mops, fence hooks, and sash weights.

Primary markets remain practically unchanged; lead and zinc products still holding firm, with sheets, plates and bar iron at previous levels. Pipes and fittings remain at last week's prices, and the waste market is still slow. Sales in seasonable lines are reported as satisfactory with a general steadier tendency.

Reduction in Coal Oil

Toronto.

Gasoline this week remains at 36 cents, following the recent reduction of 2 cents per gallon. Coal oil has followed with a similar drop of 2 cents, prices being now 23 and 26, according to grade.

Small Demand For Bars

Toronto.

Bar iron and steel are reported to be held unchanged on local markets and buying continues to be largely of the hand to mouth variety. On United States markets bars have reached the lowest point since November, 1919. It is stated that Japanese pig iron can be delivered on the Pacific coast at $6 a ton lower than the United States figure, and an increase in the tariff is being asked for. In local warehouses stocks are said to be ample for present needs but are not heavy. Quotations are the following:

Common bar steel, 3-16 in.	$ 4 50
Common bar steel, ¼ in. and heavier	4 00
Common bar iron, 3-16 in	4 50
Common bar iron, ¼ in. and heavier	4 00
Angle base	4 10
Horseshoe iron	6 00
Tire steel	5 95
Band steel	4 50
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	23 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	4 50
Norway iron	15 00
Toe caulk iron	6
Hoop Steel	6 00

Nail Sales Improve

Toronto.

A continued improvement in the demand for nails is noted. Sales are increasing in number but very few large orders are reported, and retailers as a whole are apparently ordering in small quantities and there is a tendency to underbuy due to a doubt as to whether prices will decline still further. No changes are reported and wire nails are still quoted at $4.65, base, and cut at $5.60.

Lead Unchanged But Firm

Toronto.

Primary lead markets continue to show firmness, but no changes have been made in local lead or zinc product prices. Under the circumstances there is a fair movement in lead and zinc goods and business is reported to be showing a steady though small increase. Present prices are as follows:

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 34
Do., strictly, lb.	0 24
Do., commercial, lb.	0 22
Do., guaranteed, lb.	0 27
Do., wiping, lb.	0 22
Zinc sheets, per lb.	0 16

Oakum Shows Reduction

Toronto.

Special No. 1 oakum shows a reduction of $1.50, the new price being $17 per hundredweight. Plumbers' oakum remains at the recent decline of $7.50.

Slight Change in Boilers

Toronto.

A small change is shown in standard range boilers, the price for the thirty-gallon being $12, a reduction of 50 cents. Sales are still even and according to present needs. Following are present quotations:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallons	$12 00	$15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Glass Wash Boards Up

Toronto.

Prices on some lines of glass wash boards are slightly advanced this week, although window glass is down and plate is keeping firm. The new quotation on Diamond King boards is $8.75.

Corrugated Sheets Held

Toronto.

No price changes are recorded in corrugated sheets and business is showing a small but gradual improvement. The following are present quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	9 50
No. 26 gauge	10 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00
Less 7½%.	

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Watering Pots Reduced

Toronto.

Watering pots, both japanned and galvanized, are included among those articles showing a reduction, japanned being quoted at list plus 10 per cent. and galvanized at 30 per cent. above list.

Carpenters' Tools Down

Toronto.

Stanley planes and levels, also screwdrivers and braces, are now quoted on a revised list with reductions of approximately 7½ per cent. on the previous prices.

Soldering Coppers Reduced

Toronto.

A reduction of 3 cents per pound is now given on soldering coppers, the new quotation being 41 cents, base.

Jack Chain Prices Revised

Toronto.

A new list on both steel and brass jack chain, showing a readjustment of prices on a very slight decline, has now been issued. Following are the new net quotations, f.o.b. Toronto:

JACK CHAIN

Bright Steel Wire and Brass Wire.

S.W.G. No.	Single and double link. Price per Doz. Yards. Steel Single. Link	Steel Double. Link	Brass Single. Link	Brass Double. Link
7	$1 50	$1 40	$6 35	$7 50
8	0 95	1 15	5 25	6 15
9	0 90	1 05	4 25	5 15
10	0 80	0 95	3 50	4 75
11	0 70	0 85	2 80	3 77
12	0 65	0 72	2 30	3 20
13	0 60	0 65	1 92	2 50
14	0 55	0 60	1 60	2 05
15	0 50	0 58	1 25	1 60
16	0 48	0 53	1 00	1 32
17	0 45	0 51	0 84	1 10
18	0 40	0 48	0 70	0 90
19	0 40	0 45	0 60	0 76
20	0 40	0 45	0 55	0 72

Mops Now Cheaper

Toronto.

Both self-wringing and crank-wringing mops are shown at reduced prices this week, the new quotations being: Self-wringing, $4.75 per dozen, a reduction of 75 cents on last week's price, and crank-wringing, $7 per dozen, as compared with $8.25 on the old list.

Pipe Fittings Unchanged

Toronto.

Quotations remain unchanged on pipe fittings, and very little increase in sales is reported. Wrought nipples were not affected by the change in piping. Stocks are reported in good condition. Following are current quotations:

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%
Do., ⅛ in., 2½ to 4 in.	35%
Flanged Unions	20%
Dart Unions, blk., ¼ to 2 in.	29%
Do., ⅛ in., 2½ to 4 in.	14%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., long, ⅛ in. to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B	0 23	0 32½
Class C	0 15	0 23

Fence Hooks Reduced

Toronto.

Galvanized fence hooks are among the items showing a reduction this week, these now being quoted at $7.50 per keg net.

Wrought Pipe Holds

Toronto.

Pipe, both wrought and steel, is held at the reduction announced last week and list No. 51 of April 25 is in force. There is stated to be an improvement shown in the demand for the smaller sizes of piping and supplies and deliveries are satisfactory. The pipe list will be found in current market quotations.

Brass Goods Unsettled

Toronto.

Conditions appear to be unsettled in brass goods, although no actual price changes are reported on standard compression work. Some readjustments are expected in certain lines by many, and it is thought that some reductions may be looked for. Business is reported to be variable with a slight increase, which, however, is not well maintained. Quotations are generally the following:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	25%
Do., Fuller	25%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	10%
J.M.T. C.	15%
J.M.T. Gate Valves	15%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Rope Firm and Unchanged

Toronto.

The market continues firm in rope and cordage though no changes have been made in prices by manufacturers or jobbers. While prices may not advance for the present, there is thought to be little prospect of them being any lower, and rope manufacturers state that, judging from the outlook in the hemp and sisal markets, buying at the present prices should be good. Stocks are said to be in fair shape but not large. Quotations will be found on current market pages.

Sash Weights Decline

Toronto.

A reduction is reported in the price of solid sash weights, the new local quotation being $3.75 per hundredweight net. The previous price was $4.25. Figures are shown in the current list.

Sheets Continue Quiet

Toronto.

Some lower quotations are reported on sheets and plates, but prices continue to show a range. Although slight improvements in sales are reported here and there the general report is that buying is still small and light. Consumers are buying for present needs only and stocks are not supposed to be heavy. An increase in inquiries is reported by some of the sheet mills in the United States and some new business has been booked but the bulk of the increase is stated to have come from the automotive industry. The following are current quotations here and the range is given:

PLATES

10 gauge	from $5 00 to $6 00
12 gauge	5 05 6 05
14 gauge	5 10 6 10
16 gauge	5 20 6 20

BLACK SHEETS

14 gauge	5 10 to 6 10
16 gauge	5 20 6 20
18-20 gauge	5 75 6 75
22-24 gauge	5 80 6 80
26 gauge	5 85 6 85
28 gauge	6 00 7 00

Prices shown are for full cases. An extra charge of from 25c per 00 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	8 60 to 9 60
U. S. 28	8 20 9 20
U. S. 26	7 90 8 90
22 and 24	7 75 8 75
18 and 20	7 60 8 60
16	7 45 8 45
12 and 14	7 40 8 40

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Slackness in Waste Continues

Toronto.

The general slackness in the waste material markets continues, and improvement has not made much headway. Consumers are using up their accumulated stocks and are not anxious for fresh supplies. Cast iron scrap is probably the most active of the different lines. Steel mills are not using much material and prices are nominal. Nonferrous metals have not improved but white metals have been more active. Few changes in quotations are noted and the following are nominal prices for fair-sized quantities:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	19 00 20 00
Yellow brass	6 50 7 50
Red Brass	10 00
No. 1 machinery cast	24 00 25 00
Heavy melting steel	13 50 14 50
Heavy Copper	10 50 11 00
Scrap zinc	3 75 4 25
Light brass	4 00 4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50 14 50
Scrap pipe	8 00 9 00
Heavy lead pipe	4 00 4 50
Old rubbers, boots and shoes	2 00 2 50
Overseas lumbermen's rubber boots	1 50 2 00
Auto tires	0 50 1 00
Solid tires	0 75 1 25
Tea lead	1 75 2 00

Ingots Dull But Unchanged

Toronto.

The better feeling noted in the ingot metal market last week has not been maintained and business has been quiet and dull again. Primary metal markets are quiet with prices practically unchanged. Lead has advanced on outside markets and tin has made a small increase.

TIN.—There has been an uptrend in tin in London markets, and United States markets were influenced. Buying, however, has been in small quantities. Prices here are unchanged at 38½ cents.

COPPER.—No changes have been shown in copper prices and though a few more sales are reported on United States markets the export trade is very

dull and quiet. London prices advanced 10s., but trading was small. Quotations here remain at 18 cents for casting copper.

LEAD.—This metal continues to show firmness and quotations advanced to $4.50, New York, or $4 a ton. London also was stronger. Business locally is quiet and prices are held at $6.25.

SPELTER. — Outside markets continued firm in spelter. United States prices held, but London advanced and then slightly receded. Quotations locally are unchanged at $7.25.

ANTIMONY. — This market was strong throughout the week but last week's prices held. Quotations here are still 8 to 9 cents.

ALUMINUM.—This metal was quiet and prices steady. No changes are recorded here and 30 cents is still quoted.

London Markets

LONDON, May 5.—Business in London and surrounding districts has been surprisingly good this last week in spite of the unfavorable weather. Spring lines, including paints, oils, lawn mowers, poultry netting, garden tools, etc., are all in good demand. Price changes are conspicuously small this week and the steadiness in the markets should encourage buying.

Turpentine Price Advances

London, Ont.

There has been an advance of 5 cents in the price of turpentine this week and it is now quoted at $1 per gallon in single barrels. Sales are improved and there is more movement. Present quotations are as follows:

TURPENTINE.	
1 barrel lots, Imp. gal.	1 00
2 to 4 barrel lots, Imp. gal.	0 99
5 gallon lots, Imp. gal.	1 15

Linseed Oil Unchanged

London, Ont.

There is a good seasonable sale on linseed oil at the present time and prices remain unchanged from last week. The following are quotations:

	Raw.	Boiled.
1 to 2 barrels, Imp. gal.	0 77	0 80
3 to 5 barrels, Imp. gal.	0 76	0 79
6 to 9 barrels, Imp. gal.	0 74	0 77

Less barrels, add 15 cents gal.
5 gal. jacketed cans, $1.25 each.

White Lead Moving Well

London, Ont.

There is a good movement in white lead and sales are numerous, but they are not large and the bulk of the business is in small lots. Prices show no change and the following are still the market quotations:

	Tons.	Less Tons.
Pure, per 100 lbs.	$14 95	15 30
Elephant, per 100 lbs.	15 45	15 80

Putty Held Unchanged

London, Ont.

Putty is having only a fair sale at present. There is no change in price to record. Quotations are the following:

Standard, 100 lb. drums, $7.05 per 100 lbs.; 25 lb. drums, $7.30. Pure, 100 lb. drums, $8.55 per 100 lbs.; 25 lb. drums, $8.80.

Window Glass Sales Fair

London, Ont.

No great business is being done in window glass and sales are just fair. Prices are holding unchanged and quotations are 50 per cent. off new list for single and double diamond and 60 and 10 per cent. off cut light list.

Rope Sales Steadily Growing

London, Ont.

There is a slow but steady improvement in the sales of rope and cordage. No changes are reported in prices and quotations are the following:

Pure Manila, 24½c base; Beaver Manila, 20c; New Zealand Hemp, 20c; Sisal, 18c.

Fly Swatters Moving

London, Ont.

Sales of fly swatters are beginning and prices on some of these goods are the following: Canada and Peerless, per dozen, $1.05; Dunlop, $1.15.

Poultry Netting and Screen Wire

London, Ont.

Business is good here on screen wire cloth and poultry netting. The Canadian make of poultry netting is quoted at list plus 10 per cent. for the 1-inch and 2-inch mesh, and screen wire cloth, black painted, is $3.50 per 100 square feet.

Shovels and Garden Tools

London, Ont.

Sales on garden tools and spades and shovels continue good. The former are quoted at list less 50 and 10 per cent. and the latter at 35 per cent. off list.

Good Sales of Mowers

London, Ont.

Lawn mowers are reported to be moving out well and sales are good. There have been no changes in prices and the quotations on some of the better sellers are the following:

WOODYAT—14 in., $11.80 each; 16 in., $12.50; 18 in., $13.20; 20 in., $13.90.
Less 10 per cent.

STAR—14 in., $10.70 each; 16 in., $11.40.
Less 10 per cent.

EMPRESS BALL BEARING—14 in., $15.25 each; 16 in., $16.00; 18 in., $16.65; 20 in., $17.35.
Less 15 per cent.

DAISY—12 in., $8.25 each; 14 in., $9.00; 16 in., $9.70.
Less 15 per cent.

BROCKVILLE MAKE—K, 12 in., $10.10 each; 14 in., $10.50; 16 in., $10.91; 18 in., $11.65.
C, 14 in., $11.05 each; 16 in., $11.60; 18 in., $12.05; 20 in., $13.10.

BB, 14 in., $12.85 each; 16 in., $13.45; 18 in., $14.10; 20 in., $14.45.

Grass Catcher Prices

London, Ont.

With the sales of lawn mowers there is beginning to be a demand for grass catchers. The prices on these are as follows: No. 20G, with galvanized bottom, $20.75 per dozen. The all canvas, No. 1, is quoted at $7.50 per dozen.

Wringers and Washers Move

London, Ont.

There is a good sale at the present time for wringers and washing machines and the Canadian makes are quoted at 25 per cent. off list prices.

Alabastine Price Erroneously Quoted

London, Ont.

London, Ont.—In the April 23 issue alabastine was erroneously quoted at 15 cents per pound list in place of 16 cents. The correct price on alabastine is the price shown in the current market quotation pages of that issue as follows: Colors and white, 2½ pound packages $10.10 for 100 pounds, 5 pound packages $9.60 for 100 pounds, f.o.b. Paris, Ont., or nearest jobbing house east of Manitoba.

Carpet Sweepers Moving

London, Ont.

Now that house cleaning time is here there is a good sale for carpet sweepers and the quotations on some of these goods are the following:

CARPET SWEEPERS—Universal Japd, $48.00 doz.; Universal, N.P., $53.00; Grand Rapids Japd, $50.00 doz.; Grand Rapids N. P., $55.00; Princess N. P., $57.00; American Queen N. P., $60; Parlor Queen N. P., $62.00.
SWEEPERVACS — Household, $94.00 doz.; Grand Rapids, $106.00; Superba, $120.00.

New Net Handle Prices

London, Ont.

Sales are good on handles for garden tools, spades, shovels, etc., and the new net prices figured from the recent changes are as follows:

SECOND GROWTH ASH BENT HAY FORK HANDLES—4 ft., $6.38 doz.; 4½ ft., $7.26; 5 ft., $8.36; 5½ ft., $9.68; 6 ft., $11.00.
EXTRA QUALITY ASH BENT HAY FORK HANDLES—4 ft., $4.51 doz.; 4½ ft., $4.95; 5 ft., $5.72; 5½ ft., $6.38; 6 ft., $7.15.
EXTRA QUALITY HOE HANDLES—4½ ft., $3.63 doz.
EXTRA QUALITY RAKE HANDLES— 5 ft., $4.68 doz.
SECOND GROWTH LONG SOCKET SHOVEL HANDLES—$7.26 doz.
SECOND GROWTH LONG BENT SHOVEL HANDLES—$9.57 doz.

No Change in Nails

London, Ont.

There has been no change in the price of nails. The sales are steadily increasing on these commodities. The base price on wire nails is $4.65 per keg and on cut $6.

Calf Meal Prices Decline

London, Ont.

There has been a decline in the price of Royal Purple calf meal and the new quotations are 20 cents per hundredweight lower. The new prices are the following:

ROYAL PURPLE CALF MEAL—25 lb. bags, $4.40 per 100 lbs.; 50 lb. bags, $4.35; 100 lb. bags, $4.30.

Lamp Black is Lower

London, Ont.

A decline has been made in the price of lamp black and new quotations are about 10 per cent. lower. The following are new prices on the genuine Germantown:

LAMP BLACK—Genuine Germantown, 1 lb., 35c lb.; ½ lb., 45c lb.; ¼ lb., 54c lb.

Winnipeg Markets

WINNIPEG, May 5.—A fairly large number of price changes have been recorded this week, but are of a minor nature. Among the more important changes is the 30-cent reduction on wire nails, which now have a base price of $5.65 F.O.B. Winnipeg. Turpentine has dropped another 10 cents per gallon. Solder is also reduced 5 cents per pound; and other items that show reductions are resin, soil pipe and fittings, Hurwood screw drivers and brass butts. Linseed oil, and black and galvanized sheets remain unchanged. Prices on wrought iron pipe are revised. Business is improving very slowly. Seasonable lines are moving fairly well, and wholesalers report a brisk sale in these articles.

Turpentine Reduced

Winnipeg.

The price of turpentine is reduced again this week and is now selling at $1.20 per gallon in barrel lots. Less than barrels 10 cents per gallon extra. Containers 25 cents per gallon extra.

Linseed Oil Unchanged

Winnipeg.

Linseed oil prices are held unchanged again this week and quotations are $1.05 per gallon for raw and $1.08 for boiled in single barrels.

Reduction in Resin

Winnipeg.

The price of resin has been lowered and is now selling for 15 cents per pound in barrel lots; less quantities, 16 cents.

Decline In Solder

Winnipeg.

The price of solder has been dropped 5 cents per pound and the following prices now prevail:

Half and Half, case lots, 26c; less, 27c.
Wire solder, 37c.
Tinkers' solder, 32c.
Wiping solder, case lots, 24c; less, 25c.

Wire Nails Reduced

Winnipeg.

The price of wire nails has been dropped another 30 cents per keg and the price f.o.b. Fort William is now $5, base, and f.o.b. Winnipeg $5.65, base.

Soil Pipe and Fittings Reduced

Winnipeg.

The prices on soil pipe and fittings have been reduced this week and are quoted as follows:

Soil Pipe—2 and 3 in., 7½% off; 4 in., 25% off; 5 and 6 in., 12½% off; 8 in., 7½% advance.
Soil Pipe Fittings—2 and 3 in., 35% off; 4, 5 and 6 in., 40% off; 8 in., 7½% advance.

Hurwood Screwdrivers Down

Winnipeg.

Prices have been lowered on Hurwood and Pony Hurwood screwdrivers and are now selling at the following prices:

Hurwood—3 in. per doz., $3.50; 4 in., $4.25; 5 in., $5.20; 6 in., $6.20; 7 in., $6.85; 8 in., $7.55; 10 in., $9.40; 12 in., $11.15.
Pony Hurwood—3 in., per doz., $3.50; 4 in., $4.20; 5 in., $4.95; 6 in., $5.95; 8 in., $7.20.

Machinery Steel Reduced

Winnipeg.

Prices are lower this week on cold drawn machinery steel and following are the latest quotations:

5-16 in., $10.51; ⅜ in., $10.51; 7-16 in., $10.03; ½ in., $10.03; 9-16 in., $10.03; ⅝ in., $9.71; ¾ in., $9.71; ⅞ in., $9.55; 1 in., $9.55; 1⅛ in., $9.45; 1¾ in., $9.45; 1½ in., $9.31; 1¾ in., $9.31; 2 in., $9.31; 2¼ in., $9.05; 2½ in., $9.05.

Brass Butts Down

Winnipeg.

Prices have been lowered on brass butts and following are the latest quotations: Narrow, 30 per cent. adv.; middle, 30 per cent. adv.; broad, 30 per cent. adv.; desk, 30 per cent. adv.

Sheets Remain Unchanged

Winnipeg.

There are no changes in prices of black and galvanized sheets this week and stocks are in fairly good shape. There has been a slight improvement in sales, but the demand is away below normal. The present prices are as follows:

	Black.	Galvanized.
10 gauge	$7 15	....
12 gauge	7 15	....
14 gauge	7 20	....
16 gauge	7 30	9 10
18 gauge	7 80	9 25
20 gauge	7 80	9 25
22 gauge	7 85	9 40
24 gauge	7 85	9 40
26 gauge	7 90	9 55
28 gauge	....	10 15
10¾ ounce	....	10 55

Wrot. Pipe Revised

Winnipeg.

Prices on wrought iron pipe have been revised this week and are a trifle lower. Following is the new list:

BLACK PIPE. F.O.B.

Size ins.	Winnipeg	Calgary Edmonton Lethbridge and Medicine Hat.	Saskatoon	Regina	Brandon
		[Add to Winnipeg price.]			
⅛	$ 6.21	$ 0.30	$ 0.20	$ 0.17	$ 0.11
¼	5.31	0.53	0.34	0.30	0.19
⅜	5.45	0.70	0.45	0.40	0.26
½	7.25	1.05	0.67	0.59	0.38
¾	8.73	1.40	0.90	0.79	0.51
1	12.56	2.08	1.34	1.17	0.75
1¼	17.01	2.80	1.80	1.57	1.00

Pittsburgh Markets

PITTSBURGH, May 5.—The steel market situation might be summed up very briefly by saying that the market is very steady and also extremely quiet. As to steadiness, the prices recently developed are being strictly maintained, and while in pre-war times that was not an unusual but rather the usual condition, it has not been so usual since the war, since for two-thirds or three-fourths of the time the independent and Steel Corporation prices have been different, the independents being usually either above or below the Corporation. That is the better way to put it, rather than to say that the Steel Corporation has been above or below the independent prices, since it is the independent prices that have done nearly all the fluctuating.

Already there is some speculation in trade circles as to whether or not the independents will cut the prices they have lately adopted. Just now the various producers strongly assert that they will not, because they cannot afford to, but it was only last November they stopped saying they could not sell at the Industrial Board prices, while about the beginning of February they began to cut those prices. The unit cost of production is very high, on account of poor distribution of overhead with the present light operations, but an individual mill might figure that if it secured additional business, furnishing a more economical operation, it could thus afford to sell at a lower price. As to the Steel Corporation making any further reductions, the Steel Corporation's general policy is well understood. The Corporation would reduce its prices if thereby a broader consuming market for steel could be developed, but it is plain that this could not be done at present or in the near future. There is a very strong probability that steel prices will be reduced readily when a latent demand develops large enough to give the steel industry reasonably full employment, but no one expects such a condition to develop in the near future. There are possibilities of it for next September or October, but the common view in the steel trade is that there will be no really heavy demand before next year. A heavy demand would be a demand more than 50 per cent. greater than the present demand, which is running, at long range view, at about 40 per cent. of capacity.

The Steel Corporation is undoubtedly

receiving more business than formerly, or since it reduced its prices, this carrying with it a modification of contracts. The Corporation's customers are naturally more disposed to specify now than a few weeks ago, when the cost was higher than prices that could be done with independents. However, the increase in the Steel Corporation's specifications is perhaps not altogether as great as might have been expected to result from the change in prices.

This Steel Corporation business, however, does not appear in the open market, being simply in the form of specifications against old contracts. In the open market there is very little business. No new or increased wants have arisen, and the volume of business being booked by independents is particularly small now, as is naturally to be expected from the circumstance that customers of independents closed rather freely at the time when the independents were withdrawing their former quotations in favor of the advanced prices they are now adhering to, and to which the Steel Corporation reduced.

Steel Prices

The following quotations, developed in the readjustment that fell approximately within the period April 8 to April 15 still rule: Billets, $37; slabs, $38; sheet bars and small billets, $39; rods, $48; bars, 2.10c; shapes, 2.20c; plates, 2.20c; hoops and hot rolled strip, 2.75c; cold rolled strip, 5.50c; plain wire, 3c; wire nails, $3.25; standard steel pipe, 62½ per cent. basing discount; blue annealed sheets, 3.10c; black sheets, 4c; galvanized sheets, 5c; tin plate, $6.25.

In manufactured steel products there were some changes in the past week. At first, in the readjustment, some spike makers, as noted in last week's report, set standard spikes at 3.30c, small spikes at higher base prices and boat and barge spikes at 3.85c. Then the Illinois Steel Co. and Inland Steel Co. put out a uniform base price of 3.40c applicable to all spikes, subject to extras in the list used during the war control, and the other spike makers are disposed to use this price basis when in competition, but some of them assert that they will not do it regularly.

Last week's quotation on chain, 6.35c, was based on the quotation of one producer, who had reduced from 6.75c. The other producers have since reduced from 6.75c to 6.25c, base, at the same time decreasing the advances on ½-inch and smaller by a quarter cent.

Operations

The Steel Corporation has probably a slightly heavier operation now than at its low point about three weeks ago, when the rate was scarcely 40 per cent. of capacity. The independents are doing better, probably operating at 40 per cent. or more. In January the Steel Corporation operated at about 90 per cent. and the independents at about 30 per cent.

Pig Iron and Coke

Foundry iron is easier. While some producers are still quoting $25, valley, and state they are picking up small orders from regular customers, one producer has gone to $24.50 and it is possible $24 might be done, the price at any rate being quoted by some middlemen, perhaps on resale iron.

Merchant furnaces that were holding basic iron at $25 have withdrawn the figure and have no open quotation. When any worth while inquiry develops they will decide what to quote. A steel works interest that sold over a month ago at $23 has gone up to $25. Lower sellers remain, and the question just now is whether they will develop enough competition with each other to do $22 or less, or will withdraw on account of other producers having gone up, and with the idea of giving the steel market some sentimental support. One valley steel interest has sold several small lots of basic iron at intervals at $22.50, while a Canton interest states it was quoted as low as $22 on its recent inquiry for 10,000 tons for May. No purchase was made as the company will blow in its own furnace instead, probably because it has a by-product coke plant that would make the operation more economical than that of a furnace selling pig iron at $22 and buying Connellsville coke. The question is whether the $22 quotation made for Canton was from Weirton, valley or Cleveland, as the three points have the same freight to Canton, $1.96.

Connellsville furnace coke shows quite a range. Sales three weeks ago were at $3.50, while since then coke has sold both lower and higher, at $3.25 or $3.30 and at $3.75, possibly at $3.90. It is unusual for there to be such a spread. Some furnaces believe they could buy at $3 if they could offer a good tonnage, sufficient to operate a coke plant economically. As it is, most coke producers keep their plants idle as there is less loss in that than in running to produce the very small quantities for which orders could be secured. Spot foundry coke remains at $5 to $5.50.

ADAPTING "SAVE THE SURFACE" IDEA

Continued from page 55

advertising you can identify yourself with a great movement which if carried out successfully will prove of inestimable benefit to your town and the surrounding country and also to the entire Dominion. You can cash in on the efforts which have already been put behind this movement and which have interested many of your customers in the subject of painting and varnishing and in that way saving the surfaces of their homes, barns, motor cars, summer homes, implements, and valuable property of all descriptions.

"At small expense you could have special dodgers printed by your local printers, for enclosure in all parcels going out of the store, and on these dodgers you could drive home the many arguments which are effective in preaching the gospel of 'Save the Surface and You Save All, Paint and Varnish.'

"Save the Surface" Department

"You can create a 'Save the Surface Department' in your store which will be the brightest, most attractive, most cheerful, most inviting, most profitable, and most interesting department of your business. There is no limit to the business you can do through this department if you put constructive effort and enthusiasm to work for you.

"Start the ball rolling in your town, create the first Save the Surface Department, and you will cash in on it. Link up your store front, your store windows, your local advertising, and get your sales force boosting your 'Save the Surface' Department and you will more than make up this year for the losses which may be sustained through the falling off in business in some other department.

"Right now is the time to get your department under way and get your publicity plans working for you. Right now is the time to cash in on this movement in a big way, and liberal rewards await those who have enough gumption to put some real vim behind their efforts in connection with this movement and take advantage of the opportunity which presents itself at this time."

"I believe you are right," stated the hardwareman. "I am going to start a 'Save the Surface' Department in my store, and believe me if I start one I am going to make a huge success of it."

"That's the spirit," I replied. "We hope to have an opportunity within the next few weeks of telling the readers of HARDWARE AND METAL how your plans have worked out and also place before them a photograph of your new department and one of your windows linked up with it."

"SAVE THE SURFACE"—

A National Duty

UNDERLYING all the special effort put forth to encourage the use of paint and varnish should be the inspiration that in so doing an important national duty is being fulfilled. Paint for the preservation of property looms up as a large factor in the economic life of this country and its value as such must be crystallized in the minds of customers largely through the efforts of the hardware merchant with whom they are in personal contact. Much has been said about the preservative qualities of paint, and no doubt there are a few who would not admit all that is claimed for it if put to the test, but it is realized that the public has demonstrated a hesitation toward putting such convictions into practice. Personal effort on the part of the hardware trade will help greatly to establish a correct appreciation of the value of paint, in the minds of customers.

There is no question but that Canada suffers a huge economic loss to property each year through inadequate protection against the elements. If figured out in dollars and cents this loss would possibly be found to exceed the annual loss by fire and other elements practically beyond human control. Nothing is left undone to curtail the destructiveness of fire, yet because there is less lurid evidence of the loss from exposure, it is allowed to run its course almost unhindered. In times such as these when every economy must be practised it is obviously unwise to allow such elements to be rampant.

The real value of protecting wood surfaces is evident from the following statistics supplied by the Canadian Commission of Conservation which shows the comparative years of service of treated and untreated woods:—

	Untreated	Treated
Railway Ties	7	17
Posts	13	26
Piling	3	20
Shingles	20	35
Lumber	8	20

Attention is also drawn by the Commission to the large number of unpainted houses and barns in Canada. In the summer of 1915 the Commission conducted a survey of 100 farms in each of four counties in Ontario and on 400 farms found 352 unpainted barns and 53 unpainted houses. In a typical farming community this is indication of great neglect and loss.

The cheapness of wood in Canada for many years encouraged extravagance in its use and it has been only of very recent years that the average individual has felt any necessity for economy in the use of timber. The experience of the Eastern States is ample evidence of how rapidly large timber resources can be depleted due to insufficient protection and if Canada is to maintain this great source of natural wealth much effort must be directed along the lines of protection.

While such effort to increase the use of paint and varnish will undoubtedly result in more business for the hardware merchant it should be kept in mind that the dominating factor is the fulfilling of a national duty by helping to stop a serious drain on the country's resources. "Saving the Surface" of our buildings and equipment helps to store up national wealth and this in turn will benefit all concerned. Fulfilling the idea of preservation, as suggested in the "Save the Surface" campaign, should be impressed upon all customers by the hardware merchants. Paint consumption, per capita, is low. There are unlimited possibilities for the sale of paint and varnish and these have scarcely been touched.

With the impetus of a national campaign in the interests of thrift and economy the customers of each hardware store should not be hard to convince that they are not only beautifying but are preserving their properties and indirectly augmenting the country's wealth and integrity by the intelligent use of paint and varnish.

In the following pages will be found a number of articles setting forth how the hardware merchant can most effectively apply the ideals of this "Save the Surface" movement to his own business. Quick action will bring biggest rewards to the merchant's effort.

"Save the surface and you save all" Paint & Varnish

Establish "Save the Surface" Department

Public Is Reluctant to Recognize Preservative Value of Paint — An Actual Illustration of Surface Saving Quality of Paint

Written for Hardware and Metal by George Henderson, Chairman "Save the Surface" Campaign Committee; President Brandram-Henderson, Ltd., Montreal.

LET me congratulate the editor and staff of Hardware and Metal upon their enterprise in publishing a "Save the Surface" number of their very excellent periodical. They have the welfare of the journal's many readers at heart in doing this, and the results that will be obtained through the manner in which the objects of the campaign are discussed will without question justify their action.

I know of no form of advertising more calculated to inspire confidence in the public mind than that being conducted by the "Save the Surface" campaign committee. It is the co-operative, non-proprietary nature of the appeal which robs it of the selfish characteristics so often injurious to the effect of the advertising of individual concerns. The members of the committee feel this, and I believe attach a dignity to the work they do in this regard that they do not associate with their individual endeavors promoting the prosperity of their own companies. How much finer and more inspiring an undertaking is it to occupy the time in the dual endeavor of advancing the prosperity of a great national industry in all its phases and ramifications, and in devising plans to protect, at a time when economic measures are so necessary, the property of Canadian people, than merely to spend the time in the selfish work of advancing one's own individual company or fortune.

Paint Has Wide Utility

The "Save the Surface" advertising is making it manifest that buildings and furniture, machinery, farm equipment, automobiles, waggons, in fact practically every manufactured article, requires the use of paint or varnish, in the first place for its preservation, and in the second place to give it a pleasing appearance, thus adding to the sum total of human happiness and incidentally increasing the

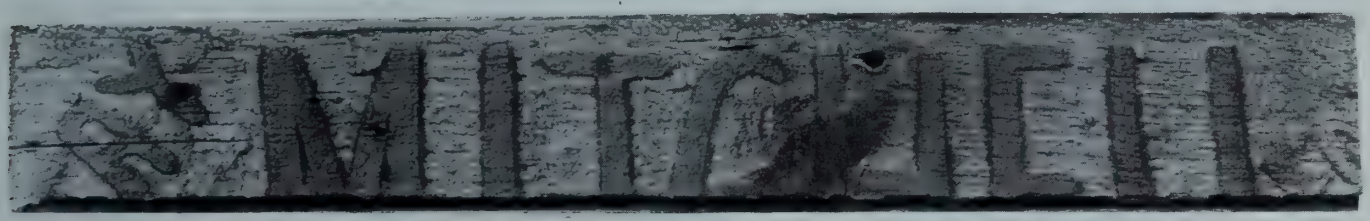
GEORGE HENDERSON

market value of these buildings and articles.

It is, of course, quite true that the advertising of the "Save the Surface" campaign calls for the expenditure of money on the part of the persons influenced by it, but it advocates an expenditure of a very peculiar character, inasmuch as that expenditure brings about a greater saving than the amount expended. The truthfulness of this contention is already so manifest that the public is rapidly becoming more and more influenced, and the great paint and varnish industry of this country, an essential factor of which is just as much the hardware merchant and retailer as is the manufacturer, is to-day experiencing a reasonably active business at a time when there is some depression and many industries are distinctly quiet.

A Striking Example

At this point in my article it may not be amiss to refer to an incident which recently came to my attention, and to submit an extraordinary example of the preservative effect of paint. The half-tone illustration herewith below was prepared from a photograph about twenty inches long by about three and one-half inches wide which constituted part of a sign which, about twenty-four years ago, was placed by Mr. W. A. Mitchell, of Kingston, Ont., in a position about two miles from Kingston, on the Napanee-Toronto road, and exposed to the south. Mr. Mitchell informed me that the board was given one coat of white paint, and the letters "Mitchell for Hardware" were painted in black over the surface of white, thus giving two coats of paint to that portion of the board taken up by the actual letters.



To-day, as will be seen from the illustration, the letters are actually raised from the general surface of the board for a thickness of fully one-thirty-second of an inch.

This not only shows the extraordinary efficacy of paint as a surface saver, but also proves the wonderful advantage of two coats as against only one; the thickness of the wood which had received but the one coat having actually become reduced by 1/32″—a very great matter as against apparently no loss of thickness in that part of the surface which had received the two coats. One-half of the board, or that portion shown in the photograph referred to, is in my possession, while Mr. Mitchell retains the other.

Public is Reluctant

Generally speaking the average dealer is willing enough to admit there is no doubt that paint and varnish, as well as being manifest beautifiers, are great preservatives, but does he realize that the increasing proneness of the public to similar convictions furnishes him with the opportunity of making business good and his cash register ring?

I contend that the public is already by way of being persuaded that it should take advantage of the economic benefits that result from the use of paint and varnish, and that it only remains for the retailer with whom the public comes into frequent contact to crystallize that state of mind into actual sales and into the saving of money not only to the individual buyer, but in the end to the extent

The preservative value of paint is well demonstrated in this illustration of part of a sign which about twenty-four years ago was placed by W. A. Mitchell, of Kingston, Ont., in a position about two miles from Kingston on the Napanee-Toronto road and exposed to the south. The board was given one coat of white paint and the letters "Mitchell for Hardware" were painted in black over the surface of white, thus giving two coats of paint to that portion of the board taken up with the lettering. To-day the letters are actually raised from the general surface of the board for a thickness of fully one-thirty-second of an inch. This proves the efficacy of two coats of paint.

of countless thousands of dollars to the country at large.

Let the hardware dealer or merchant make use of the window trims and transparencies provided by the committee. Let him put them in prominent places in the store. Let him link up his own local advertising by the use of the slogan "Save the Surface and You Save All, Paint and Varnish" in all his publicity. Cuts for this slogan can always be secured from the house from which he buys his paints and varnishes, or from the national committee. Let him make use, by this means, of the association of ideas set up in the mind of the passer-by, who will link up the national "Save the Surface" campaign advertising with the exhibits in the windows. Let him even go so far as to call the paint and varnish department of his store the "Save the Surface Department." Let him imbue his clerks with the national spirit of the campaign, and have them talk of the practical value of the use of paint and varnish to all and sundry.

Just one word of caution in closing. Instant results on a large scale in any given community may not follow from this "Save the Surface" effort on the part of the dealer. He must persevere, remembering the cumulative effect of all advertising and particularly of a form of publicity which has a great principle to expound.

Co-operation of Hardware Merchant Needed

Hardware Merchant Is Important Chain in Link Between Manufacturer and Paint Consumer.

Written for Hardware and Metal by John Irwin, Managing Director McArthur-Irwin, Limited, Montreal; Executive Member "Save the Surface" Campaign Committee.

UPON the activity of the hardware merchant throughout this broad Dominion of ours depends, ultimately, the success of any effort to increase the consumption of paint, and this is truer of paint, white lead, and varnish than of most other types of merchandise. Interest in paint can be stimulated by advertising—appreciation of its value may also arise from advertising—the manufacturer may do his utmost to produce merchandise of the highest quality—put that merchandise in the most attractive packages—do everything in his power to make it easy to sell, but in the chain between the manufacturer and the consumer, the hardware dealer is the most important link. He must not permit his interest to flag and he must keep abreast of every new feature brought out by the manufacturer for the marketing of his products. He knows, as well as the manufacturer does, that it is the habit of the consumer to postpone painting until the absolute necessity arises. This habit has the result of reducing the consumption of paint to the minimum. Success in selling involves not only quantities of reasoning but of will power, and can only be accomplished by aggressive merchandising not only by the retail hardware dealers, but also on the part of the master painters.

JOHN IRWIN

The object of the "Save the Surface and You Save All" campaign is to stir up a greater enthusiam on the part of the hardware men and painters in the whole idea of using paint, white lead, and varnish products, irrespective of the fact whether the paint, white lead or varnish is manufactured by Tom, Dick or Harry. Already the campaign has been fruitful. The committee now feels assured that the missionary work has been accomplished. The past six months has evidenced a wonderful change in the attitude of the hardware dealers and the master painters. They are now devoting more and more time to promotion work in connection with their end of the marketing of paints, white leads, and varnish.

This experience is a rising tide showing the way the "Save the Surface and You Save All" idea has seized the imagination of the trade, and moreover the doctrine of the "Save the Surface and You Save All" is a sound selling doctrine, being based on good advertising, theory of appeal and business building, as the result of co-ordinated effort.

It is perhaps not realized by the retailer how this co-ordination of the paint manufacturers assists him, if he will, in the sale of paint products. In the past the effort of the manufacturer was put forward to differentiate his goods from the goods of another, and the dealer handling A's merchandise received only the benefit of A's advertising. Similarly, other merchandise received benefit only of B's or C's advertising. In the "Save the Surface" campaign A, B and C have united and from the impetus given to the sale of paint products by this combination of individual effort, every dealer benefits, no matter what line he handles, if he will only line himself up with the movement.

L. C. STEPHENS,
of G. F. Stephens & Co., Ltd., Winnipeg, Man., who is a member of the Executive of the "Save the Surface" Campaign Committee.

Aggressive Dealer Wins Out

The more aggressive the dealer is the larger the advantage he gains. Given a surrounding population educated to the necessity of using paint, he who will fill the demand engendered by the campaign is the progressive dealer advertising the fact that he has the goods. Catering to insignificant demands from a very limited stock stultifies business and tells against successful merchandising of paint. No dealer can hope to supply in a large way what he will not adequately stock. It has been our experience that the sales of paint are in exact proportion to the stock the dealer carries. Prompt satisfaction of requirements from the shelves is the first essential of successful merchandising. Suggestion, augmenting and driving home in concrete instances the "Save the Surface" message play a most important part. This can be done when any generalized advertising cannot be effective. The church, the house, the school, the barn, the fence, the farm, that need paint, brought to the attention of the owner, finds him ready to listen to the suggestion of the dealer that he purchase the paint required.

This is the co-operation that the campaign affords. It educates in a general way along broad lines and the merchant applies the principles of its teaching to the community and the individual.

Lying upon my desk as I write is an envelope from one of our customers in

the Province of Quebec. The slogan, "Save the Surface and You Save All," is printed on one corner in English and on the other in French. Here is an instance of co-operation. Think of these things, multiply them, use every means that ingenuity suggests to take advantage of all that is being done for you and "Save the Surface" will become the greatest asset of your business.

A National Duty For The Merchant

To Educate Customers to Higher Ideals and Happier Surroundings—Live List of Prospects on Every Street

Written for Hardware and Metal by Royal Cluxton, Manager the Canada Paint Co., Montreal; Executive Member "Save the Surface" Campaign Committee.

THERE are three all important factors in the "Save the Surface" campaign; the manufacturer, the "distributor" or merchant, and the consumer. Up to the present writing the merchant has not played the important

ROYAL CLUXTON

part that he should, but I am equally as certain that once the way is pointed out the response will be loyal, generous and prompt. This response will be actuated not only by a natural desire to take advantage of an opportunity to enhance profits by increased sales on paints and varnishes, but also as a national duty in helping to educate those in his community to higher ideals and happier home surroundings, also to educate them to the economic value and actual saving made possible by the use of these protective and beautifying products. How can the merchant do this? By inserting the "Save the Surface" slogan in every advertisement in your local paper, thus definitely adding to the volume of educational advertising and at the same time connecting your store as one of the headquarters where the "Save the Surface" products can be obtained. Next, and just as important, place a transparency of the "Save the Surface" slogan on your store window or door where every farmer and city property owner will be sure to see it and the truth and force of the suggestion be brought home to him right at your counter where he can turn his good intention into action.

The necessity of this campaign in your locality is pressing. All one has to do is to walk down any street in your town and you could send in a good live list of prospective paint buyers to your manufacturer consisting of about every other property owner, then take a drive in the country and note the state of decay of most farm homes and barns.

Public opinion and common sense is being aroused by the educational advertising of the "Save the Surface" campaign. Get behind this great national drive for greater economy and more cheerful Canadian home life by doing your bit; use the slogan as a part of all your advertising; use the transparency on your store window—both can be obtained without cost from the manufacturer you buy from, and last but not least, set a good example by painting up your own store front and home.

How the "Save the Surface" Campaign Helps the Merchant

Rebuilding or Repairing is Expensive—Opportunities for Big Paint Trade This Year by Emphasizing Economy of Painting

Written for Hardware and Metal by R. C. Misson, Manager the Sherwin-Williams Co. of Canada, Limited; Executive Member "Save the Surface" Campaign Committee.

THIS is a year when merchants should more than ever before put every effort behind their paint department. The country was never so much in need of paint as it is this year. The opportunities for doing a big paint business are just as great as they have been for a number of years. The opportunities may not be quite so staring as in the past, nevertheless the merchant who is willing to devote just a little thought to his paint department will soon recognize the big possibility for good business in his town.

This year to secure this business, it may mean a little closer co-operation between the agent and dealer and the manufacturer. Manufacturers are anxious for this co-operation, but it is not fair to leave the planning of all campaigns in their hands. Do not forget the manufacturers have agents and dealers situated throughout the whole of the Dominion and in most cases each dealer has individual problems which do not exist in their towns. Therefore for the best co-operation and naturally the best results agents and dealers should approach the manufacturers for their assistance and advice.

Canada to-day, as far as the housing problem is concerned, is practically bare of paint. The "Save the Surface" campaign, which is doing such splendid work on this continent, deserves better co-operation on the part of the dealers.

There are many reasons why this year more painting should be done than in other years. One of these is that the buildings have stood for so long without a protective coat of paint or varnish that the surface is beginning to rot for want of protection.

Re-building is Expensive

Again, re-building or repairing at any time is a mighty expensive operation, and every year that is allowed to pass by without the surface being properly protected increases the amount of damage done.

Another reason is that it will require more paint to cover the old surface than it does to cover the surface when in fair condition, and when painted within the last four or five years.

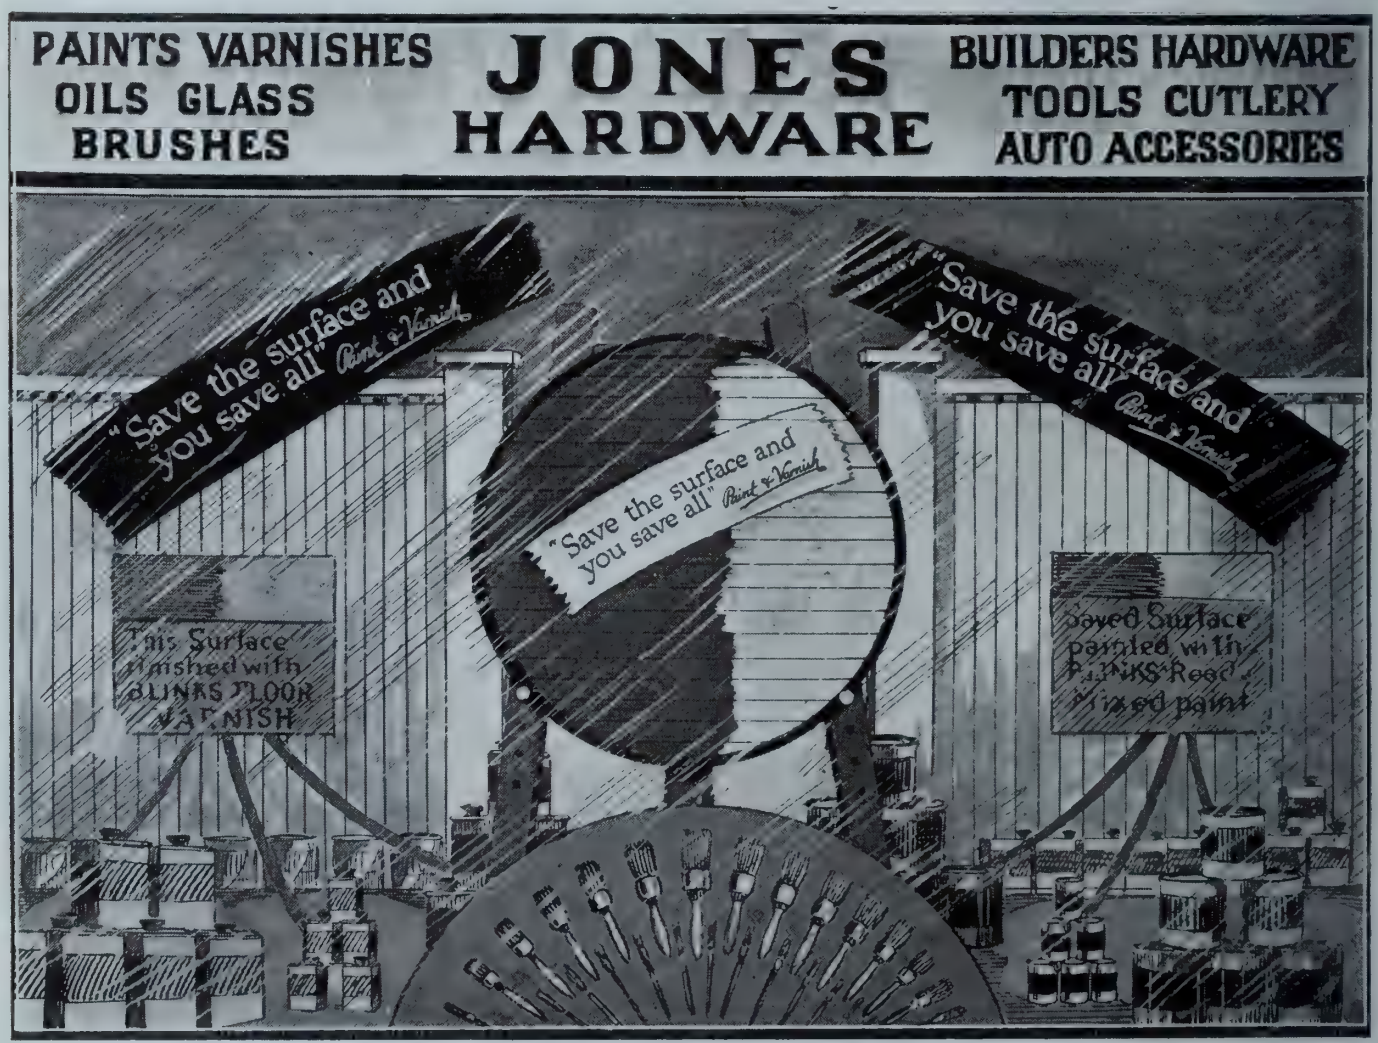
R. C. MISSON

The dealers should remember that they have working for them the big national advertising, carried out by the "Save the Surface Campaign," the national advertising of the largest paint and varnish manufacturers, the follow-up and creative power of the salesmen connected with each of these concerns, the natural desire of a property-owner to beautify

Continued on page 69

Adapting "Save the Surface"

By DUNCAN



"I BELIEVE I would like to link up with this 'Save the Surface plan," said a hardware merchant to the writer a few days ago, after the aims and objects of the "Save the Surface and You Save All" campaign had been outlined to him.

"How can I link up with this movement to the best advantage?" he asked.

"In the first place," I replied, "I think you should become imbued with the spirit of the 'Save the Surface' movement and after you have thoroughly absorbed the many splendid arguments in favor of a movement of this kind, you should pass along to every member of your sales staff some of the information and enthusiasm which you have acquired.

"Secondly, I think you should start to 'save the surface' in connection with your own business. I noticed on coming into your store that the store front is rather unattractive owing to lack of paint. I believe you could greatly brighten up your store interior through the use of paint and varnish. Your store should be the best painted store in the town. It should stand out as a model for all other merchants and also for all other citizens and your farmer customers for miles around. The hardware merchant, in my opinion, should be the leader in the community so far as painting and varnishing is concerned. How can you hope to fully enthuse others if you do not practise what you preach?

"I notice that your paints and varnishes are scattered in various parts of the store. Why not concentrate and set aside a portion of your store, preferably near the main entrance, for a 'Save the Surface Department'? In this department you can display to good advantage

The idea of "Save the Surface" in a window display is conveyed in the suggestion herewith. The centre easel bears a sample section of boarding showing one section of the surface protected with paint, whilee the other section is unprotected and showing signs of decay. Neat pyramids of paint and varnish cans are arranged, bearing a "Save the Surface" card conveying suggestions for the use of the lines shown. Brushes are featured on a half circle card in the foreground of the display. This is a suggestion for a window display which might well be found in the store of a progressive hardware merchant who is linking up with the ideals of the "Save the Surface" movement.

Idea to the Hardware Store

GARFIELD

a striking assortment of paints and varnishes, display cards, and other material of an informative and attractive nature.

Brushes in "Save the Surface" Department

"At the present time your stock of brushes is kept at a very considerable distance from your paints and varnishes. Much loss of time occurs when your salesmen find it necessary to take the customers some distance across the store in order to show them paint and varnish brushes. Would it not be better to have these brushes also on display and stock carried in the 'Save the Surface' Department? In this department you could also arrange for a demonstration in connection with the use of various paint and varnish materials. You could have a permanent display showing partly finished surfaces of woodwork, shingles, linoleum, furniture, floors, in order to drive home forcibly the contrast between painted and unpainted surfaces.

"You could link up your window display with this 'Save the Surface Department,' and with a little extra study on the part of yourself and your window trimmer you could work out some very effective window displays featuring the 'Save the Surface' idea and link it up with the 'Save the Surface Department' of your store. In the window displays you could not only show attractive displays of the packages, but you could also show actual illustrations of painted and unpainted articles. In these window displays you could also use effective dealer helps, showcards, and feature prominently the 'Save the Surface and You Save All' slogan.

Local Advertising

"Your local newspaper advertising could be used effectively in linking up with the 'Save the Surface' movement, the special department in your store, and also your window displays. Through your local newspaper

Continued on page 49

This suggestion of a "Save the Surface" Department shows how a hardware merchant can link up closely with this campaign by radiating the idea in this section of their paint business. Generous use is made of color cards and other literature in an endeavor to emphasize the preservative qualities of paint. The stock is placed where it is within easy reach of the customer and where the various displays, whether on easels, on the side of the counter or elsewhere, are seen to best advantage.

Directing Your Advertising

Save the Surface
With a New Spring Coat

CLOTHE your home in a covering of —— Ready Mixed Paint, and you will preserve and beautify it at small cost. Delay is costly. Sunshine and rain are great blessings, but they are also pitiless destroyers of unpainted and unvarnished surfaces.

We have a paint or varnish for every purpose. Homes, barns, fences, furniture, walls, implements, roofs, floors, and all surfaces, can be preserved and beautified through the use of suitable paints and varnishes. Come in and talk it over with us.

We have samples of finishes for all surfaces.

"Save the Surface and You Save all"

Merchant's Name

Street and 'Phone Nos.

Unique Opportunities Exist in Every Community for the Exercise of the Ad. Writer's Prowess.

A LITTLE study on the part of the hardware merchant will enable him to write much more effective advertisements for all departments of his trade. This is especially applicable to the paint and varnish department where unlimited possibilities exist. Much education of customers is necessary in order that paints and varnishes may be used intelligently and with best results, and while the individual effort of the merchant in his dealings with customers can help educate them along this line, a large number can be reached through the medium of the local newspaper advertisement who would otherwise be missed. This is a matter deserving of the best attention which the merchant can give. It is not necessary that a prolonged course of education along this line be taken in order to make an effective advertisement writer. On the other hand, the practical merchant who can get the viewpoint of the prospective customer and write his advertisement so that he touches the interest of that customer becomes a much more effective ad. writer than the theoretical man whose writing lacks the practical viewpoint.

By studying the matter is meant a brief study of various types and layouts in order to get the most effective setting, so that the ad. will be sure of a reading when placed among a large number of other ads. on a page of a newspaper. This is secured by a combination of a number of sizes of type which allow emphasis to be placed on the most important sections, and effective layout.

Study Local Requirements

Another important phase of ad. writing is the study of local requirements in order to see that all classes of prospects are reached and that the most important class of prospects are receiving their due attention. In connection with paint and varnish advertising there is naturally much variation in the appeal accordingly as the largest class of prospects consist of residential, farm, factory or other classes.

In connection with any one of these groups the advertising can well be linked up with the "Save the Surface" idea because it is an effective argument for the use of paint or varnish on all surfaces which lend themselves to such treatment. Taking each class of prospects individually, let us analyze the various requirements and the strongest points of appeal.

In the residential district the strongest

Appeal in Right Channels

The Distinct Classes of Trade in the Merchant's Community Should be Singled Out and Made the Subject of Special Appeal.

appeals for the use of paint and varnish can be directed along the lines of preserving property which today is of much greater value than for some years; the beautifying of the home and the resultant envy of the neighbors; the raising of the status of the district and the consequent value of property in that district by setting an example which other property owners will follow, the preservation of the country's resources with the consequent improvement in general conditions.

Then from the standpoint of the interior of the home there are a large number of effective appeals. Furniture is high in price and worthy of the utmost protection, floors need re-finishing after the tracking in of snow during the winter and the wet spring weather; stove pipes need a coat of enamel; the woodwork needs to be freshened up; walls need painting or tinting. There are a great many odd jobs around the house interior which can be suggested at this time of year.

The man who owns an automobile may require some enamel or other specialties provided for re-finishing various parts of automobiles. This should not be overlooked in the auto accessory advertising as well.

Farm Trade

Then there is the farm district where a different course must be followed in the advertising. There are certain seasons when the farmer is most approachable in regard to suggestions for the use of paint and varnish. Between seeding and midsummer there is a temporary slackening in farm operations which might be taken advantage of to suggest the use of paint or varnish on the farm house, barns and implements. The farmer is gradually becoming more trained to businesslike methods and the appeal on the basis that paint will preserve and prolong the life of the buildings and machinery should receive a good hearing on the part of the farmer. There is no doubt but that the average farmer should be one of the biggest individual consumers of paint, and experience has shown that he is inclined to neglect painting. If the merchant is located in a farming community where this neglect is evident, his advertising should be largely directed along lines suggested elsewhere in this issue pointing out the waste that results from such neglect.

Another important class of trade is factory business in paints and varnishes.

Are you giving your house a square deal?

?

Aside from the pride you should take in the neat, clean appearance of your home there is another angle which you should consider—

the matter of

DEPRECIATION

Every month you allow the surface of your woodwork to be exposed to the damaging elements —moisture and heat—the greater is the depreciation, and the more difficult and costly it will be to repair the damage.

The fact is, deep checks in woodwork caused by exposure can never be repaired.

This is the time to ***save the surface.***

Don't let "Old Sol" get in his handiwork.

"Save the surface and you save all" Paint & Varnish

—Name of Dealer—

"Sales Boosters" in the "Sa

A NUMBER of brief but important tips to help hardware merchants increase the sale of paints, varnishes and specialties are outlined herewith and there are few, if any, hardware merchants who will not be able to benefit by the application of some of these ideas to their own paint departments.

* * *

SHOWING WOMEN SHOPPERS HOW TO "SAVE THE SURFACE"

One merchant who has a strong belief in the value of demonstrations finds that a young woman who has had little experience at such work but who is resourceful and acquainted with domestic requirements is most valuable for conducting such demonstrations among housewives after she has received some instruction on the uses of the various specialties. Her natural talent was found more valuable than the routine sales talk of the professional demonstrator.

* * *

DEMONSTRATION OF SURFACE SAVING QUALITIES OF PAINTS

Another merchant who uses demonstrations to good advantage says free the demonstrator from any responsibility for making sales, do not clutter up the demonstration stand but leave it clear of everything but a few cans of the line being pushed and the article which is being used for the demonstration. Concentration on one line to be demonstrated was found to bring best results.

* * *

SEEING THE RESULTS OF SAVING THE SURFACE

A merchant who claims he never could have sold a certain farmer customer an order of paint from the sample colors provided by the manufacturer closed a a sale with the farmer in question by letting him have the brush in his own hand and trying out a coating of paint on a board similar to that of which his barn was built. Thus the farmer saw the actual results such as he might expect on his own barn and having handled the paint himself he was all the more enthusiastic to do the job. Thus the merchant placed a section of four rough hemlock boards, five feet high, at one side of the window. A small section of clapboard siding was also shown, on the floor was a section of flooring and at the other side of the window was a section of wall board. Each was finished with some line of paint, varnish or tints and the showing of actual results under ordinary circumstances provided a big business puller.

SET EXAMPLE OF "SAVING THE SURFACE"

The merchant can set a good example to other merchants and owners of vehicles of all kinds by painting up his own vehicles. One merchant in a small city painted his trucks a bright red shade for the purpose of advertising, to improve their appearance and to aid in their preservation. He soon found that some other merchants took the tip and were in the market for paints for that purpose. Actual costs of painting the average wagon, motor truck, pleasure automobile, etc., were figured and these helped to clinch the sales.

* * *

SAVING THE SURFACE OF SHEET IRON

As many buildings of sheet iron are encountered throughout the country and as some difficulty is often experienced in making satisfactory jobs of painting on such a surface, the paint salesman in a hardware store got definite instructions on how to paint metal surfaces and because of his knowledge he gained the ear of several owners of garages and other buildings. He also investigated other points concerning the successful application of paint and his knowledge enabled him to become a valuable help in advising the right course of action.

* * *

DODGERS SHOW IMPORTANCE OF SAVING THE SURFACE

Distributing printed dodgers at the market by placing one in each shopper's basket is the plan followed with good success by another merchant. He finds that this reaches prospects when they are in a buying mood, and it also reaches farmers who are in town at a time when they are gathering in money in return for their products. This merchant also encloses some paint literature in all parcels taken from his store, and finds they are productive. He also erected a framework on each side of his trucks, designed to show a card which could be changed daily. Some paint idea was outlined in a brief and attractive manner from day to day.

* * *

OFFERS PRIZE FOR SAVING THE SURFACE

A Western hardware merchant has adopted the unique method of offering prizes for the best painted houses in the town and district. To this end he follows the plan of running a large display ad. in the weekly newspaper announcing that he will give $50 in prizes for the best painted houses in the town and district, with the proviso that the paint used be purchased at his store. Of this amount $30 goes to the winner and a second prize of $20.

While the extra incentive of the prize would not ordinarily be expected to stir up much action, this merchant found that the contest set people thinking about whether or not their property could stand painting and that was the idea of the campaign. If they thought a coat of paint was needed the opportunity of winning a prize was an incentive for them to take immediate action and participate in the contest as the prize money would help defray the cost of painting. Another factor was that people hoping to win a prize purchased only best grade paints, took time in the application so as to get best results and in the end this was better for all concerned.

* * *

"GETTING ON THE INSIDE TRACK"

The delivery boy engaged by a certain hardware merchant was begrudging the fact that he did not get paid for passing on to the boss the information he secured from women to whom he delivered parcels. The boy was sure that if the boss made best use of this information he could conduct his paint department more effectively. Gradually the merchant came to a realization that such inside information about the women's likes and dislikes and their opinion about his store and the goods he sold was valuable to him in arranging things to better suit their tastes. There is considerable information of this kind to be gleaned from delivery clerks and others in touch with the customers.

* * *

"SAVING THE SURFACE" OF SCHOOLS AND CHURCHES

Schools and church boards will shortly be taking up the question of repairs to their properties. As trustees they are responsible for maintaining in good repair the property under their control. It should not be a difficult matter for the hardware merchant to go before these local boards when such matters are being considered and point out that it is their duty to see that all properties are well protected with paint so that they will not be held responsible for any deterioration through decay. Schools will soon be closing for summer holidays and with the diminished congregations of the summer months then is the best time of year for renovating the church. Now is the time to plan for such business. Figure out actual costs and go before the boards with definite figures, also

e the Surface" Department

some information showing the rapid loss through neglect.

* * *

SHINGLE STAINS "SAVE THE SURFACE"

The sale of shingle stains as a surface protector is an important branch of the paint department trade, especially if the store is located near summer resorts. Shingle stains are not essentially a decorative medium; they have wonderful preservative value even though they have not the covering capacity or protective body. They have greater penetrating power and sink deep into the pores of the wood, killing the destructive fungi that destroys wood cells. From the standpoint of either protection or decoration shingle stains can be used on shingles and half-timber construction with good effect. The best quality stains should be sold for preservation. Shingles are still high in price and require protection. Railroads are large users of creosote oil for preserving ties, posts, etc., and as creosote oil is one of the chief elements in good shingle stain, this preservative value should be pointed out to customers.

* * *

TEACHING CHILDREN VALUE OF "SAVE THE SURFACE"

Far-seeing hardware merchants who realize that children will within a few years' time be property owners will take steps to educate the children who visit their store as to the preservative value of paints. The children will soon get the idea fixed in mind and when the bicycle, express cart, garden swing, scooter, or other such article becomes worn looking, they can then be shown the remarkable change produced by the application of a coat of paint or enamel. The lesson learned at that age will not soon be forgotten. To the children will be given the future problems of conservation and of the protection of property and no more important economic lesson can be taught children than showing them the preservative value of paint.

* * *

SHOWING FARMERS VALUE OF "SAVE THE SURFACE"

Upwards of two-thirds of the hardware and paint business in Canada is directly or indirectly dependent upon farm trade. It, therefore, behooves the hardware merchants to keep their ears close to the ground regarding the habits of the farmer and the developments that are taking place in the conduct of his business. In recent years the farmer has had to learn more about costs and accounting in order to make his business pay. When he begins to think along such lines as this he is in a good mood to listen to information as to how he can save expense by protecting his property with the use of paints.

Betwen seed time and harvest there is a little lull in farm operations and then is a good time to approach the farmer. Farm property in Canada is valued at over a billion dollars and it is estimated that through lack of paint there takes place annually a depreciation of at least 2 per cent., which runs the loss up to twenty-five million dollars.

* * *

FREE OFFER TO "SAVE THE SURFACE"

The giving of free samples of paints and varnishes has many drawbacks. The greatest one is that described in the saying of an old missionary, to the effect that if you give a Bible away to a heathen he either loses it or forgets it, but charge him only a fraction of its cost and he takes it home and develops an interest in it. Hardware merchants have in many cases found this to be very true. A better plan is to prepare a demonstration booth and give an offer to varnish, stain or enamel any small domestic article that a customer cares to bring to the store. Suggest picture frames, wicker baskets, flower stands, piano stools, children's chairs, jardiniere stands, etc. This avoids giving away a lot of paint and varnish in small quantities which would hardly be sufficient to do a job, and is a better demonstration to the real prospects. Let the customers select their own colors as this gives an opportunity for the discussion of the merits of various lines.

* * *

DECORATIVE VALUE COMBINED WITH SAVING THE SURFACE

A real estate man had a row of six houses on his list to sell, but try as he would he was unable to dispose of them. A hardware merchant friend put up a proposition to him, consisting of giving a price of $250 to paint and decorate one of the houses. If the house did not sell within a month after the work was done, the merchant said he would charge only the cost of the material and labor, but if sold within that time he would expect his full figure. Before the painting job was finished the house sold at $700 above the original price.

This shows that property purchasers will pay more for the house which shows signs of having been well protected. The paint used in this case brought good returns.

SPECIAL SERVICE IN "SAVE THE SURFACE" DEPARTMENT FOR WOMEN CUSTOMERS

Women purchase a large percentage of indoor paint and varnish specialties. The woman is the prime mover behind the domestic clean-up campaign in the home and it is very often the woman who has the last say about the color scheme for the outside of the house even if she does not do the painting.

No one appreciates a neat store and well-ordered stock more than a woman, and with her being such an important factor in paint purchasing the merchant should attend to these matters. A well-lighted, easily accessible, service-rendering paint department is the one which attracts women customers. As a rule women are more careful in the selection of color combinations than are men and here good light and intelligent service on the part of salesmen is necessary. The suggestion has been acted upon of making a little enclosure where a table and two or three cane seated chairs are placed for the convenience of women desirous of purchasing paints.

* * *

SAVING THE SURFACE A FACTOR IN SOCIAL CONTENT

It has remained for a prominent author, viewing the question of painting from his own aesthetic tastes, to point out that paint is a factor in social content. He thinks that certain socialistic centres would turn vivaciously to camouflaging themselves as peaceful Dutch villages by the use of a color scheme that changed with every dying season. "Long ago," he states, "someone made the discovery that long hours of meditation transformed every shoe cobbler into a revolutionary but who, as he lays bright vermilion streaks, good and strong, on his garden fence, could be other than filled with the noblest thoughts and exalted by the spirit of the purest patriotism?"

* * *

INSTRUCTING CLERKS IN VALUE OF "SAVE THE SURFACE"

A number of suggestions have been put forth in this article to educate the hardware merchant to the value of selling paint as a preservative medium. It is up to the merchant to see that his clerks are given the necessary schooling. The junior clerk will be the store proprietor a few years hence and in order that the full effect of the surface saving value of paint is realized, the merchant should see that all store salesmen are thoroughly acquainted with the question.

Suggestions for the Window Show Card

Nicely-displayed and well-worded showcards add materially to the effectiveness of show window and interior display advertising. The suggestions below may give you a lead in getting up your Spring and Summer cards.

We Have
New Spring Coats
For all paintable surfaces —"Save the Surface and You Save All." Paint and Varnish.

Economy Demands
Preservation
of our existing resources. Paints and Varnishes are preservatives as well as beautifiers.

Amazing Property
Depreciation
is caused annually through exposure and decay. Prevent it by using Paint and Varnish.

Your Neighbors
Will Envy You
Set a good example on your street—paint your property and the neighbors will fall in line.

Property Values
Are High To Day
and are therefore more worthy of the protection afforded by an adequate covering of paint.

Government Regulations
Cannot Prevent
depreciation of property through exposure—Paint and Varnish will save the surface.

SAVED
Homes and furniture of far-seeing customers who use our paint and varnishes. Consult us about your paint and varnish problems.

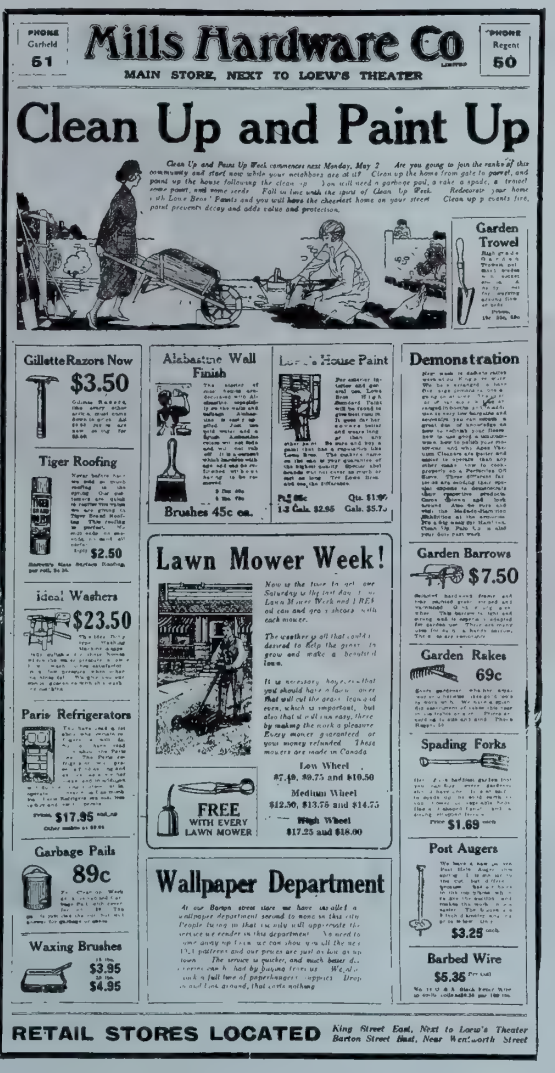
Let Us Give You
A Demonstration
of the surface-saving qualities of good paint and varnish.

Hardware Merchants' "Clean Up" Week

Mills Hardware Co. and Other Hardware Merchants of Hamilton, Ont., Link up With Local Campaign to Boost Sales of Paints, Varnishes, Etc.

TO the hardware merchant, "clean-up" week means more than a mere catch phrase or passing slogan, and embraces higher ideals than just falling into line.

With the Mills Hardware Co., of Hamilton, Ont., the clean and paint up campaign is a time for logical business expansion, and presents an opportunity for cementing the goodwill of customers through the medium of service.



The Hamilton Chamber of Commerce instituted its "Clean up, paint up, and planting" campaign, May 2 to 7, and the accompanying illustration on this page clearly demonstrates the manner in which the Mills Hardware Co. supported and actively assisted in the movement.

Individual advertising is, of course, the chief method of concentration adopted by retail merchants interested, and in this connection show window cards pertaining to clean-up are supplied to these stores.

An Asset to the Home

While the advantages of boosting such a movement from the merchant's viewpoint is easily recognized by the Mills Hardware Co., yet they also point out to their customers through the channels of judicious advertising the value of "clean-up" week as an asset to the home.

Seasonable displays and demonstration effects are other features adopted by this progressive Hamilton store. In addition to special bargains and souvenirs, the Mills firm secured practical experts from the factories interested to demonstrate their respective products. Thus an opportunity for the public to secure knowledge on such topics as how to re-finish floors, to use good aluminum ware, to polish automobiles and how to operate vacuum cleaners are all covered simultaneously. And added to these attractions, a suggestive list of these articles most generally needed in spring activities of this nature is not only given a prominent place but is also included in the specials of the week.

Free Oil Can and Shears

One of the leaders is a lawn mower, with the purchase of which free oil can and grass shears were presented. Reductions in such commodities as house paints, wheelbarrows, garden rakes and trowels, spading forks, post augers, wire, waxing brushes, garbage cans, roofing paper and safety razors are all among the list of goods being given special prominence at this season.

Another attractive and seasonable display appears in the wall paper department, and in conjunction with this a complete array of paperhangers' supplies is prominent. Refrigerators and washing machines are other items carried to good advantage, and the whole compaign properly summarized under the Mills plan is conceded to be a big business winner.

Emerson Davis, of Teeswater, Ont., has purchased the Teeswater Foundry.

George R. Weller, hardware merchant at Brussels, Ont., has reopened his tinshop and will also look after furnace installations and general repair work.

FREE CUTS AND WINDOW MATERIAL

Cuts suitable for use in Save the Surface advertisements may be secured by retailers free of charge from headquarters of "Save the Surface" Campaign Committee. Window display material will also be supplied free of charge.

Cuts and display material will be forwarded upon request to "Save the Surface" Campaign Headquarters, 509 Royal Trust Chambers, Montreal, Que.

This is the Time to Cash In

Right now, while the "Save the Surface and You Save All" Advertisements are appearing in magazines and newspapers across Canada, you can link up with the campaign and cash in on it. Your show windows, store interiors, local newspaper advertising, circular matter and your over-the-counter talks can be linked up with the "Save the Surface" idea.

The Results of our combined efforts will mean more paint and varnish sales, conservation of our national assets and incidentally more profit for you.

Link up with our efforts without delay, and make use of our dealer helps, such as those shown on the opposite page.

Follow Nature's Example

Paint is to the House as Bark is to the Tree

Nature never makes mistakes — she knows that her handiwork, in order to retain its beauty and its usefulness, must have protection against the elements.

Apply this same thought to the protection of the home and you see at once how important it is that exterior surfaces should have adequate protection against natural decay. By saving the surface you save all that lies beneath.

This is the teaching of the "Save the Surface" educational campaign now being carried on by the Paint and Varnish Association of Canada.

This campaign has been tremendously successful in educating Canadians to the necessity of "Saving the Surface" and in creating bigger sales of Paint, Varnish, Oils, etc.

From the start of this campaign two years ago we have aimed to link up in every possible way with this general campaign. Our show cards, color cards, window trims, newspaper and farm paper advertisements—in fact all of our advertising has featured the "Save the Surface" slogan as prominently as we could.

Our Agents who have been using our wide range of display material have found it exceedingly profitable, for it is probably the most comprehensive display of advertising material furnished by a Canadian Manufacturer, and in addition it links up most effectively with the "Save the Surface" campaign.

Full particulars of the Brandram-Henderson Agency Proposition will be sent on request, without obligation.

Jamieson's Products

Have Been Saving Surfaces Since 1858

WHEN Jamieson's first commenced the manufacture of Paints sixty-three years ago, most people believed that paint was merely a beautifier. Its protective qualities and surface-saving virtues were not generally appreciated.

So the Canadians of those pioneers days bought Jamieson's Paints to brighten up their homes and buildings, but found that the colors endured amazingly — that the surfaces treated with Jamieson's Paints defied wind and weather and all the climatic variations of the Canadian seasons. Their use and reputation became nation-wide.

Jamieson's products were born of Canadian needs. They were made to serve against Canadian Winters and the scorching suns of Canadian Summers. During the past sixty-three years Jamieson's have been working with ever-increasing success to produce Paints and Varnishes that are peculiarly adapted to Canadian conditions.

Honesty of purpose and scrupulously careful manufacturing methods have been responsible for the success of Jamieson's Products. A fair and square Dealer Policy has established the friendliest relationship with Dealers everywhere, who find in this old-established and reliable House, a staunch ally in promoting sales of good Paints and Varnishes.

Jamieson's Products have become a Canadian Institution. They offer Dealers a complete line of Paints and Varnishes which sell readily because sixty-three years of paint knowledge has gone into their making. As a Jamieson Dealer you can increase your paint sales and establish a sound reputation for selling the best Paints and Varnishes that skill and experience can produce and money purchase.

HOW "SAVE THE SURFACE" KEEPS THE MERCHANT

(Continued from page 53)

and improve his property, the stimulus caused by experienced painters and workmen who are looking for outside work during the summer months, and who are ready to tackle any kind of painting.

Get Out and Hustle

One cannot depend upon the same conditions existing in any year in the future. This is the dealer's opportunity for doing a big business, notwithstanding any inclination he may have towards a feeling of pessimism. He who gets out and hustles after business is the dealer who is going to have a successful year.

There is no better way to increase the paint business and to render a bigger or better service to his customers and to his country than to link up with the big "Save the Surface" campaign, using this slogan in local advertising, working and co-operating with the paint manufacturer, whom he represents, and by this class of work helping to put across the big idea of economy, which is stretching across this country.

1921 Plans For "Save the Surface" Campaign

Annual Value of Per Capita Consumption of Paint in Canada is $1.90—Buyers' Market Can Be Changed to Sellers' Market With Aggressive Effort

Written for Hardware and Metal by H. E. Mihell, Sales Promotion Department, Imperial Varnish & Color Company, Limited, Toronto; Executive Member "Save the Surface" Campaign Committee.

WHILE plans for the 1921 "Save the Surface" campaign were being made last winter it was predicted that this year would give the "acid test" to the efficacy of the idea.

That it has analyzed and proven 100 per cent. sound goes without saying. Frequently one hears retail paint and varnish dealers saying that they have sold more paint and varnish to date than they did up to the corresponding date last year. The optimism of others leads them to anticipate a much greater volume of business than they have had for several seasons past.

In a few cases the doubling of last year's business is openly looked forward to. While a certain amount of credit must also be given an unusually early season, the "Save the Surface" campaign has done much to pave the way to increased business. Almost without exception, live, wide-awake paint and varnish dealers consent to the helpful influence of the "Save the Surface" campaign. Many are getting behind the idea and linking up with it in a manner that they have not done before.

Not only are the dealers realizing the influence of the campaign, but the public itself is showing the effects of the work already done. There is scarcely a paint man but who has witnessed or heard of consumers who have been brought to the painting idea through "Save the Surface" advertising.

Two of the fondest hopes of those behind the campaign have been realized. One was that the cumulative effect of "Save the Surface" advertising as each year went by would have a greater effect in the succeeding year. Already the spring business of 1921 is beginning to realize this ambition. The other effect hoped for was that the inauguration of the campaign during the years of prosperity would insure continued prosperity and stability during less favorable conditions. Evidence of this has been seen in the difficulty already realized by some manufacturers in keeping up with orders.

H. E. Mihell

The optimism shown generally by paint and varnish dealers throughout the country indicates that the "acid test" has been given to the campaign and that it has not been found wanting, either in merit or effectiveness in influencing the consuming public.

Possibilities Scarcely Touched

But there is much yet to be done. The possibilities for greater paint and varnish business in Canada have scarcely been scratched.

There is need for a much closer linking up of paint and varnish men everywhere with the "Save the Surface" idea if these possibilities are to come anywhere near realization.

After passing through the last few months of uncertainty in every phase of business, and yet realizing the demand for paints and varnishes that has been experienced this spring, there is no telling what might be hoped for in the years to come, when greater stability will be established in prices as well as our social and economic welfare.

Readers of Hardware and Metal will remember the figures issued some months past by the Federal Government of the production of the paint and varnish industry in Canada during 1918.

These figures are given below, together with a rough analysis of their meaning to the trade for future business:—

Kind	Unit of Measure	Quantity	Value
Linseed Oil, boiled and refined (sold), gals.		113,256	$ 211,335
Paints in Oil (ready for use)	gals.	7,483,893	8,613,973
Paste Paints, lbs.		33,500	3,460
Colors in Oil and Japan, lbs.		27,800	5,142
Varnishes, all kinds, gals.		3,317,069	3,764,555
Japans and Lacquers, gals.		209,249	251,856
Shellac, gals.		81,704	309,975
Stains, gals.		216,274	276,665
Dryers, gals.		105,868	105,401
White Lead, dry, lbs.		4,030,367	473,922
Lampblack and other carbon, lbs.		62,939	6,878
Oxides of Lead (black Litharge, Red Lead, etc.), lbs.		2,432,936	268,624
Iron Oxides		748,750	44,925
Dry Colors, lbs.		335,000	76,926
Al other pigments		3,535,213	404,770
Barytes, lbs.		1,236,000	12,400
Putty and other fillers, lbs.		5,178,405	280,581
Asphaltic, Pitch and Tar Products, lbs.		.....	30,463
All other miscellaneous products, lbs.		.....	982,280
			$17,678,049

In this analysis certain deductions must be made from the government's total of $17,678,049.00 to allow for such items as linseed oil, white lead, dry colors and earth pigments, again entering into paints in oil, paste paints, varnishes, etc., and thus avoid being reckoned twice in the aggregate.

Making a rough allowance that perhaps 60 per cent. all around of linseed oil, dry white lead, lampblack, oxides of lead, iron, etc., dry colors, and other pigments, together with miscellaneous products re-enter paint or varnish manufactured, and deducting such items as asphaltic products we have approximately $1,527,608.00, which would leave somewhere around $16,150,441.00 that can properly be called the net total used by the consumer.

Per Capita Consumption

Placing Canada's population at 8½ millions in 1918 this would give us an annual per capita consumption of $1.90. making a further allowance that 50 per cent. of this amount was used in the finishing of manufactured products it would leave 95c per capita as the amount consumed by the public for architectural protection and domestic decoration.

Some Seasonable Appeals For Brush Trade

Housecleaning Work in Full Progress—Summer Resort Clean-ups Soon to Follow—Linking up With Local Clean-up Campaigns — Acquainting Customers With Use of Various Brushes

IF paint and varnish are instrumental in saving the surface of the material to which they are applied it is quite obvious that correct application will increase the preservative value of the application. If all parts of the material are adequately covered and each part is covered to the same extent the material will be better preserved and the appearance will be much improved. A good brush is the chief help in guaranteeing correct application and in the interests of his customer, his own trade and the general idea of painting, it is wise for the merchant to see that the customer secures the correct utensils for handling the painting or varnishing job in hand. If the job does not turn out to the satisfaction of the customer or the results are not as good as claimed by the merchant the whole cause of painting is affected and sooner or later his trade will suffer by this condition.

In the window displays, store displays, advertising and in the sales effort extended personally in the store, the hardware merchant and his staff can always link up the sale of a brush designed to best suit the purpose with the sale of paint or varnish. There are many ways of carrying out this idea, chief among which is to show an attractive display of a range of brushes placed near the paint department. Racks can be used to advantage to contain brushes of various sizes and prices, and these racks can be placed in such a location that actual handling by customers is encouraged. The customer will not handle the brushes unless he or she is interested and allowing them to handle the brushes will increase the likelihood of a sale.

Using Local Developments

Local conditions can be studied with the idea of appealing more effectively to the interests of prospective customers, similar to the plan advocated in the case of paints and other hardware lines. At the present time, while there is an extraordinary amount of unemployment in certain parts of the country, certain hardware merchants are turning the situation to good advantage by suggesting that those waiting for employment spend their spare time fixing up the home. It is suggested that a few hours' time, a brush and a little paint and varnish can be used to good advantage and turn otherwise wasted hours into profitable ones. The appeal has met with good success.

Another local condition which can be used as the basis for appeal at present time is the Clean Up and Paint Up campaigns being instituted in various districts. Hardware merchants have found it profitable to link up with these campaigns and a large range of brushes can be pushed on such occasions. Not only are there the various brushes for painting and varnishing, but there are floor brushes, sanitary brushes and many other types particularly handy at housecleaning time. There is a sufficient range of these brushes to warrant an exclusive window periodically and a store display continuously.

The experience of other hardware merchants in selling brushes to the unemployed is that the medium priced brush is the best seller. The purchasers realize that they cannot do as good a job as the painter, but they are anxious to be busy and they buy a medium paint brush or two.

Acquaint Customers With Use

The range of brushes now available is such that special effort on the part of the merchant to fully acquaint his customers with their uses is necessary. The average housewife is always on the watch for any article which will lessen the labor of the home or which will improve the sanitary condition of the home. Here the large range of brushes can be pushed to advantage, each salesman being fully acquainted with the various types and their particular use. This is an important factor in brush selling, as has been shown in numerous articles which have appeared in Hardware and Metal, setting forth how certain merchants have developed large brush trade by making suggestions as to their use and preservation.

Spring cleaning is no doubt still in progress in many communities and this appeal can be continued for a time. This is followed with a demand for brushes for painting and housecleaning the summer cottage. Already many citizens are planning the annual return to nature's haunts and the summer home always requires a thorough cleaning. This not only brings business to the merchant located near such resorts, but the city merchants can get their share of it by approaching such customers on the question before they depart.

PLANS FOR "SAVE THE SURFACE" CAMPAIGN FOR 1921

(Continued from page 69)

Paints in oil are given at 7,483,893 gallons or 88-100 gallons per capita. Again making a deduction of 50 per cent. for manufactured products this would leave only 44-100 gallons, or less than ½ gallon per capita per annum for the protection of every sort of architectural surface in the Dominion. On this latter basis we only produced 1 4-10 gallons for each one of our 1,900,000 homes and 782,849 barns in 1918. This does not take into account hospitals, stores, office buildings, schools and a host of other structures. Obviously we are not producing anything like an adequate amount for the protection of Canadian property.

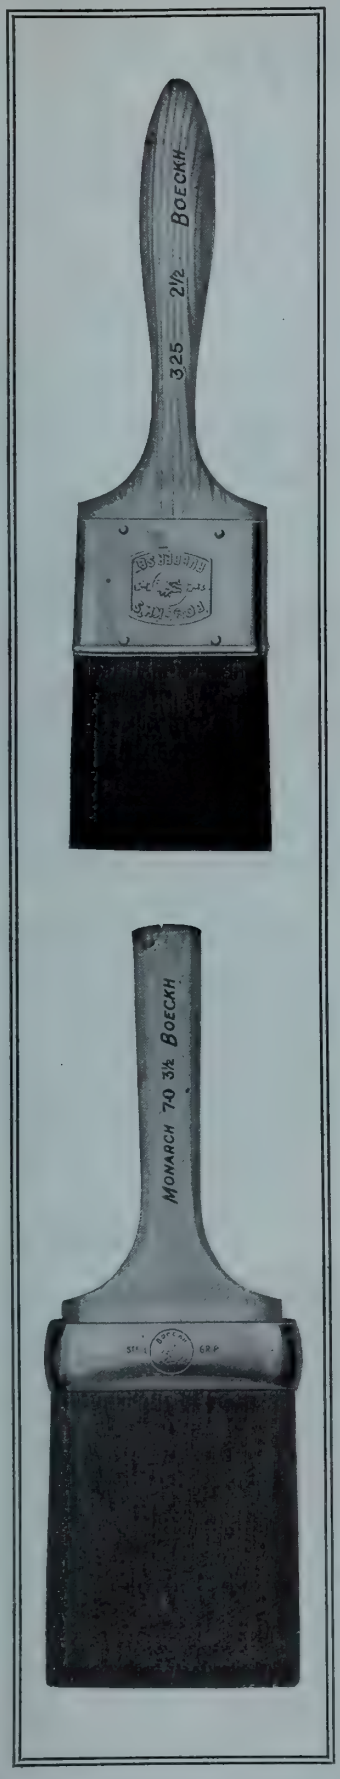
On the basis of 20 lbs. of lead in oil to the gallon of paint we only produced 593,713 gallons from this source, which would only add 6-100 to our per capita consumption or a little over 2-10 gallons to each one of our homes and barns.

On the whole, we cannot deduce from these figures any greater consumption than ½ gallon per capita for 1918 or 1 6-10 gallons for each home and barn.

It is quite likely that 2-3 of the 3,317,069 gallons of varnish enumerated was used for finishing manufactured products, which would leave 1,105,689 gallons for architectural use. This means a consumption of 13-100 gallons per capita or less than one pint.

Further, this would only allow the use of 58-100 gallons on each of our 1,900,000 homes, and when it is considered how much varnish is used on office buildings, stores, launches, automobiles, etc., it is readily seen that the consumption of varnish, per home, would be reduced to a very low figure.

Canada's paint and varnish trade has yet a long way to travel before it has in any way sufficiently provided for the adequate protection of its property or its domestic surfaces.



Much Work Yet To Do

The "Save the Surface" campaign has infinitely more work to perform in the future than it has accomplished in the past; good as that work has been.

But it can only be performed by the whole hearted backing of every distributor in the trade. In addition to the great educational force it is exerting on the public it must be backed more and more by extensive salesmanship and greater personal contact of the retail seller with his buying trade.

The possibilities for greater paint and varnish trade exist everywhere about us. True, we are in a buyer's market, but it can be readily converted to a seller's market for those who will everlastingly dig and use the "Save the Surface" idea and arguments, together with the literature and window trims provided by the committee.

The "Save the Surface" campaign will back every paint and varnish dealer in proportion to the extent that he will back it in intensive educational selling and advertising. Sales are the keystone to the building up of greater paint and varnish business, and the "Save the Surface" is an instrument to building which no dealer can afford to neglect in the face of the needs and possibilities of the more extensive use of paints and varnishes in Canada.

BOECKH TRADE MARK EST^BD 1856 TORONTO

Boeckh's Brushes Are Rubber Set

A perfect, continuous covering of paint or varnish, evenly applied, will save a surface by protecting it from destructive elements.

This is not so simple as it sounds, because any little defect, such as a bristle shed by the brush and removed after the paint or varnish sets, will open the way to damage. Boeckh's Brushes are Rubber Set.

And Absolutely Guaranteed

The bristles cannot come out, and because of their excellence, and ability to properly apply a coating of paint or varnish to save surfaces, Boeckh's Brushes constitute one of the most important factors in surface saving.

For the good of your business take advantage of the present interest in surface saving. Display and drive home the fact that you sell Boeckh's Brushes—that they are available in your store.

There Is Good News In Boeckh's Catalog

Weekly Paint Markets

Montreal

MONTREAL, May 5.—Both linseed oil and turpentine have advanced in price again this week, with markets on both products very firm. Quotations on white lead in oil and putty are unchanged, and while putty is slow, white lead is now very active. Window glass is holding unchanged, although the Belgian market is much firmer. Little improvement is expected in glass until the fall demand, but local prices are now on a much steadier basis than they have been in the past few months.

Ready mixed paints and varnishes are now active, outside painting now well at hand. April has been a heavy month and May is expected to show good returns. Prices are steady on all lines, with little likelihood of any changes until the summer months at least.

Linseed Oil Again Advances

Montreal.

Keeping in line with the flax seed market, which is continuing firm, linseed oil again advanced 3 cents a gallon this week. In some quarters, however, a lower price lingers due to these jobbers being anxious to sell oil at the present time. An advance will be made in all probability at the nd of the week with these jobbing houses. The closing of last week showed a slight falling off in flax seed, but this has again been overtaken and firmness with higher prices is given. A continued increase in sales is reported from all crushers, although still in a hand-to-mouth movement. Following are this week's quotations, showing a range:

LINSEED OIL—	Raw		Boiled	
1 to 2 barrels ..	0 75	0 84	0 78	0 86½
5 to 10 barrels .	0 73	0 82	0 76	0 84½

Broken lots, add 10c gal.

Turpentine Shows an Advance

Montreal.

Turpentine has advanced again this week and general quotations are $1.05 a gallon in one barrel lots, although 95 cents is quoted by certain jobbing houses with every likelihood of their prices being advanced within the week. Reports from the Southern markets state a continued improvement with advances in prices. The domestic consumption also shows an increase as the season is more advanced. Quotations are the following:

TURPENTINE—	Per Imp. Gal.	
1 barrel lots	0 95	1 05
2 to 4 barrel lots	0 92	1 03
Broken lots	1 05	1 15

Light Demand for Putty

Toronto.

A light demand continues for putty, and no changes are made in quotations. A steady market is looked for until well into the summer months. Any change made in prices at a later date will in all probability be downward from present indications. Quotations are as follows:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Little Buying in Window Glass

Montreal.

There is still very little demand for window glass, the building construction not yet increasing the sale to any extent. The Belgian market continues firm with a recent advance in quotations, but this will have little effect on the present situation here as glass now coming from that source was bought months previous. However, a more stable market may be expected during the following months. The price cutting since the beginning of the year is not so extensive lately. The big factor to remedy glass will be the fall demand, as at present the world-wide consumption is not sufficient for the output of the glass manufacturers. There is no change in the Montreal quotations, this being 50 per cent. off Montreal list.

White Lead Sells Well

Montreal.

With no change in quotations, white lead in oil is now very active. Much outside painting is reported throughout the country, this having a great effect on white lead sales. There is now a steadier feeling among the corroders and jobbers, and although slight concessions are made for quantity, the quotations are as follows: $14 in five ton lots, $14.50 in one ton lots, and $14.85 in less quantities.

No Change in Shellac

Montreal.

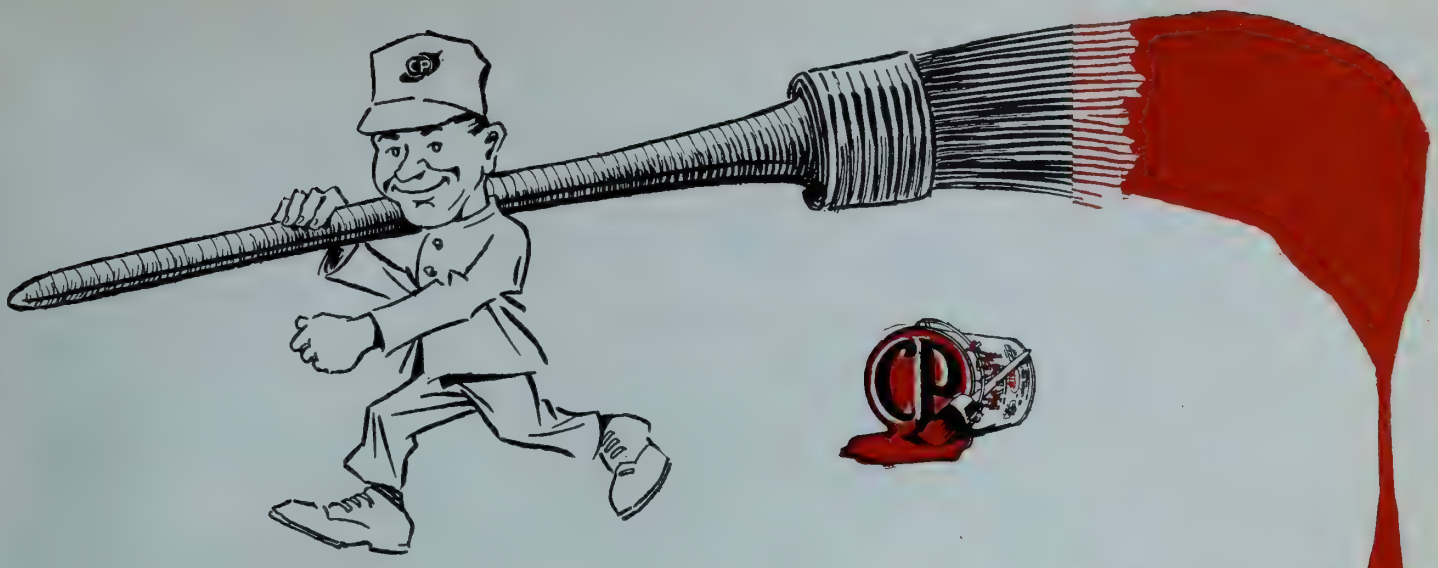
Neither white nor orange shellac shows any change in quotations. This product is now selling in fair quantities, but is still backward compared with other seasons at this time. Shellac has remained fairly steady in the past few weeks. However, stocks are reported low with some paint houses and if new supplies were purchased at present, a slight advance might be shown as a recent stiffening of gum shellac is noted. Following are present quotations:

Orange shellac, in barrels, $3.50; in one gal. jugs, $3.80; white, in barrels, or 5 gal. jugs, $3.85; in one gal. jugs, $4.25.

Paint, Paint Specialties, Varnish

Montreal.

Business in paint and varnishes is now in full swing. Paint manufacturers claim present business is very satisfactory, and mail orders continue to pour in. This might be expected, as five months' output is really crowded into two. It will be remembered that January and February were dull months, wheras in other years much of the bookings would be forwarded. April has been an exceptionally busy period and well ahead of last year, prices considered. May is looked for to bring extra heavy returns, reports throughout the country being that much painting is being done. Prices are remaining unchanged in all lines, and little change may be expected until the busy season is over at least.



Paint Brushes Now Sell Well

Montreal.

With the painting season now at hand, paint and kalsomine brushes are selling well. Different from other years, however, sales are small, showing that dealers are only sorting their present stocks to carry them through the season. Prices are steady on practically all lines, with no price changes coming through.

Toronto

TORONTO, May 5.—Prices continue to hold unchanged on paints and allied products with the exception of turpentine, which has again been advanced and Southern markets show increased strength in this product. The linseed oil market is inclined to be firmer and flax seed continues to fluctuate, being up one day and down the next. No changes are made here by wholesalers in linseed oil this week and reports indicate some price cutting. Business is continuing to improve in paint and varnishes and sales increase in numbers. White lead in oil and putty are held unchanged, lead sales being numerous but small. The shellac market is reported to be a trifle firmer. Window glass is unchanged with a stronger tendency. Better sales are reported in paint brushes during the past few weeks.

Canada Paint

Canada's favorite "Surface Saver." Made from the famous "Elephant Brand" Pure White Lead, mixed with pure Linseed Oil, and combining good appearance with extreme durability and protective value.

A paint you can honestly recommend. A paint that will save the surface and beautify it too.

The Canada Paint line furnishes you with the right surface savers for your customers' every painting and varnishing need. A stock will enable you to secure the big end of the local paint demand.

Let the C. P. Agency connect you. Write for full particulars.

If interested tear out this page and place with letters to be answered.

Turpentine Advances Ten Cents

Toronto.

Another advance in the price of turpentine is given this week, the amount being 10 cents on all quantities. The market generally shows a good demand, while stocks on hand are reported low. It is expected in some quarters that continued firmness will cause a further advance, and it is also rumored that turpentine might become scarce owing to the possibility of strikes among the seamen and other workers on transportation facilities at U. S. ocean shipping points. The alternative is, of course, rail shipment, which at present freight rates would have a decided tendency to boost prices, irrespective of scarcity. New quotations follow:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 10
2 to 4 barrel lots	1 09
5 gallon lots	1 25

Linseed Oil Held

Toronto.

The demand for linseed oil is reported as keeping up well, but prospects are still erratic, and no expression of opinion as to the future can be obtained. Prices are remaining at last week's quotations and the markets are apparently getting stronger, with present conditions firm. Following are the present quotations:

LINSEED OIL.	Raw.	Boiled.
1 to 2 barrels, per gal.	0 77	0 80
3 to 5 barrels, per gal.	0 76	0 79
6 to 9 barrels, per gal.	0 74	0 77

Less barrels, add 15 cents per gal.

More Paint Brush Sales

Toronto.

An impetus in paint brushes is being experienced in some quarters, due to the usual spring activity in house decorating and building. No changes in prices are reported, however, although manufacturers state that bristles are down a very little in some few lines. Brushes and brooms remain steady, but dealers are purchasing carefully, quantities being small and evidently according to present needs only.

Paint and Varnishes Firm

Toronto.

Business in paints and varnishes during the month of April is reported to have been most satisfactory. This year's total is said to have been very near to that of April last year, and with the lower prices prevailing this season, the volume of business was correspondingly greater. Prices on both varnishes and paints still remain the same, and with the advent of finer weather the present conditions are expected to continue upon a gradually improving scale.

Glass Tendency Firm

Toronto.

A firmer tone is reported in window glass. The Belgian window glass market, as indicated in last week's report, has strengthened considerably and may affect prices here in the near future. An advance is also expected by some in plate glass. In United States glass markets the chief interest is in the proposed tariff changes, and if they are adopted there will likely be a difficulty with regard to the large orders which are known to have been placed with Belgian manufacturers by United States importers. Wholesalers here report very little change in the situation with business still light and sales in small lots. The quotations remain 50 per cent. off new case list and are 60 and 10 per cent. off cut light list.

Putty Is Stationary

Toronto.

Prices in putty are again reported stationary, the sales still being light, Brisker activity in smaller building is looked for in some quarters as the better weather advances and should this expectation be realized, it would create an improvement in the present demand. The following are the current quotations:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

White Lead Steady

Toronto.

Purchasing in smaller quantities is still the rule for white lead in oil, but a fair volume of demands keep dealers busy. No changes are made this week, and none are reported expected, in prices, and quotations on standard pure grade lead are $14.95 per 100 pounds in ton lots and $15.30 per 100 pounds in smaller lots.

Good Demand For Insecticides

Montreal.—"Preliminary bookings of insecticides are equal to last year, up to the present," stated Royal Cluxton, manager of the Canada Paint Co., Ltd., manufacturers of insecticides, to Hardware and Metal. "The future demand will depend on the prominence of the potato bug and other vegetable insects and worms. Also the existence of blight and other pests when the later spraying commences."

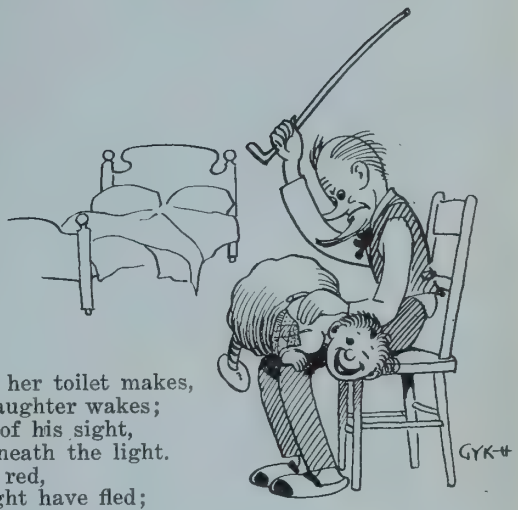
In Mr. Cluxton's opinion there will be very little change from present quotations unless the grasshopper plague in the Western provinces, which caused a heavy demand last year in the summer months, calls for a rush of insecticides and causes a shortage among the manufacturers. Then a slight firming in price might occur. As to lower prices prevailing, it was explained that manufacturers were now sacrificing their profits of other years, and there was little likelihood of easier quotations.

From the back yard city gardener to the farmer all now realize the necessity of using bug destroyers, for this reason the sale has steadily increased from year to year.

Home Sanitation Equals Home Decoration

Paint and Varnish, While a Beautifying and Preserving Product, is Also a Disinfectant.

NOTWITHSTANDING the fact that there has been much discussion concerning the wholesomeness of paint and varnish, the opinion of most eminent doctors is that from a germ killing and disease destroying point of view, no money spent on the home or in the home goes so far toward keeping down diseases as the small amount of money spent on paints and varnishes. No one factor enters so largely into the health of the individual as home conditions, so this is a point of much importance over and above its values as a decorative and beautifying product, and as a preservative against decay.



We hear so much these days about disinfectants. One of the best and surest is paint. Tell your customers to use it freely and constantly. They wash linens and other articles of daily use. Can they afford to allow the walls, ceilings and floors of their rooms to go from year to year unrenovated? When you are selling paint, Mr. Merchant, do you take these points into consideration? Do you talk with your clerks along the same lines of thought, causing them to see and feel the need of paint and its constant use in our Canadian homes? They would prove, perhaps, to be of great assistance in your selling. Tell your customers about it through your advertisements in the local papers, through the medium of your display windows and on neatly arranged cards for this particular purpose.

We gain physical life while we are striving for business. Let the other fellow sit around the stove in the early spring and late summer months. Let us get busy and go after the prospects, using spare time to educate them on paint value. By painting your own home you may be the means of revolutionizing the aspect of an entire row of houses, being the first to give thought to the appearance from the street and not only bring home to the publlc the decorative value but the preservative and sanitary qualities of paint.

The law of beauty is the law of completeness and perfection. The hardware merchant's stock of paint is a good tool to help bring about such results to the consumer and to himself. "Save the surface and you save all." The slogan is appropriate, it is honest and is of value to all who will adopt it.

"Save the surface and you save all" *Paint & Varnish*

Young Jones, well knowing penalty of guilt,
His threatened quarter pads with Mother's quilt;
At forty-five degrees his form he bends,
The pliant cane in expert hands descends.
No fear has Jones how heavily 'twill fall,
Quoth he, "The surface save and you save all."

Behind locked doors Miss Scraggs her toilet makes,
Her unveiled charms the parrot's laughter wakes;
With blinking eyes, quite reckless of his sight,
He views her time-worn surface 'neath the light.
A coat of "C.D." flesh, a touch of red,
The ravages that time have wrought have fled;
Her youthful air regained makes Polly squall:
O Boys! "The surface save and you save all."

"Hoot Mon!" says Sandy, "d'ye ken the kilt
Is nae sae muchly for protection built,
When on the hillside down wi' her you sit,
A thistle underneath disturbs your wit.
Aye, mon, but wi' a coat of bonnie lead
Like yon Crown Diamond just as parritch spread,
It doesna matter if you sit or fall.
Aye, lads! "The surface save and you save all.'"

I hold it true, what'er befall,
There's none the axiom can deny,
Our Paints the elements defy—
The surface save and you save all.

Crown Diamond Paints and Lead endure,
Protect, and Father Time resist;
They beautify and thus assist
To make Contentment doubly sure.

Make up your mind 'tween now and Fall
That opportunity's not past—
'Tis better to have saved at last
Than never to have saved at all!

O.P.W.

"Let's 'Root' Together

"for this 'Save the Surface' Campaign.

"It's got the right idea and it's getting over
"—increasing the consumption of paint—
"helping you to sell more without treading
"on the next dealer and without his grab-
"bing at your piece o' the pie.

"Its line o' talk ain't paint pots or quality
"—it sees things through your customer's
"eyes—talks to him about his own property,
"his own dollars and cents. It drives on
"the protective value o' paint and varnish,
"forgets the decorative stuff; teaches the
"economy 'birds' that it's cheaper to paint
"than not to paint—that delay means decay.
"It gets after the guy who didn't believe in
"paint, and the guy who did is painting
"twice as often.

"When this campaign gets through the
"paint business is going to be something
"good to be in—and it's getting over—
"steadily building up a big general demand,
"giving you and us a splendid opportunity
"to turn it into a specific demand for the

FLINT

FLINT Varnishes and Paints are based on those ingredients which insure quality first. There is no economy in questioning price in purchasing paint products. Competition keeps prices down, but there are some paints and varnishes of a standard of quality that makes price a secondary consideration.

People will buy Flint varnishes and paints on this basis, because they know that all the permanence necessary is there. Quality and long wear are two outstanding Flint sales arguments. Use them and profit by their use.

Dougall

"Save the surface and you save all" *Paint & Varnish*

The Varnish That Lasts Longest

A varnish that is absolutely impervious to boiling water. Ammonia-proof, Soap-proof, and Steam-proof. A varnish that can be washed with hot water and soap without the least injury to its original lustre.

Where the wear is hardest and where ordinary varnish will crack and peel, Univernish will give lasting satisfaction. It is the Varnish for universal use and is equally reliable on indoor or outdoor surfaces.

It will pay you to keep Univernish in stock. Your customers know it and our window trims and display cards will remind them of the fact that you sell "the one best varnish for anything that needs varnishing."

May we send you prices and particulars of our dealer proposition?

"The Finish That Endures"

Seven Big Lines for Surface Saving

If interested tear out this page and place with letters to be answered.

Pays Big Profits on Small Capital

Floglaze

The uses and possible uses for Floglaze, "The Finish that Endures," are practically without limit. As a result, it is a line that presents unusual opportunities for the development of the retail paint and varnish department.

Floglaze can be used for finishing and refinishing a thousand and one articles of domestic use in and about the home. It can be used for an infinite number of purposes on the farm and in the workshop. Whether the material is of wood, metal or concrete, Floglaze will finish or refinish it with a brilliant, glossy, hard-wearing surface.

FLOGLAZE dealers can do an unlimited business on limited capital, for Floglaze is a comprehensive line in condensed form.

It enables the dealer handling it, to supply the demand for almost any kind of surface finisher for which he may be asked and from a limited stock. Its unlimited usefulness creates greater turnover.

It conserves both capital and shelf-room.

And the satisfactory results which Floglaze produces in all uses bring repeat sales, which also mean rapid turnover of stock and greater profits. Satisfied customers and substantial profits are factors which make Floglaze a most attractive dealer proposition.

Save the Surface With JOHNSON'S

Paste or Liquid

Prepared Wax

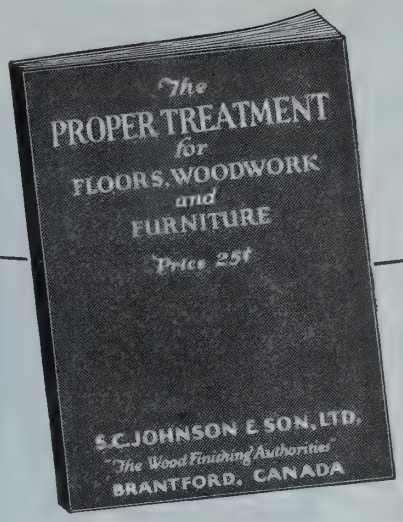
Surface Saving Applies to Home Interiors As Well As Exteriors

We are spending large sums in consumer advertising like the example shown at the right in the effort to bring consumers into your store. The total Canadian circulation of these magazines is well over one million. All inquiries received are referred to our Co-operative Dealers.

Johnson's Prepared Wax

Comes in three convenient forms—a form for every use: Johnson's Paste Wax—for polishing floors of all kinds—wood, linoleum, tile, marble, etc.

Johnson's Liquid Wax—for polishing furniture, pianos, woodwork and automobiles.



Johnson's Powdered Wax—immediately gives any floor a perfect dancing surface.

Johnson's Artistic Wood Finishes

New floors and trim will turn out better and wear longer if finished with Johnson's Artistic Wood Finishes. Johnson's Perfect Tone Under-Coat and Enamel for enamel trim—Johnson's Wood Dye for stained effects—Johnson's Paste, Wood Filler and Prepared Wax for floors. Our beautiful color book, "The Proper Treatment for Floors, Woodwork and Furniture," is full of valuable information and is interesting consumers for our Co-operative Dealers.

Our Co-operative Dealers are the connecting link between our advertising results and our distribution. Write to-day for Dealers' Co-operative offer and have these inquiries referred to you.

2 Kinds of Advertising

The first kind of advertising is what we *say*.

The second kind is what the brushes *do*.

Both kinds are good—but the second kind is best.

Through the pages of newspapers, magazines, farm journals, by signs and posters, we say to the public: "Rubberset Brushes defy destruction—the bristles are gripped everlastingly in hard vulcanized rubber — Rubberset Brushes must make good—or *we will*."

These are the claims we make.

These are the claims we substantiate. That is the advertising which sends people into your store to buy Rubberset Brushes.

The second kind of advertising is done by Rubberset Brushes themselves.

They do hold their bristles!
They do defy destruction!
They make good!

Do you handle the original and genuine Rubberset Brushes?
"There is a *Rubberset* Brush for every use to which a bristle brush is put."
Rubberset Brushes are a profitable, satisfactory and clean-cut line to handle.

Write your jobber re Rubberset, or drop us a line.

AD-EL-ITE
PAINT AND VARNISH REMOVER

The Pioneer Remover

An easy day ahead

Most in Demand

For Spring re-painting and decorating, Ad-el-ite Paint & Varnish Remover meets every demand.

It quickly removes old, hard coats of paint or varnish right down to the wood, leaving the work clean and ready for the new finish. It is absolutely harmless and will not injure the grain of the wood, the hands of the workmen, or the after coats of paint or varnish.

Made in liquid and paste form, it is the favorite with both householders and painters, and finds a ready sale everywhere.

Our dealer selling helps and special merchandising campaigns insure continuous sales.

Meakins Brushes

An Essential to Service Saving

Meakins Brushes are needed for Surface Saving jobs. You cannot paint or varnish without brushes, in most cases.

To protect a surface, properly, the paint or varnish must be uniformly applied, so as to leave a continuous film of paint or varnish which affords protection from the various enemies that, otherwise, would attack and destroy the material concerned.

There is no better way of so coating the surface than by applying the protecting film with a brush — a good brush — therefore, a Meakins Brush.

Tie up your sales of Meakins Brushes with the "Save the Surface" advertising that is now before the public. Display Meakins Brushes and enforce on your prospects the fact that it is Meakins Brushes that Save the Surface.

It Sells Well Because It Wears Well

Your customers want floor varnish that gives beautiful finish and the maximum resistance to hard wear. No other floor finish meets these requirements as well as

Liquid Granite

It gives the smooth, rich lustre desired and withstands the severest tests of wear and water. There is more Liquid Granite sold than any other varnish on the market.

Saving the Surface With Decorative Wall Burlaps

(No. VI of a Series)

Every Hardware Merchant in Canada should be constructively interested in what concerns the conservation of his customers' property.

Decorative Wall Burlaps

should be carried in stock by every hardware dealer, and kept moving to the consumer. The cost of building material continues so high that repairing must be resorted to whenever possible. For this work nothing is better adapted than DECORATIVE WALL BURLAPS.

They are moderate in price.
They protect and preserve walls.
They are easily renewed or re-decorated.
They represent a moderate investment.

Decide to-day to sell this line: Order a stock now!

Three shades available—drab, green and white, each shade being a suitable "ground" over which to obtain any desired effect in gloss, varnish or flat tone.

Have You Our Sample Book? Copy, with Price List, Mailed on Request.

3 Winners!

LIQUID VENEER MOP POLISH

Goes Twice as Far

That brand new, wonderful polish fills a long felt want. It is going bigger every day.

It will renew any dusting mop as it has never been done before. Used on floors, it immediately brings out the original finish in all its beauty, leaving a dry, high polish.

Your customers are protected when they buy Liquid Veneer Mop Polish. It must be exactly as represented and entirely satisfactory to them in every way or you are authorized to refund the purchase price. We, in turn will reimburse you.

Liquid Veneer Mop Polish is a wonderful companion product to our regular

LIQUID VENEER

the old standby, for cleaning, polishing and preserving pianos, furniture, woodwork, automobiles.

And don't forget the "Champion of the World," the

LIQUID VENEER MOP

with its many exclusive features. It is far ahead of any other mop on the market and is going bigger than ever right now.

The new Liquid Veneer Junior Mop is slightly smaller and, aside from the full yarn center, has all the exclusive features of the regular mop.

You should stock every one of these high quality products. They mean satisfied customers and a good profit for you.

Ask your jobber for particulars.

The Liquid Veneer Products are made in Canada.

BUFFALO SPECIALTY COMPANY

BRIDGEBURG, ONTARIO

The Easiest Thing to Sell

In these days when everything is said to be hard to sell, it is a treat to get hold of something that is easy to sell.

The Westco Tankless Water System is actually easy to sell, and we would gladly prove it to you.

In the first place, the dealer knows what a boon running water is to every farmer, and his family.

The farmer and suburban resident does not have to be ***sold*** on the idea of running water on the farm or in the home, but what they do hesitate at is paying high prices for a system that is mainly a collection of tank, wheels, gears, valves, belts, etc., a multitude of moving, wearing parts.

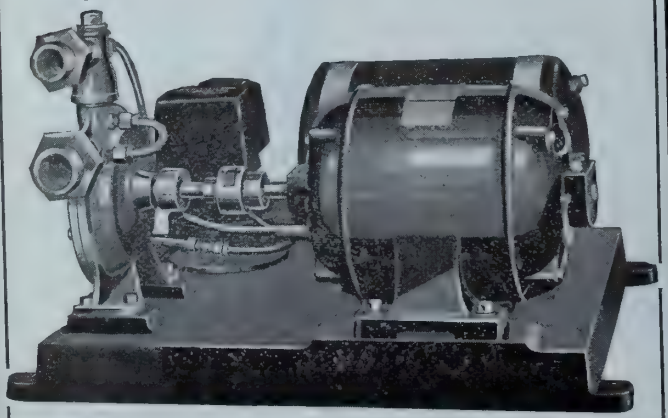
Now the *Westco*

Tankless Water System

has NO TANK
NO GEAR
NO VALVE
NO BELT

Its quality and durability are guaranteed.

It has only one moving part—the impeller, and this, with its outer casing, is all bronze, so it is absolutely wear proof and rust proof.



It is automatic—and self-lubricating.

Where it is being advertised it is in heavy demand. It has been advertised in your territory. It is easy to sell to those without running water in their homes because it is so perfect in construction, so efficient in operation, so low in cost, slow in wear, and free from troubles.

Write us for particulars of our Dealer's Co-operative Plan.

Westco Pumps Limited

Queen and Abell Sts., Toronto, Ont.

Easy Moving Stocks

You don't tie up your capital in sluggish stock when you lay in our files.

Their well-known names sell them on sight, for they are the standard files.

And our large reserves enable you to restock quickly from your jobber.

THE CANADA METAL CO., LTD.

Toronto Montreal Winnipeg Vancouver

THE WAY TO SELL BICYCLES

is to put in a fair stock. The man who has only one or two machines cannot fill orders promptly. And when riders want bicycles they want them right away. They don't like to wait for bicycles to come from the factory.

There are four heights of Men's C. C. M. bicycles in "A" and "B" grades. There are also ladies' C. C. M. bicycles. And juveniles. And the motorbike design. Also a splendid racing model.

We suggest that you carry in stock at least four men's models, one ladies', one boy's juvenile, one girl's juvenile, and one 18-inch Curved Bar Model—the bicycle the boy won't outgrow.

With this assortment you will be able to fill almost any bicycle requirement and need not fear mail order competition, as you will be able to fill orders promptly with bicycles of the highest quality, fitted with the C. C. M. Triplex Hanger and the Hercules Coaster Brake.

NOW IS THE TIME
TO STOCK UP

C·C·M· Bicycles

Axes

and

Lumbering Tools

The very best that can be made

A considerable portion of our large modern plant is devoted to the manufacture of these lines, and we have the most skilled and experienced axe and tool makers in Canada.

We want your orders—and we are going to make it to your interest to place them with us.

Do not order axes, picks, cant hooks or peavies again until you have written for our catalogue and price list.

TINKER TOM'S TALKS.

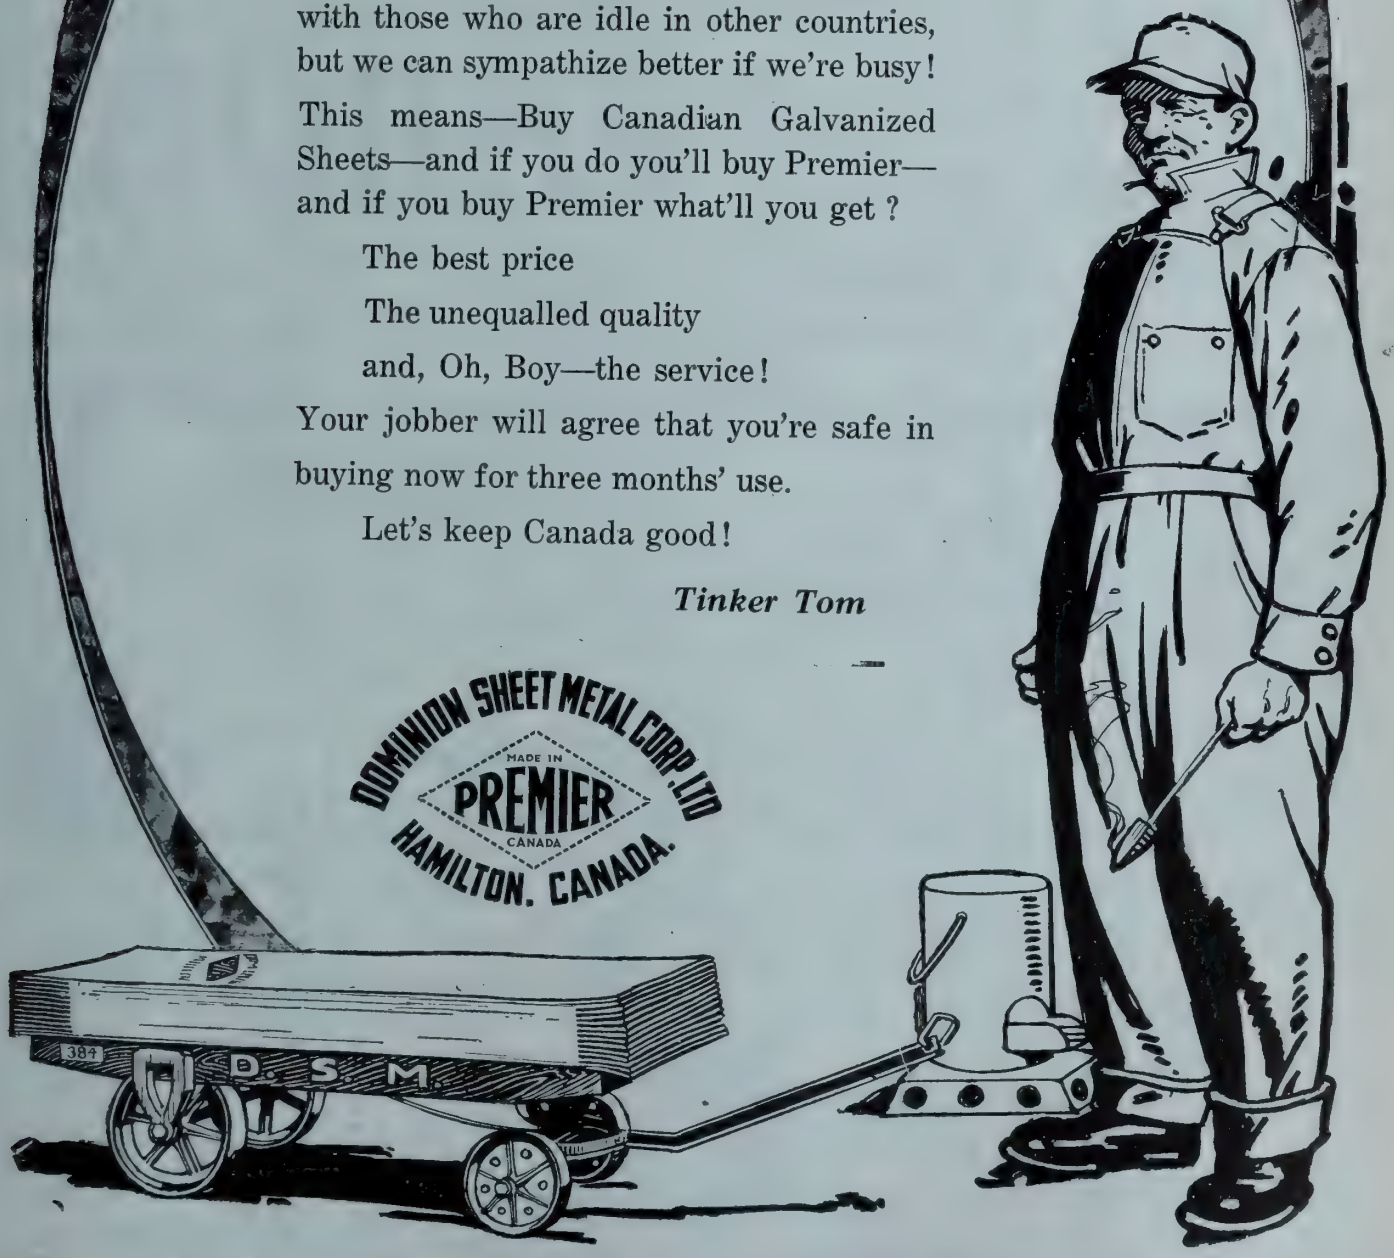
No. 310

Our Problem

—Yours and mine—is to keep Canadian workers busy. It's all right to sympathize with those who are idle in other countries, but we can sympathize better if we're busy!

This means—Buy Canadian Galvanized Sheets—and if you do you'll buy Premier—and if you buy Premier what'll you get ?

The best price



The unequalled quality

and, Oh, Boy—the service!

Your jobber will agree that you're safe in buying now for three months' use.

Let's keep Canada good!

Tinker Tom

HOBBS Manufacturing Company, Limited

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

"Save the surface and you save all" Paint & Varnish

"Save the surface and you save all" Paint & Varnish

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by" of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Fly Swatters Screen Doors Window Screens

Dunlop

Canada

Fly Swatters in several styles are offered: The Dunlop, "B-B." and Canada. Dunlop is made of 2-ply, non-rusting, flexible joint screen, with a pliable rubber cushion around entire edge (both sides). B.B. and Canada are also well made. Canada is a lower-priced article. You haven't much time to spare; order now and be in on these good sales.

Kasement Screen Doors. Each door has 22 genuine mortise and tenon joints. They are well made and hang trim, neat and straight as a die long after the house exterior grows weather-beaten and aged. Called "Kasement" because they overlap the door instead of hanging between the casing. Will not sag or warp. Guaranteed. This is a sure good seller.

Window Screens. These excellent screens are perfectly adjustable; made of hardwood; oil finished; edges of wire cloth entirely covered with wood; angle irons fit closely to wire, leaving no space for flies to enter. The perfect adjustment is obtained by means of double, dove-tailed tongues. This is a good, seasonable item and one that you should have now.

Other Screen Doors. These are excellent doors of kiln-dried pine, hardwood dowels, glued joints. Finished in grained quartered oak. Stiles ⅞ x 4 inches. We also offer a little better grade door to similar specifications and a higher-priced door in kiln-dried, clear pine, filled and varnished.

Good Business Follows Seasonable Displays

You should lose no time in ordering your screen doors, window screens, and fly swatters. There are many indications of an early Spring and that means early sales for you — if you're ready. Good, well-planned displays of these goods, made a little in advance of the actual need for these products, will ripen up your prospects. It will turn their minds to their needs in this line, and not only stimulate, but actually create, good profitable business for you.

SOURIS, MAN.

O-Rib-O
Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

When Writing to Advertisers
Kindly Mention this Paper

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

If interested tear out this page and place with letters to be answered.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Barrett Roofings, Cements Industrial Paints etc.

First Sales *Easy*—Repeat Sales *Sure*

When you handle Barrett Products you are aided by two strong selling forces:

(1) Our big national advertising campaign in the leading newspapers, farm journals and technical magazines. This advertising is creating new business for Barrett Dealers in every city, town and village throughout the Dominion.

(2) The high quality of the products themselves. This *keeps* the business. The railroads, the large industrial concerns, and many thousands of individual users know from their own experience that the Barrett trade-mark stands for sure dependability and sound economy.

Are you carrying *all* these famous Barrett Products?

Take up your pencil and check this list.

- [ ] Everlastic "Rubber" Roofing
- [ ] Everlastic Liquid Roofing Cement
- [ ] Plastic Elastigum Patching Cement
- [ ] Liquid Elastigum
- [ ] Everjet Elastic Carbon Paint
- [ ] Creonoid (Fly Oil) Lice Destroyer and Cow Spray

The demand for these products far exceeds the demand for any similar products on the Canadian market. Their sale is increasing by leaps and bounds. Don't miss the opportunity to cash in on this big and growing demand.

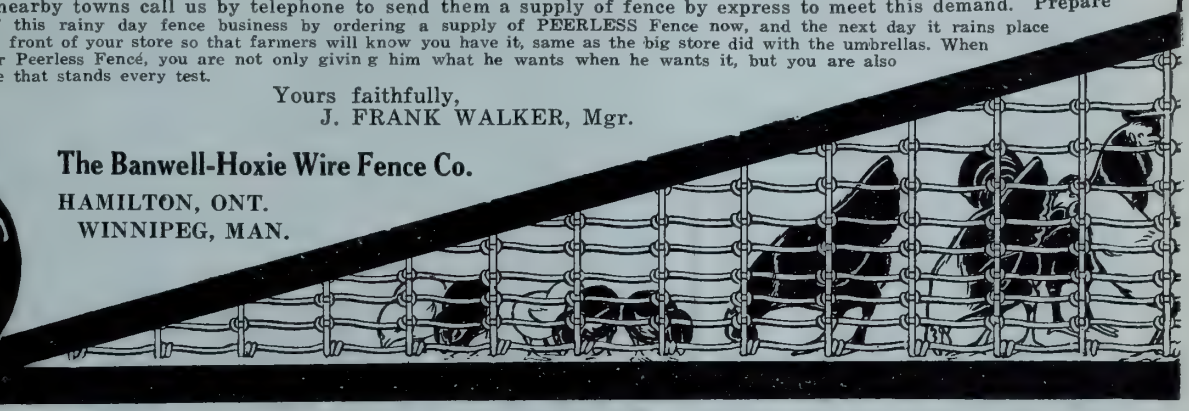
The Farmer Makes Hay When The Sun Shines
The Dealer Sells Fence When It Rains

The other day when I stepped into a big department store to wait until a heavy rainstorm passed over, I saw the floor manager and his clerks quickly clearing off a counter for the purpose of displaying umbrellas. Raincoats and rubbers were also much in evidence. It seemed like good merchandising to me. They were actually cashing in on that rainstorm. The umbrellas sold like hot cakes. I bought one myself.

Suppose I had asked for an umbrella and they had told me they were out of stock but would have a supply next day. Would they have sold me an umbrella? No—I wanted it then. I had the desire to buy. The next day was bright and I didn't need one. This store would never have sold me an umbrella if they had not been ready to make the most of their opportunity when I walked in.

The Public Want
What They Want
When They Want It.



Here's How This Applies To Fence:

At this time of year farmers are busy on the land, and too busy to erect fences until it starts to rain, and then they rush to town to buy. They haven't time to write to a Mail Order House because they want it that very day. On rainy days dealers in nearby towns call us by telephone to send them a supply of fence by express to meet this demand. Prepare to get a share of this rainy day fence business by ordering a supply of PEERLESS Fence now, and the next day it rains place a few rolls of it in front of your store so that farmers will know you have it, same as the big store did with the umbrellas. When you sell the farmer Peerless Fencé, you are not only givin g him what he wants when he wants it, but you are also giving him a fence that stands every test.

Yours faithfully,
J. FRANK WALKER, Mgr.

The Banwell-Hoxie Wire Fence Co.
HAMILTON, ONT.
WINNIPEG, MAN.

PEERLESS THE ALL AROUND FENCE

Look for the Green Box

Hack Saw users look for the green box when they buy hack saws, to be sure they get the Star.

And so must you if you would have satisfied customers.

Insist on the genuine.

Star Hack Saws are now sold by Clemson Bros., who have made them since the beginning.

Canadian Office and Warehouse:
304 Imperial Office Building
Hamilton, Ontario

STAR HACK SAWS

Now Sold by
CLEMSON BROS. INC.
MIDDLETOWN, N.Y.
Makers Since 1883

Service Counts!

Corrugated Eavetrough, Conductor Pipe and Elbows, Ridge Roll, Valleys, and a large stock of Galvanized and Black Sheets.

"We Ship While Others Are Thinking About It."

BISSELL'S New Toy Sweepers

MADE in an entirely new way, these Bissell's Toy Sweepers are easily the neatest, most attractive and the best mechanically, of any toy sweeper now, or heretofore marketed.

Not only this, but the installation of special machinery and processes to manufacture them on a big production basis, makes possible the low prices quoted.

The toy sweeper has always ranked high as an educational toy that pleases the youngsters. The habit of neatness that it fosters appeals to mothers, and its realism to the children themselves.

From a selling standpoint, aside from producing its immediate profit from the sale, it is a potent suggestion to the mother for a full size Bissell.

Ready for delivery in July

Through jobbers or direct.

Jobbing Terms on Request

Bissell Carpet Sweeper Co., of Canada Limited

Niagara Falls, Ont. (Factory) **and Grand Rapids, Mich.**

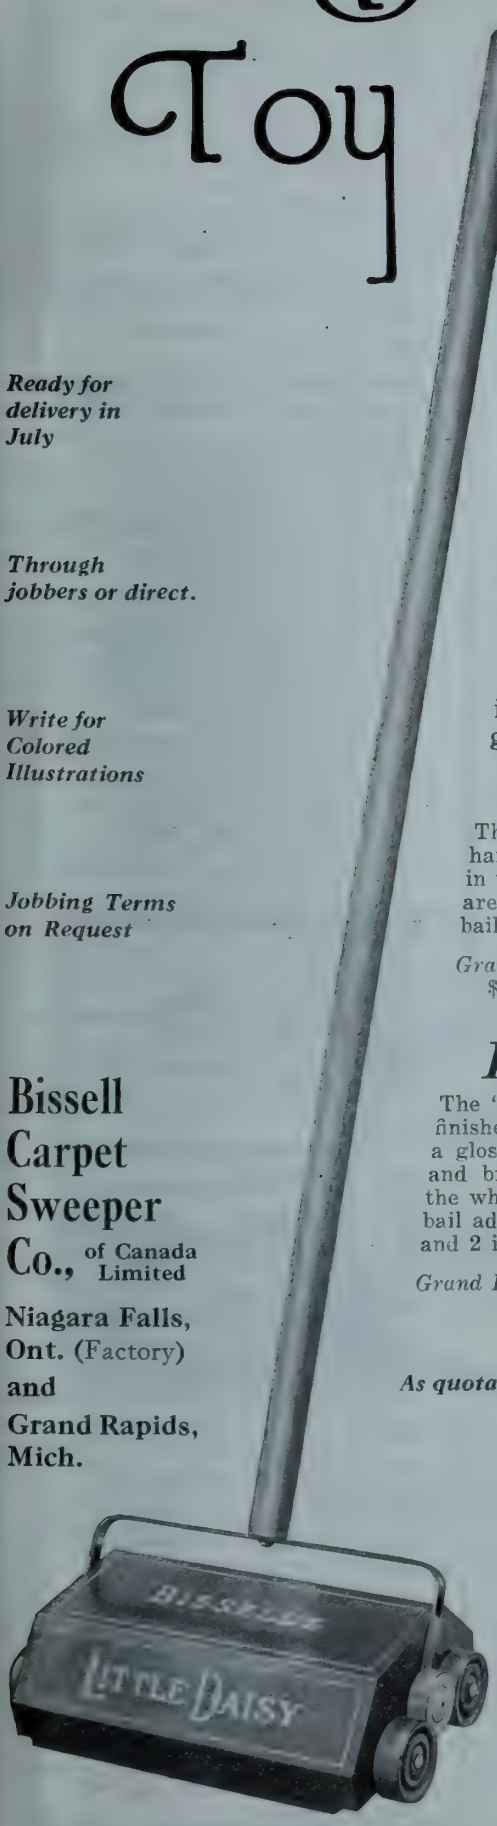
Bissell's "Little Daisy"

This model is 7 in. long, 4½ in. wide and 2 in. high, with 24 in. handle. It is finished deep blue with lettering and border stripes in pale yellow. The handle is stained to match the case; wheels are red and the brush pulleys natural. The bright coppered bail harmonizes attractively with the blue.

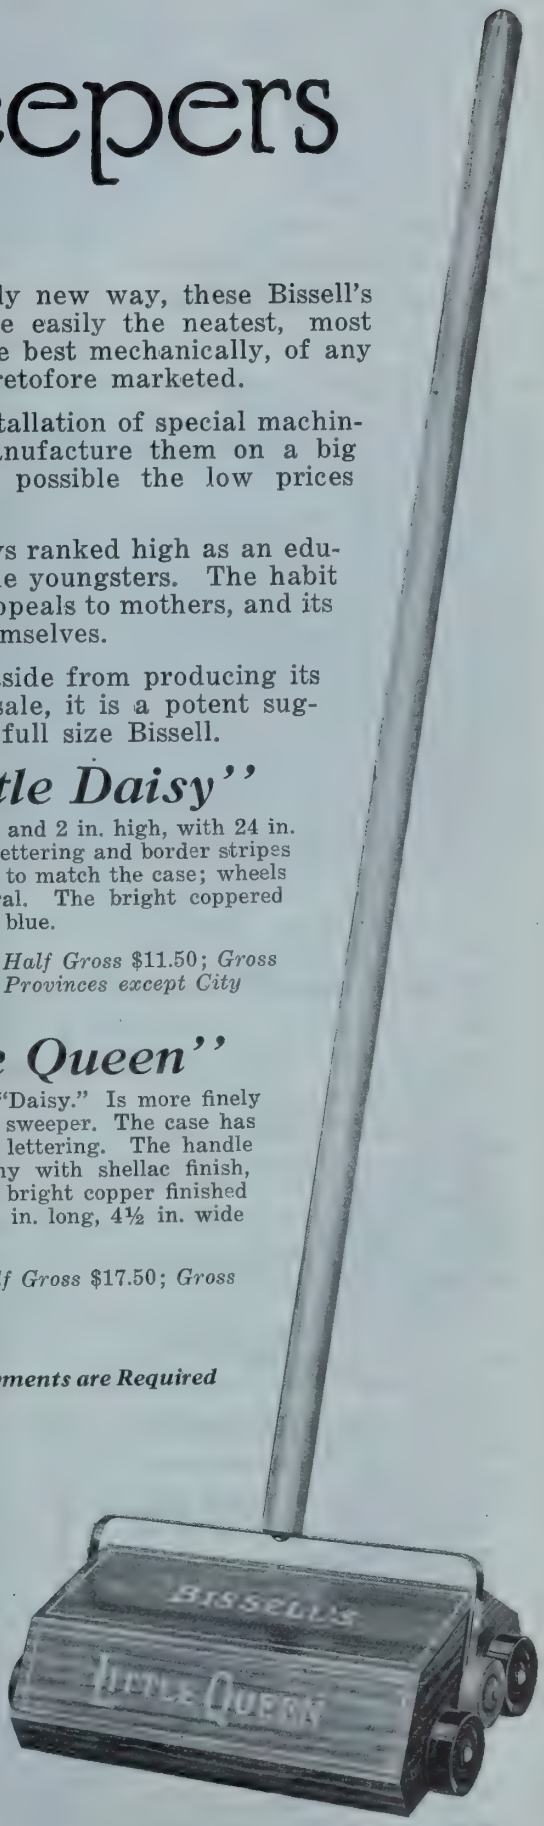
Grand Rapids Prices—Per Doz. $2.00; *Half Gross* $11.50; *Gross* $23.00; *Retail* 35c (40c *in Western Provinces except City of Winnipeg*)

Bissell's "Little Queen"

The "Little Queen" is larger than the "Daisy." Is more finely finished and all together a very fine toy sweeper. The case has a gloss mahogany grain finish with gilt lettering. The handle and brush pulleys are stained mahogany with shellac finish, the wheels being a gloss black, while the bright copper finished bail adds richness to the whole. Size 7¾ in. long, 4½ in. wide and 2 in. high. Handle 24 in. long.



Grand Rapids Prices—Per Doz. $3.00; *Half Gross* $17.50; *Gross* $35.00; *Retail* 60c.



As quotations are Grand Rapids Prices, Payments are Required in United States Funds

Both models packed in assorted cartons of 3 and 6 dozen

Extra packing charge of 15c per dozen on less than 3 dozen lots

Shipping Weight Approximately 120 lbs. to the Gross

will give satisfactory service under all conditions. It is Smokeless, Odorless and Noiseless and has a sub-flame so that the burner can be turned down low when not in use, thus saving time and fuel. The No. 71 will heat 12-lb. soldering coppers as fast as two mechanics can use them. The maker's guarantee is behind every tool. Jobbers supply at factory price. **Send for catalog.**

In design and construction it is the best torch of this type on the market to-day.

Detroit Torch

Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on botton of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

Maple Leaf Stitched Cotton Belting
Longer Life

Maple Leaf Stitched Cotton Duck Belting, has proved itself, and satisfied critical mechanical men in hard machine-shop use where belting is severely tested. Its construction of stitched cotton duck wins out.

For the dealer it means new customers, profits and repeat orders.

Write to-day.

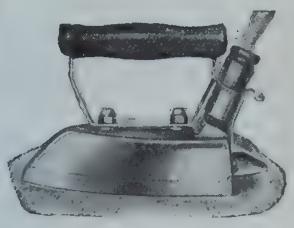
HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Gaining New or Greater Distribution

is a well-recognized and familiar use of properly-directed, continuous advertising.



For either marketing on a national scale or by "Zone Methods" continuous, properly-directed advertising blazes the trail, carries your name, reputation and a knowledge of the product to the trade. It paves the way for the salesmen, lubricates your whole distribution system and creates friendly territory waiting to welcome your product and your travellers as your production expands.

A weekly message to the whole hardware trade of Canada through HARDWARE AND METAL—their recognized source of business information—will increase your distribution.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment; Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

"Old English Gray Ware"

The Standard by Which All Gray Ware is Judged

Genuine "Old English Gray Ware," for years imported by the Canadian Trade, is now being manufactured from the raw sheet steel to the finished utensil right here in Canada. Absolutely all the "Old English Gray Ware" sold in Canada, is Canadian made—a home product, saving you all duty formerly paid, and providing work for Canadian workmen.

Our factory, which started operations in Canada a little over a year ago, is manufacturing a full line of this beautiful and durable gray enamelled kitchen ware.

As quality stands paramount in its production, it costs more than some other lines, but is well worth it. You make your money in turn-overs—not in hang-overs. The rapid selling qualities of "Old English Gray Ware" have oftentimes been compared, in actual department store sales, with other lines of gray ware, and on every occasion "Old English Gray Ware" has proven the quickest selling line.

We Invite You to Visit Our Plant at Toronto

2382 Dundas St. West, Toronto, Ontario

TWO MEN

There are two men we know, you know them too—they are in every town and in every street of every city in Canada.

The first lives in Hamilton—George Travers is the name we will know him by.

A few months ago he wrote us to analyze some stock he held. By chance he learned through a friend, of THE FINANCIAL POST Investors' Inquiry Service. $3,000.00 he had paid for what were now mere scraps of paper. The whole lot of prettily engraved certificates wasn't worth over $150.00.

"If only I had known of your service seven years ago, when I spent my money for this stuff," said Mr. Travers, "I would have had a real stake now."

The Other Side

Out in Sunny California away from the biting winters of Canada —in a little bungalow which could well be called "ideal," lives another man—he is well beyond middle age, but he doesn't need to work again except at his own pleasure. He has made sufficient for his needs, and saved it by investing his yearly profits from a modest grocery store.

Fourteen years ago he realized that savings were not saved until they were safely invested in income-producing securities. From a knowledge gained by a weekly reading of FINANCIAL POST he began setting aside a monthly sum for investments. Invariably he asked the opinion of our Investors' Inquiry Service before investing. And after these years of working moderately hard he has comfort, independence and a life income—more than that he has an estate.

"You will be glad to know," he wrote, "I am able to sell out and retire from active business. The whole of my present estate I owe to sound investments made through your Investors' Inquiry Service."

WHICH?

At fifty which will you have? Great fortunes, as a rule, are the result of careful savings and wise investments.

Learn more of securities and investments through THE FINANCIAL POST, and make use of the valuable Investors' Inquiry Service, which is free to FINANCIAL POST readers. Through this service experts advise you the class of security that fits your needs and point out clearly the factors of safety and risk in each one.

It is only a moment of decision you need. Fill in the coupon and prove for yourself what THE FINANCIAL POST of Canada can do for you.

The Financial Post
143 University Ave., Toronto

Sirs:

Send me THE FINANCIAL POST. I'll read it carefully and if I decide not to take it I'll write you within five days. Otherwise you'll know I want to keep on getting THE POST and will bill me for $5.00—price for one year—52 issues.

Fostering Canada's Export Trade

Canadian National Export Club Formed to Develop Foreign Trade—Banking Facilities Being Extended—Information Re Prospective Markets

A STEP, preparatory to the Dominion's entry in dead earnest into the world-wide contest for foreign trade, was taken, when a large gathering, representative of manufacturers and others interested in the extension of Canada's commerce to the ends of the earth, met together recently at the inaugural banquet of the Canadian National Export Club.

Foreign and domestic conditions, as they related to the extension of Canada's export trade, were topics of the several addresses given by distinguished speakers.

The position of Canadian banks in the development of foreign trade was ably discussed by G. F. Towers, of Montreal, superintendent of the foreign trade department of the Royal Bank of Canada.

Banks Ready to Help

"So far as lies in their power, Canadian banks are ready and willing to increase Canada's export trade, and are going to do it," he declared. The service of the Canadian banking system, especially in providing credit information, without which no one could afford to make foreign shipments, was one of the points dealt with at some length by Mr. Towers. The service of Canadian banks in this respect is very extensive, there being an efficient chain of correspondents in most British countries where there are not actual branches. Canadians must look more to countries of the British Empire for new business than to other countries, he said.

Because Germany can obtain workers for less money to work longer hours, she is getting back on the road to commercial success by offering her goods at lower prices, he continued. Germany is at present buying more than she sells, but there are indications that she is reviving.

Meeting Winds of Competition

Many questions of procedure in arrangements for payments, etc., were instructively considered by Mr. Towers. Concluding, he said, "Canadian business is being drawn out of the sheltered nook of war years to the full blast of competition with other industrial nations. Only by co-operation of every wheel in the machine can Canada be driven forward to prosperity and success.

Col. Douglas Young, who recently returned from Siberia, where he was stationed for three years with the Canadian Red Cross Mission, gave his hearers the benefit of a great deal of information on conditions which he had observed at first hand.

Though Russia was grasping for supplies from the outside world, he thought that shipments to the country at the present time were out of the question. There could be no knowledge as to where payment was to come from. Europe, he said, would never return to normal until Russia became once more a producing nation.

Must Learn Conditions Abroad

A short address was given by Mr. Lennox Simpson, advisor to the president of the Chinese Republic. He stated that China as a market was only in its infancy, the total trading of the country amounting to less than £1 per head.

"We must become as familiar with conditions which obtain in all parts of the world as with those prevailing in Canada," said J. S. McKinnon, president of the C.M.A. He said that the sales department of industries must play and continue to play an increasingly important role to meet keenness of competition.

The following officers of the club were elected: President, R. E. Jamieson, Montreal, first vice-president, Thomas Morton, Toronto; second vice-president, J. J. Foot, London; secretary-treasurer, A. Marshall of the C.M.A.

The officers and the presidents of local associations compose the executive committee.

Objects of Club

The object of the club, whose active members will be men employed in the export departments of Canadian manufacturers and officials of national manufacturing organizations, is to develop Canadian export trade by the spreading of reliable information on subjects relating to export trade, and by co-operation with the Department of Trade and Commerce, the C.M.A. and similar national organizations. The club will also assist in the formation of local export clubs, which will be modelled after it on a smaller scale, and also affiliated with it.

The organizing committee is as follows: H. B. Halliday, chairman, Canada Cycle & Motor Co., Ltd.; L. L. McMurray, Gutta Percha & Rubber, Ltd. Thos. Morton, Western Canada Flour Mills, Ltd.; W. C. McLaughlin, Dunlop Tire & Rubber Goods Co.; H. P. Cowan, Cowan Co., Ltd.

Correct Packing a Factor in Exporting

A Thorough Understanding of Proper and Efficient Packing is Essential for the Successful Promotion of an Export Trade—How to Proceed in Exporting to British and Foreign Ports

THE question of the proper procedure to pursue in exporting to British or foreign ports very often baffles the Canadian manufacturer who has an opportunity to engage in export trade and who has not done much in this regard. In order that this information might be secured first-hand, a Hardware and Metal representative interviewed officials of certain steamship companies. Inquiries from foreign countries indicate that many Canadian manufacturers have an opportunity to enlarge their export business and the correct method in packing and shipping goods in trade of this kind is very important, much depending, particularly in first shipments, on the care taken.

Consult Transportation Companies

The first step to be taken is to get in touch with the foreign department of the transportation company, giving the number of packages and the nature of the commodity, specifying measurements, weights and the destination. The carrying company then arranges for ocean space, providing permits for the same. These permits are furnished in sufficient time to enable the goods to arrive at the seaboard in order to connect with the specified date of sailing. In no case, however, shall an agent guarantee that property will clear on a particular steamer or date. When large shipments have been booked for clearance over a specified period, permits only will be supplied by foreign freight department at Montreal, when confirmation is received from the steamship company interested that space has been reserved on certain vessels. The permit

indicates quantities which must be shipped out between specified dates.

Packing Most Important

In the various factors entering into an export business, the one of packing and shipping is particularly important. Exporters in all countries have sustained substantial losses, both in the way of goods and also in repeat orders, through careless and improper packing. When goods arrive in a damaged condition, it often necessitates lengthy adjustments, resulting in loss of market. It also creates dissatisfaction and may give the importer opportunity of refusing to accept the goods. Complications of a difficult character can often arise from lack of proper packing, and complications and adjustments of any kind, in an export business, are usually expensive.

In the consideration of correct packing first thing to have in mind is safety. Exporters should consider the additional handling by forwarders, and endeavor to visualize what the case must go through, before arriving at the importer's warehouse. The exporter must guard against all the hazards of domestic shipping, and be assured of the strength of the case or container to protect the goods against the considerably increased handling of ocean shipping and the by no means gentle handling of stevedores, when loading or discharging the ship. Cargo pressure must also be considered, that is pressure that is the result of rough sailing. Messages of advice printed on the cases, such as "handle with care," "use no hooks," etc., might as a general rule be omitted because little attention is given to them.

Loading the Ship

Cases are usually loaded aboard ship in slings, and hoisted aboard with the aid of a steam winch, when the winch takes up the sling, the cases are rolled into a bundle. Considerable pressure is thus exerted on all the cases—particularly the outer ones.

The sling is brought over the hatch, prior to lowering away into the ship's hold, and it is not an unknown thing that this lowering process sometimes becomes a dropping process. Consequently, it is evident the care that must be taken in packing. The case that can stand these operations both in loading and discharging must of a necessity be a sound one.

A shipping case can, however, be unnecessarily strong, and if so will consequently increase ocean freight charges. Ocean freight rates are made up on a weight or measurement basis, ship's option. By ship's option, the steamship companies make their calculations based on 42 cubic feet to the ton. If the goods are light and take more than 42 cubic feet to the ton, they may on their own option charge on a measurement basis. If the goods are heavy and less than 42 cubic feet to the ton, the charges may be fixed on a weight basis. Unnecessary weight in a case is then to be avoided.

Proper Packing Builds Trade

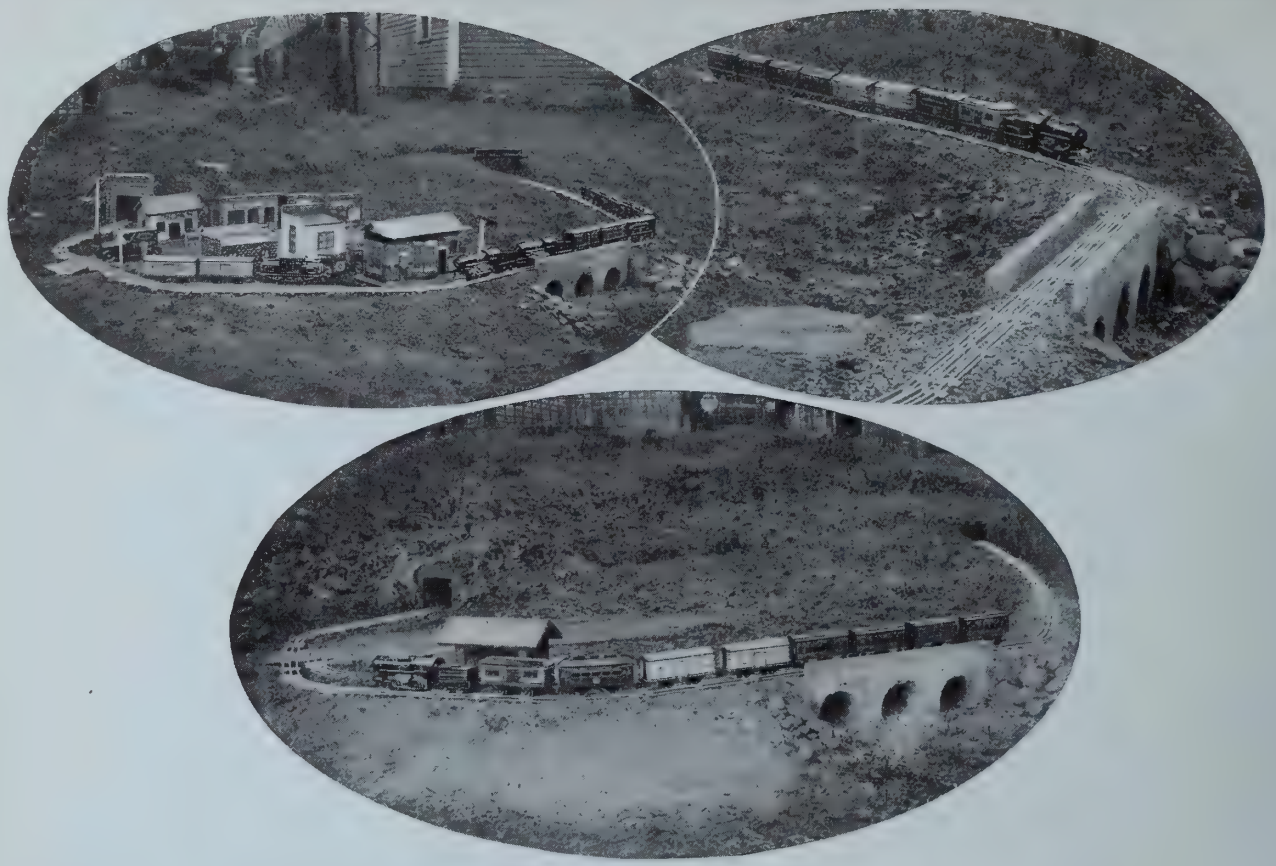
In England it is the custom, particularly in piece goods, to have the goods prepared by professional export packers, who make a business of it. Proper packing has helped to build up England's tremendous export trade. In Canada, perhaps, it is not possible to engage professional packers, but if Canada's export business is to expand greater care must be given to this important feature.

Experience will teach the exporter the proper and the most economical size of case, both for efficient handling and minimum freight rates. A thorough knowledge and a better understanding of the packing and shipping problem is to-day absolutely necessary to the successful growth of a Canadian export trade.

HOW CANADIAN EXPORTERS CAN PROFIT FROM THE EXAMPLE OF ENGLISH PACKING

DISCUSSING with a large importer of British and foreign merchandise the question of correct packing of export shipments, in order to insure safe delivery, a representative of Hardware and Metal was told that the Canadian exporter could profit a great deal by following the example of Old Country shippers. "We scarcely have any consignments from England that do not arrive in perfect condition," he said. "The English shipper has made a study of this important factor, with the result that the best methods in packing goods have been adopted. Importing, as we do, a great many lines that come to us in bottles, we never have any trouble. These goods come in either cases or casks. The cases are packed four dozen to the case, and the casks twelve dozen to the cask.

"Domestic packers have very often used a very thin wood, with results, in a great many cases rather disastrous. A thin wood will not stand the rehandling, and shippers on this side have learned or must learn that the strongest possible cases or casks must be used for overseas delivery. In addition to the cases and casks arriving from the Old Country being of the strongest wood, they are all very strongly coopered.



"Particular care of course must be given to lines that are affected by climate, and the attention that is given to goods of this character, means everything in the delivery of them in first-class shape. Canadian exporters can learn a good deal from the way Old Country goods are shipped, and are well advised to follow them as completely as possible."

One of the fleet of ships operated by the Canadian Government Mercantile Marine, which are carrying Canadian products into the markets of the world. Recent additions to the fleet have enabled the opening up of many new markets to Canada's manufacturers.

SEEKING GERMAN TRADE

The race between the United States, Great Britain and France to regain trade with Germany has been a close one. Official records of the three countries in question show that the trade of the United States with Germany in 1920 was $390,000,000, that of Great Britain £82,255,000 and that of France approximately 3,500,000,000 francs. Belgium and Italy also showed an equal trade willingness to "forget the past," while the neutrals on all of her frontages, Switzerland, Netherlands, the Scandinavian States, Czecho-Slovakia, Poland, and even Soviet Russia, showed marked gains over the preceding year, apparently bringing the grand total of Germany's foreign trade in 1920 to approximately $2,000,000,000.

The Backyard Railroad

Did you ever in all your life see a more novel use of the American Flyer Railroad than this?

The "Backyard Railroad," shown above, was built by Clyde Nolan, of Elkhart, Indiana. Thousands of outdoor railroads will be built this summer—we are using a full page ad. in two colors in the June issue of the "American Boy" to tell the boys about this new outdoor sport.

Sell American Flyer Railroad in Summer

Every dealer would like to stimulate the toy business in the summer months—here's an idea that will do it. Make a display of American Flyer Railroads in your show window, featuring "The Backyard Railroad Idea." We shall be glad to supply you with a colored reproduction of our full page "American Boy" advertisement. You will find that the boys and girls in your neighborhood will soon become enthusiastic over the idea. This means sales of complete outfits and extra equipment.

A B C

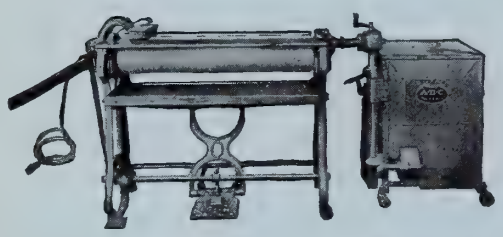
Sell a Complete Line Under One Famous Name

At a retail price range from $90.00 to $225.00 there are A B C power washers, electric washers and electric ironers. A model to suit every purpose and purse! No need to tie up capital in several lines. No need to devote advertising space, time and energy to pushing more than one line. Reduce your investment, increase your turnover, lower your freight costs, secure longer discounts, by confining your selling to the A B C line. Note its broadness. Each model the leader in its class. Each bears the famous A B C name—backed by pioneers in the industry, the big, successful, twelve-year-old firm of Altorfer Bros. Company. Exclusive dealerships open. Write our nearest wholesale distributor, or us, for all particulars.

Some lift and dip

Others rock and toss

The A B C does both

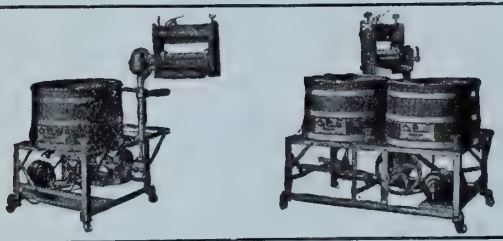


A B C *Super-Electric Washer*

Open, semi-cabinet and full cabinet models. Maple or zinc cylinders. Copper or galvanized tubs. ¼ h.p. motor. Also equipped for power drive. Retail price range $200.00 to $225.00.

A B C *Electric Ironer*

Foot pedals apply and release ironing pressure. 45-inch roll and shoe. One-piece steel ironing roll; 8-inch diameter, 7-inch non-warping ironing shoe. Result: faster, uniform work. Shoe drops back 4 inches. Enclosed parts. Retail price, equipped to operate off any A B C electric washer, $205. With motor, $245.



A B C *Electric Laundress*

Washes—Wrings—Irons—with a Single Motor.

The **only** complete home laundry unit. Detachable wringer. Ironer shaft attaches to wringer post. Saves cost of extra motor.

The "Iron All" attachment superbly irons the difficult operations—ruffles, collars, cuffs, children's dresses, etc.

A B C *"Alco" Washers*

Dolly type. Underneath drive. Single or double tub. Oversize motor. Machine-cut gears insure absolute quietness of operation. Also furnished for power drive off gasoline engine. Retail prices, $128 to $175.

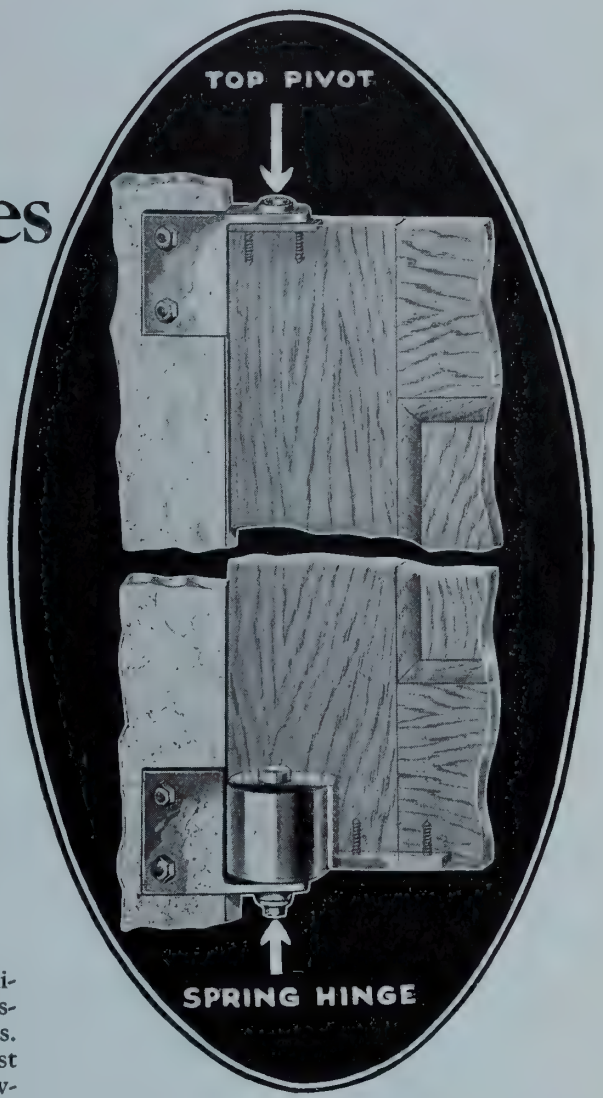
Sell Better Hinges at Lower Cost



RECENTLY we found it possible to make a marked reduction in prices. You can now offer your customers Lawson Spring Hinges at figures that they will find extremely attractive.

Lawson hinges are easy to sell. Architects and contractors are quick to recognize the numerous exclusive features that mean a saving of time and money, as well as their superiority in durability and appearance.

The turn-over is rapid, with a corresponding increase in profits.

Show your customers why Lawson's "Universal" are the best hinges that could possibly be used for toilet and lavatory doors. Show them how they can save at least $1.50 on every door they hang with Lawson's Nu Jamb, the hinge that requires no hanging strip. Explain the numerous other points of superiority in the Lawson line.

Then quote the figures that you are now able to make. You will be surprised at the business you can land when you go after it. This is something you can cash in. Do it now!

Lawson "Universal" Pivot Spring Hinge for toilet and lavatory doors. Neat, strong and "Universally" adjustable.

Write today for the new Lawson catalog. It is beautifully illustrated and shows the latest developments in the construction and use of spring hinges.

Action in ½ inch space.

BILLMONT

The Ratchet Wrench

The solid pawl is set in a recess of solid steel instead of using a pin for its axis. The ratchet itself is especially heat-treated to resist wear—pawl and ratchet are both finely milled. They catch and hold with the least movement of the drop-forged and nickeled handle—a half-inch leeway is more than enough to operate a Billmont Ratchet.

The hexagon opening will take all sizes of Billmont interchangeable sockets, thereby making a ratchet wrench that will operate on nuts or bolts of twenty-four different sizes. Moreover, the two extensions (6-inch and 11-inch) also fit the ratchet separately or together and likewise take twenty-four socket sizes, giving additional length and creating greater utility.

Dealers should write for our Master Dealer's (service station) proposition—sell every local garageman, mechanic and car owner at more than the usual profit.

Catalogue Upon Request.

The Most Helpful Equipment In Business

To-day modern business is transacted with the aid of numerous equipment, counters and display windows and cash registers.

We can hardly get along without them — each has its saving in speeding up of daily sales, and yearly turnovers.

But now you add to other equipment, perhaps the most important of all — HARDWARE AND METAL is the equipment for sending you new business ideas.

Properly applied ideas increase the hum of the adding machine. Business ideas quicken the ring of the cash register. Business ideas speed up sales and increase turnover. The ideas you will secure from HARDWARE AND METAL cover practically every one of your important business problems.

Ideas on selling, advertising, managing, financing, buying. Ideas on credits, collections, letter-writing, training salesmen, personal efficiency. Information regarding market conditions. Ideas on stock keeping, inventory, accounting, records and a hundred and one other business suggestions and methods.

Surely from such a productive source of ideas there will come many ideas of real dollars and cents value to you.

HARDWARE & METAL
143 University Ave., Toronto

When you require a roof, the measurement will be in squares (100 square feet). A basis for analysis of the costs of Brantford Asphalt Slates is given below:

1—**INITIAL COSTS OF MATERIALS**—Brantford Asphalt Slates are sometimes higher in initial cost for the material.

2—**NAILS REQUIRED**—Brantford Asphalt Slates require ONLY 684 nails to lay a square. Brantford Asphalt Slab Slates require ONLY 450 nails.

3—**COST OF LAYING**—Brantford Asphalt Slab Slates are four on one strip—require only one operation in handling, one operation in spacing—Individual slates are 8 x 12¾ inches—Cut easily, fit easily, fit on angles and bend over round surfaces. You save 30 to 50 per cent. in laying.

4—**NO PAINT OR STAIN REQUIRED**—The surface of Brantford Asphalt Slates is in nature's permanent colors, green and red, unfadeable, always attractive,—requiring no stain to produce artistic effects, no liquid coats to make them fire-resistant.

5—**SAVING OF INSURANCE**—Brantford Asphalt Slates are classed as non-combustible by fire insurance Companies—a direct saving of from 10 to 20 per cent. on premiums is effected. In certain localities fire regulations demand asbestos paper under some roof materials, but Brantford Asphalt Slates are fire-resistant and are immune from special regulations.

6—**COST OF REPAIRS**—From the day they are laid Brantford Asphalt Slate roofs show almost 100 per cent. of the original roof untouched. Brantford Asphalt Slates do not curl, split, crack or rot. Complete protection and permanent protection are built into Brantford Asphalt Slate Roofs.

Compare these roof costs with those of any other roofing material; it is your money you are spending and you want value for it—then buy

Brantford Asphalt Slates

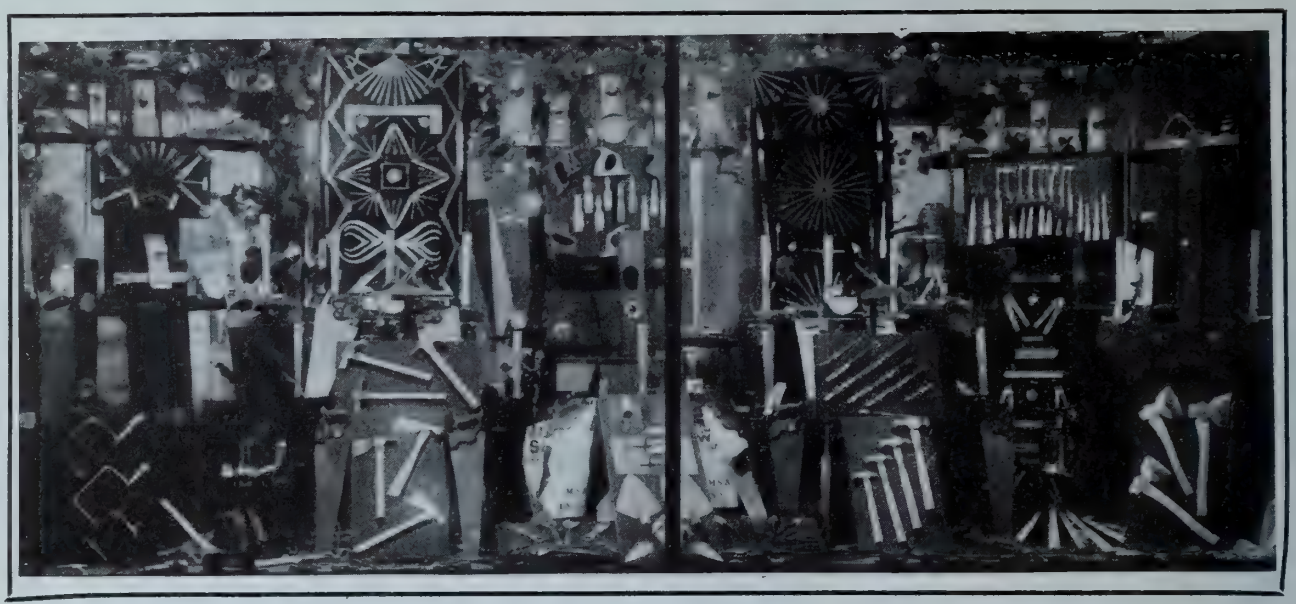
Have you any small needs?

Do you want to sell anything?

If so, advertise on this page and watch results.



Hardware and Metal's unique circulation as proven by the A.B.C. audit is due to 33 years of honest effort to give the retail trade the best possible service.

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

If interested tear out this page and place with letters to be answered.

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

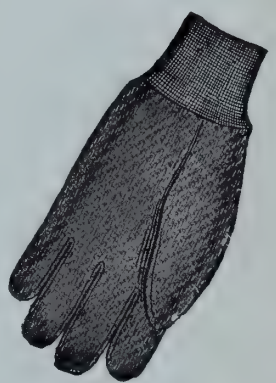
THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

Tapatco Stapling Device for attaching hooks (Patented in U.S., Dec. 1, 1914; patented in Canada, April 6, 1915). Gives a firm hold that outlasts even the splendid wearing qualities of the fabric itself.

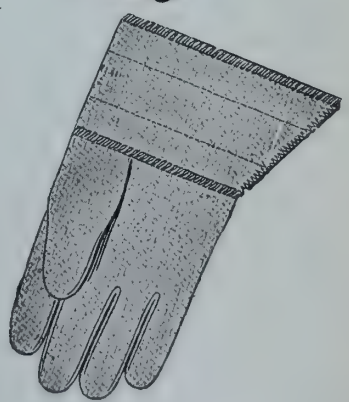


TAPATCO
REGISTERED TRADE MARK
BRAND

COLLAR PADS

Cost Less Than Disabled Horses

Let your customers appreciate this convincing point. A disabled horse is expensive. He will cost more than it would to insure him against chafed, bruised or galled shoulders, with the soft, springy, cushion-like protection of Tapatco Collar Pads.



Your market for the sale of these efficient horse protectors is excellent. There are always horses working. Their owners know from experience what disabled horses cost. Display Tapatco Horse Collar Pads; drive home the facts and enjoy profitable sales.

Tapatco Brand Work Gloves

Tapatco Gloves are made of selected cantons in Gauntlet, Knit Wrist and Band Top Styles. They are supplied in Heavy, Medium or Light Weight; also, in Leather Tip, Leather Faced; Jersey Gloves and Mitts in Tan, Slate or Oxford.

These reliable gloves outwear all others from the cheapest to the highest priced. They are the best buy you can offer your customers.

The American Pad & Textile Co.

COMMUNITY PLATE

MADE-IN-CANADA

This 26-piece chest will sell

This 26-piece Chest de luxe of the new Grosvenor design is especially suited to present selling conditions. It is fitted with the most practical set of silverware ever devised at the price.

It contains: 6 Teaspoons, 6 Hollow-Handle Medium Knives, 6 Flat-Handle Medium Forks, 6 Dessert Spoons, 1 Butter Knife, 1 Sugar Spoon.

All quick selling, every day, every meal staple items that appeal to every housewife.

Sell the silverware from the Chest, piece by piece—or the Chest and contents complete, as wedding gift, or for the couple just starting housekeeping.

The Chest, with its handsome, rich blue lining, forms a striking background for the silverware—sure to attract attention—and is just the thing for counter or window display. Each Chest is equipped with an attractive Chest Card listing the contents with the retail price of each item. This Chest de luxe will sell.

Your Jobber has a complete stock.

'RICE LEWIS' NEWS

If you can't Stop 'em—Swat 'em

Fly Stoppers

Fly stopping is always preferable to fly swatting—that's why the general public are becoming more and more in favor of Screen Doors and Windows. We carry a good line of Screen Doors and Windows in the best sizes and styles.

Screen doors in Nos. 1, 2, 8, 9 and 21; sizes: 2 ft. 6 in. x 6 ft. 6 in.; 2 ft. 8 in. x 6 ft. 8 in.; 2 ft. 10 in. x 6 ft. 10 in.; 3 ft. x 7 ft. Window Screens, Nos. 1 to 15 in widths extending to 18 in. up to 48 in.

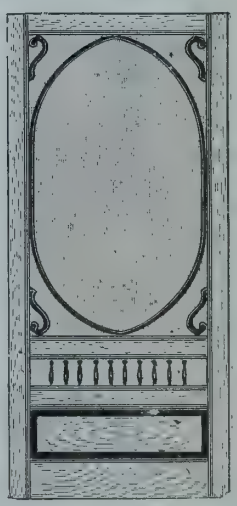
Fly Swatters

—And when they do get in it's time to swat 'em. This is where the fly swatter comes into play as the most effective means of extermination.

Our stock consists of the following lines made by the Perfection Mfg. Co.: "King," "Neverbreak," "Peerless," "Imperial."

These swatters are well made, of good material, in the best styles—most efficient, serviceable fly swatters we have been able to get.

Order your stock to-day and be ready for the demand. Don't miss sales.



SCREEN DOORS

SCREEN WINDOWS

We ask your attention to our stock of Wire Cloth. We carry Galvanized Wire Cloth—a silver grey finished cloth in 14-mesh from 18 to 48 inches in width.

We also stock Bronze Cloth in 14-mesh by 24, 30 and 36 inch, and black in 12-mesh only, all widths.

Ask the "Rice Lewis" man or write direct.

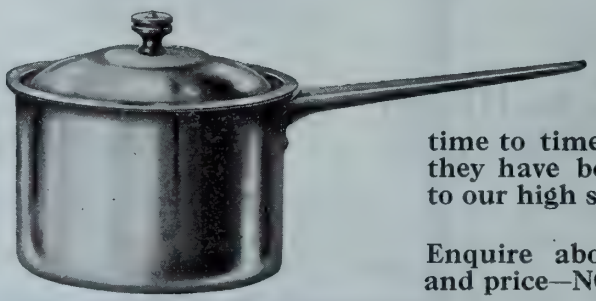
"LUMINO"

The Newest Achievement in Aluminum Ware

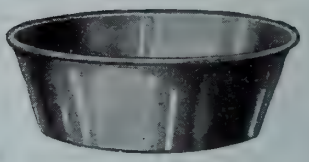
THE trade of Canada will welcome the announcement that we now have a line of High Grade Aluminum Kitchen Utensils to offer. The registered name of this line is

Lumino REGD Pure Aluminum



SMP "QUALITY"

After looking over inferior aluminum lines which were not selling, we decided that to have a winner it was necessary to produce a high grade line. Months were



spent in studying and designing the different shapes. The articles are manufactured from the highest grade of Pure Aluminum with the greatest care. Each piece goes through a rigid inspection after every operation.

"Lumino" has no flaws, but many fine features, for instance, the tubular handles remain cool, and are so riveted to the body that the bearing is along the tapered heads of rivets. It is not possible to make a stronger connection. Again, the interior is left with the *original hard finish* of the metal as it comes from the rolling mill, and will not stain as easily as a brush finish. The knobs on the lids, being corrugated, will not slip from the fingers.

At present, the *Lumino Ware* line consists of Nos. 53A Rice Boiler, 400 A and 600A Straight Sauce Pans with covers, 20A Flaring Sauce

pan, 3 A and 4 A Pudding Pans, and 9 A and 10 A Pie Plates. These are all *good-selling*, *serviceable* lines, and their quality is *guaranteed*.

Other lines are being perfected and will be added from time to time, but not until they have been brought up to our high standards.

Enquire about the quality and price—NOW.

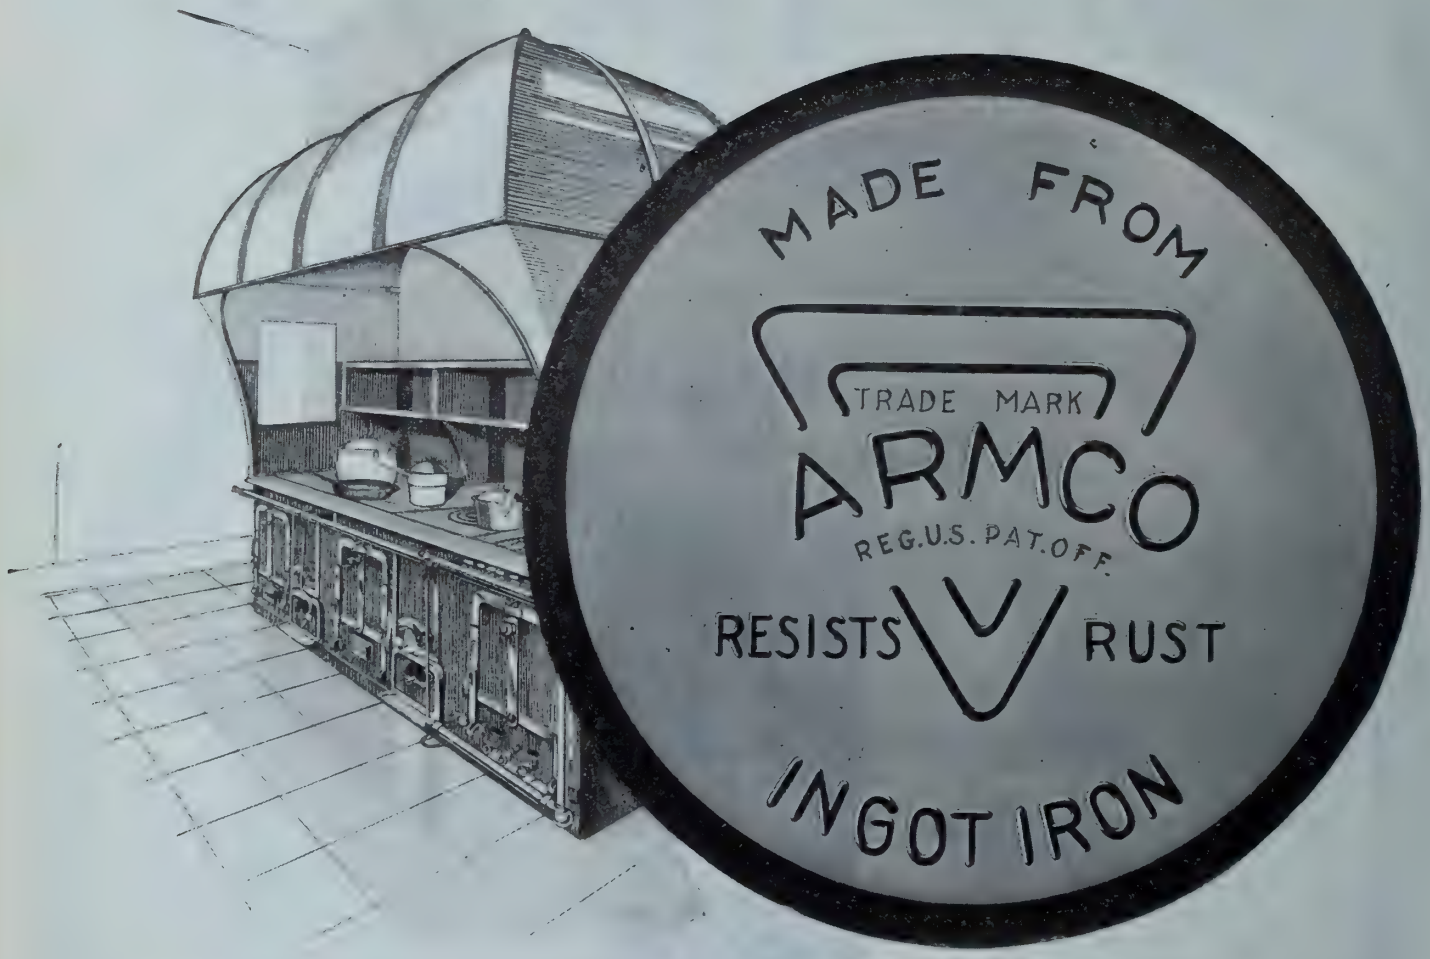
"Canada"

Flexible Steel Door Hanger

The real test of a hanger is performance "on the job." The "Canada" runs smoothly and easily on anti-friction, steel-roller bearings. It uses the same track as our famous "National" Hanger.

The Braced Rail, shown above at the left, is 1¼ x 3-16 inches and is furnished in lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle.

The farmer was never more prosperous than to-day and probably was never more inclined to build and repair and generally to improve his buildings than now. 1921 will see a particularly active season in this way. The hardware merchant may expect unusual sales of builders' and garage hardware this year. It brings new customers and nothing holds them like Canada Steel Goods Co. products.



The "Canada" comes neatly and conveniently packed, one pair in a box complete with bolts. Be sure to include "Canada" in your order.

Drop Us a Line for a Catalog

Canada Steel Goods Co., Limited

Hamilton, Canada

If a Manufacturer Uses This Label He Makes a Good Product

NO manufacturer would use "Armco" Ingot Iron in a cheap, unworthy stove. If the blue and gold Armco triangle appears on any stove you buy—and it should—you may be sure that not only good materials but the best workmanship went into the making of it.

There is a big difference between "Armco" Ingot Iron stoves and those made of ordinary sheet metal. Interpreting this difference into stove terms, it means many added years of service.

Stoves do not wear out, they rust out—but "Armco" Ingot Iron stoves resist rust.

This iron is now being used extensively for stoves, enameled refrigerators, table tops, washing machines, and other household articles.

When buying, ask the salesman to show you the Armco blue and gold triangle.

ARMCO

The trade-mark ARMCO carries the assurance that products bearing that mark are manufactured by The American Rolling Mill Company with the skill, intelligence, and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for them. The trade-mark ARMCO is registered the U. S. Patent Office.

Decorative Wall Burlaps

(No. VII of a Series)

MERCHANTS should see to it that stock of BURLAPS is never allowed to run low—*especially during the building season.*

With the cost of building materials at present high levels, the demand for this moderately priced wall decoration will continue — and remember this also — there is good profit for you in BURLAPS.

Not only as a wall decoration, but also for purposes of protection and preservation, there is nothing more satisfactory than Decorative Wall Burlaps.

Therefore, always keep your stock well assorted. There are three shades—drab, green and white — and they can be treated with Gloss, Varnish or flat tones to obtain any color scheme desired.

Our sample book with price list will be sent free on request.

Made in Canada

Stewart No. 9
Ball Bearing
Shearing Machine

Retail Price
Eastern Canada, $22
Western Canada, $23

Sell the Machine That Appeals Most to Your Customers

STEWART No. 9

Ball Bearing Shearing Machine

It appeals to customers because it offers such definite, money-saving advantages. Sheep owners are interested when you point out that this machine gets more wool from six sheep than hand blades get from seven. Reinforce this with the reminder that this extra profit on even a few sheep will quickly pay for the machine.

When you explain these things and show that the Stewart No. 9 gets better, long-fibred wool, and that machine-sheared wool brings top prices, you convince them and close the sale. Stewart Machines sell easily and bring you a good profit.

Many sheep owners will come to your store for Stewart Machines. If you don't have a stock, you can't make sales. Every lost sale is a lost profit.

Your jobber has Stewart Machines. Order now, display well, and you will get the business.

Dealers like the Assortment Plan of ordering Columbia Dry Batteries, because it's so handy

But of equal interest is the fact that buying in barrel lots—on the assortment plan—brings you

A WIDER MARGIN OF PROFIT PER BATTERY

It's so easy to specify "C-1 Assortment" and get—

50 No. 6 Ignitors
6 No. 1461 Hot Shots
3 No. 1561 Hot Shots
2 No. 1562 Hot Shots

or to say "C-2 Assortment" and get—

50 No. 6 Ignitors
12 No. 1461 Hot Shots

or to tell us "C-3 Assortment" and get—

50 No. 6 Ignitors
6 No. 1562 Hot Shots
4 No. 1561 Hot Shots

The Eveready Line with the Ever-steady turnover

Selling Flashlights on the Cafeteria Plan

Lay in a stock of Eveready Flashlights and Batteries—and oil up the old cash register. Display them on your shelves and counters, and you will see a demonstration of automatic selling.

People will come in, pick up a flashlight, look at the name and say to themselves, "Yep, it's an Eveready," and tell the clerk to wrap it up. Sort of a flashlight-cafeteria proposition.

Eveready dealers have an average turnover of 4 on cases and 8 on batteries. On cases alone, the yearly profits on a small investment are unusually large.

That's because the flashlights and batteries themselves have genuine merit, and because we have spent thousands of dollars to tell people about that merit. Yes, sir. "Eveready" is the big name in Flashlights and Batteries.

The Eveready jobbers in your district have an attractive assortment for you as a starter. If you don't know who the nearest Eveready jobber is, send us a postcard and we'll tell you.

DOWSWELL HAND POWER WASHERS

ARE SURE SELLERS

The HIGH GRADE Dolly Washer is developed to the highest point of efficiency. The balanced mechanism has cut gears and ball bearings which ensure smooth and noiseless running. It can be operated either standing or sitting. All gears are protected. The High Grade is unquestionably the finest high speed washer made.

The PATRIOT Dolly Washer is a modern high speed machine with cut gears and ball bearings. The mechanism is self-contained and runs so easily that a child can operate it. Owing to great quantity production the Patriot sells for a low price, although it is one of the best quality washers on the market.

The HAMILTON is a rocker washer with improved detachable operating lever. It is easy to work and is easy on clothes. Many people have used this type for years and would have no other.

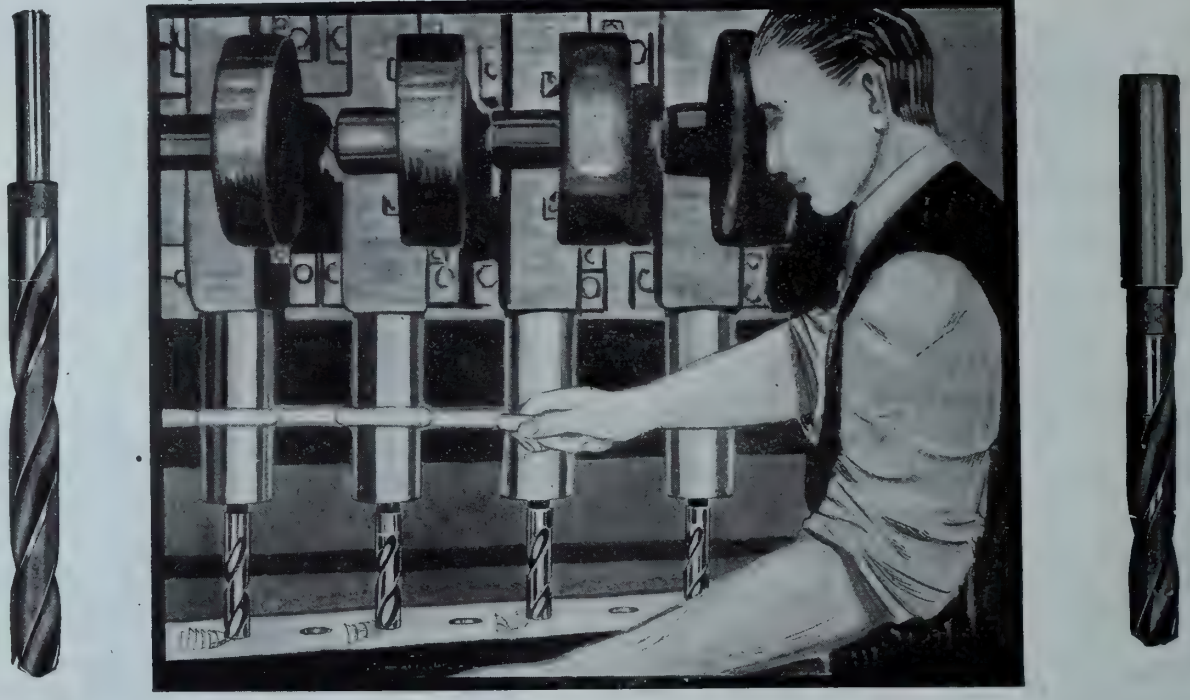
Your Salesman—

HAVE you a place in your store for a purely "Canadian Made" product that will bring you an excellent trade each year?

Your customer sees many points of superiority as you talk. The wire is tough and elastic—drawn to proper size and well galvanized in our factory at Hamilton — The Frost Lock — the strongest part of the fence, the evenly spaced uprights and the strong lateral wires are material for a selling talk that is bound to convince.

When you sell Frost Fence you make these purchasers of it regular customers, the reason being: they get something that measures up to their idea of what they ought to have.

Frost Fence is that kind of a product. It gives the kind of satisfaction that breeds good-will and not only brings your man back for further purchases but makes him a booster for your store.



FROST FENCE IS AN ASSET TO YOUR BUSINESS

Where Disston Quality Is Born

There is something more than a proper mixture of metal put into the crucible when Disston steel is made.

It is an unseen, intangible ingredient—yet as big and real as the tremendous plant in which Disston Saws and Tools are made. The long experience of men whose fathers were Disston steel workers, whose grandfathers worked out the secrets of fine Disston steel generations ago—this is what has made the present quality of Disston steel.

Under the greatest test of all, hard service over a long period of years, the quality born in Disston steel is revealed. The greatest praise of Disston Saws and Tools comes from men who have used them longest, men who write of these tools with a friendliness, and even affection, seldom given to inanimate objects—and there could be no higher tribute.

Now It's "GTD LINCOLN" On Drills

The GTD Corporation is now making and selling the line of twist drills, milling cutters and reamers, hitherto produced by the Lincoln Twist Drill Company, Taunton, Mass. U.S.A.

The addition of the nationally known GTD trade-mark to that of *"Lincoln"* means the combining of our forty-nine years' experience with the Lincoln Twist Drill's eighteen years, inspiring the same confidence as that which exists on commercial paper bearing double endorsement.

NOW you can buy a complete line of small tools under the GTD trade-mark. Such completeness means uniformity of product and suitability of tools.

You can drill your hole, ream it, tap it and gage it with GTD tools and they are made to be used together! Decidedly, an improvement.

"Lincoln" Drills and Milling Cutters have been rapidly coming to the front. For the past three and a half years they have been made by GTD men. The only change you will see will be that of continued improvement in quality, finish and service that characterizes our history, for there is a very active ideal constantly before us.

Just Out. New supplementary catalog-folder showing the GTD tool line, (including drills). Specially for men interested in automotive repairs. Tells at at a glance important repair information every garage needs today. Your copy sent by return mail without cost upon request either by letter or the coupon below.

Is Merchandise Properly *SOLD* To You?

YOU recognize the direct connection between production methods and the cost and quality of the goods; you have a right to know that goods are properly made. Yet the manufacturing, important though it is, is but the first lap on the journey to the consumer. Merchandise must be sold; sales cost is just as legitimate as manufacturing cost, and it has *just as direct a bearing upon the final cost to you.* If needless expense is incurred, it means either higher prices or a decrease in quality or service.

Obviously it will pay you to recognize efficient selling service. With this simple truth clearly in mind, permit us to enunciate an established, proven sales principle—

—The seller who advertises in the Business Papers, reaching *only* the class interested in his message, is using the most direct and economical method of helping you maintain an intelligent contact with your sources of supply.

This kind of advertising bears the same relation to the sales department that an improved machine does to the production department. And if the sales methods are wasteless and efficient, you seldom need worry about the goods. Each acts as a support and stimulus for the other.

On the other hand, the practice of buying circulation by the million in the hope of influencing a few thousand possible customers, is open to question. The best machine is a source of waste when improperly used, and this is no reflection on the machine. Concentration beats scatteration, and costs less. The right tool in the right place is a principle of as much importance to selling as to production.

There are many other reasons why discriminating buyers are giving preferred consideration to the concerns which tell them their business story in the buyer's own business paper, *especially* if that paper has subscribed to the high standards of practice of The Associated Business Papers, Inc.

The Love of Fine Tools A National Characteristic

The love of fine tools and proficiency in their use has long been recognized as a typically American trait. From the home work-benches of our amateur mechanics, no less than from the shops of our master machinists, come mechanical inventions that have made "Yankee ingenuity" a tradition among the nations.

In a similar manner, the reputation of Starrett Tools for extreme accuracy and superior quality, is a tradition among machinists everywhere—from the apprentice to the toolmaker.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

T. F. Shurly Company, Limited

And Now—
Toronto Printers May Strike

THE present agreement between printers in book and job offices and employers in Toronto expires May 31. The minimum wage paid is $35.20 per week (increased voluntarily a year ago by the employers from $32.00, although the agreement had a year then to run). This wage covers a 48-hour week.

The International Union is demanding a week of 44 hours as the basis for all wage scales, and the Toronto unions are demanding a wage of $44.00 per week of 44 hours, $8.80 more per week for 4 hours less work.

This means an increase of from 73 cents per hour to $1.00 per hour, or over 36%.

Publishers and other employing printers feel that under present conditions of business and the admitted decreasing cost of living, the increased wages and shorter hours demanded by the International Union are unreasonable.

This is acknowledged by many of the thoughtful and loyal printers employed in the Toronto offices, who believe that the International Union has blundered in its demand that local unions shall not sign new agreements except on the basis of the 44-hour week.

The position, however, may be that these local men may not be able to make the International officers in Indianapolis see, that to force a strike now on these unreasonable demands would be an act of folly—and a strike may be called on June 1st.

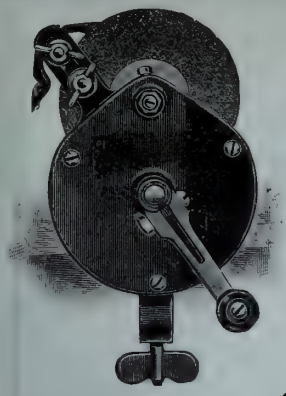
The facts of the case are presented here, for the information of the sections of the public—subscriber and advertiser—reached by this publication.

The attitude of the employing printers is shown by their voluntary action in giving a 10 per cent. increase last year while the agreement calling for the minimum wage of $32.00 a week had still a year to run.

They feel strongly now, however, that this is not a time when an increase of 36 per cent. in the labor cost of production should be permitted.

If publishers are forced to pay $44.00 a week instead of $35.20 and get only 44 hours of work instead of 48, it is inevitable that subscription and advertising rates must advance. No business can stand an increase in its wage bill of 36 per cent. and absorb that increase. The extra cost will have to be added to the sale price of the product.

Publishers sincerely hope that the great body of sane opinion among the local printers may prevail and that the Indianapolis officials will be induced to withdraw their unreasonable demands so that Toronto printers may continue to find well-paid, congenial employment.



If this sane, thoughtful opinion does not prevail, a strike seems inevitable, with its equally inevitable result of loss to the printers and publishers, and inconvenience and loss to the public.

An expression of the opinion of readers of this paper on the Union's proposals, involving an increase of 36% in the labor cost of printed matter, is asked. Will you not write a letter to the editor (not for publication) telling him your view of the situation?

This statement is published by and has received the endorsation of the Toronto publishers who are members of the

Budget Shows Tax and Tariff Changes

Sales Tax Increased 50 Per Cent.—Change in Basis of Value For Customs Duties on Imports—Sales Tax Need Not Be Shown Separately--Tinsmiths Relieved from Responsibility as Manufacturers

AN increase of 50 per cent. in the sales tax has been made in the budget presented this week by the Minister of Finance. This is to provide extra revenue needed and to make up for the Business Profits War Tax and Luxury Tax, both of which have been abolished. The tax upon sales by manufacturers in Canada to wholesalers, and by wholesalers to retailers, will be hereafter 1½ per cent. instead of 1 per cent. The tax on sales by manufacturers or wholesalers directly to consumers will be 3 per cent. In the case of importations by wholesalers the tax will be 2½ per cent. of the duty paid value of the goods but in case of importations by retailers or consumers the tax will be 4 per cent. The new rates are effective on and after May 10 and will apply to all goods imported or taken out of warehouse for consumption on and after that day and to goods previously imported for which no entry for consumption was made before that day.

Legislation also provides for strengthening the anti-dumping law in Canada and for stabilizing customs valuation by figuring the exchange where it is adverse to Canada and by providing that the depreciated currency of certain other countries cannot go below fifty per cent. Imported goods are to be marked, where possible, with the name of the country of origin, in both English and French.

Commenting upon the extension of the sales tax to raise necessary revenue the Minister of Finance stated that the imposition of a general turnover tax had been advocated by many organizations, but that it had been found that many retailers kept no books and that the cost of collection of such a tax would be unduly great.

May Not Be Passed On to the Consumer

No provision is made that the sales tax must be shown separately on invoices and it is contended that the increase will not necessarily be passed on in full to the consumer. It is thought in some quarters that competition will lead to the absorption of at least a portion of the new sales taxes into production costs and prevent the passing of the full amount of the taxation to the public.

No General Tariff Revision

No general revision of the tariff schedules is proposed at this time, partly due to the fact that settled tariff legislation in the United States has not been decided upon. The changes in tariff schedules are confined to adjustments for the purpose of carrying out the terms of the trade agreement with the British West Indian colonies and to certain other adjustments made necessary by the repeal of the few remaining luxury taxes.

Three important amendments to the Customs Tariff Act are included in legislation introduced. These are designed to protect Canadian interests against unfair competition from foreign countries. In proposing them the Minister of Finance stated that much of the unemployment in Canada resulted from the importation into Canada of goods at prices below the cost of production. He therefore proposed to enact that goods be valued for duty at a figure in no case lower than the wholesale price at the time in the country of origin and that the value for duty of new or unused goods should in no case be less than the actual cost of production of similar goods at date of shipment direct to Canada, plus a reasonable profit thereon.

Consider State of Currency in Country of Origin

Another amendment provides for taking cognizance in valuation of goods for duty of the state of the currency of the country of origin. The law as it stands provides for valuation in the currency of the country of export. Under a customs ruling this currency has been accepted on the basis of existing rates of exchange. The amendment provides that "in computing the value for duty of the currency of an invoice, no reduction shall be allowed in excess of 50 per cent. of the value of the standard or proclaimed currency of the country from whence the goods are invoiced to Canada." It also enacts that "in respect of goods shipped to Canada from a country where the rate of exchange is adverse to Canada, the value for duty of the currency of the invoice shall be computed at the rate of exchange existing between such country and Canada at the date of the shipment of the goods.

To illustrate these points take for example the German mark, the standard value of which is approximately 24 cents and which has depreciated greatly. By the suggested amendment the mark can

TAX AND TARIFF CHANGES IN BRIEF

Business Profits Tax abolished.

Luxury Taxes Abolished.

50 per cent. increase in general sales tax collected by manufacturers and wholesalers.

Increase in tax on goods imported by wholesalers and retailers.

Customs valuation stabilized by changing value of goods for duty figuring exchange when adverse to Canada and not allowing depreciated currency to appear on invoices below 50 per cent. of normal value.

Imported goods to be marked with name of country of origin.

Plan to strengthen anti-dumping law.

Tinsmiths relieved from manufacturers' license.

Binder twine taken off free list.

never be accepted in the valuation of an invoice for duty at less than 12 cents (50 per cent. of its proclaimed value). On the other hand if an article selling in the United States at $10 is imported into Canada at a time when the rate of exchange is 10 per cent., the valuation of the article for the purpose of collecting Canadian customs duties will be $11. If the rate of duty is 30 per cent. the revenue collected on that article will be $3.30 under the new legislation compared with $3 under the former basis of value for duty.

Mark All Imported Goods

The third amendment calls for the marking of all goods imported into Canada in English and French, to indicate the country of origin. This provision is to enable Canadian consumers to know the source of the goods purchased and is in accord with the wishes of manufacturers who have complained that goods have been sold as British, for example, when they were never manufactured in the United Kingdom. This latter amendment is not effective until September 1 next, after which unmarked goods will be liable to an additional 10 per cent. ad valorem duty as a penalty and a fine of $1,000 or imprisonment for persons violating the legislation with intent to conceal information given in the marks, stamps, brands or labels.

Reviewing the situation Sir Henry Drayton pointed out that revenues for 1921-22 from the sources of 1920-21 would reach $372,600,000 and that the amount of money needed is $435,360,971. Thus the amount to be secured by additional taxation this year is $62,760,971.

While the luxury taxes have been abolished, duties will be levied on certain articles on much the same basis. Playing cards come within this category and cards not exceeding $24 a gross in value will be taxed 8 cents a pack. Cards exceeding $24 a gross will be taxed 15 cents a pack.

Under the heading of exemptions, foodstuffs figure most prominently. Among them, however, are enumerated ores of metals of all kinds; fuel of all kinds; materials for use only in the construction, equipment and repair of ships; electricity; gas manufactured from coal; calcium carbide or oil for illuminating or heating purposes.

Not Applicable to Exports

The excise taxes as specified are not to be payable on goods exported or on sales of goods made to the order of each individual customer by a business which sells exclusively by retail, under regulations by the Minister of Customs and Inland Revenue, who shall be sole judge as to the classification of a business; and a drawback may be granted of 99 per cent. of the said taxes paid on materials used, wrought into or attached to articles exported. This section relieves tinsmiths from being classed as manufacturers.

License Fees.

Every manufacturer, producer, wholesaler or jobber may be required to take out an annual license for which a fee not exceeding $2 will be charged. The penalty for neglecting to take out such license will be $1,000.

Binder Twine Taxed

Fibre for use in the manufacture of binder twine has been removed from the exempted list and will hereafter be subject to the 2½ per cent. tax when imported by manufacturers.

Opinions on New Budget Proposals

Retailers Favorable to Extension of Sales Tax Principle—May Affect Window Glass Imports — Sales Tax Should Be Shown Separately to Avoid Juggling—Binder Twine to be Taxed—Effect on Imports From England and U.S.

SUMMARIZING the opinions of hardware retailers, wholesalers and manufacturers in connection with the new tax and tariff legislation proposed in the budget, it is evident that most retailers look upon the sales tax legislation in a favorable manner as it is merely an extension of existing methods and does not interfere to any great extent with the actual dealings with customers over the counter. The change in value for duty and other taxes on imports provides a more complicated condition which must be considered from the standpoint of the individual articles involved.

* * *

Nelson Mills, Mills Hardware Co., Hamilton, Ont., while expressing satisfaction with the new taxation, is of the opinion that the matter could have been facilitated by placing the sales tax only on the sales of manufacturers and eliminating the wholesaler from this tax. The tax in this case would, of course, be higher than the prevailing rate. Regarding the changed basis for duty on imports Mr. Mills thought that this slightly increased protection for Canadian manufacturers should satisfy them for the fact that they are responsible for making excise tax returns and the retailer is freed from such responsibility.

W. F. Macpherson, Prescott, Ont., thought that the increased sales tax to be paid by the retailer can better be calculated in his selling at this time while a declining market exists than if other conditions prevailed. It is his opinion that the trade should be well satisfied with this method of securing necessary revenue as it interferes little with the retailer's business routine.

* * *

FACILITATE ACCOUNTING

Discussing the point as to whether or not the tax should be shown separately on invoices from wholesalers to retailers, R. Hawkins, Smiths Falls, Ont., stated to Hardware and Metal that in order to facilitate the accounting of both wholesaler and retailer this tax should be shown separately on each invoice. He thought this would best enable the retailer to figure his selling prices and to know where the tax could be collected and where it would have to be absorbed. In the case of articles of fixed retail price Mr. Hawkins was of the opinion that it would pay to avoid any controversy with customers and absorb the small amount of the tax on such articles.

In his case he takes an invoice of goods when received and figures by percentages just what his selling price is on each article listed. The tax can be figured in this percentage and thus facilitate matters.

* * *

SHOULDN'T LOSE HEADS OVER TARIFF REVISION

Speaking of the altered value of imports for customs duties, Mr. Hawkins thought that while it is a good thing to protect home industries that neither Canada nor the United States should lose their heads over the question of tariff revision at this time.

* * *

W. J. Bell, Beeton, Ont., thinks that the sales tax is a very fair method of collection as it is now applied but contends that the farmers represent a class from whom much revenue could be secured and who are escaping their liability. Mr. Bell favors the imposition of a land tax and a tax on the farmer's income to supplement taxation raised in other manner and so to apply the liability in the most equitable manner. He is of the opinion that the sales tax can be adjusted very easily by each hardware merchant.

* * *

George May, West Toronto, speaks favorably of the new system of taxation and thinks the merchants' business will be little interfered with as long as the question of taxation does not enter into the actual sales over the counter.

MAY AFFECT WINDOW GLASS

Discussing the effect of the changed basis of value for duty on window glass imports J. Taylor, of Joseph Taylor & Son, Toronto, stated to Hardware and Metal that there would be no effect upon imports of Belgian plate glass as this is now invoiced on the basis of the pound sterling. In the case of Belgian window glass, however, there will likely be some alteration owing to the fact that the Belgian franc is now quoted a little below 50 per cent. of its normal value. The provision in such cases is that the value for duty shall not be below 50 per cent. of the normal value of the currency of the country from which the goods are coming. There will, therefore be some increase in the duties on window glass from Belgium, though it is expected that the franc will continue its recent strength and soon be quoted at 50 per cent. of its normal value. No definite idea of what this change will bring can be calculated owing to the fact that exchange will fluctuate from day to day and the rate prevailing on the day the goods were shipped will apply. Practically all imports of plate and window glass to Canada to-day are coming from Belgium owing to the fact that lower quotations are made than on United States or other glass.

Mr. Taylor is of the opinion that the sales tax applied by manufacturers and wholesalers should be shown separately on invoices and not absorbed in the invoiced price, so as to avoid any danger of juggling prices.

* * *

CORDAGE ON FREE LIST

The changed basis of value for duty will not affect rope and cordage owing to the fact that the raw materials entering into the manufacture of these products are now entered free, stated Mr. Hubbard, Independent Cordage Co., Toronto, to Hardware and Metal. There is some talk of such manufacturers having to pay duty on some basis owing to the change now made in value for duty, but no official mention has been made of such and the likelihood of such a duty is discounted.

* * *

BINDER TWINE TO BE TAXED

The chief change in the new budget proposals as affecting the cordage industry is that removing binder twine from the exempted list and making manufacturers liable to a 2½ per cent. tax on importations of fibre for the making of binder twine.

Mr. Hubbard points out that this ruling will complicate matters seriously for the cordage firms as one price has been made for the season and orders booked. Obviously the manufacturers cannot pass on this tax nor the increased sales tax now applied. The matter will be discussed jointly among manufacturers and a decision arrived at. Mr. Hubbard stated, however, that it was possible that prices would have to be advanced on repeat business, this depending to some extent upon the size of the crop and the consequent volume of binder twine business.

* * *

WILL SHOW AT LEAST 1½ PER CENT. ON INVOICES

Discussing the question of showing the sales tax separately on invoices Mr. Hubbard stated that an arrangement had been made among a number of manufacturers and jobbers to show at least 1½ per cent. sales tax on each invoice. This is the total tax applied on sales from wholesalers to retailers but in the case of sales from manufacturers to retailers this tax is 3 per cent. and the balance could either be shown or absorbed. The idea of this agreement is to prevent any juggling of the sales tax and establish a definite basis of invoicing so that the merchant will know where he is at.

* * *

MAKES COSTS UNCERTAIN

A jobber of paints, varnishes, oils, etc., expressed satisfaction with the new tax and tariff legislation.

"While detailed discussion seems a little premature, at this time," he stated, "yet the situation can be generally summed up as a fair proposition. While I am sorry to see the exchange rate entering into valuation, as it makes the factor of cost uncertain, yet some new ruling was no doubt necessary. The increased sales tax is good in view of the fact that some method has to be devised for increasing revenue, and the budget as a whole seems to represent the best possible way, at present, of meeting a situation that had to be faced."

* * *

PREFER EVEN PERCENTAGE

Brass manufacturers in discussing the budget and its new tax and tariff regulations voiced the opinion that they would prefer to see the sales tax increased to 2 per cent., rather than only 1½, as the odd split would no doubt cause many trivial irregularities. The even cent would be much easier to handle when applied to small sales, especially where these are numerous. It was apparent that the budget comprised a very fair attempt at impartiality.

* * *

CUSTOMS HOUSES NEEDED

"It is unfortunate, in my opinion, that such a measure should have to be taken at the present time," said G. T. Pepall, M. & L. Samuel, Benjamin & Co., Toronto, to Hardware and Metal, "but we must pay for the war, and to this every Canadian will agree; the disagreeable part is paying for the reckless railroad policies of the pre-war days. Canada is particularly unfortunate in her tariff legislation, as we are continually taking our cue from the United States, a self-contained country, which Canada is not. To give a few instances, we have customs houses scattered all over the country, in villages and towns; these were born of political patronage, and the least observant must see that what is required is a proper chain of customs houses with a proper board of appraisers at real ports of entry—in the interests of economy the knife should be applied here, and applied at once.

"Another example is the weird Canadian Customs Tariff—this was issued in 1907, and up to December 31, 1918, twenty-six amendments had been issued, and I presume an almost similar number have been issued during the last few years. This, of course, means a very complicated tariff, and it is amusing to think of the struggles of the collectors and sub-collectors in the small towns in their endeavors to keep up with the amendments. The present legislation simply adds indefinitely to the clerical work in connection with the entries, and it would almost seem as if the effect would be to turn half the population of Canada into clerks, as it seems impossible for us to have simple legislation. To digress a moment, take the Income

WILL NOT GO INTO EFFECT IMMEDIATELY

Ottawa, May 12—(Special)—It being understood that in some parts of Canada certain Customs officials have interpreted the declaration of Sir Henry Drayton, in the Budget address with regard to the method of determining the exchange value of foreign currencies for Customs purposes, as going into effect immediately, it is well to make it plain that this is not the case.

A bill will have to be introduced into the House of Commons by the Finance Minister, and the new method of determining the value of currency for duty purposes will not go into effect until after that passes or on the date set by it. The same thing is true of provisions introduced to make the anti-dumping law more effective, though in this regard the bill will only state definitely what has been for many years the interpretation of Customs officials of existing law.

On September 1 all imported goods must bear the name of country of origin plainly marked.

These are the exceptions to the tax provisions which went into effect immediately.

WATCH FOR THE CHART

In next week's issue of Hardware and Metal will appear a chart showing the sales tax to be collected and sales tax payable on importations as affecting all branches of the hardware trade. This chart will be a revision of the former chart which appeared in Hardware and Metal and which has been used by retailers, wholesalers and manufacturers to good advantage.

Tax—we must have A, B, C and D columns; one, of course, would be sufficient and computation would be easy.

"My objection to the present legislation is that it is too complicated, and I think that the Minister should have grasped the nettle firmly by the hand, and, having in view the average of importations during the past, say, ten years, should have computed from them and placed a 5 per cent. or 10 per cent. war tax (or whatever was necessary) on all importations, on free and dutiable goods alike, without exception."

* * *

EFFECT ON ENGLISH IMPORTS

"Being interested solely in the importing of English made goods into Canada, the new legislation is against us in one way, as we shall now have to pay an increased tax on all imports," said S. A. Rowlandson, manager Associated British Industries, Ltd., Toronto, to Hardware and Metal. "Under last year's regulations the taxation cost us 1 per cent. on all imports, which had to be paid before goods came into our possession, but we were able to charge sales tax ourselves, bringing the total cost of the tax to us to not greater than 1 per cent. We are not quite certain under the new legislation what the new taxation will cost us; it is a subject for deep study, but it is bound to come out more expensive.

"As opposed to this, however, we feel sure that we shall benefit by the regulations stipulating that on imports from the United States duty and tax must now be paid on the actual purchase price according to Canadian funds. The United States is the only country from which Canada purchases where the rate of exchange is unfavorable. On purchases from England and other European countries Canada benefits owing to the favorable rate of exchange. The average duty paid by Canada on all imports from the States is about 14½ per cent., and figuring that a hundred dollars' worth of stuff in the States costs the Canadian importer on an average $112, it will be seen that American made stuff is going to cost Canadians about 5 per cent. more than in the past. This should tend to increase purchasing in England by Canadian firms."

* * *

MAY ADD FIVE PER CENT. ON IMPORTS FROM U. S.

J. W. Dowling, general manager, Caverhill-Learmont & Co., is of the opinion that present taxes, recently brought down are favorable to bring the extra required revenue. The hardware trade is fortunate in having little heavier taxes imposed, and nothing to greatly affect the trade generally. The outstanding feature is the change in value for duty on imports, and while this may add an additional 5 per cent. to the invoice cost to the retailer on lines imported from the United States, this he thought was wholly satisfactory. The machinery used today to collect the taxes formerly in existence could be utilized at little further expenditure to the country, this alone being a redeeming feature.

* * *

A. C. Leslie & Co., Ltd., express themselves as being well satisfied with the new budget taxes. Although importers of galvanized and black sheets, copper, lead and lime sheets, and other lines of which there are Canadian competitors, the handicap exists with the extra tax to 2½ per cent, on imports, yet the taxes are considered fair and it is realized that some must needs suffer more than others, no matter what proposals are brought down.

* * *

WHOLESALER WOULD PREFER TURNOVER TAX

"I was very sorry to observe that Sir Henry Drayton in bringing down the budget this week increased the sales tax to obtain the necessary revenue, instead of adopting the turnover tax; and was also disappointed to see that no alteration was made in income taxation," said W. H. Lamont, of H. S. Howland Sons & Co. "I note that the capital expenditure mentioned in the estimates as well as the deficit on the railroads is to be provided for out of taxes, and while ev-

Tinsmiths Relieved From Manufacturers' Tax

Ottawa Merchants Approve New Taxes—Expect Retail Trade Will Be Stimulated

FOLLOWING the publication of the budget proposals, Ottawa merchants, business men and officers and members of the Retail Merchants' Association of Canada expressed general satisfaction with the provisions. It was the general opinion of those interviewed by Hardware and Metal that the decision to have the sales tax collected at the source of production and distribution, in addition to saving endless inconvenience to retailers, would mean an enormous saving of both time and money.

It is a matter of considerable gratification to certain retail merchants, including tinsmiths, merchant tailors, etc., that the Finance Minister has seen fit to abolish the regulation of the Department of Inland Revenue and Customs requiring certain retailers to take out a manufacturer's license and collect a two per cent. tax. It is difficult to think of any Government regulation that was more unpopular, and therefore the reform gives the retailers who were affected every cause for being joyful. It is general knowledge that the case was being fought out in the courts and that a judgment was being anxiously awaited, but of course any judgment rendered now must be declared null and void.

"I think that the retail merchants as a whole are to be congratulated on the striking success which their associations have gained," said E. M. Trowern, Dominion secretary of the Retail Merchants' Association of Canada.

"The Government has done a wise thing in centering the collection of the tax in the fewest points, so that a large portion of the revenue and much time will not be lost in its collection. In my opinion this will save the country millions of dollars, for it will be readily seen what the difference in the cost of collection would be between obtaining the revenue from 200,000 retail merchants, or only 10,000 others.

"In addition, the retail merchant will be spared the great inconvenience of having to keep sets of books for the Government, with consequent loss of time, and will now be able to attend strictly to his business which will reflect beneficially upon the consuming public.

Tinsmiths' Case Settled

"The Retail Merchants' Association also took the stand that under the old act a retailer in certain classes could not be compelled to take out a manufacturer's license, and the budget has vindicated us in our stand as set out in the following clause:

" 'Provided further that the excise taxes specified in this section shall not be payable on goods exported, or on sales of goods made to the order of each individual customer by a business which sells exclusively by retail, under regulations by the Minister of Customs and Inland Revenue, who shall be the sole judge as to a classification of a business.

"It is evident we were right in combating the attempt which was made to class certain retailers as manufacturers, or the Government would not have amended the act."

J. C. Campbell, secretary of the Eastern Ontario and Ottawa branch of the Retail Merchants' Association of Canada, said he felt that now the merchants had got rid of the great impediment to the successful conducting of their business, retail trade would receive a great impetus. "We are glad to note," he said, "that a retail merchant will be considered strictly as such and that certain classes in the retail trade will not be singled out as manufacturers. Under the new order of things there will be no more inspectors to bother the merchants every month, or sets of books to keep in order that the Government may collect the tax. Our association feels that its officers have cause for satisfaction, in that they have accomplished what they set out to do, viz.: bring justice to the retail merchants of Canada."

Planning "Special Sales" of Hardware

Appeal Strongly to the Housewife Who is the Chief Purchaser at Such Sales, Says G. L. Davey, Ingram & Davey, St. Thomas, Ont.—Special Sales Liven Up Trade in General as Well as in the Specials, Says W. J. Illsey, Retail Store Manager, J. H. Ashdown Hardware Co., Winnipeg

THE setting aside of a special day each week for the sale of "specials" in the hardware stock is now becoming quite common among hardware merchants. The "Saturday Savings" sale has been adopted in a number of cases preceded usually by good sized advertisements in local papers announcing the sale and outlining a wide range of seasonable lines.

Discussing the effectiveness of such sales with a number of hardware merchants, Hardware and Metal has secured a number of interesting points which may be of value to other merchants contemplating this plan.

"We run Saturday Savings sales practically every Saturday and find they bring us very good results," stated M. L. Davey, of Ingram & Davey, Ltd., St. Thomas, Ont., to Hardware and Metal.

"We have no special way of deciding on the line to be featured, but try to get different lines each week and to make them as seasonable as possible. Lines which appeal to the housewife are best featured in such sales, as they are the class who watch for such events and the ones who do the most buying," said Mr. Davey.

"We put in a window display on Friday and display the goods prominently in our store and they are all well ticketed, each clerk understanding exactly what is on sale and the price before Saturday morning."

Western Merchants Hold Sales

The special sale day is also carried out by a number of Western hardware merchants, prominent among whom is the J. H. Ashdown Hardware Co., of Winnipeg and Calgary.

W. J. Illsey, retail store manager for this firm in Winnipeg, stated to Hardware and Metal that special sales along the lines outlined are run frequently and are found to be instrumental in livening up business in general, as well as in the line specially featured.

"We endeavor to have window displays at the same time as the ads. are running in order to get the utmost effect from this effort," stated Mr. Illsey, who emphasized the fact that results to retailers at any time come only with persistent effort, both in publicity and the arranging of special sales. It is his opinion that merchants in towns of any ordinary size can put on a week-end sale and that good use should be made of the local newspaper or newspapers in order that all possible publicity may be had.

A Little Ahead of Season

"Seasonable items should be featured and these should be just a little ahead of the season," concluded Mr. Illsey.

The advertisements reprinted herewith indicate that a number of other hardware merchants follow the plan of advertising special sales on certain days of the week.

"Opportunity Day" is advertised by Wood Hardware Co., Regina, Sask., which lists a number of lines which will

shortly be seasonable. These include refrigerators, screen doors and windows, electric stoves, garden tools, kitchenware, etc. The ad. is well illustrated and was used in good sized space to herald the special Opportunity Day sale, when window displays were linked up with this selling effort.

Russill Hardware Co., Toronto, feature special Saturday savings sales and have found them valuable in stimulating trade. The ad. shown herewith shows specials for three days of the week and includes garden tools, paints, roofings, mechanics' tools, poultry supplies, etc., all lines seasonable in the spring and early summer.

Bargain Prices on Cash Sales Only

Another firm which features Saturday Savings sales is the George Taylor Hardware, Ltd., Cobalt, Ont. The ad. shown herewith featuring thermos bottles, flashlights, paints, vacuum cleaners, kitchen utensils, is run in the local papers on Friday, and sometimes earlier in the week. A feature of the sales in this store is that the Saturday bargain prices apply on cash purchases only. This does not affect the delivery of the purchases.

A wide range of specials for Saturday, at this season of the year is shown in the ad. by Dominion Hardware Stores, Toronto. This ad. shows garden tools, bulk, etc. Prices are featured prominently on these specials and they act more or less as leaders for trade in other lines. The store salesmen are acquainted with the lines to be given special effort in these sales and they are treated accordingly, frequent suggestions being made of other lines which the customer might require.

In handling special sales the experiences of these merchants, in brief, is along the following lines. Advertise generously, not too far in advance, select lines most likely to be required by your customers and advertise lines a little ahead of their season; establish a definite arrangement regarding prices as

Pacific Coast Merchants Feature Sales

A "two-day" special sale for Friday and Saturday is advertised by Share Bros., Ltd., Vancouver, B.C., which shows that hardware merchants on the Pacific Coast have also realized the advantage of holding special sales to stimulate business. This ad. emphasizes automobile accessories, including a wide range of spring requirements of the motorist. Sporting goods for spring are also given prominence along with garden tools, mechanics' tools and some spring household hardware requirements. Generous use is made of prices as a feature in drawing trade in special sales.

washing requirements, paints and brushes, waxing brushes, polishes for housecleaning, roller skates, etc. A number of small lines are illustrated as suggestions to the person engaged in painting, housecleaning or other renovating at this time of year.

Specials Act as Leaders

While the ad. by Mills Hardware Co. is devoted to housecleaning needs and features a number of lines now seasonable, it will also be noted that the centre column of the ad. is devoted to specials for Saturday, including brushes, screens, step ladders, floor mops, white lead in

to whether they apply on cash purchases or otherwise, also as to whether the "bargains" are to be delivered; fully acquaint clerks with the lines being featured and point out that these will be used as leaders; that there is a good opportunity for the sale of other lines in the store by the mere suggestion; appeal strongly to the housewife, who is found to be the chief purchaser at such sales; link up the window displays of similar lines to those advertised and concentrate all selling effort on them; ticket all the specials plainly in the ads., in the window display and in the store display.

Army of Tourists to Invade Canada

Unprecedented Volume of Enquiries Regarding Canadian Touring Conditions by Motorists—Officials Estimate Forty Million Dollars to be Spent in Ontario by Tourists This Summer —Much Trade in Auto Accessories, Camp Equipment, Sporting Goods, etc., for Hardware Merchants

Many of the automobile accessory lines which will be required by the automobile tourist to Canada during the forthcoming season, are shown in this display. Minor repairs may have to be made far from a garage, so tools can be shown; tires and tubes are always required on long distance touring, as are also repair outfits, including patches, vulcanizing outfits, etc. Fire extinguishers, headlight lenses, chains, robes, windshield cleaners, etc., are also good lines to feature for the interest of the tourist. Gasoline and oil will be required anyway, but some of these other lines which will add to the comfort of touring can be sold by merely making the suggestion.

FROM information secured by Hardware and Metal from various organizations in Canada there have been a much greater number of enquiries received from prospective tourists from the United States and Canada during the spring months than at any time in the past. These enquiries are for information concerning roads and touring conditions in Canada and are from motor car owners who contemplate visiting this country during the coming summer. The exchange situation is undoubtedly a factor in encouraging U. S. tourists to spend their holidays touring Canada, for their money carries a greater buying power in this country than do Canadian funds. Many enquiries are also being received at certain points in Canada from Canadians residing at some distance, who are evidently contemplating taking the road for their holidays this season.

200,000 Cars Will Enter Ontario

It is estimated by the Ontario Motor League that during the present season some two hundred thousand cars will enter Ontario alone from the U.S. This means between eight hundred thousand and one million tourists. If the average tourist spends five days in the province and spends ten dollars per day upon car maintenance the amount of U.S. money brought into this province alone will be in the neighborhood of forty million dollars.

That money spent on improving Canada's highways is not lost, but is rather a good investment by encouraging tourist travel is evident from the figures above.

Great Potential Trade

The army of tourists who are expected to visit Canada during this summer constitute a great potential in trade in many lines handled by the hardware merchant. Automobile accessories will be one of the foremost lines, due to the necessity for giving the automobile constant attention when on long distance touring. Tires and tubes will be needed, anti-glare lenses, to comply with the laws in some parts of Canada; gasoline and oils, etc. This trade also extends to many other lines, such as campers and picknickers' supplies, including hampers, tents, collapsible chairs, thermos outfits, etc.

Then there is the range of sporting goods to be offered the tourist. Quite likely he will be interested in fishing, golfing or some other Canadian sport, and the hardware merchant has a wide range of sporting accessories to offer the interested tourist. There are a great many other lines sold in the hardware store which will be of special interest to the tourist, who must provide his own fun and comforts. If the hardware merchant is located on or near a trunk road, over which many of these tourists must travel, it will pay him to devote a little attention to catering to the needs of such tourists and thus encourage business in those lines mentioned.

Firearms Proposals Remove Objections

British Subjects Freed From Necessity of Securing Permits For Rifles and Shotguns Under Proposed Regulations—Aliens Still to Require Permits But More Officials to Issue Them

THE trade, all sportsmen and hunters will be glad to hear that the Minister of Justice has introduced in the House of Commons a bill to amend that section of the Criminal Code relating to permits for the possession of firearms.

As we read these amendments, if they pass the House, the sale and possession of shot guns and rifles for legitimate purposes will be freed from the annoyance and red tape that has been so much complained of under the original act.

Under the bill as amended the possession of, outside of one's residence or business premises, or the carrying concealed pistols, revolvers, sheath or bowie knives, daggers, brass knuckles or skull crackers, without a permit will be a serious offence, and the sale of these weapons or ammunition therefor to people not having a permit and without keeping a record thereof will be punished.

In regard to rifles and shot guns:

It will not be necessary for British subjects to get permits for either.

Aliens will have to get permits, but the number of officials who can issue permits has been increased and no limit has been placed on the jurisdiction of these officials in this matter.

The following taken from the original act and proposed amendments will be of interest to the trade, sportsmen and hunters. It seems to us that the Minister has gone as far as he can in allowing freedom of the possession of firearms for all legitimate purposes, while retaining necessary safeguards against those who would use firearms in an improper way.

We would suggest therefore that the trade, sportsmen and hunters urge upon the members of the House from their districts the speedy adoption of the amendments.

Section 118 of the Criminal Code As Amended to 1920 and Present Proposed Amendments

Part 2 of Criminal Code (resumed).

118. Possessing or Selling Offensive Weapons.—Everyone is guilty of an offence and liable, on summary conviction, to a penalty not exceeding one hundred dollars and costs or to imprisonment for three months, or to both fine and imprisonment, who—

(a) not having a permit in Form 76, has upon his person, elsewhere than in his own dwelling house, shop, warehouse, counting house, or premises, or is carrying concealed, a pistol, revolver, ammunition that can be used in any pistol or revolver, sheath knife, bowie knife, dagger, stilleto, metal knuckles, skull cracker or other offensive weapon that may be concealed upon the person; or

(b) sells or, without lawful excuse, gives or lends any such offensive weapon, ammunition, firearm, air gun, device or contrivance to any one not being the holder of the permit; or

(c) in the case of a sale, neglects to keep a record of such sale, the date thereof, the name of the purchaser, such sufficient description of the weapon, ammunition, firearm, air gun, device or contrivance sold as may be necessary to identify it, the date and place of issue of the permit and the name and office of the issuer of the permit, or neglects to send a duplicate of such record by registered mail to the person who issued such permit, or neglects to endorse upon such permit, the date and place of sale, the said description of the weapon, firearm, air gun, device or contrivance, and the name of the vendor; or

(d) being authorized to issue a permit, issues it without keeping a duplicate thereof as a record, or having issued a permit, fails to keep any records received by him of sales of weapons, ammunition, devices or contrivances to the holder thereof; or

(d1) being an alien has in his possession any pistol, revolver, shot gun, rifle, or other firearm or any ammunition for any firearm or any offensive weapon without having a permit therefor, which permit may be issued in the same manner by the same persons and as near as may be in the same form as in the case of the other permits referred to in this section; or

(e) issues a permit without lawful authority.

2. Upon sufficient cause being shown, any officer of the Royal Canadian Mounted Police or of a provincial police or detective force, or any stipendiary or district magistrate or police magistrate or acting police magistrate or sheriff or chief constable of any city, incorporated town or district municipality; or any person authorized under the law of any province to issue licenses or permits to carry firearms, or to hunt or shoot, or any officer or class of officers or persons thereto authorized by the Governor in Council, may grant any applicant therefor as to whose discretion and good character he is satisfied a permit in Form 76, for such period not exceeding twelve months as he deems fit.

3. Such permit, upon the trial of an offence, shall be prime facie evidence of its contents and of the signature and official character of the person by whom it purports to be granted.

5. Nothing in this section shall apply to the having upon his person or the carrying by any member of His Majesty's naval, military or militia forces, or by any peace officer or immigration officer of any weapons, devices or contrivances which he is by law permitted or authorized so to have or carry, or to any bona fide sale made by any manufacturer of or person trading wholesale in such weapons, devices or contrivances to any person bona fide dealing in such articles and having an established and fixed place of business.

6. Every peace officer may search any person whom he has reason to believe and does believe has upon his person any weapon, firearm, air gun, device or contrivance contrary to the provisions of this section, and may seize any weapon, firearm, air gun, device or contrivance illegally in the possession of any person without a permit. Any such weapon, firearm, air gun, device or contrivance had or carried in violation of this section shall be forfeited to the Crown to be disposed of as the Attorney General of the Province in which such forfeiture takes place may direct. (As enacted by 3-4 Geo. V., c. 13, sec. 4.) For the definition of "offensive weapon," see section 2, par. 24, ante.

Form 76 of the said Act, as enacted by chapter 13 of the Statutes of 1913, is amended by inserting the following after the words "insert duration of permit" the words, "and county, city, town or other limits within which permit is to be in force."

COAL STRIKE AFFECTS SHEET AND PLATE SHIPMENTS

Montreal.—The coal strike in England is having its bad effects on importations to the local market, especially in regard to English galvanized sheets and tin plate. Fewer steam sailings are now arriving and altogether some little concern is felt for fear of a shortage occurring. While this has its results on the two above mentioned lines at present, Welsh Canada plate may have to be placed on the shortage list if the strike continues, and the trade was looking forward to being able to again purchase these sheets this fall. Stiffening of prices may occur, it is said, in the event of a shortage, so it is earnestly hoped that a settlement will be arrived at in the near future.

Next Convention of O. R. H. A. in Hamilton

Plans Made For Extending the Exhibition and Other Features of Annual Convention—May Hold Summer Session During Toronto Exhibition — Permanent Secretary After June 1 — Ratify Fire Insurance Scheme

A DECISION to hold the next annual convention of the Ontario Retail Hardware Association in Hamilton, Ont., was made at the meeting of the executive committee of the association in Toronto this week, and plans were laid for the extension of various phases of the annual gathering. It was decided to hold the convention during the second week of February and to secure the new Armories for exhibition purposes, thus giving larger space than was available at the last exhibition. The date will, however, be contingent upon the building being available. Nelson Mills, president, stated that the manufacturers preferred to have the exhibition held earlier than the usual time, which has been the third week in the month. The suggestion was made that it be held the first week in the month but R. Hawkins, Smiths Falls, Ont., thought that better weather would be had in the second week and it would be less likely to interfere with stocktaking. Immediate application will be made for the use of the building. A question arose as to the heating of the new Armories owing to the fact that they are so spacious and that cold weather is likely to be experienced. On the suggestion of John Caslor, Toronto, treasurer, the secretary will get in touch with some manufacturers of pipeless furnaces to secure their co-operation in putting on a display showing their furnaces in actual use, adjustment to be made in view of the expenses of putting in smoke pipes, supplying coal, etc., and as insurance on the building would be high.

Accept No Courtesies

George May, West Toronto, vice-president, took a very emphatic stand against the acceptance of any courtesies from manufacturers or wholesalers in connection with the convention. He pointed out that the members of the association while they appreciated the spirit shown, yet they would prefer to pay their individual shares toward the cost of a banquet and be under no obligation to anyone. A motion that the association put on its own banquet at a nominal charge to each one attending was moved by George May and seconded by John Caslor.

President Nelson Mills divided the members of the executive committee with the idea of securing definite suggestions along the lines of membership and for the exhibition to be held in conjunction with the convention. Messrs. May and W. J. Bell, Beeton, will look after membership, while Messrs. F. B. Smith, Belleville, and R. Hawkins will devote some effort to suggesting improvements for the exhibition.

Give Exhibitors More Time

In connection with plans for the exhibition Mr. Mills suggested that the exhibition be allowed to run on for a few nights after the end of the hardware convention, so that the manufacturers exhibiting could devote their attention to the public of Hamilton, thus giving the manufacturers better value in connection with their exhibits. A charge of ten cents was suggested to be paid by the public to raise revenue to meet some of the expense of continuing the exhibition. Another suggestion was to the effect that hardware merchants visiting the exhibition must all have a badge, thus restricting those merchants who visited the exhibition but who were not members of the association and whose identity was otherwise unknown.

Secretary Macpherson reported that there were already applications in for space at the next exhibition and thought there would be no difficulty in disposing of the increased space available in the larger quarters. A higher fee is likely to be imposed, covering all extra charges.

Hold Summer Session

The question of holding a summer session for the benefit of members of the association was discussed and decision made to secure a referendum of the members on the advisability of holding a special session on Wednesday, August 31, during the Toronto Exhibition, providing an enjoyable social reunion of hardware merchants in town visiting the fair and also providing an opportunity for the discussion of any timely hardware problems. This will take the form of a question box if the idea is ratified.

Re Fire Insurance

Secretary W. F. Macpherson reported on his recent visit to the New York State Retail Hardware Association convention in Rochester, N.Y., pointing out that the investigation conducted by himself and by George May into the status of the fire insurance organization with which the Ontario Retail Hardware Association has now linked up proved that the organization was quite satisfactory and the proposition of the company was endorsed. Some applications for fire insurance from some merchants who were not members of the association had been received, and these are expected to shortly become members as it is only by membership that they are entitled to the insurance in this company. The secretary now holds a license to solicit and collect insurance. On the motion of F. B. Smith, Belleville, and John Caslor, Toronto, the insurance plan was adopted for use of members.

Revision of Firearms Legislation

President Mills reported on the visit of a committee to Ottawa, composed of Messrs. Hardy, Toronto, secretary of the Canadian Wholesale Hardware Association; Birkett, Ottawa; Macpherson, Prescott, and Mills, Hamilton, to put before the Minister of Justice a plea for the revision of firearms legislation. This plan was outlined in a recent issue of Hardware and Metal. In view of the fact that new legislation has been proposed to help matters along the lines suggested it was decided to keep after the Government, acting in conjunction with the Canadian Wholesale Hardware Association.

Mr. Mills read the communications with the Government in which certain tax recommendations were made. It was the general feeling of those present that the taxes as announced have followed along the lines desired and a communication is being addressed to the Minister of Finance expressing the satisfaction of the association members.

Permanent Secretaryship

The principle of employing a permanent secretary having been approved, it has remained for Mr. Macpherson to make satisfactory arrangements concerning his business in Prescott, Ont. At the meeting this week Mr. Macpherson stated that he would be ready to devote his whole time to association matters after June 1. On the motion of George May, the arrangement with the secretary, as to salary, etc., was ratified and provision made for the allowance of rent and other office expenses. For the present Mr. Macpherson will conduct the association affairs from Prescott where inexpensive quarters are available.

The financial statement showed a very favorable condition of affairs following the disbursements and receipts connected with the recent convention in Hamilton. It was thought that with larger quarters and adopting some suggestions made for exhibitions as the result of the secretary's visit to other associations, that larger financial returns could be secured in future from this source.

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, MAY 14, 1921

NO ONE will worry much over the elimination of the Business Profits Tax and the remaining Luxury Tax. No method of direct taxation is ever popular, but these impositions were particularly offensive and a decided detriment to business expansion.

* * *

JUDGING from the frequency of motorists' complaints in Ontario concerning glaring headlights, the legislation recently enacted in this province is not being enforced to the letter or some of the devices are inadequate.

* * *

SOME definite idea of the extent of price declines is evident from figures showing that from lower values alone a decrease of twenty-eight million dollars was sustained in customs receipts during the past year, according to the Minister of Finance.

* * *

THE INFLUENCE of the retail merchants of Canada is evident in the final tax legislation proposed in the Budget. The suggestions of other bodies to place the tax on retail sales or on turnover have not been acted upon and taken as a whole retailers have little complaint with their liability in the matter. No doubt the influence of the Retail Merchants' Association of Canada has been a factor in guiding the matter in the best interests of the retail merchants and it is evident that the establishing of an office at Ottawa where the secretary of the organization may keep in close touch with the Government has been an effective measure.

The New Taxation

THE expressed approval of retail hardware merchants of the taxation proposals as outlined in the Federal Budget presented this week is largely based on the fact that the principle of taxation heretofore in effect has not generally been departed from. Hardware merchants asked for the tax to be placed on the source of manufacture or importation and emphasized the dangers of applying any tax similar in principle to the luxury tax which entered into the actual sale over the counter. This plan has largely been followed in the proposed measures and the increased sales tax will be handled in the same manner as the 1% tax on invoices from the wholesaler has recently been handled.

The fact that the showing of the sales tax separately on invoices is left optional with the manufacturer or wholesaler under the new regulations is apt to cause some difficulty. If this is absorbed in the invoice price and not shown separately, it is apt to make difficult the keeping of correct records of amounts due the Government for taxation and unless the same policy is followed by all manufacturers and wholesalers the retailer will be faced with complications. The object in not making it necessary to show this tax separately is not apparent in view of the fact that it does not enter into the final sale of the goods from retailer to consumer and could therefore be no drawback from that standpoint.

It will be noted that the regulations relieve tinsmiths and other merchants who were classed as manufacturers, from the liability of that class and that this relief came just at a time when the test case to determine the status of such merchants had been completed and judgment was pending. This looks like a victory for the merchants though the method of announcing it would make it appear as though the matter was never an issue.

Taken as a whole, retail hardware merchants should be very well satisfied with the regulations and the fact that the increased sales tax comes at a time when prices are on the decline should facilitate the adjustment of this tax on retail prices.

Effect Upon Hardware Trade

ALTERATIONS in the basis of value for customs duty of imports, the removal of certain articles from the free list and the provisions for curtailing "dumping" in Canada as outlined in the Budget, will probably have a wider effect upon all branches of the hardware trade than the excise tax adjustments which have been announced. Much of the hardware sold in Canada represents raw materials imported and a portion of the hardware sold in Canada is imported in the finished state. Under the new regulations materials imported from a country whose currency is now below fifty per cent. of its normal value will be valued for duty at fifty per cent. of normal value. This regulation would affect particularly imports from Belgium, France and Germany. Of these countries Belgium is probably the most interesting to the Canadian hardware trade because of the fact that practically all our plate glass and window glass is now coming from that country. The Belgian franc is quoted to-day at slightly less than 50% of normal value so that the basis for duty will be raised on window glass though plate glass will not be affected as quotations are made in sterling.

On the other hand, imports from countries which discount Canadian funds will be raised in value for customs duty by the percentage of exchange existing. This will slightly increase the cost in Canada of United States goods subject to customs duties.

Legitimate trade with other countries is to be encouraged. Due protection being given Canadian industries, new regulations to curtail "dumping" in Canada and having the country of origin marked on all imports are steps toward this end.

Altering Firearms Legislation

A GREAT many amendments to the Criminal Code have recently been proposed, as affecting section 118, dealing with the sale and ownership of firearms and other offensive weapons. In the May 7th issue of Hardware and Metal the latest bill to be read in the House of Commons on the subject was reproduced. Consideration is being given by the Minister of Justice, however, to the further revision of these regulations so that a number of the more objectionable features will be removed. It is now felt fairly certain that regulations as outlined elsewhere in this issue will be finally adopted. If so, the British subject will be relieved of the necessity of securing permits for a rifle or shotgun. This has been one of the contentious points. The carrying of such weapons as are generally used for acts of violence is still controlled by permit and aliens will still be required to secure permits for rifles, shotguns and other weapons.

Events in the Trade

Business Changes

Welland, Ont.—J. S. O'Neil has sold hardware stock to Ingram & McMaster.

Markdale, Ont.—Richardson & Brady, hardware merchants, have dissolved partnership; J. J. Richardson continues.

Shelburne, Ont.—J. A. Yeo, hardware, has been succeeded by E. Fleming.

Fire Loss

Montreal.—Joseph A. Tanguay, hardware, has suffered fire loss.

Obituary

Charles H. Morse, of the Fairbanks-Morse Company, died at his winter home in Orlando, Florida. He had been ill for two months.

Robert Pearse, of the Cowan Hardware Company, London, Ont., has the sympathy of a wide circle of friends in the death of his father, Henry Pearse. Mr. Pearse was one of the oldest and most prominent Oddfellows in the Dominion.

Incorporations

Sandwich Foundry, Ltd., has been incorporated with capital of $200,000; head office, Sandwich, Ont.

Chamberlain Desolvo Company, Ltd., has been incorporated with capital of $40,000; head office, Toronto, Ont.

Kasement Skrene Dore Company, Ltd., has been incorporated with capital of $50,000; head office, Toronto.

Master Valve Company, Ltd., has been incorporated with capital of $100,000; head office, Toronto.

Personal

Walter H. Cottingham, president of the Sherwin-Williams Co., of Canada, Ltd., was a visitor at head office at Montreal last week.

J. A. Hossack, sales manager, Lufkin Rule Company of Canada, Ltd., Toronto, and E. P. Grobb, sales manager, Dominion Chain Company, leave this week on one of their periodical trips throughout Western Canada.

Hugh Kearns, managing director, B. & S. H. Thompson Co., Ltd., Montreal, returned last Saturday from an extended business trip through England, France, Belgium and Germany.

G. G. Complin, sales manager of the Metallic Roofing Company, Toronto, has been seriously ill with pneumonia during the last two months. He is now reported to be on the road to recovery, and slowly regaining his former vigor, but it is expected some time will elapse before he will be able to attend to business as previously.

The marriage of Victor Gagne, of the sales staff of Lewis Bros., Ltd., to Miss Louise Dumouchel, formerly of the sales department of the same firm, is announced to take place on Monday, May 16.

Ald. Percy B. Chown, hardware merchant, Kingston, Ont., who was stricken with an attack of appendicitis, underwent a most successful operation at the Kingston Hospital, and expects to be back at his business in a short time.

"Walt" Peart, of Peart Bros., retail hardware merchants of Regina, Sask., was a visitor in Toronto last week. Mr. Peart was formerly connected with the wholesale phase of the hardware business.

O. H. Willison, of the Lyman Tube and Supply Company, Montreal, has just returned from a six weeks' trip to England, where he spent a month at the plant of the Hoffmann Manufacturing Co., manufacturers of ball and roller bearings. The Lyman Tube and Supply Company will carry a large stock of Hoffmann equipment in their Canadian warehouses.

Edward Shangrow, employed by Lemmon Bros., Kingston, Ont., met with a serious accident when a pail of hot metal was upset, burning him about the face.

D. Brand, of Lucan, Ont., is moving to Mitchell, Ont., where he will look after the interests of the Imperial Oil Co.

James Still, of the Still Mfg. Co., St. Thomas, was elected as an elder of Knox Presbyterian Church at a meeting of the session this week.

Winchester Has Over 3,500 Hardware Dealers

The Winchester Repeating Arms Co., Newhaven, has arranged for the marketing of its product with hardware merchants in over 3,500 cities and towns throughout the U. S., according to the latest statement of the company's affairs. These merchants have become stockholders in the company and financially interested in the success of the business.

In New Quarters

The Montreal offices of the Canuck Supply Co., Ltd., are now in more commodious quarters at 371 Aqueduct Street, formerly being at 416 St. James Street.

New Executive Officers in Pease Foundry Co.

Changes are announced in the personnel of the executive organization of Pease Foundry Co., Toronto. Mr. Allen Case, Toronto, has been elected president of the company, and R. J. Millar, who was general manager, is now vice-president and general manager.

Discussing conditions in the heating industry with W. E. Fice, sales manager of the firm, Hardware and Metal was informed that the expectation is for a big revival of business during the last six months of the year, similar to the condition of 1919. Judging from reports coming to hand and the amount of new building of medium grade houses now being conducted, Mr. Fice stated it as his belief that the last six months of the year will see a demand for heating facilities which may result in some shortage of supplies. He stated that many houses were being finished up without provision made for heating, this being sometimes left to the purchaser, to select his own heating and in other cases it was the result of builders waiting until the last minute in case of further price reductions.

Western Ontario Notes

W. N. Gunning, hardware merchant at Granton, Ont., is erecting a large addition to his garage, which he conducts in connection with his other business.

* * *

Lawrence Davey, of Ingram & Davey, St. Thomas, stated to Hardware and Metal this week that the extensive improvements which the firm plan to make to their premises will be under way in a couple of weeks. The store will be remodelled and another storey added to the tinshop at the rear. The firm's offices will be placed on the second floor and this will provide room on the main floor for new departments.

* * *

Work will commence early in June on the new warehouse to be erected at London, Ont., by Cranes, Limited, to distribute their hardware and plumbing supplies in Western Ontario.

Selling Hardware Business

Montreal.—The Estate J. H. Wilson are receiving sealed tenders for the purchase of the hardware business of J. H. Wilson, Reg'd., 318 Notre Dame Street West, including building, stock book debts, firm name and good will.

News of Western Canada

Western Notes

Winnipeg.—T. L. Waldon, general manager of Marshall Wells Company, Winnipeg, Man., has returned from a trip to the Old Country.

* * *

Kerrobert, Sask.—The British American Oil Co. are planning to make a number of improvements and alterations, which, it is said, will make Kerrobert one of the largest and up-to-date distributing points in the province. A motor tank delivery service will be commenced. A. A. Willard, Saskatchewan manager of the company, recently visited town with Mr. Lorimer, manager of the Kerrobert warehouse and plant, completing arrangements for the enlargement of the company's holdings at this point.

* * *

Red Deer, Alta.—E. G. Johns & Co. have thrown into one store, 60 x 62 feet, the south half of the Smith & Gaetz block, recently purchased by them, by removing the partitions. An additional store has been taken in. The south store, the original furniture store, will be used for the new hardware department, which the firm are opening out with S. P. Clarke in charge.

Building Stimulated in North Vancouver

Vancouver, B.C.—S. T. Nursey, hardware merchant at Lynn Valley, B.C., states that a very marked activity is noted in building around that district. The district of North Vancouver has been the scene of a great deal of acreage and lot speculation. Now the speculators are considerably in arrears with their taxes and the municipality is disposing of the lots for the amount of taxes. Many have been put in tax sale before and clear titles are given. Some lots sell as cheaply as fifty dollars. Naturally a lot of building is being done. Enough is saved in purchasing the lot to offset the relatively high cost of building materials. Building hardware and paints are selling freely.

Brisk Trade in Dairy Cans

Kingston hardware dealers report quite a brisk trade in dairy cans. This is the result of the re-opening of the cheese factories in this district. Dairying is the chief industry of the farmers in Frontenac country, and this always brings a good deal of business just at this time of the year.

Program For Saskatchewan Convention

"Goodwill and Co-operation," Slogan for This Year's Convention of Saskatchewan R. M. A. —Trade Sections Meeting To Be Held

THE eighth annual convention of the Saskatchewan board, the Retail Merchants' Association, which is to be held in Saskatoon on the three days of June 7, 8 and 9, promises to be notable on account of the special effort which will be made to bring the various branches of the producing and distributing sections of industry closer together. The keynote of the convention may be expressed in the slogan, "Good-will and Co-operation between the Manufacturing and Distributing Branches of Trade."

A Sightseeing Drive

After the preliminary session in the morning of Tuesday, June 7, at which the opening function and the officers' reports will be disposed of, the first item on the programme is a sightseeing automobile drive, including visits to the numerous points of interest around the beautiful city of Saskatoon. All the visiting delegates will be guests of the United Commercial Travellers' Association.

The object of this drive, together with the joint banquet which is scheduled for the evening, is to bring about a better understanding between the merchant and the commercial representatives of the distributing houses, and overcome that little feeling which has not been absent in the past on the part of the retailer that the traveller's visit was somewhat of an encroachment on his time, and, on the commercial man's part that the retailer failed to appreciate the value of his time, causing a good deal of unnecessary expense and delay in his schedule.

Trade Section Meetings

The second day of the convention is to be given over altogether to trade section meetings, to which the representatives of the supply houses operating in Saskatchewan are cordially invited, with a view to taking part in the discussions and giving the retailers the benefit of their point of view. The subjects up for discussion will be opened by well-known and representative men who are specialists in their line, and they are all subjects to which the wholesalers' and manufacturers' representatives can make a valuable contribution. A new feature in the conduct of Saskatchewan R.M.A. conventions is the demonstration and display of goods in which those manufacturers and jobbing houses which are co-operating with the association in the way of taking advertising space in the programme have been invited to take part. The convention hall is large and roomy, and the display booths will be ranged around a portion of the hall open for inspection during the whole period while the actual convention is not in session.

Some Timely Topics

Matters which are exercising the minds of all Saskatchewan merchants at the present time, such as the Income Tax, the respective merits of a cash and credit business, and mutual fire insurance, are all on the programme.

The Income Tax will be explained by Bert R. Masecar, B.Acc., who is the official auditor to the Saskatchewan Board, and is thoroughly acquainted with its requirements. The debate on cash and credit will be led by two representative country merchants, who are keen protagonists of the side each proposes to champion. Mutual fire insurance will be advocated by F. J. Martin, president of the Northwestern Mutual Fire Association of Seattle, the organization which is working with the nine provincial boards of the association with a view to giving the retail merchants of Canada cheaper fire protection.

Rural Service Departments

Most of the large business institutions operating in Western Canada have found that, in order to improve their relations with the farming community, it has been necessary to organize practical rural service departments to assist in improving farming conditions. Of all commercial endeavor, that of retail merchandising carries with it the most intimate relations with agriculture. It is, therefore, important that the retailer

should offer his contributions to this basic industry. With this in mind, W. J. Rutherford, dean of the College of Agriculture, University of Saskatchewan, has been asked to bring the question of agricultural service before the convention on Thursday morning, when he will speak on "A New Line of Endeavor for the Retail Merchant."

Other noted speakers will be Professor W. W. Swanson, who will deal with the economics of retailing and other kindred subjects, and Hon. C. A. Dunning, Provincial Treasurer, whose subject will be "The Natural Resources of Saskatchewan."

The Department of Trade and Commerce has also been drawn upon for some interesting films showing the national industries of Canada. These will be shown on the second and third evenings of the convention, completing a series of meetings which promise to be most profitable to the visiting delegates.

OPINIONS RE TAXES

Continued from page 37

eryone no doubt would approve of the policy of pay as you go, still I firmly believe that both these items should have been taken care of by borrowing, assuming of course that the deficit in the railways is only temporary, but if continuous, the Government should dispose of the roads.

"I am still of the same opinion that the one tax, the simplicity or turnover tax would bring the required revenue and remove irritation, as well as being a great saving both to the Government in operating, as well as to the taxpayer by the time and expense saved in preparing his returns; and I believe that the consumer, who eventually bears this taxation, will also benefit by this more simple method.

"Economy should be continually before the Government, and everything possible done to obtain the necessary revenue with the least possible friction and thus encourage the development of trade and commerce to flow through natural channels unhampered by any measure that would tend to restrict ordinary growth or expansion.

"I would very much like to see the ordinary Government revenue and expenses separate from the war revenue and expenses. The people of this country have a huge war obligation to liquidate, and it seems to me that the Government in order to keep the confidence of the taxpayer should show clearly that the heavy tax now required is going towards war expenditure and a reduction in the war debt, and that this heavy tax is not being used for any other expenditure whatsoever."

Will Have Little Effect on Linseed Oil

Canadian Linseed Oil Prices Governed Largely by Argentine Linseed Market—"Result Has Already Been Discounted," Says W. S. Fallis

DISCUSSING the probable result of the increase of U. S. duties on Canadian flaxseed entering that country and the consequent effect upon linseed oil, W. S. Fallis, vice-president and managing director of the Sherwin-Williams Co. of Canada, Limited, stated to Hardware and Metal that the effect upon Canadian prices has already been discounted and that the imposition of a further 10 cents per bushel on Canadian flax entering the United States will give the U. S. farmer that extra protection in production.

"Canada produces each year a surplus of flax," stated Mr. Fallis, "and it is, therefore, always on an export basis, competing with the Argentine for American trade. The United States always consumes more than it produces, and it is, therefore, on an importing basis. Its sources of supply are Canada and Argentine.

"When exchange was normal, Duluth prices ruled twenty to twenty-two cents above Winnipeg, but since exchange has fluctuated between 12 and 15 per cent, it has shortened this differential from one to two cents. The enactment of the Emergency Tariff legislation will widen the spread to eleven to twelve cents.

"'We do not anticipate that the increased duty into the U. S. will hurt materially the exportation of Canadian flax. American crushers will always be prepared to buy Canadian flax in preference to Argentine, largely on account of the better transportation facilities, and when quoted in Winnipeg eleven to twelve cents a bushel cheaper than Duluth which figures, plus premium on American funds, a laid down cost in Duluth on a parity with the American product."

Argentine Market is Big Influence.

That the proposed increase in duty will have no direct effect on linseed oil prices in Canada is the statement made to Hardware and Metal by J. M. Ransom, assistant manager the Canada Linseed Oil Mills, Limited, Toronto, who points out that this is because of the fact that the present price of linseed oil in Canada and also in the U. S. is influenced and based on the Argentine linseed market; the linseed from that country being at the present time the ruling factor in influencing and regulating the value of linseed oil not only in Canada and the United States, but the world's markets.

Unusually Brisk Trade in Floor Finishes

Less Outside Attraction Results in Home Owners Being More Around Their Own Property to See Need for Paint

"ONE of the features in the spring activity in the paint situation this season is the unusual demand for floor finishes," stated H. E. Mihell, of the Imperial Varnish & Color Co., Limited, Toronto, to Hardware & Metal. Such products referred to are showing exceptional development at present, and several causes are contributory to this effect.

During the past few seasons very little rejuvenating was done around the average home; but through the tightening of the industrial situation pleasurable participations are being catered to on a much smaller percentage than formerly, with the result that staying around the house has recently come into vogue again. This being so, any defects in appearance, either as regards surface or construction, in both city and country homes, not only become apparent, but are soon glaringly annoying to the average man or woman. The decision to paint up is the natural outcome of such conditions, and a country-wide epidemic of spare time rejuvenation is said to be in evdence.

Moreover, according to paint authorities, the average housekeeper is becoming tired of floors covered with dust-absorbing carpets and has been conforming more toward the hardwood floor, with its sanitary varnished and polished surface. Even painting ordinary flooring is considered preferable in some quarters to the heavier work which large carpets entail; and homes where experiments of this nature are being indulged in have been more frequently encountered this spring than ever before.

Hardware Exhibits at English Fair

The Second Annual London Fair and Market will be held in the Royal Agricultural Hall, Islington, London, from 4th to 15th July, inclusive. This fair is organized by the International Trade Exhibitions, Limited, and includes the exhibits of hardware, comprising art metal goods, labor saving appliances, domestic hardware, etc. Admission is confined to bona fide buyers. Further information can be obtained on application to the British Government Trade Commissioner, 260 Confederation Life Building, Toronto.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

REVOLVING NAIL BINS

The DeWolfe Hardware Co., td., St. Stephen, N.B.—Please give us the name and address of concerns making revolving nail bins, metal sectional.

Answer—The Wellston Mfg. Co., Wellston, Ohio.

WALL PLASTER

W. A. Dorrington, Alton, Ont.—Can you give us the names of makers of fibre wall plaster?

Answer.—The Alabastine Co., Ltd., Paris, Ont.; The Albert Mfg. Co., Hillsborough, N.B.; The Ontario Plaster Co., Ltd., Paris, Ont.; Windsor Plaster Co., Windsor, N.S.; Iona Gypsum Co., Ltd., Iona, N.S.; Keystone Wall Plaster Co., St. Therese, Que.; Wright & Co., Inc., Hull, Que.

FIBRE BOARD

Tedford & Co., Alvinston, Ont.—Can you inform us where we could purchase fibre board?

Answer.—The E. B. Eddy Co., Ltd., Hull, Que.; The Beaver Board Co., Ltd., Thorold, Ont.; Diamond State Fibre Co., of Canada, Ltd., Toronto, Ont.; The Freed Paper Box Co., Ltd., Montreal, Que.

BAY STATE BRICK PAINT

Coleman Bros., Decorators, Peterborough, Ont.—Kindly give us information as to the makers of Bay State red brick and cement paint?

Answer.—Geo. E. Watson Co., Chicago, Ill., and Wadsworth Howland & Co., Boston, Mass., are both manufacturers of this product.

ROUND REFRIGERATORS

Collingwood Hardware Co., Collingwood, Ont.—Kindly advise us where we can procure round white enamelled metal refrigerators?

Answer.—The "White Frost" refrigerator is a round, white enamelled metal product such as you mention, and these are manufactured by the Home Products Corporation, of Jackson, Michigan. They have no Canadian agents or distributors at present.

"DOMESTIC" STOVE PARTS

Gerry's Hardware, Fort William, Ont.—We will be obliged if you could advise the whereabouts of the Canada Stove & Furniture Co., manufacturing a stove called the "Domestic?"

Answer.—Repairs for "Domestic" stove can be obtained from the Gurney Foundry Company, Ltd., St. Laurent, Montreal, Quebec; this firm having taken over the Canada Stove & Furniture Co.

ONE MINUTE WASHING MACHINE

Bonthron & Drysdale, Hensall, Ont.—Kindly advise us where we can get repairs for the One Minute washing machine?

Answer.—The One Minute Mfg. Co., Newton, Iowa, can supply repairs. There is no Canadian agent at present.

STERLING FOOD CHOPPERS

F. W. Inman, Dundas, Ont.—Kindly advise us where we can purchase Sterling food choppers?

Answer.—The Sterling food chopper is made by the N. R. Streeter Co., Rochester, N.Y.

BUTCHER'S BLOCKS

Sommerville Hardware Co., Ltd., Edmonton, Alta.—Kindly give us the names of makers of butcher's blocks?

Answer.—The John Harrison & Sons Co., Ltd., Owen Sound, Ont.

TROJAN & AJAX WASHING MACHINES

John E. Meyer, Ayton, Ont.—Kindly advise us of the makers of the Trojan and Ajax electric washing machines?

Answer.—MacDonald & Willson, Yonge St., Toronto, Ont., are manufacturers of the Trojan washing machine, and can also supply you with the Ajax.

SCREEN DOOR CATCHES

W. Walker & Sons, Ltd., Toronto, Ont.—Could you give us the address of the maker of the Mallory screen door catch?

Answer.—J. W. Mallory, Blenheim, Ont.

BEAVER STOCKS AND DIES

James Cowan & Company, London, Ont.—Kindly advise us who are the manufacturers of Beaver stocks and dies?

Answer.—The Borden Co., Warren, Ohio, U.S.A.

DUMORE GRINDERS

W. Walker & Son, Ltd., Toronto, Ont.—Kindly advise us who manufactures the Dumore grinder.

Answer.—There is a "Dumore" grinder manufactured by the Wisconsin Electric Co., Racine, Wisconsin, and it is handled by the Canadian Fairbanks Morse, Co., Ltd., Toronto, Ont.

COLONIAL PRINCE RANGE

The Wyandotte Hardware Co., Windsor, Ont.—Can you inform us who is now manufacturing the Colonial Prince Range formerly made by the Percival Plow Co.

Answer.—Our information is that these were taken over by the Tudhope Anderson Co., of Orillia, Ont.

METAL FURNITURE

The Amherst Furniture Co., Montreal, Que.—Would you kindly give us the address of manufacturers in Canada of Metal furniture such as cabinets, chairs, etc?

Answer.—Dennis Wire & Iron Goods Co., London, Can.; The Metal Craft Co., Ltd., Grimsby, Ont.; Office Specialty Mfg. Co., Ltd., Toronto, Ont.; The Steel Equipment Co., Ltd., Ottawa, Ont.; Dominion Steel Goods Co., Grimsby, Ont.

VICTOR BOLT CUTTERS

W. Walker & Son, Ltd., 1228 Yonge St., Toronto, Ont.—Kindly advise us who manufactures Victor bolt clippers?

Answer.—The Roberts Mfg. Co., Somerville, Mass.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2922. **Hardware.**—Manufacturers' agent in Ireland desires to get into touch with Canadian manufacturers of the following: carpet whisks, hay rakes and forks, manure forks, scythe snaths, wood and zinc washboards, spring clothes pegs, hurricane lanterns, hatchets and felling axes, wood handles for shovels, spades, hoes, brooms, picks, slashers, axes, hammers, etc. Highest references given.

2923. **Hardware.**—A responsible firm of manufacturers' agents in Scotland desire to purchase the following in large quantities: hay forks, manure forks, hoes, axes and claw hammers, clothes pins, washboards, tool handles, etc. It is essential that these should be manufactured in Canada by a firm owned and managed by Canadians, and if these conditions can be fulfilled there are opportunities of a large volume of business.

2925. **Electrical material.**—A Milanese house wish to buy electrical material in Canada.

2926. **Heavy chemicals, chemical fertilizers, colours, varnishes, etc.**—A firm of commission agents established in Naples wish to represent Canadian houses dealing in the foregoing articles.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

AUTO WHEEL COASTER WAGONS ..

A new catalog has been issued by the Canadian Buffalo Sled Co., Ltd., Preston, Ont., illustrating and describing a few of the lines made by them, including the auto wheel coaster wagon, Buffalo coasters, flexible steering sleds, sleighs and baby cutters.

Three improvements are noted in the new auto coaster wagons, first the bearings are now held in the wheel in a patented cage keeping them separate from each other and preventing them from falling out and getting lost if the wheel is taken off; secondly, a new auto type hub-cap has been added in which the cotter pins are concealed. This cap, it is stated, cannot fall or be taken off without the aid of the special wrench supplied with the wagon. The third improvement consists in placing the hound support brace in the centre making steering more safe and adding to the strength of the front end of wagon.

A. B. JARDINE & CO., LTD.

A new catalog and discount sheet has been issued by A. B. Jardine & Co., Ltd., Hespeler, Ont., manufacturers of blacksmiths' and machinists' and boiler makers' tools and machinery. New lines have been added since the previous catalog was issued and included in these are automobile sets of taps and dies, grinders, and disc sharpeners. Particular attention is called to the alteration or change in threads and all sets of taps and dies as well as separate dies and separate taps are now supplied in U.S. standard thread unless otherwise ordered. A copy of catalog and list will be sent on request.

O. K. CANADIAN POTATO PLANTER

The Canadian Potato Machinery Co., Ltd., Galt, Ont., have issued a 12-page booklet, entitled: "More Profit from Potato Farming." This booklet illustrates and describes the O.K. Canadian Potato Planter. Potato planting by machine is said to be the only method where there is a large area to be covered, as the work is done quicker and more easily than by the more laborious and slow hand method. The potato planter makes the row, opens the furrows, plants or drops the sets, covers them and applies commercial fertilizers at the same time if desired. The O.K. Planter is made in two sizes and two different styles.

NEW PLANT OF THE WEIRTON STEEL COMPANY

A. C. Leslie & Co., Ltd., Montreal, are in possession of a booklet containing the reprint of an article appearing in recent issues of the Iron Age on the new steel plant of Weirton Steel Co., Weirton, W. Va.

The article is illustrated by photographs and drawings showing the extensive plant with its blast furnace, open hearth furnaces, and mills for producing sheet bars, billets and slabs, also its labor-saving equipment which is prominent throughout. A. C. Leslie & Co., Ltd., are Canadian sales agents for products of this extensive plant, which include: basic pig iron; O. H. steel blooms; slabs, billets and sheet bars; coke tin plates, best cokes, silver finish, egg shell finish, canners, special, gold lacquered, extra cleaned for lithographing, charcoals, ternes, (copper bearing steel base) carrying coated of 8 lb. to 40 lb. inclusive, tea-tray stock, Weirton blue (uniform color), full finish black plate, enamelling stock, metal shingle stock, show card stock, ceiling stock, milk can stock, galvanizing stock, nickel plating stock, H. R. & A. stock, O.P.C.R. & A. stock, special deep drawing stock.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

REDUCTIONS continue to be in evidence on general hardware, but are mainly confined to small changes in discounts. Prices are gradually settling toward a firmer tone with signs of normal activity approaching. Chief among the declines noted are corrugated sheets, conductor pipe and eavestrough. Lower changes have taken place in quotations on lapweld boiler tubes; standard compression work, machine, black, and cylinder oils, clay picks, crowbars and mattocks, also capped goods and tacks, as well as some lines of hinges.

Developments in the turpentine and linseed oil markets are prominent this week. The third advance within as many weeks has been quoted on turpentine. Linseed oil is in good demand and the market unusually brisk.

No change in sheets or plates is reported, and lead products remain firm. Bar iron and steel are generally unsettled, with no actual price alterations recorded. Ingot metals are still quiet, with lead showing slight improvement.

The movement in seasonable goods continues to be satisfactory, and with the country trade brightening a fair season in hardware is anticipated. Paints and allied products are moving exceptionally well and dealers are gradually returning to a more optimistic viewpoint.

Pending firearms legislation freeing British subjects from securing permits for the possession of firearms and shot guns, is calculated to stimulate sales in firearms generally. From the retail hardware merchants' standpoint the budget tax regulations have brought forth little complaint, less than would have been the case had a turnover tax or tax on retail sales been instituted.

Montreal Markets

MONTREAL, May 12.—The outstanding features of the market this week are the new lists on eavestrough and corrugated sheets; in both lines a reduction being recorded. Of importance also are the new discounts on capped goods and tacks, the discount now being 70 and 15 per cent. off list, which is a slight reduction from former prices. The 30-gallon range boiler is quoted at $12, and standard compression goods are now 37 per cent. off. Crowbars are down 1½ cents a pound, also floor bars. Clay and rock picks are $2 a dozen cheaper. Sheets, bar iron and steel, wrought piping and fittings remain unchanged. Lead products are very firm with advances likely to be made in the near future. Lead also features the ingot markets this week, showing very strong. while other metals are holding well.

Cotton Rope Revised

Montreal.

A revision is made in quotations on cotton rope with the following prices now quoted: 3-16 in., 39 cents, ¼ and up, 37 cents.

Capped Goods Now 70/15 Off

Montreal.

A new list is now issued on capped goods, which includes saddle nails, lining tacks, capped trunk tacks, tufting buttons, etc., and the discount is now 70 and 15 per cent. off.

Tacks 70/15 Per Cent. Off

Montreal.

A change in discounts brings tacks to a lower cost. The revised hardware tack list is now quoted less 70 and 15 per cent.

Iron and Steel Bars Slow

Montreal.

Iron and steel bars are held unchanged, and buying continues light. It is stated that some lines of steel products can be laid down 50 cents a ton cheaper from Belgium than from the United States mills, considering the present rate of exchange. Local stocks are ample, with little change looked for at present. Following are quotations:

IRON AND STEEL BARS

Common bar iron, 100 lbs.	3 70
Refined iron	5 20
Iron finished machinery steel	3 75
Mild steel	3 70
Band steel	3 70
Single reeled machinery steel	5 75
Spring steel	5 00
Sleighshoe steel	3 70
Tire steel	3 90
Toe calk steel	4 60
Harrow tooth steel	3 85
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE.—Refined iron is aproximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Standard Compression Goods

Montreal.

Standard compression work, also standard flat and round way stop and wastes, are now quoted at 37 per cent. off list; the former discount being 34 per cent. Other lines of brass bibbs, valves and cocks are holding unchanged although an unsettled feeling still exists and lower prices are not improbable on many other lines. Following are quotations:

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	25%
Basin cocks, Fuller No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, standard	37%
Roundway stop an dwaste cocks, standard	37%
Brass steam cocks, standard	10%
Radiator valves, standard	23%
Do., removable disc	38%
Globe, angle and check valves, standard	5%
Gate or straightway	Net
Jenkins globe	10%
Jenkins gate valves	10%

New List on Corrugated Sheets

Montreal.

Corrugated sheets are now selling under a new list, showing reductions on all gauges. The best selling weight, 28 gauge, was formerly $9.50, and is now listed at $8.50 with the same discount. Heavier gauges show a bigger reduction. Following is the new price list:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Range Boiler Sales Limited

Montreal.

There continues a slight improvement in sales of range boilers, but they are only moving in small orders. The quotation on the 30 gallon standard boiler has been lowered to $12 this week because of a very unsettled market on this size. Other sizes, both in standard and

extra heavy are unchanged. The electric welded boilers are selling well, the price of these being slightly lower than the riveted. Quotations are as follow:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	12 00	15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

No Change in Boiler Tubes

Montreal.

Quotations on boiler tubes are unchanged, with a slow sorting movement reported. Following are the quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	$26 00	$25 00
1¼ inch	27 25	26 00
1½ inch	26 25	27 00
1¾ inch	29 75	27 00
2 inch	29 25	22 90
2¼ inch	33 00	26 00
2½ inch	44 75	28 00
3 inch	49 25	35 00
3½ inch	63 50	40 75
4 inch	85 00	51 75

Waste Materials Listless

Montreal.

Little actual business is being done in scrap metals. although recent inquiries coming to hand have offered some encouragement. All metals are more or less listless, with no actual changes with the exception of lead. This metal is slightly higher, no doubt following the the exception of lead, which is at present very strong on the primary markets. Quotations are as follow:

DEALERS' BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 04
Light copper	0 07¾
Lead, tea	0 02
Heavy copper	0 10½
Wrought iron, R. Rd., No. 1, per gr. ton.	12 00
Malleable scrap (ton)	11 50
Pipe scrap (ton)	8 00
Stove plate, per ton	16 00
Heavy melting steel	8 50
No. 2 busheling	4 00
Boiler plate	10 00
No. 1 machinery cast, per gr. ton	24 00

Crowbars Are Reduced

Montreal.

A reduction of 1½ cents per pound is made in the prices of crowbars, and these are now quoted at $9 per 100 pounds.

Lead Products Are Firm

Montreal.

No price changes are made on the different lead products this week, but the market is very firm and higher prices on most lines would not be surprising in the near future. Pig lead in the primary markets continues to show strength, with a substantial advance made this week. Present prices are as follow:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 35
Zinc sheets, casks	0 13
Do., broken lots	0 13½

Clay Picks Are Reduced

Montreal.

A reduction of $2 per dozen has been made in the price of clay picks, with the following prices now being quoted: 5 to 6 lbs., $9.50 doz.; 6 to 7 lbs., $10.50 doz.; 7 to 8 lbs., $11.50 doz.

Rock Picks Down $2.00 Dozen

Montreal.

Rock picks have been lowered $2 per dozen and following are the present prices: 6 to 7 pounds, $10.50; 7 to 8 pounds, $11.50; 8 to 9 pounds, $12.50 dozen.

Eavestrough Under New Discount

Montreal.

Eavestrough, conductor pipe and conductor pipe elbows, as well as other sundry lines are now selling under new lower discounts. The reduction is approximately 5 per cent. Troughing and conductor pipe is now quoted at 60 per cent. off list, elbows 55 per cent. off list prices. The former discounts were 50-10 and 50 per cent. respectively. Wholesalers now state these lines are moving well, with stocks in good shape to meet the increased demand.

Pipe Fittings Hold

Montreal.

No change has been made in quotations on the different lines of pipe fittings since the decline of a few weeks ago. Sales are rather irregular, one week showing a fairly heavy demand, while the week following sales are reported small. Stocks are in good shape in all sizes. Quotations are the following:

PIPE FITTINGS.

Cast iron fittings	20%
Bushings, cast	30%
Do., malleable	30%
Flanges	27%
Plugs	22½%
Flange Unions	20%

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 10%.

Wrought Pipe is Held

Montreal.

Wrought iron and steel pipe is holding unchanged since the new list of two weeks ago, namely list No. 51. Buying is fair, although confined to small orders. The pipe list will be found on current market pages.

Floor Bars Down 1½ Cents

Montreal.

The price of floor bars has been reduced 1½ cents a pound, the new price being $12.50 per 100 pounds.

Sheets Still Slow

Montreal.

Buying in sheets continues light: merchants still purchasing as the actual demand requires. Most wholesalers are of the opinion that little change will take place in quotations in the near future. However, practically all steel products today are very uncertain, and subject to fluctuations either one way or the other. Following are quotations showing the range that exists among the local wholesalers:

PLATES—		
10 gauge	5 25	6 25
12 gauge	5 30	6 30
14 gauge	5 45	6 45
16 gauge	5 55	6 55
BLACK SHEETS—		
14 gauge	5 45	6 45
16 gauge	5 55	6 55
18-20 gauge	6 15	7 15
22-24 gauge	6 25	7 25
26 gauge	6 35	7 35
28 gauge	6 50	7 50

.. Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANIZED SHEETS—		
U.S. Standard—		
10¾ oz.	8 75	9 75
28 gauge	8 25	9 25
26 gauge	8 00	9 00
22 to 24 gauge	7 85	8 85
20 gauge	7 65	8 65
18 gauge	7 65	8 65
16 gauge	7 50	8 50
14 gauge	7 50	8 50
12 gauge	7 50	8 50

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	10 00	9 25
26 gauge	9 75	9 00
24 gauge	9 15	8 60
22 gauge	8 80	8 15
18 and 20 gauge	8 10	8 00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Lead Features Ingot Markets

Montreal.

The chief feature of the ingot metal markets this week is the further advance in lead, which continues strong with indications of going higher. There is not much change in the other metals. the list generally remaining firm.

TIN.—The market on tin in London is somewhat irregular, but holds very well considering the continued strike. It is felt that when this is settled there should be an upward movement. The market here is firm with no change in quotations at 40 cents.

COPPER.—Copper is slightly firmer both in London and New York, standard having touched the same level as electro in London. While the market is steady no immediate advance is looked for. Electro is quoted at 18 cents, casting at 17½ cents.

SPELTER.—This metal seems to be marking time for the present, with prices practically unchanged both in London and East St. Louis. Until the situation with regard to German spelter is a little clearer, there will not likely be much change. Local price unchanged at 8½ cents.

LEAD.—Lead has been very firm both in London and the U.S.A.; the trust price was again advanced to 5 cents, East St. Louis, this being one cent per pound above the low point. London has also touched the highest point since early in the year and the situation appears very strong at present. There is no scarcity of lead in this country, and the market has advanced in line with foreign prices, now quoted at 7¼ cents.

ANTIMONY.—Antimony is slightly more active with little change in prices. Chinese is quoted at 7¾ cents, high grade English 8½ cents.

ALUMINUM. — This metal remains dull on the market, with no change in price, quotations being 34 cents.

Toronto Markets

TORONTO, May 12.—Reductions are still the outstanding feature of the markets, but the changes are generally not large and are chiefly confined to minor commodities. Prominent among the declines is the reduction in corrugated sheet prices and in lap-weld boiler tubes.

Compression work, valves and cocks, also conductor pipe and eavestrough, show lower quotations this week. Other items revised on a lower scale are clay picks, crowbars, mattocks and tacks. A slight revision in waste prices is general and there has been a decline in oil, affecting machine, black and cylinder.

No change appears in plates or in bar iron and steel but market conditions covering these commodities exhibit an unsettled tendency. Pipe fittings remain steady, with ingot metals quiet, local business being small.

Conditions generally remain fair with spasmodic and satisfactory movement of seasonable lines. Demand continues to be good, and while no great volume of business is expected, yet reports indicate that a steady average improvement is in evidence. The outcome of the new tariff legislature is awaited with interest and has probably had some effect in holding up quotations and a small degree of market activity.

Rope Still Unchanged

Toronto.

No changes in prices are reported in rope and cordage, but the market continues firm. Sisal and manilla hemp have gradually advanced during the last month, and prices are holding well. Hemp has been showing increasing firmness, but although there is a good movement, it is not quite up to expectations. The current market pages contain local quotations.

Wash Boards Unsettled

Toronto.

Owing to the recent strengthening apparent in the Belgian glass situation, a corresponding increase in price of glass wash boards is looked for by some dealers in the near future. Present quotations, which are as yet unchanged, will be found in the current market lists.

Roofing Paper Revised

Toronto.

A revision is made this week in the price of one line of roofing paper, the new quotation for heavy dry straw sheathing being $4.55 per hundred pounds. The previous price was $5.10. Other roofing prices appear in the current lists.

Range Boilers Improve

Toronto.

Some slight improvement in the sale of range boilers has been noted, but dealers are only handling small orders. No changes in prices have been made this week, but some revision in quotations is expected very shortly. Following are present prices:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	12 50	15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Oil Prices Change

Toronto.

Following the recent declines in the prices of gasoline and coal oil, reductions in other oils are announced this week. These changes affect black, cylinder and machine oil, and also paraffine. The new prices will be found in the current market lists.

Clay Picks Reduced

Toronto.

A reduction has been announced in the price of clay picks, the new quotations being as follows: 5-6 pounds, per dozen, $9.75; 6-7 pounds, per dozen, $10.75; 7-8 pounds, per dozen, $11.75.

Crow Bars Decline

Toronto.

Crowbars are among the numerous small hardware items showing a decrease in price this week. Chisel point and wedge point are now quoted at $9.50 net.

Pick Mattocks Revised

Toronto.

Long cutter mattocks and pick mattocks are quoted on local markets at revised prices. The six-pound mattock is now $12.25 per dozen.

Change in Tack Prices

Toronto.

A change in discounts is announced on all kinds of tacks and capped goods, the new quotations being 70 and 15 per cent. off list. The previous discount was 67½ and 15 per cent.

Bar Steel Unsettled

Toronto.

Even the recent wage reduction announced by the United States Steel Corporation has not stimulated any marked activity among local buying centres in bar iron and steel; and it is considered problematical whether this result will immediately be apparent, as some little time must elapse before price adjustments can be made effective. In some few cases dealers have been inclined to quote lower prices on a few grades, and a range is shown. Reductions are stated to be in effect in some quarters, but anticipated price changes of this nature are not generally in order. The labor and political situation in Britain has had the effect of further unsettling the metal markets, and some purchasers are inclined to hold off in the expectation of a corresponding drop in the scale of quotations. Following are the average prices at present:

Common bar steel, 3-16 in.	4 50
Do., ¼ in. and heavier	4 00
Common bar iron, 3-16 in.	4 50
Do., ¼ in. and heavier	3 75
Angle base	4 10
Horseshoe iron	4 10
Tire Steel	5 95
Band steel	4 50
Spring steel	12 75
Crucible cast sheet steel	35 00
Mining drill steel	23 00
Common cast tool steel	20 00
Sleigh shoe steel	4 50
Norway iron	15 00
Toe caulk iron	6 00
Hoop steel	6 00

Reductions in Corrugated

Toronto.

Reductions of a fairly substantial nature are evident in the prices of corrugated sheets. Business is still reported as showing a gradual tendency toward seasonable improvement, and the brighter vein is expected to continue. The new quotations are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Lapweld Tubes Reduced

Toronto.

Some slight reductions on lapweld boiler tubes are announced this week; the changes being variable on sizes from 1¾-inch to 4-inch. Prices on seamless tubes remain unchanged. Following are the revised quotations:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	$26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	$25 00
2 inch	29 25	22 00
2¼ inch	33 00	25 00
2½ inch	41 75	27 00
3 inch	49 25	35 00
3½ inch	63 50	40 00
4 inch	85 00	50 25

Reduction in Brass Goods

Toronto.

As outlined in last week's market report, the expected readjustments and reductions in some lines of compression work have been made. These changes consist of increases in the discounts on current list, and affect standard compression work, compression bath cocks and some lines of valves and basin cocks.

Signs that business is inclined to open up a little have not been wanting, and it is expected that these reductions will help in stimulating activity among brass goods. The new quotations are given as follows:

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	29%
Do., Fuller	25%
Flatway stop and waste cocks, standard	40%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%

J.M.T.	20%
J.M.T. C.	25%
J.M.T. Gate Valves	15%
Gate or straightway	16/10%
Jenkins Globe	10/10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening No. 3633	37%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Reductions in Pipe And Eavestrough

Toronto.

New quotations showing a reduction in the prices of conductor pipe and eavestrough are announced this week. Elbows and shoes are now 55 per cent. off list, while conductor pipe and eavestrough, bridge roll and valley, are now 60 per cent. off list. The previous quotation was only 50 per cent.

Reports indicate that there is a fair demand for these products, but this is generally considered as seasonable and chiefly due to spring building activity. Prices are as follows:

TROUGH (Eave)

O. G., Square Bead and half round. Size in girth:

Per 100 ft.		Per 100 ft.
8-in.	15-in.	$28 80
$15 90	18-in.	36 50
10-in. 17 70		
12-in. 21 20		

Less 60 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10-ft. lengths, list	$18 40
3 in., in 10-ft. lengths, list	22 30
4 in., in 10-ft. lengths, list	29 60
5 in., in 10-ft. lengths, list	40 00
6 in., in 10-ft. lengths, list	49 00

Less 60 per cent.

CONDUCTOR ELBOWS—	
2 inch, list	$5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 55 per cent.

Firmer Tone in Lead

Toronto.

The lead market has evidently developed a firmer tone during the past week and local lead quotations advanced a little.

Zinc is also on the upward trend, and the market promises to continue steady, while business is reported as showing a fairly strong activity.

Prices of the primary lead and zinc products, however, continue unchanged, as follows:

LEAD AND ZINC GOODS

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 34
Do., strictly, lb.	0 24
Do., commercial, lb.	0 22
Do., guaranteed, lb.	0 27
Do., wiping, lb.	0 22
Zinc sheets, per lb.	0 16

Wrought Pipe Quiet

Toronto.

Quietness continues to be apparent in the pipe market, and prices for both wrought and steel tubing remain at the reductions recently announced in list No. 51.

Jobbers are reported to be doing a larger business, but pipe mill operations are rather irregular, and the outlook for future activity appears to be in doubt. The pipe list will be found among the current market quotations.

No Change in Plates

Toronto.

Buying in plates and sheets is still reported to be light, with sales fairly numerous but small. Quotations continue to show a range, with prospective signs of brightening in the future. The opinion has been expressed that the development of buying power is necessary before an improvement in present market conditions, or decided increase in volume of transactions, will be produced.

While construction work is needed, yet this alone is not the primary factor in stimulating business activity. The regular course is for the ordinary business of life to gradually expand until the degree of advancement is so apparent that construction work is then encouraged.

The probability is that we have already rounded the turn in the matter of business depression, but many men will not admit this fact until they see signs of great activity, particularly in building. They do not realize the necessity for the buying power to grow as a prerequisite to the establishment of full activity. It does not come suddenly, but very gradually, and long after the turn has been rounded.

A gradual development along such lines is expected to produce improvement in many primary lines, and among the principal, of course, are sheets and plates. The following are current local quotations:

PLATES

10 gauge	from $5 00 to $6 00
12 gauge	5 05 6 05
14 gauge	5 10 6 10
16 gauge	5 20 6 20

BLACK SHEETS

14 gauge	5 10 to 6 10
16 gauge	5 20 6 20
18-20 gauge	5 75 6 75
22-24 gauge	5 80 6 80
26 gauge	5 85 6 85
28 gauge	6 00 7 00

Prices shown are for full cases. An extra charge of from 25c per 00 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	8 60 to 9 60
U. S. 28	8 20 9 20
U. S. 26	7 90 8 90

18 and 20	7 60 8 60
16	7 45 8 45
12 and 14	7 40 8 40

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Pipe Fittings Steady

Toronto.

Quotations on pipe fittings again remain unchanged, and the same remark can be applied to general conditions. No marked increase has been recorded, but an expectant attitude has been adopted by the more optimistic dealers. Current prices follow:

PIPE FITTINGS

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%

	Black.	Galvanized
Class A	0 60	0 75
Class B	0 23	0 32½
Class C	0 15	0 23

Revisions in Waste

Toronto.

In the waste market some brighter signs have been evident but very little improvement is generally shown. Nominal changes in some prices have been made, but conditions generally remain the same, with nothing of a special nature to record.

Local activity has been chiefly confined to the buying of cast iron scrap by foundries, which, it is reported, are not operating up to 50 per cent. capacity. The lower prices in pig iron have resulted in dealers being adverse to offering as much for cast scrap as formerly.

White metals have been firm, and the demand has slightly improved. The scrap rubber situation is at a standstill at present. Local dealers report conditions to be very quiet. Prices for fair-sized quantities, which contain a few revisions, follow:

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	18 00	19 00
Yellow brass	6 50	7 50
Red Brass		10 00
No. 1 machinery cast	22 50	23 50
Heavy melting steel	13 50	14 50
Heavy Copper	10 50	11 00
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	3 00	3 50
Overseas lumbermen's rub. boots	2 00	2 50
Auto tires	0 50	1 00
Solid tires	0 75	1 25
Tea lead	2 00	2 50

Ingots Remain Steady

Toronto.

The general situation in ingot metals remains the same and a dull outlook is the prospect here. United States and British markets have recently shown a revival of activity in copper and tin, with lead and zinc movements remaining around previous levels. Some slight changes have been recorded in local prices but are not of sufficient degree to indicate market conditions.

TIN.—The upward trend of the market is still apparent and this feeling is reflected in a one-cent increase in local quotations, the price now being 38½ cents. Local business is generally reported small.

COPPER.—The foreign copper market has taken on a more active appearance, and with Japanese, British and French purchases pending, the United States dealers are looking for an ad-

vance. In some quarters prices are reported to be a little higher, but local quotations still remain at 18 cents.

LEAD.—Activity in the lead market is the keynote of the ingot metal situation at this time. An increase in quotations from $6.25 to $6.50 has been recorded here, while foreign markets interpret conditions to mean another advance in the near future.

SPELTER.—Outside markets in this metal continue to be a little erratic. Buying is again reported to be very light and the quiet spell generally continues. Prices locally advanced to $7.50, an increase of 25 cents over last week's quotation.

ANTIMONY. — This market is still firm, but generally less active than was previously reported. Quotations here remained unchanged at from 8 to 10 cents.

ALUMINUM. — The steady improvement in the automotive industry has been productive of a better feeling in aluminum circles. More inquiries have been received, and the price of 30 cents is still holding on local markets.

London Markets

LONDON, May 12.—Business in this section of the country continues to be seasonably good. While there is no apparent rush, there is still evident a steady demand for hardware and the volume of sales is very satisfactory.

Market prices generally remain steady, with the exception of a few lines which are quoted at slight reductions. These small declines include house brooms, clay picks, edge and pick mattocks, grub hoes, crowbars, plated butts, heavy tee and strap hinges, and japanned shelf brackets.

Turpentine advanced twice during the past week, and is now fifteen cents higher than formerly. Linseed oil prices are very firm. Collections are reported to be good, and at present the outlook is very favorable for good trade throughout this district during the summer and fall seasns.

Linseed Oil Firm

London, Ont.

Linseed oil at present is in good demand, and while the prices are exceedingly firm, no changes have as yet been quoted. Advances are looked for in some quarters. Following are the present prices.

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, Imp. gal.	0 77	0 80
3 to 5 barrels, Imp. gal.	0 76	0 79
6 to 9 barrels, Imp. gal.	0 74	0 77

Less barrels, add 15 cents gal.
5 gal. jacketed cans, $1.25 each.

Turpentine Again Advanced

London, Ont.

Turpentine advanced twice during the past week on local markets, and is now quoted at fifteen cents per gallon higher than previously. A very good demand is evident, with the new prices as follows:

TURPENTINE—	
1 barrel lots, Imp. gal.	$1 15
2 to 4 barrel lots, Imp. gal.	1 14
5 gallon lots, Imp. gal.	1 30

Cut Nails Reduced

London, Ont.

The demand for nails continues to be only fair; but a slight reduction in the price of cut nails is shown. The new quotation is $5.75 base; the previous local price being $6.00. Wire nails still remain at $4.65 base.

White Lead Unchanged

London, Ont.

Good sales continue to be the rule in white lead in oil, and there is a very fair seasonable demand. Up to the present, however, there has been no change in price and following are still the market quotations:

WHITE LEAD IN OIL

	Tons.	Less Tons.
Pure, per 100 lbs.	$14 95	15 30
Elephant, per 100 lbs.	15 45	15 80

House Brooms Decline

London, Ont.

An average reduction of one dollar per dozen is announced in the price of corn house brooms. There is reported to be a fair demand. Following are the revised prices:

CORN HOUSE BROOMS—	Per doz.
Special	$5 00
4-string parlor	7 75
4 string, hardwood handle	6 50
No. 7 hardwood handle	9 00
XX hardwood handle	5 75

Clay Picks Reduced

London, Ont.

Considerably lower prices are shown on clay picks, the extent of the reduction being on a basis of two dollars per dozen. Following are the new quotations:

PICKS (Clay)—	
5 to 6 lbs., per doz.	$ 9 50
6 to 7 lbs., per doz.	10 50
7 to 8 lbs., per doz.	11 50

Edge and Pick Mattocks Show Decrease

London, Ont.

Edge and pick mattocks are also among those goods showing a fairly large drop in price this week. The new price of $11.50 per dozen being $2.50 lower than the previous quotation.

Grub Hoes Are Reduced

London, Ont.

A reduction of two dollars per dozen has been announced in the price of grub hoes. These have been sellIng fairly well. The new price is $9.00 per dozen.

Crow Bars Revised

London, Ont.

The new revision in the price of crowbars shows a reduction of one and a half cents per pound. Quotations are now $9.00 per cwt.

Butts, Hasps and Hinges Show Lower Range

London, Ont.

Slightly lower prices are now in effect in several lines of common hardware. This adjustment includes plated butts, heavy tee and strap hinges, japanned shelf brackets, wrought staples, safety hasps, hasps and staples, and barrell bolts. The average reduction is from 5 to 10 per cent.

New Net Prices on Heavy Tee and Strap Hinges (Bulk).

	Tee.	Strap.
4 inch, dozen pair	1 55	1 90
5 inch, dozen pair	1 95	2 30
6 inch, dozen pair	2 20	2 50
8 inch, dozen pair	2 50	3 35
10 inch, dozen pair	4 50	5 90
12 inch, dozen pair	7 15	7 35
14 inch, dozen pair	7 80	8 40

JAP'D SHELF BRACKETS—3 in. x 4 in., 90c dozen pair; 4 x 5, $1.20; 5 x 7, $1.80; 6 x 8, $2.20; 7 x 9, $2.60; 8 x 10, $3.00; 10 x 12, $4.40; 12 x 14, $6.70; 16 x 18, $15.00.

PLATED BUTTS—2½ x 2½, 35c pair; 3 x 3, 37c; 3½ x 3½, 38c; 4 x 4, 50c; 4½ x 4½, 75c; 5 x 5, $1.30.

Clothes Line Wire Slightly Lower

London, Ont.

Slightly lower prices are quoted on clothes line wire, for which dealers report an average demand. The new quotations are as follows:

CLOTHES LINE WIRE—XX in 50 ft. lengths, $6.95 per M. ft.; in 100 ft. lengths, $6.35. XXX, in 50 ft. lengths, $7.50 per M. ft.; in 100 ft. lengths, $6.95.

Rope Sales Numerous

London, Ont.

A steady increase has been noticeable in the demand for rope, and sales are reported to be more numerous. There have been no changes in prices up to the present, and the following quotations prevail:

ROPE—Pure Manila, 24½c base; Beaver Manila, 20c; New Zealand Hemp, 20c; Sisal, 18c.

Netting Selling Well

London, Ont.

Good sales are reported in poultry netting of Canadian manufacture. The annual spring activity is credited with the reason for this demand. Prices for both the 1 and 2-inch mesh are maintained at list, plus 10 per cent.

Screen Wire Active

London, Ont.

Preparations for summer have resulted in stimulated sales of screen wire cloth. The local price for painted black screen is $3.50 per hundred square feet.

Demand For Garden Tools

London, Ont.

A good seasonable demand prevails for all garden and harvest tools, and dealers report numerous small sales in these articles. The prices remain at list, less 50 and 10 per cent.

Selling Active in Spades and Shovels

London, Ont.

Spades, shovels and scoops are also selling well at the present time. The prices on these are unchanged, being list, less 35 per cent.

Lawn Mowers Unchanged

London, Ont.

An average demand for lawn mowers is expected at this season of the year; and although sales in these machines have been fair up to the present, it is

thought that the higher prices prevailing, has lessened the activity in some quarters. Following are local quotations:

LAWN MOWERS

Taylor-Forbes Make—
Star, 10 per cent. off list.
Woodyatt, 10 per cent. off list.
Daisy, 15 per cent. off list.
Empress, 15 per cent. off list.
Brockville make, Net list.

Mop Wringers Reduced

London, Ont.

New and lower quotations are given on white mop wringers, this adjustment following a general reduction on these lines. The prices now shown are as follows: No. 1, $45.00 per dozen; No. 2, $31.00 per dozen; No. 3, $38.00 per dozen.

Winnipeg Markets

WINNIPEG, May 12.—Declines in prices of hardware commodities are reported to be slowing up, and a somewhat firmer tone is now visible on most lines of heavy goods.

Reductions are noted this week on No. 241 butts, alarm clocks, heavy strap and tee hinges, corrugated strap and tee hinges, and several lines of small tools. Wrought iron pipe is held at recent changes, while pipefittings, bar iron and steel, plates and sheets have experienced no revision in prices.

Business on the whole can be summed up as being fair, but is not generally up to expectations for this season of the year. The inclement weather last week undoubtedly caused a setback in the sale of seasonable lines. Collections are now stated to be improved.

Steel Grease Cups Down

Winnipeg.

Prices have been marked down on steel grease cups, and are now quoted at the following figures:

GREASE CUPS—000, 6c each; 00, 7c; 0, 10c; 1, 12c; 2, 20c; 3, 27c; 4, 38c.

Reductions on Corrugated Hinges

Winnipeg.

Prices have been reduced on corrugated tee and strap hinges, and are quoted at the following:

CORRUGATED TEE—4 in., $2.45; 5 in., $2.70; 6 in., $3.65; 8 in., $5.75; 10 in., $8.25.

CORRUGATED STRAP—4 in., $1.60; 5 in., $2.20; 6 in., $2.85; 8 in., $4.75; 10 in., $7.20; 12 in., $11.05.

Cotton Waste Steady

Winnipeg.

No changes have been made in waste prices and the demand is stated to be improving. The following are present quotations:

WASTE—Cream, polishing, 24½c; White, XXX extra, 21c; XX Grand, 20c; XLCR, 19c; X Empire, 17½c; X Press, 16c. Colored, fancy, 17½c; Lion, 16c; Standard, 14½c; Popular J, 13c; Keen, 11½c.

Above prices are subject to trade discount for quantities.

Sheets and Plates Unchanged

Winnipeg.

The prices for black and galvanized sheets are holding at recent changes, and following are the present quotations:

BLACK—10 ga., $7.15; 12 ga., $7.15; 14 ga., $7.20; 16 ga., $7.30; 18 ga., $7.80; 20 ga., $7.80; 22 ga., $7.85; 24 ga., $7.85; 26 ga., $7.90; 28 ga., $8.15.

GALVANIZED—16 ga., $9.10; 18 ga., $9.25; 20 ga., $9.25; 22 ga., $9.40; 24 ga., $9.40; 26 ga., $9.55; 28 ga., $10.15; 10¾ oz., $10.55.

Brass Jack Chain Slightly Lower

Winnipeg.

Lower prices are given this week for brass jack chain and following are the latest quotations:

BRASS JACK CHAIN—Single, No. 10, $3.85; No. 12, $3.53; No. 14, $1.75; No. 16, $1.10; No. 18, 77c; No. 20, 60c; No. 22, 60c; No. 24, 60c. Double, No. 10, $5.25; No. 12, $3.52; No. 14, $2.25; No. 16, $1.45; No. 18, $1; No. 20, 80c; No. 22, 80c; No. 24, 80c.

Heavy Tee & Strap Hinges Down

Winnipeg.

A reduction has been made this week in the quotations on heavy tee and strap hinges in bulk. Following are the latest prices:

HEAVY TEE—4 in., $1.75; 5 in., $2.20; 6 in., $2.45; 8 in., $2.80; 10 in., $5.05; 12 in., $7.90; 14 in., $8.50.

HEAVY STRAP—4 in., $2.10; 5 in., $2.55; 6 in., $2.65; 8 in., $3.75; 10 in., $6.70; 12 in., $7.75; 14 in., $9.40.

Plated Butts Reduced

Winnipeg.

A reduction has been made in the prices of No. 241 plated butt hinges, and the changes result as follows:

No. 241 Antique Copper and Dull Brass Finish. —2½ x 2½ in., 36c per pair; 3 x 3, 38c; 3½ x 3½, 39c; 4 x 4. 52c; 4½ x 4½, 77c; 5 x 5, $1.34; 6 x 6, $2.35.

Reduction in Alarm Clocks

Winnipeg.

Further reductions have been made this wee ko nalarm clocks and the following are the revised quotations:

Big Ben, $3.85; Baby Ben, $3.85; America, $1.80; Sleepmeter, $2.35.

Ball Pein Hammers Reduced

Winnipeg.

Prices have been slightly reduced on Heller's ball pein hammers, and are quoted as follows:

No. 4, $17.85 per dozen; No. 5, $18.75 per dozen; No. 6, $20.25 per dozen; No. 7, $21.50 per dozen.

Jack Chain Revised

Winnipeg.

Prices have been slightly reduced on on iron jack chain, and following are the latest revised quotations:

IRON JACK CHAIN—Single, No. 7, $1.20; No. 8, $1.05; No. 9, $1; No. 10, 88c; No. 12, 72c; No. 14, 60c; No. 16, 52c; No. 18, 44c; No. 20, 44c. Double, No. 7, $1.55; No. 8, $1.25; No. 9, $1.15; No. 10, $1.05; No. 12, 80c; No. 14, 65c; No. 16, 58c; No. 18, 52c.

Pittsburgh Markets

PITTSBURGH, May 12.—Production of pig iron in the United States is now at the rate of about 14,000,000 tons a year, which compares with rates of 39,000,000 tons last October and 40,000,000 tons in March, these being the two high months of the year. Actual production as officially reported was 36,925,987 tons in 1920 and 39,434,794 tons in 1916, the record year. Thus the present rate of output is extremely low and indeed is lower than the actual production in any year since 1900. By comparison with capacity the showing is still worse, for the capacity is considerably in excess of outputs previously attained. In 1916 there was production approximately equal to the existing capacity, but since then the capacity has been materially increased, for very little of the war-time construction became effective in 1916. Last year there was an effort during the first eight or nine months to make maximum output, but transportation difficulties prevented any full attainment, chiefly through causing a shortage of coke.

The capacity is fully 45,000,000 tons, this figure not representing theoretical capacity, but the actual production that could undoubtedly be realized if there were reasonably fair manufacturing conditions, such as existed in 1916, and were normal before the war, including proper transportation service and an adequate supply of efficient labor. Compared with 45,000,000 tons capacity the present rate of production of 14,000,000 tons of pig iron a year is 31 per cent.

The merchant blast furnaces make a much poorer showing than the steel works furnaces, since the merchant furnaces are producing at the rate of only about 2,000,000 tons a year, their capacity being approximately 12,000,000 tons, so that their rate is only about 17 per cent. The steel works furnaces are producing at about 12,000,000 tons a year, or 36 per cent. of their estimated capacity of 33,000,000 tons.

The chief reason the merchant furnaces are operating at a much lower rate than the steel works furnaces is not that there is a much smaller demand upon the malleable and gray iron foundries, steel foundries and detached steel works that use merchant pig iron, as compared with demand upon the steel works that have blast furnaces of their own, though there may be a little difference in this respect. The difference is due chiefly to the existence of stocks of merchant pig iron in the hands of both producers and consumers. The steel works that have blast furnaces naturally do not stock pig iron to any extent, partly because they do not buy or sell, and partly also because they normally use molten iron, which is much more economical, and make it as they consume it. In the case of merchant iron, on the other hand, consumers normally carry stocks and some months ago these stocks increased, while the furnaces also have stocks. A blast furnace must either run

Some Valuable Pointers in Paint Selling

Low Grade Paint Will Not Please Customer and This Will Ultimately Discourage the Retail Salesman—Intelligent Advice Makes Many Customers

Written for Hardware and Metal by Harry Borland, the Martin-Senour Co., Ltd., Sales Staff

The hardware merchant will be on the watch for all helpful pointers to aid paint selling at this season, and suggestions for the paint window displays, which must be made frequently at this season, should be helpful. Herewith is a suggested display embracing a number of lines required at this season. There are exterior and interior paints, varnishes and specialties, paint and whitewash brushes, etc. The use of neat electric fixtures gives the display an attractive appearance when illuminated at night.

THE first and most important thing to gain for a successful paint department in retail hardware is the confidence of your salesmen on the quality of the goods you ask them to recommend and sell to your customers. If the paint is of a low grade, and one that you yourself have no faith in, do not ask your salesmen to recommend it. The low-grade paint will fail to please the customer, Mr. Merchant, and you have not only failed to please your customer but you have discouraged your salesmen. Not only on paint sales, but on all other sales, and they become discouraged. If the quality is high, and you know it to be high, and your faith is in its quality, impart that faith to your salesmen, inspire and enthuse them with its value, service and beauty, and to ask them to co-operate with you in making that department grow with value to consumer, salesman, merchant and the company you represent.

Service to Customers

Keep before you that paint is an absolute necessity in the home. Its use and needs are frequent or constant. The first sale to a home is the introduction of your line of paint, varnish or stain, as the case may be. If you have explained to your customers its proper use and value you have gone far to make its use a success. Many failures in paint sales, and more particularly in repeat orders, are brought about by no instructions, or improper instructions, on its proper application. The customer may ask your opinion to color, tone and effect, and the guidance you are able to give will go far, not only to bring this person back to your store for more paint, but to bring many others in your locality who see and admire the work done. If the tone is bad and the colors are poorly arranged or selected, you need not hope for future or repeat orders.

Instruct to Avoid Abuses

Paints, varnish, stains and enamels promote beauty. Study their values, educate as to their uses and instruct to avoid any abuses when applying.

A beauty paint window is always a big drawing card. In this do not overcrowd your display, a small assortment, neatly arranged, will bring the proper results. Change your window often and where possible use an alternating electric lamp for night displays.

Arrange your paint department in a prominent place in your store, at the front if possible.

Keep your mailing lists up to date—they are working while you sleep.

Sell the large sizes, five gallon cans and one gallon cans, through your full co-operation, while your opposition dealer is selling the small cans.

The Brush Department

Specific Suggestions in Brush Selling

Hardware Merchant Finds Early Start and Maintenance of Good Brush Display Throughout Season is Big Help in Brush Selling—Suggesting Brush for Boat Painting, Summer Cottage Renovating, Etc.

DISCUSSING brush selling with a hardware merchant in an Ontario city recently, Hardware and Metal was informed that in so far as household trade is concerned, the customers of that store followed the habit of buying a medium-priced brush which was always thrown away when the annual clean-up is completed. Then they need a new brush when the next occasion arises to use a brush. For this reason this merchant has developed trade largely in the popular priced variety of brushes.

"By having a good stock of brushes that can be sold at a price which most people will pay they will usually throw away the old one and buy a new one each season," stated this merchant.

Through education the paint customers of this store have come to be large purchasers of good quality paint, as compared with cheap grades, and they have also been educated to the value of using a good brush to insure a good painting job. "Service" is the watchword of this store, and the merchant contends it is an important element in giving service to point out to customers the advantage of using a good quality brush wherever one is required. An early start is made in displaying paints and brushes in this store and it is found that this early start enables the gathering of greater momentum as the season progresses and in the final analysis results have been found to be appreciably greater than when less initial effort is expended.

Throughout the paint selling season, a showcase is devoted to the display of various brushes. This display includes a range of housecleaning brushes, whitewash brushes and paint brushes. Many of these brushes are designed to facilitate certain housecleaning operations, and unless they are well displayed the housewife is apt to pass them by. This display is maintained right near the paint department where the interests of both may be more closely linked. At the present time this merchant is showing brushes and paints for painting boats and for summer resort work. House painting, of course, forms the basis of the appeal, but these other interests are worthy of special attention and this merchant has found that the specific suggestion that it is time to paint the canoe, sailboat or skiff, that it is time the summer cottage had a coat of paint, shingle stain, etc., has produced best results.

Paint Trade Suffered Less Than Other Lines

During Re-adjustment Period, States W. H. Cottingham, President Sherwin-Williams Co. of Canada, Ltd.

MONTREAL.—"The paint, varnish and allied trades industry suffered less during the re-adjustment period than many other industries, whose products were not so much of a necessity," said W. H. Cottingham, president of Sherwin-Williams Company, in expressing his opinion on conditions in the above industries. "The great need, and the growing recognition of the necessity for the preservation of buildings of all kinds by the use of a protective coating has kept up the volume of business that, apart from the decrease in price that has taken place, compares favorably with former years," he continued.

While Mr. Cottingham may be always termed an "optimist," he bases his views on the sound judgment acquired through thirty years of successful handling of business, under most adverse conditions as well as favorable.

Mr. Cottingham is an old Canadian boy and has always retained his Canadian citizenship. He is president of the Canadian Company, the American house of The Sherwin-Williams Co., also the English Company, with headquarters in London. He returned from England just three weeks ago.

SOME VALUABLE POINTERS IN PAINT SELLING

(Continued from page 56)

Follow instructions gained from pamphlets and other advertising mediums supplied from the paint "house" and watch your paint department grow and grow and grow, it will not be long in showing you 300 per cent. gain in one season.

Use the "Save the Surface and You Save All" slogan. You cannot get anything more honest, more practical and more appropriate for your department, because your line of paint does just these very things.

Some Important Points

I want to leave with you a few simple instructions in closing, that will help much to keep down trouble and afterclaps in the paint department. These should be conveyed to your paint customers:

First: Open can and stir until all pigment is dissolved.

Second: Use a good quality brush.

Third: Prepare the surface by wiping down walls with a clean cloth. Shellac knots, if any, fill cracks, and proceed to give the work a coat of ground color or surfacer. After this is dry take your can of paint, stir again and proceed to apply in limited quantity, each brushful being brushed out to its full extent in an even and proper manner.

Fourth: Never apply second coat until first has had two days at least to dry.

Fifth: Never apply white enamel until you have applied at least two coats of under coating or flat white.

Sixth: Do not paint or varnish a floor the day it has been scrubbed.

Seventh: Do not put anything in paint but pure linseed oil or pure turpentine, and make sure it is pure. The quantity of either used is also limited and too much will spoil the job.

Do not under any circumstances sell a substitute for turpentine or linseed oil and hope to keep your paint department in a clean, healthy and growing condition. You cannot get away with it. Others have tried and failed. Let the other fellow experiment on price, he will lose. If you want to win, win on quality and in this you will gain value, service, a pleased customer and a constant friend.

Improvement in Paint Trade

Kingston, Ont.—Hardware dealers report a good trade. During the war, when help was so scarce, and the price of paint was comparatively high, owners of houses put off work that should have been done; but this season, when help is so plentiful, and the price of paint is somewhat cheaper, there is a good deal of work being carried on.

Moore's Paints

Moore's Paints will "save the surface" and build business anywhere in the Dominion. Every brand of Moore's Paint and Varnish will produce satisfactory results for the consumer, and bring the dealer many new friends, who will show their appreciation in repeat purchases, and in recommending these efficient paints to their friends.

Changes Among McArthur-Irwin Executives

John Irwin Elected President, Succeeding Late George Y. Chown—R. H. Monk is Appointed Vice-President, Succeeding Mr. Irwin

MONTREAL. — McArthur - Irwin, Limited, Montreal, corroders and grinders of white lead, manufacturers of paints and varnishes, have appointed as their new president, John Irwin, who was until then vice-president and managing director of the company. The presidency was recently made vacant by the death of George Y. Chown, of Kingston, Ont., notice of whose decease recently appeared in these columns.

JOHN IRWIN,
formerly vice-president and managing director of McArthur-Irwin Co., Ltd., Montreal, who has been elected to the presidency of the company, succeeding the late George Y. Chown.

R. H. MONK,
Who succeeds John Irwin in the position of vice-president of McArthur-Irwin Co., Ltd., Montreal.

Mr. Irwin is one of the rising men in the business community of Montreal. His worth is widely recognized and appreciated in the commercial world. The record of his business career is sufficient evidence of his latent power and energy, and the esteem in which he is held is a tribute to his universal popularity.

When in 1912 Mr. Irwin purchased the old firm of McArthur, Corneille & Co., which was established in 1842, he undertook a task which was commensurate to his ability. His energy, capacity and business foresight quickly put new life into the old firm. With optimism and energy he has greatly extended the activities of the organization.

In addition to his connection with McArthur-Irwin, Limited, Mr. Irwin is now president of Parker, Irwin, Limited, Montreal; vice-president of Davies-Irwin, Limited, Montreal; vice-president of Laporte-Irwin, Limited, Montreal; president of Perfection Counters, Limited; director of Standard Amusements, Limited, Montreal; director of Century Amusement Company, Montreal; and vice-president of Miller Extracts, Limited, Millerton, N.B.

At the last election Mr. Irwin was returned as a member of the council of the Montreal Board of Trade to represent thereon the paint industry of Montreal.

R. H. Monk to Be Vice-President

R. H. Monk, just appointed vice-president of McArthur-Irwin, Limited, Montreal, is an Englishman by birth and a Canadian by adoption. After he graduated from King's College, London, he spent the early part of his business career in the research laboratories of the firm of Sherard, Cowper, Coles, specializing in research work in white lead, paint, color, and varnish industries. Later on he went to Calcutta, India, where he helped to build up the paint business of Turner, Morrison & Co., well known Indian merchants. Later he returned to England and entered the employ of Lewis Berger & Son, subsequently coming to Canada as assistant manager of the paint factory of Henderson, Potts, Limited, who later became Brandram-Henderson, Limited, at which time Mr. Monk was placed in charge of the entire lead corroding business.

In 1919 he joined the firm of McArthur-Irwin, Limited, and established their lead corroding works in Outremont, Quebec.

English Conditions Sound, Says W. H. Cottingham

Walter H. Cottingham, president Sherwin-Williams Co., who has returned from a trip through England and France, states that business and political conditions in England are intrinsically sound. Most of the working men are behind the government. They are not Bolshevik.

"The present situation is looked upon as something that was bound to come as part of the after-war readjustment," said Mr. Cottingham. "'It is part of the struggle to adjust wages which we are also passing through in this country."

Conditions in England and France are by no means as bad as they have been painted by some who have returned from there, Mr. Cottingham asserted.

"Both nations have already gotten back to a situation much more nearly normal than is generally believed in this country," he said. "Business and social conditions there strike one as remarkably similar to ours."

Gas Plant Nears Completion

The directors of the Canadian Libbey-Owens Sheet Glass Co. recently held a meeting covering a period of two days, which included an inspection of the new plant being erected at Hamilton, Ont. Due to the exceptionally mild weather of the past winter, excellent progress has been made in the construction of this building and the roof is now in position and the special glass machinery is being installed. The engineers in charge of construction predict that glass will be turned out of this factory about August 1st, 1921.

Special Sale of Electric Fixtures

One of the most successful sales of electric lamps and electric fixtures that Ingram and Davey, of St. Thomas, Ont., have held was conducted recently. The firm offered a 10 per cent. reduction on lantern fixtures, candle fixtures, stand lamps, domes, bedroom lamps, portable lamps and indirect fixtures and offered to prepay the freight on all orders of $10 and over. An extra special offer was a 12-inch pan fixture in brush brass with Flemish finish and hand-painted shades for $8.89.

The firm backed its store and splendid window display by a four column advertisement 11 inches deep in which cuts were shown of lamps and fixtures. The window display was a centre of real interest not only for the people of the city but for hundreds of farmers who motored in. Prices were conspicuously displayed and when the window was lighted at nights it made an exceptionally attractive showing and one that "pulled" business.

Registered Floglaze

The finish that endures

Weekly Paint Markets

Montreal

MONTREAL, May 12.—Turpentine features the paint markets this week with a fifteen cent advance, this making the third advance in the last three weeks. The tendency continues firm with higher quotations probable as the busy season continues. Linseed oil shows no change in most quarters, but the range of prices is smaller. The lower prices, quoted by a few jobbers, has been raised three cents this week. White lead in oil is held at same quotations, with stocks now low and pig lead continuing strong on the primary markets. Putty is stationary, also shellac. Window glass is slow but firmer than it has been in the past months of this year.

Paint manufacturers report a very active week in paint and varnishes, with sales piling up to meet the record of last year. Altogether, the paint industry is today "booming."

Linseed Oil Holds

Montreal.

Linseed oil prices are holding unchanged from last week in most quarters at 84 cents for raw in one barrel lots, while a quotation of 78 cents is given by others with the advance to the higher level expected. The flax seed market is continuing firm with little advance, however, showing throughout the week. Following are present quotations:

LINSEED OIL—	Raw		Boiled	
1 to 2 barrels ...	0 78	0 84	0 81	0 86½
5 to 10 barrels ..	0 76	0 82	0 79	0 84½

Broken lots, add 10c gal.

Further Advance in Turpentine

Montreal.

The longest jump in turpentine quotations since the commencement of higher levels of three weeks ago is recorded this week, an advance of 15 cents a gallon being given. Present quotations are $1.20 in one barrel lots. As has been stated in recent issues of Hardware and Metal, when turpentine reached as low as 87 cents, it was thought much below the level that present conditions in other paint products warranted, and advances would, in all probability, be made as soon as the demand became anywhere near normal for this season of the year. However, the upward trend has been beyond expectations in the past three weeks, when a gain of 33 cents has been made. Last week a range of prices was given, certain wholesales maintaining a price 10 cents below the general quotations, but this week the lower prices are withdrawn. A continued firmness is looked for, with further advances not improbable. Following are quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 20
2 to 4 barrel lots	1 18
Broken lots	1 30

White Lead Firmer

Montreal.

With stocks now low in the hands of corroders, and the strength of pig lead continuing on the primary markets, white lead in oil now has a much firmer tendency than has been shown in the past months of this year. Pig lead has shown another substantial advance this week. With the trend of the white lead market pointing downward in the past few months, the tone of both pig lead and linseed oil causes a somewhat different aspect. Quotations are held as per current market page, with little change expected, for some time at least.

Shellacs Unchanged

Montreal.

Quotations on both white and orange shellac are holding unchanged again this week. The tendency of the market has shown a slight improvement in recent weeks, gum shellac having firmed considerably. Stocks are now reasonably low for this season among the paint manufacturers, and with any purchasing by these sources at present might stiffen prices rather than further declines. Sales are reported favorable, although confined to small orders. Following are quotations:

Orange shellac, in barrels, $3.50; in one gal. jugs, $3.80; white, in barrels, or 5 gal. jugs, $3.85; in one gal. jugs, $4.25.

Limited Sales of Putty

Montreal.

With building construction not yet advanced to create any stimulus in the sales of putty, the movement continues slow. Prices are unchanged with a steady market anticipated. Following are quotations:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Glass Slow But Firmer

Montreal.

Wholesalers report very little change in the window glass situation, business remaining light. The tendency is, however, firmer, with the Belgian market holding its strength. Two large ships have arrived this week in Montreal carrying good supplies of glass. Locally a better feeling exists among the importers and jobbers, and a steadier market may be looked for. Quotations remaining at 50 per cent. off Montreal list.

Paints and Varnishes Active

Montreal.

Paint, paint sundries and varnishes are selling well on a steady and firm market. This condition will, in all probability, prevail for some time now. Manufacturers all report that small orders coming by telegraph, telephone and mail are very numerous, with difficulty in getting them off in good time to the various dealers. With painting weather now here to stay for this season, sales will keep up to a high record. No change in quotations is anticipated until the busy season is over at least.

Toronto

TORONTO, May 12.—Chief interest in paint circles continues to revolve around the turpentine and linseed oil situations. Linseed oil has advanced this week and the demand is reported to be very firm. Turpentine has now reached $1.15 per Imperial gallon for one barrel lots, and conditions are erratic, with future prospects in doubt.

An active season in paints and varnishes has stimulated merchants into an optimistic mood, and general satisfaction is expressed all through the trade. Automobile colors and floor finishes are experiencing a strong demand.

Brush prices are being well maintained; while quotations on white lead in oil and putty continue firm. Glass prices also remain unchanged on local markets. A better feeling is predominent in trade circles, with conditions generally showing improvement.

Turpentine Again Higher

Toronto.

More foreign inquiries and the prospects for a fair volume of future shipments have produced a strong demand for turpentine, with the result that a further rise in price is evident. Locally the market is unsettled, with a reported shortage of stocks on hand.

Whether the recent changes indicate a gradual readjustment towards higher levels, or is just a temporary tendency, is hard to determine. Increases have been in some measure due to anxiety for immediate shipments, but the possibility of strikes among shipping circles

MEAKINS BRUSHES

Profitable Sales

and repeat orders will reward the dealer who stocks Meakins famous Rubber Set Brushes. The "man on the street" knows that satisfaction and Meakins Brushes are synonymous. He knows that the bristles will stay in; that these brushes can be used on delicate work with the utmost confidence; that the bristles will not adhere to the surface of the work. That Meakins Brushes are made from selected materials by skilled workmen.

spreading to other transportation facilities is not counted upon to figure very prominently in future price announcements, as a scarcity of supply from this direction is said to have been substantially guarded against. The market is fluctuating, due to present demands, and prospects show signs of continued unsettlement. The latest quotations follow:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

Linseed Oil Prices Change

Toronto.

The price of linseed oil has advanced 8 cents per gallon. This increase has been expected, and brings the local quotation to 85 for raw and 88 for boiled on one to two barrels.

The unexpected receipt by U. S. interests of European orders for quantities of linseed oil has stimulated the demand for flax seed to such an extent that it is being prophesied by some that the price of linseed oil will likely reach the dollar mark during the next few months. Whether this will be so or not the Argentine market is unusually brisk at present, and some further calls from foreign parts, where internal conditions have been suddenly, if but partially, settled, has had the effect of boosting the demand here.

Heavy purchasing of Canadian flax seed by U. S. interests still continues, but whether the American proposed emergency tariff increase of ten cents per bushel on seed will affect this situation adversely or not is at present stated to be a gamble. No indication can be secured as to whether local conditions will force further increases, as the market just now is extremely erratic.

The demand for linseed oil is fairly good, and the fact that the oil cake has shown a reduction in price means that this decrease on the by-product must be added by the manufacturers to the oil itself. According to this viewpoint some further advances are expected in certain quarters, should the present situation develop along these lines. Present quotations are as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, per gal.	0 85	0 88
3 to 5 barrels, per gal.	0 84	0 87
6 to 9 barrels, per gal.	0 82	0 85

Less barrels, add 15 cents per gal.

Brisk Sales in Paints & Varnishes

Toronto.

Seasonable activity was naturally expected in paint and varnish sales, but recent market reports indicate an eager rush of business which is keeping all paint dealers exceptionally busy.

The country trade in all kinds of paint products is reported to be very good with prospects infinitely better than they were last season. Dealers are all very optimistic, and it is evident now that the smaller merchants have been holding off all through the winter months, and only kept a small stock, with periodic orders based on local requirement. The consequence is an unusually busy spring; and reports from some quarters indicate that a much greater volume of business than was transacted along these lines last year is confidently anticipated.

Floor finishes are in good demand, and automobile colors are also proving quite popular this season. No changes are made in the current prices of paints and varnishes, and while no advances are looked for, yet the higher prices likely to prevail on turpentine and linseed oil, will probably prevent any decline which might have been otherwise expected. Therefore, it is intimated that present quotations will likely hold until the end of this season; providing the situation does not develop any unsettling incidents.

Brush Prices Firm

Toronto.

Paint brush prices are being well maintained, and the seasonable demand continues to be fairly good. Orders continue small, although more numerous, indicating a waiting policy on the part of dealers. But very few changes, if any at all, are expected at this time; and any reductions towards midsummer would only be slight changes on a few lines where dealers might have overstocked. The effect of the Chinese famine has been felt in the bristle market, and it is considered that this situation would result in preventing any further declines here. Russian bristles are still hard to obtain.

Putty Is Steady

Toronto.

No change has been reported in the current price of putty; but demand is stated to be fairly good, which is attributed to seasonable activity. Although the price is still stationary, the increased firmness in linseed oil markets will likely prevent any decline. The following are the current quotations:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

White Lead Firm

Toronto.

The seasonable demand for white lead in oil continues to be good, but no changes in price have been recorded locally. Advances have been reported from both United States and British markets, and it is thought that this will have the effect of steadying prices here. Other reports, however, indicate that the production of lead is below normal, and with summer weather prevailing and a continuance of demand for white lead in oil, the view has been expressed that there are possibilities of the price advancing in the future. $14.95 per 100 pounds in ton lots, and $15.30 per 100 pounds in smaller quantities continue to be the prevailing prices.

Glass Prices Unchanged

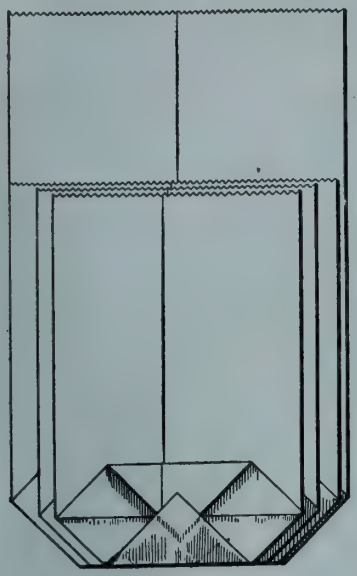
Toronto.

The strengthening of the Belgian glass situation has continued. An increase in the franc rate has resulted in a corresponding rise in the cost of laying down window glass on the local markets, but this is not generally considered of sufficient importance to justify an immediate increase. Present quotations remain unchanged, but an advance is expected by some in the future.

Emergency tariff legislation by the U. S., might affect local prices, but permanent tariff changes are not expected for some time. The demand for window glass is still in small quantities but sales are fairly brisk, with prospects that the summer building activities will show improved results in the next few months.

Plate glass also remains unchanged, with future conditions still in doubt. No market increases in plate glass are, however, expected, although further changes in the Belgian franc rate might have its effect in due time. The quotations remain 50 per cent. off new case list and are 60 and 10 per cent. off cut light list.

PITTSBURGH GENERAL MARKETS



Continued from page 54

or not run and the merchant furnaces are either single or in small groups. As demand slumped off suddenly the average furnace, before blowing out, shipped all the iron on contract that the customers would take, and also made up some stocks preliminary to blowing out. Numerous furnaces announced late last year that they would not make any stocks, but that on account of high costs they would blow out as soon as they became unable to ship their make, but in practice the theory was violated.

Not Stocking Up Now

The conclusion from all this is that the rate of consumption of merchant pig iron is in excess of the current production and that as stocks are consumed a steadier market will develop. That there will then be higher prices than those now ruling is a possibility but it is somewhat more likely that prices will decline further before there is an upturn. A factor that may intervene before pig iron prices tend to stiffen is that of freight rates on ore, limestone and coke. These are expected to come down and that would decrease furnace costs. It is fairly safe to make one prediction, that before the end of the year there will be an advance in pig iron, from whatever low point is meanwhile developed. That is, some pig iron is likely to be sold at lower prices than the price that would encourage an idle furnace to blow in. An idle furnace does not lose much money, while it is very awkward to have a furnace in blast and making a fresh cast of iron every six hours, Sundays included, if there is no market for it. Accordingly there will have to be inducements before idle furnaces blow in.

For Quick Turnover and Repeat Sales

The present-day buying trend in cooking ware is toward aluminum. And the popular demand of women who choose aluminum is for VIKO—The Popular Aluminum.

Women are quick to realize the advantages of aluminum ware for cooking. They appreciate its light weight, its attractive appearance, its durability.

And they know through experience that VIKO, The Popular Aluminum, combines all the desirable features of fine aluminum with modern methods of manufacture, which makes Viko high in quality but popular in price.

Put the Viko line in your store. Cash in on the present-day demand of the modern woman. Viko sales are easy to make and they bring repeat orders. For full information—

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Plastic Elastigum Patching Cement

ONE of the most popular of the Barrett Products is Creonoid (Fly Oil) Lice Destroyer and Cow Spray. Farmers throughout the entire Dominion use vast quantities of this product during the fly season. Our plans include an intensive advertising campaign directed to the farmers during the time when the fly pest is prevalent. Be ready to cash in on this demand which will be created for you.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

"I SAVE from $30 to $50 per month by the use of Creonoid," writes a farmer. "By its use night and morning, my cows have practically 24 hours of peace and comfort . . . I have used Creonoid for more than a year in my dairy, and I find it so superior to all other 'fly dope' that there is no comparison."

That is but one instance among thousands, where Creonoid has increased the milk yield. Experts say that cows give 25% more milk, when freed from the fly nuisance.

Creonoid is a very inexpensive and wonderfully effective fly-spray for horses and all live stock.

It is easy to apply. After its use cows will stand still at milking time, and should show an increase in weight and milk yield.

Creonoid will pay for itself many times over through increased farm profits.

Creonoid means more milk per cow, more eggs per hen, more pounds per hog.

Creonoid comes all ready for use. It requires no mixing or thinning.

It is put up in exceptionally attractive lithographed cans in the following sizes: 1-gallon cans (12 to the case), 5-gallon cans, ½ barrels and barrels.

TINKER TOM'S TALKS.

No. 311.

YE GRAND BLUFF!

We had just said to a friend: "Talk about Made-in-Canada, why we never hear a sound these days from a lot of jobbers and manufacturers who were mighty glad of our service and prices when things were different. There's no such thing as AP-PRECIATION"—

and just then a Prince of the realm phoned an order for a car of "PREMIER" GAL-VANIZED STEEL SHEETS, and a wire came in ordering another car, and the mail man brought an order for a third car!

It looks like a beautiful day to us now, and we're hoping the weather has changed to *MADE-IN-CANADA.*

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Suppose you write us to-day about Silkstone and other lines that will benefit your business? We know you want to satisfy customers and build permanent, lasting trade; Silkstone is one of a line that does that to perfection.

You can sell it because Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. It is economical, durable and satisfies good taste.

Let us show you that it is profitable to sell. If a thing sells well and pays the merchant well, you certainly want it working for you in your store, don't you?

"Save the surface and you save all" *Paint & Varnish*

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

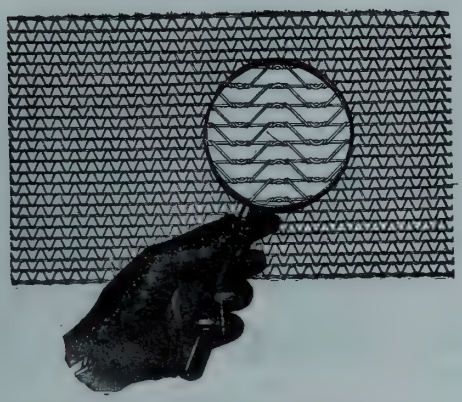

Illustration showing magnified view of weave.

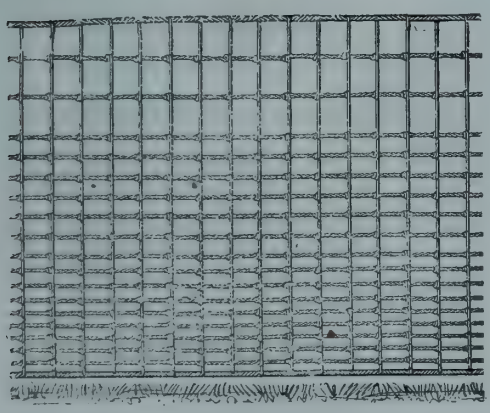
Lay Flat Poultry Fence

Lay Flat Poultry Fence is a comparatively new feature of the wire netting and fencing trade. It is a great advantage to users of these goods. The feature that pulls is, that it is made on the same lines as farm fence. It is a perfect fabric with hinged joints. It is strong, stiff, and straight; when unrolled it lies flat and straight. This requires no toprail, baseboard or extra posts.

Good Displays



No. 1. No. 2.

Galvanized Poultry Netting Staples

Effective, reliable staples in galvanized, No. 1 Size, 13 gauge. These are conveniently packed in 10-lb. boxes and 100-lb. kegs. Also barbed, blind staples, No. 2 size. In ½, 5/8 and ¾. Packed in 10-lb. boxes.

Make Quick Sales

L Union Lock Poultry Netting

This is a handy, convenient netting that shows to advantage and sells well. The spacing of horizontal, or line, wire is: First six wires 1¼ inches apart; next three spaces are each 1½ inches apart; the next six spaces are each 2 inches apart. All spaces above 15th bar are 4 inches apart. There are ten rods in a roll (165 feet). Bring this to your customers' attention now with good displays.

O-Rib-O
Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

CARTER'S

Always Recommend

CARTER'S GENUINE DRY RED LEAD

It is worth recommending. A highly oxidized and very finely ground Red Lead that is always pure, always uniform and very economical. The best protection paint for metal work, railway and marine work, steam pipes, etc.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are of a similar high quality. Write for prices and particulars.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

North Star Batteries

Last Longer Cost Less

North Star batteries are so carefully and perfectly made as to ensure more power and longer life than ordinary batteries. They will stand unused for a considerable period without noticeable deterioration and can always be relied on for quick hot sparks. We guarantee this and will replace, without asking questions, any that do not give more power and last longer than other batteries.

North Star multiples are especially made and demanded wherever heavy duty ignition is required. Made in various sizes; packed in strong containers with handle, easy to connect, and absolutely waterproof.

North Star batteries offer superior service to the user and more profit to the dealer—both are good reasons why you should stock them.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

TANKS

Gasoline Tanks

For Underground Storage

Made of the finest copper steel procurable, welded and then painted on the outside with Anti-Rust, Acid-Proof black paint, these tanks are practically rust and corrosion proof. For handling gasoline only the very best is safe. The thorough test all our tanks undergo before leaving our factory is a guarantee of their reliability. The prices are most reasonable.

Oil and Gasoline Tanks

Here's a tank made of copper-steel with handy screw cap opening at top for filling and faucet in side near bottom for drawing off contents. Another reliable tank at a moderate price. These tanks have been giving satisfactory service wherever sold.

Your money back if not satisfied

Write us for prices and send us addresses of possible customers to whom we can send literature direct for you. We also manufacture baths, dairy equipment, sanitary closets, etc.

ATKINS
STERLING QUALITY SAWS

Profit by selling Atkins Sterling Quality Saws and Tools.

The two-way taper of our hand saws, the segment grinding of our cross-cut saws, coupled with the quality of our Sterling Quality Steel and our expert workmanship, make Atkins Sterling Quality Saws

"The Finest on Earth"

The expert mechanics to-day are demanding Atkins Saws and Tools. Can you supply them?

Made in Canada

E. C. ATKINS & CO.

Established 1857

"The Sterling Quality Saw People"

Factory: Hamilton, Ontario ***Branch:*** Vancouver, B.C.

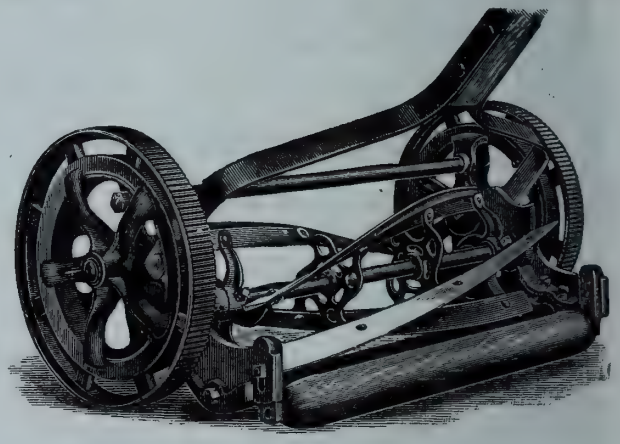
"The Premier"

The Chicago "Premier" Spring Pivot Hinge is high-class—in a class by itself.

The weight of the door is carried on ball bearings, the eccentric has roller bearings and the spring is made of best tempered steel flat wire.

It also has a tension adjustment and an aligning feature.



It is recognized as the "PREMIER."

SPRING HINGES

A Double-Edge Mower---with Many Selling Features

The Hardwareman will find Eureka Mowers easy selling. The Majestic herewith illustrated has proved its ability to make sales and satisfied customers time after time. One point of special interest is the double-edge cutting bar which eliminates "missed spots" and assures a true, even cut at every stroke.

The Majestic

Open driving wheels, 10 inches in diameter, with raised rim. Four-blade cutting reel, 6 inches in diameter. Best quality crucible steel blades and brass bearings. All adjusting screws are in plain sight. Machine screw adjustment of cutter bar. Made in three sizes: 14, 16, 18-inch cut.

This is only one of the Eureka line.

Write for complete catalogue.

SUPREME CUTLERY

A leading merchant in a Western Ontario Town, among other things, said to one of our representatives a few days ago:

"We found that the carriers, recently installed by you, enabled us to do with two salesmen less than we would have had to employ during the busy Christmas season, had we been without them."

Did you ever consider that the same applies in a greater or less degree in every retail establishment? Drop a card for one of our circulars which explains at greater length.

Gipe-Hazard Store Service Co. Ltd.

113 Sumach St.
TORONTO, ONT.

Subscription price of HARDWARE AND METAL is $4.00 per year or less than 6 cents per issue.

Appearances Count Mightily

The successful dealer is the one who makes his store a shining example of neatness. He is every bit as jealous of the appearance of his goods as of their quality.

Imperial Floor Dressing aids the tidy storekeeper. It keeps down 90% of the atmospheric dust which is directly responsible for that undesirable, shop-worn appearance that repels the buying public.

Imperial Floor Dressing does more than reduce dust. It brightens floors and fixtures and gives them a like-new appearance that sells goods. It is the ideal cleaner and preservative for wood, linoleum or oil cloth.

One gallon of Imperial Floor Dressing is sufficient for treating upwards of 700 square feet. It does not gum or evaporate, consequently one application will last for weeks.

You will appreciate the sanitary, dust-killing qualities of Imperial Floor Dressing in your own place of business. It is also a profitable line for the dealer to stock.

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans, and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

The Customers' Advantages

The Overhead Drain automatically gives the motorist all the gasoline in the hose.

The Wayne Dial registers each gallon *after* delivery into the car — not before.

The Graduated Scale shows the fractional parts dispensed.

A positive filter and four screens assure clean gasoline.

The Dealers' Advantages

Hand operation saves operating cost, repairs and shutdowns. Continuous forward crank action (no backward turns) makes Wayne the *fastest* pump.

The Million-Gallon Gear-Driven Meter keeps *accurate* books for you.

The Piston Pump principle of measurement is *mechanically accurate*, protecting you and your customers from slack guess-work methods.

Exclusive Features Attract Trade

It has become an established fact that a Wayne Curb Pump is an exceptionally profitable investment for a hardware store. But bear in mind, *Wayne* profits could not be possible without *Wayne* Advantages.

Consider speed alone. Wayne's exclusive *continuous forward* crank action delivers gasoline as rapidly as it can be forced into any car — no backward turns of the crank — no waiting for container to fill up — no delay after five gallons have been dispensed, encouraging the customer to say: "That's enough." You serve more cars at less cost and your average sale is larger.

Or consider operating cost. Wayne's hand operation (besides saving time) eliminates power cost and repair bills. Wayne's sturdy construction, with no fragile parts, assures continued operation with minimum depreciation.

Or consider service to the customer — your biggest asset. Wayne's positive filtration — its *mechanically accurate* measure clocked off by the Wayne Dial *after* the gasoline is in the car (not before)—its speed—its safety — and Wayne national advertising — all combines to attract business to the dealer with a Wayne Pump on his curb.

These are only a few of the reasons why Wayne serves better and consequently profits better. They are only a few of your reasons for deciding on Wayne. Ask today for descriptive bulletin No. 276 HM

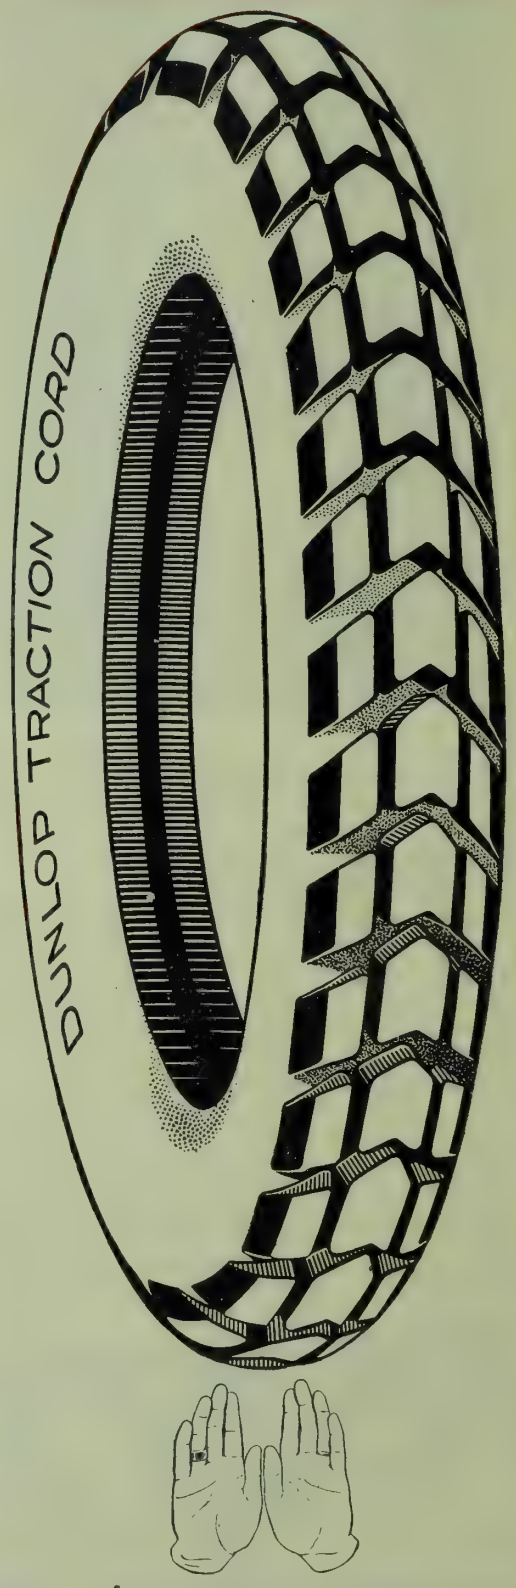
DUNLOP Double-Life, High-Mileage Cord and Fabric Tires Save You Money

Here's What Private Car Owners Say:

"The set of Dunlop Cord Tires, 36 x 4½ — two Traction and two Ribbed — have given entire satisfaction. I have run them continuously on my Cadillac car, and have taken a trip from Winnipeg to Toronto and return, and they have now covered in the neighborhood of **20,000 miles** and are still in good shape."—A. C. Turner, Winnipeg, Man.

"Would say I have been using your Traction Treads on both my big seven-passenger Steam "White" cars, and on my National and Fiat Gasoline cars, and must say I've done some fearful travelling, over **18,000 miles**, and no rim cuts so far, and I believe they'll go **18,000 miles** more."—M. N. Lenning, Esk Bank, Sask.



"I may say that I have had four Dunlop Cord Tires on my car, which have gone approximately **22,000 miles**, and I may state that I am just putting on four more 32 x 3½ (Straight Wall) Cord Tires of your make."—A. J. Barr, Ottawa, Ont.

Here's What Truck Owners Say:

"My first set of Dunlop Traction Tread Cord Tires, size 35 x 4½, bought in June, 1919, have been used continually on a Studebaker truck, and have run **18,000 miles.** They are still in good condition. Being perfectly satisfied with the service received from Dunlops, all my cars are now equipped with Dunlop Cords."—Forbes the Mover, Hamilton, Ont.

"A 34 x 4½ Dunlop Traction Tread Fabric Tire which I have equipped on one of my Ford delivery trucks, used for general cartage work, is now completing its third consecutive season and has never yet been off the rim. During this time the car has made many hard trips, including about twenty-five trips to Plattsburg, N.Y., and one trip to New York City, as well as several trips into Ontario and other points, which necessitated encountering roads of all descriptions. The total mileage, I estimate, is well over **20.000.**"—R. Clark, Montreal, Que.

"The tire which I brought back to be re-treaded ran **23,000 miles.** We used it on the back wheels of our Studebaker truck for the first 1,200 miles. This tire was not changed for nine months, and during that time needed practically no air, which speaks well for your tubes. I cannot speak too highly of Dunlop Tires for the delivery business. We deliver for thirty stores, and each of our cars covers about fifty miles a day, and has to keep running all the time."—The Independent Messenger, Parcel and Store Delivery Co., Ltd., Calgary, Alta.

Here's What Dealers Say:

"During the past season we have used many sets of Dunlop Fabric and Cord Tires as equipment on our cars. Our experience has been extremely satisfactory. There have been no complaints from any source. On the other hand, our customers frequently remarked on the fine results and big mileage obtained from Dunlop Tires. We are expecting to use your make as equipment on a much greater scale during the coming season."—The Crompton Car Company, Limited, Toronto, Ont.

"We have found the Dunlop Cords giving wonderful service and running up fine mileage records, especially on cars subject to overloading and hard usage. We have many satisfied customers who will use nothing but Dunlop Traction or Ribbed Cord Tires."—R. E. McMorran, Victoria, B.C.

"We can conscientiously recommend Dunlop Traction Treads to all our customers as both we and they honestly believe that no other tire on the market is giving like service and mileage. Adjustments asked for during the past eighteen months have been practically nil, while the mileage has been exceptionally high for this part of the country. We have tried them out against opposition makes and the result has always been in favor of 'Dunlop'."—Hargett's Motors, Limited, Mission City, B.C.

Here's What Livery and Bus-line People Say:

"We are to-day sending you a 32 x 3½ Dunlop Ribbed Cord Tire that we have just taken off a Dodge Touring Car, having run over **23,341 miles**, according to our records. We consider this a mighty fine record, and, in fact, is better service than we have been able to secure from any other make of tire."—Empress Auto and Taxi Co., Victoria, B.C.

"You cannot help being interested in hearing of the long mileage I received from a Dunlop 37 x 5 Traction Tread Cord Casing. The tire referred to I put on the rear of one of my Packard cars around November 1st, 1919. After running **11,000 miles** on the rear, I changed it and put it on the front. It delivered **19,000 miles** on the front wheel, making a total of **30,000 miles**, all told, and it was only a short while ago that its usefulness ended. I am glad to say, unsolicited, that the average mileage of all Dunlop Tires has been around **12,000** to **15,000** and **18,000 miles**, by which you can see they have proved eminently satisfactory."—The Packard Motor Livery, Toronto, Ont.

"I have been using Dunlop Cord Tires for the last fourteen months, and have about twenty-seven Dunlop 35 x 5 and 37 x 5 in use on my Cadillac cars in city and country livery business. I have as yet to have one not stand up. Some are still running and have gone **25,000 miles**, and I look for a few thousand miles more."—Maple Leaf Auto Livery, Winnipeg, Man.

Dunlop Tires, Both Cord and Fabric Construction, Are Giving Phenomenal Results

Big Tire Mileage is here to stay. Just as we predicted in 1912 that the Anti-Skid Tire would become standard, so we now predict that Big Tire Mileage will be among the things every motorist will consistently expect from now on.

The tire manufacturer who has to apologize for "short life" in his product will be automatically eliminated. Cord Tire construction made possible the coming of a tire that refuses to quit until many thousands of miles have been clicked off. The Cord Tire is now universally accepted as the master choice.

And Dunlop Cord Tire is now the most popular. "Dunlop" is at top form, but don't forget that while we are turning out Cord Tires — "Traction" or "Ribbed" — which seem almost uncanny in their ruggedness, that a great number of motorists still use Fabric Tires. These motorists wanted more mileage than Fabric Tires were usually expected to give. That set us thinking. We wondered why certain Cord Tire principles could not be applied to Fabric Tires.

We experimented and were amazed at the find. It was that we could at one sweep add 20% more mileage to Dunlop Fabric Tires and make them last longer than Fabric Tires were ever known to last. Result: Dunlop "Cord"-built Fabric Tires are giving some other makes of Cord Tires a run for their money at, of course, much lower first costs.

Dunlop Cord Tires are outdistancing any other Cord Tire made, no matter at what price the tire sells. The stories told on the opposite page prove all we claim. We have hundreds more like them. Note the remarkable distances covered and the splendid average for all parts of Canada on all makes of cars.

Barrel Trade

Are you overlooking this sales opportunity?

FARMERS are heavy consumers of oil. Automobiles, tractors and trucks all require correct lubrication.

For the machines that are in constant use, farmers realize they must have good oils.

And because of their large requirements, farmers buy oil in barrels and steel drums. We have many dealers who have made very profitable Gargoyle Mobiloils sales by intensively cultivating the local farm field.

One dealer called a number of his farm customers on the telephone and asked if he could supply them with Gargoyle Mobiloils to last them over the season. In many cases this resulted in immediate sales of one or two barrels of oil.

Another man put a drum of Gargoyle Mobiloils in his car and toured the surrounding district with this sample, talking to farmers about the economy and the high quality of Gargoyle Mobiloils. He sold six drums the first day and more later.

It would pay you to adopt similar methods in your business and, above all, you *can* remind farmers who come into your store to stock up oils for the season's needs. Prominently display cans of Gargoyle Mobiloils in your window and inside your store. By hanging our tractor, truck and automobile charts in conspicuous places, you show farmers that you are competent to supply their lubrication needs. This has often brought about prompt and rapid growth in oil sales.

GARGOYLE

Mobiloils

Chart of Recommendations

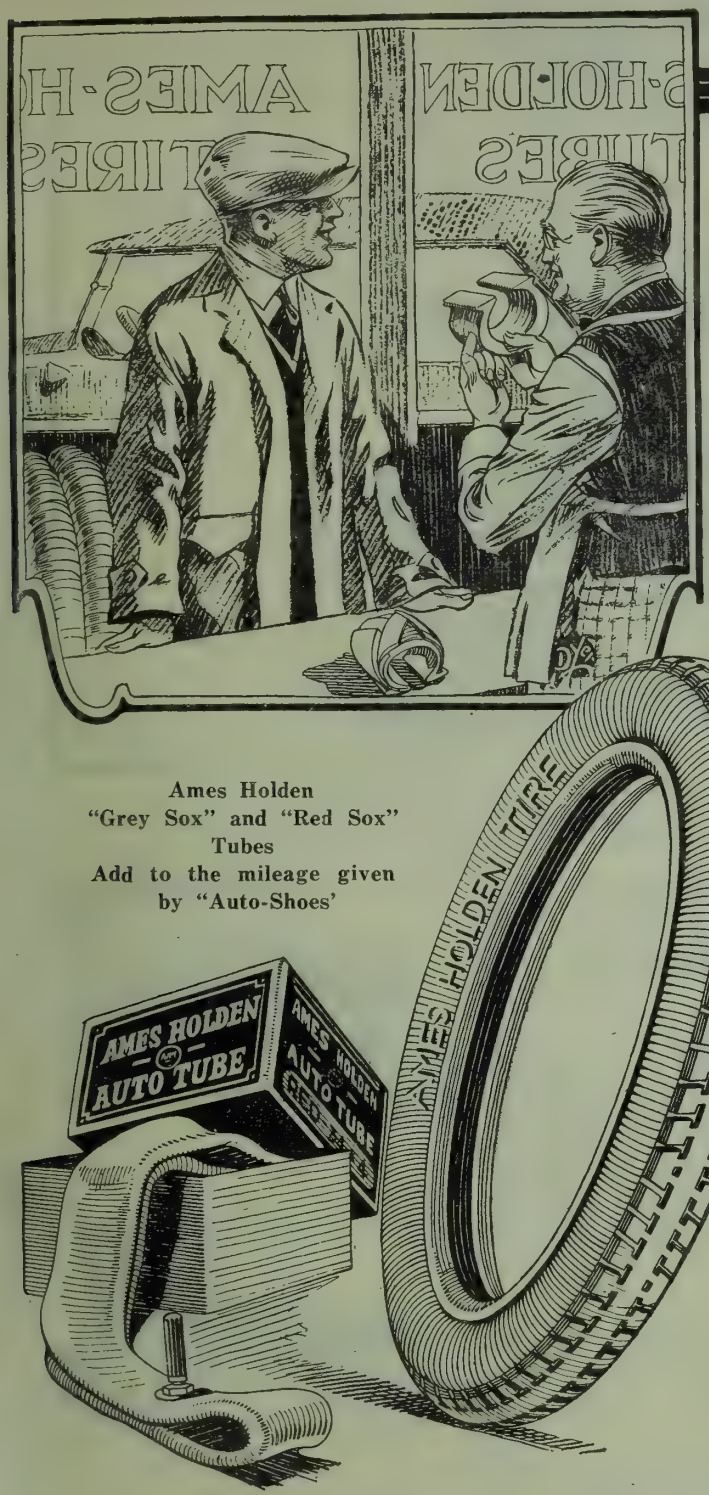
How to Read the Chart:

THE correct grades of Gargoyle Mobiloils for engine lubrication of both passenger and commercial cars are specified in the Chart below.

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendations should be followed during the entire period when freezing temperatures may be experienced.

The recommendations for prominent makes of engines used in many cars are listed separately for convenience.



The Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

Ames Holden "Grey Sox" and "Red Sox" Tubes Add to the mileage given by "Auto-Shoes'

AHM System

Your Approbation Valued

We recognize your importance in the scheme of selling tires.

We are frankly anxious to enlist your friendliest co-operation in the distribution of Ames Holden "Auto-Shoes."

To do that we must show due regard for your interests—protect you, help you and work with you.

To protect you we first of all make tires—Ames Holden "Auto-Shoes"—that give mileage much in excess of present standards.

To help you, we are guaranteeing Ames Holden "Auto-Shoes" against any defect in material or workmanship that may arise at any time in the life of an "Auto-Shoe."

And we adjust on that basis without quibble or red tape—accept your word and your customers' statements absolutely.

We are working with you by giving you our fullest support—friendliest support—in making sales and keeping your customers.

These are just points picked from our dealer policy that seeks to arrive at a new relationship between ourselves and you. Write and let us explain this policy more fully.

If You Don't Sell Tires,— WHY?

A Hardware Dealer makes a larger profit on the sale of a Tire than on a dozen ordinary articles of merchandise. Why, then, do not ALL Hardware men sell Tires and go to some trouble to develop Tire Sales? It will pay. It has been done hundreds of times. First get a good line to handle, like—

Gutta Percha (CORD) Tires (FABRIC)

They are "best sellers" because they give most value. Get our prices and terms.

MARBLE'S Outing Equipment

Vacation Needs

Vacation brings a demand for outing equipment — don't let stocks get low. Marble's hunting and fish knives, safety pocket and camp axes, gun sights and cleaners sell to every outdoor man. These prices are list—liberal discounts—order of your jobber. Get Marble's new trade catalog.

Safety Folding Fish Knife

Blade is sharp at back of point for ripping—back is dandy fish scaler. All round tool—rigid as one-piece knife when open. List price $1.50.

Trout Knife

Designed especially for cleaning trout—great for all fish. Finest cutlery steel, 5⅝ in. long—fits the pocket. With metal bound leather sheath, 75c.

Waterproof Matchbox

Keeps matches dry, even under water. Seamless brass, nickel-plated. Size 10 ga. shell, 60c.

Here is a Good Opportunity

(Read it over carefully)

The Manufacturers of

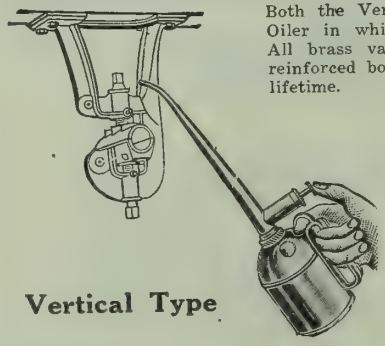
D-B CARBON REMOVER

have a proposition to offer you, Mr. Dealer. Through an extensive and continuous advertising campaign every motorist will be informed that **D-B Carbon Remover** can be tried without incurring any expense to themselves if it does not prove satisfactory.

This is true! Our plan is to let you actually give out on trial thirty-six cans of **D-B Carbon Remover** as you wish, and if your customers are not satisfied with the result, they return the cans to you.

"We have confidence in our product."

Auto Jack says:



D-B Carbon Remover cleans the dirtiest engine in thirty minutes without removing the cylinder heads. It does not cut compression, and is not injurious to the metal.

Manufacturers of and Dealers in

Transmission Oil
Auto Oil
Neatsfoot Oil
Tanners' Oil
Lard Oil
Cutting Oil
Lustriene Floor Oil
METEOR Spark Plugs
Boiler Compound
Linseed Oil Soap

and all kinds of Lubricating Oil and Greases, etc.

Velvet Lubricant is suitable for transmission, differential and cup lubrication, does not stiffen up in the cold so as to cause any inconvenience in shifting the gears, and will not become thin in hot weather, having been specially treated to meet the requirements of the varied weather conditions. Coats the gears to make them silent, will work into the smallest openings where oil will travel, and lubricate every bearing perfectly.

"Lubriko" Auto Oil is the most highly refined neutral oil for automobile lubrication, possessing high fire test, so that it retains its body under extreme heat.

After many years' practical experience in oils we produced this brand, and we offer it to dealers, knowing it to be of the highest standard of quality for the lubrication of automobiles, stationary gas engines, motor boats, motor cycles, and all kinds of gas engines, whether air or water cooled. Made in light, medium and heavy consistencies.

Sells Because It Gives Maximum Economy
Trueform Jag

This is one of the many useful lines, for Shooters, supplied by the Fraser Company at Montreal.

Every Trueform Jag is scientifically constructed to such a size that when used in conjunction with Trueform Patches it has a 2″ bearing surface, which enters to the bottom of the grooves of the rifling.

The ball bearing handle permits it to turn with the rifling, thus producing a 100% efficiency cleaning combination.

Each Trueform patch can be used four times, presenting a clean surface on each occasion.

Better Because of the War!

For years our plant was under Government control. Every effort of our employees was centred on shell making.

Into every man in our employ was drilled the necessity of hair's-breadth accuracy.

Now that their efforts are again centred on the

LONDON ENGINE

the same attention to accuracy that was developed in war time is carried out by the experts retained in our employ.

The London Engine is as perfect as the shells that helped win the war.

Aloxite Cloth

"The Cloth That Cuts"

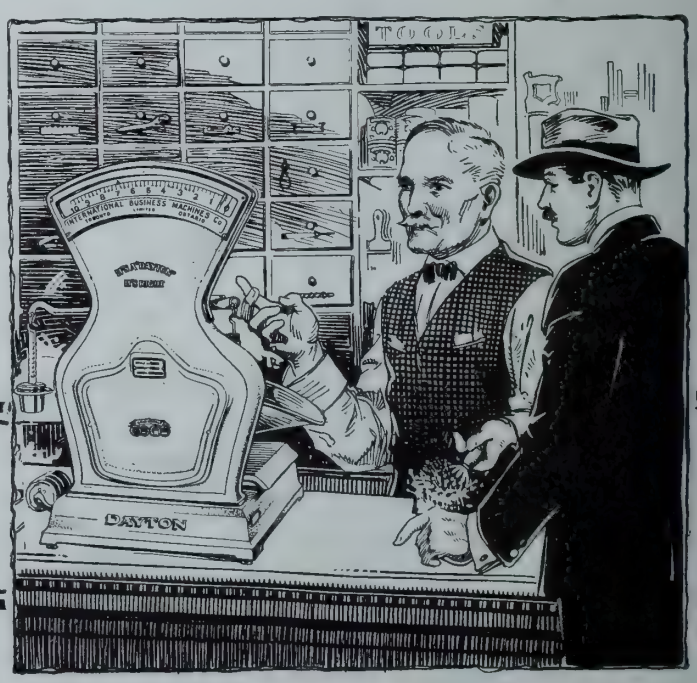
DAYTON

THE SCALE THAT COUNTS AND COMPUTES

For lighter work and larger profits in the hardware trade.

WHY should not the dealer in staple goods, which are not perishable, and do not deteriorate in value, not win out in a walk in the field of business?

Such a merchant may be careful and astute in buying. He may be proficient and successful in salesmanship. He may be vigilant and also successful in collections.



What, then, is the unseen parasite that eats the heart out of his business, leaving a shrunken, insignificant return—perhaps an actual loss, after every precaution seemingly has been taken to husband his resources?

The answer is: LOST OUNCES.
LOST OUNCES and lost fractions of ounces sap the vitality of a business with secret, merciless persistence. Lost ounces rob the many hardware dealers of the advantages they should enjoy as contrasted with their fellow-merchants who carry, say, stocks of perishable foodstuffs.

Profits lie in the last ounces at the bottom of the nail keg; in the last yards in the coil of wire.

The Dayton Hardware Scale insures this profit to the last ounce and to the last penny.

Why not, as a Hardware Dealer, provide yourself, at insignificant cost, with such PROFIT INSURANCE?

EXCLUSIVE

We'll be glad to explain to you any of the Dayton's numerous exclusive features. The counting scoop, which counts bolts, nuts, screws, and other small articles is a marvel of accuracy. See also the wire rack, which enables you to weigh coils of wire, rope, hose, etc., with ease and speed.

IF IT'S A DAYTON IT'S RIGHT

New!

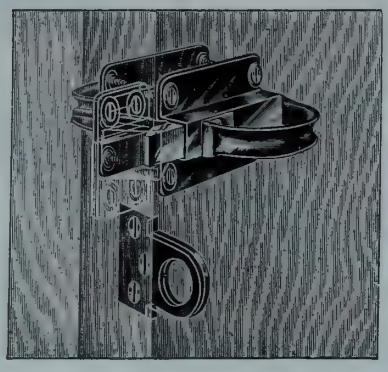
UNIVERSAL ELECTRIC RANGE

MUCH is expected where much has been given. High quality has been built into UNIVERSAL products for so long a time that it has become a habit for all time. The buying public always expects much from UNIVERSAL goods. It is our business to see that realization exceeds expectation.

THE fact that the UNIVERSAL Electric Range is a new offering implies that it possesses the traditional excellence which characterizes all UNIVERSAL products.

MANY ranges have many good features. It has remained for the UNIVERSAL to combine the best of all in ***one*** —not by process of imitation but by original and ingenious designing coupled with advanced methods of manufacture.

THE UNIVERSAL Range needs nothing to make it better. Everything that can be done has been done to give it that allness of excellence which safeguards UNIVERSAL reputation while promoting the dealer's best interests. The UNIVERSAL Range is ready for business—Are you?



Know Its Worth And How It Works

YOU should know all there is to be known about the UNIVERSAL Range—how it is made, what it contains, what it does. All these things will prove of benefit now and later. Write for bulletin which pictures and describes the UNIVERSAL Range in detail.

No. 1240

Two Latches With Selling Points That Make Sales

No. 1240 Barn Door Latch

A durable, common-sense latch with japanned frame and handles, tinned bolt and a sherardized spring of piano wire that cannot rust. A dependable latch that operates effectively and gives smooth, reliable action that wins friends and permanent, lasting trade for the dealer who sells it. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

This desirable latch possesses more points of quality and value—selling points—than any other thumb latch on the market. It is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place.

Packed one-half dozen in a box. 12 dozen in a case. Weight, 190 lbs. per case.

Canada Steel Goods Co., Limited

Profitable Service

OF ALL the nerve-racking, energy-sapping duties that fall to the lot of the average housewife, washing easily ranks first. Place a Miss Simplicity in a home, therefore, and you perform a service that will be appreciated by every single member in that home.

Miss Simplicity is a positive delight to sell because of the happy appeal it makes—an appeal upon which you can capitalize and make Miss Simplicity one of the fastest and easiest sellers you could ever wish to handle.

Miss Simplicity has everything in its favor. Expert and careful workmanship; high quality materials; perfect in every mechanical detail; simple yet efficient in operation, and priced, quality considered, at a very low figure.

Every home wired for electricity is an outlet for a Miss Simplicity. There are hundreds of prospects in your immediate neighborhood. Write now for our dealer offer. You will be agreeably surprised at the margin of profit on every sale.

We are prepared to supply our dealers with attractive advertising material to help along Miss Simplicity sales. Full particulars of this and of our liberal guarantee will be sent with our offer.

Its Value Has Multiplied

Always found on the best motor driven appliances.

The Washing-Machine Motor

Appreciation of Westinghouse reliability has multiplied with the increased consideration now given to motor-driven washers.

The careless buyer has been changed to the thoughtful buyer, who rightly demands the worth of his money in years of faithful appliance service.

Many leading dealers choose washing machines driven by Westinghouse Motors because they know the motor arms them with the strongest selling argument they can have—Reliable Service for years to come, that is the kind of sales guarantee that sells things to-day.

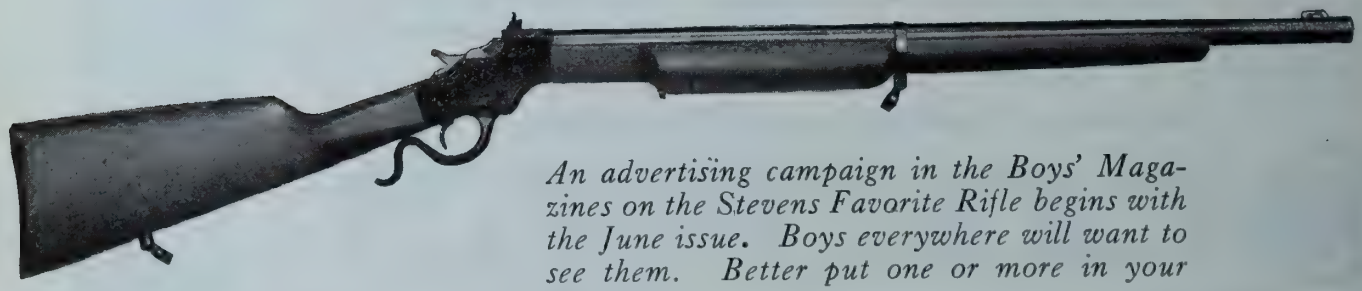
Stevens

TRADE MARK
—STEVENS—
REG. U. S. PAT. OFF. & FGN.

Stevens—and a Buyer's Market

"You'll have to sell this year. It's a Buyer's Market." Every dealer is saying that now.

If this is true, you will stock your store pretty carefully. You'll want to "play it safe."



So will your customers. They are buying just as carefully.

The STEVENS line with a 57 years' tradition of giving value received, has always sold easily wherever there is a market for firearms.

That's why STEVENS will appeal to you this year more than ever, and it will appeal to your customers, too.

It's always well to bear in mind that "Stevens sell a little easier"—particularly in a Buyer's Market.

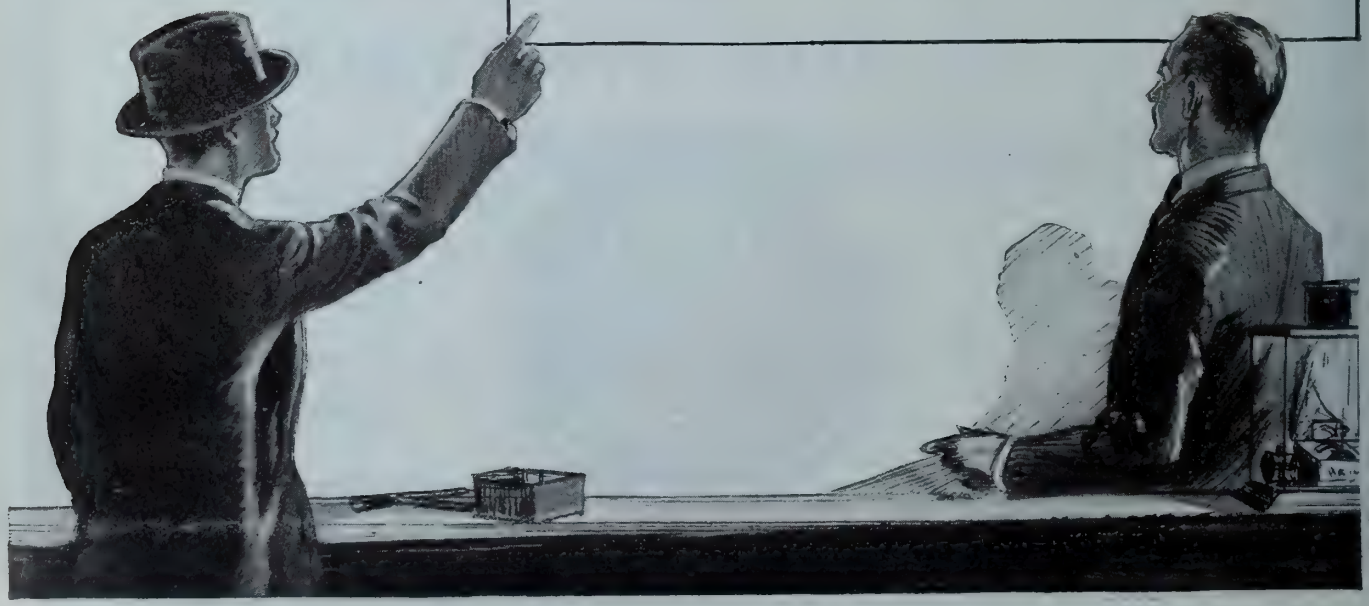
DU PONT THE STANDARD SHOTGUN POWDER

We Are Telling Shooters to Order From This Table of Standard Loads

Keep It Handy

WE are urging every shooter we can reach through the sportsmen's magazines, or in person, to go to his dealer and *order his shells direct from this list of Standard Loads.*

These loads meet the requirements of any hunter of small game in any section of the country—and the trapshooter as well. We know from our long experience that they will give the most satisfactory results. Use this table when ordering. Stock these loads heavily. Cut out "special" loads for which there is little demand, speed up your turnover and increase your profits.



Most Shooters Use Du Pont Shotgun Powders

STOCK THEM IN THESE STANDARD LOADS

DU PONT

Standard Twelve Gauge Loads

	DUPONT SMOKELESS Drams	DUPONT BLACK Drams	OUNCES Shot
Large Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼
Small and Medium Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼
Grouse, Partridge, Prairie Chicken	3 or 3¼	3¼	1⅛
Pheasants	3	3¼	1⅛
Geese	3½	3½	1⅛
Wild Turkey	3½	3½	1⅛
Squirrel, Rabbits	3	3¼	1⅛
Doves, Pigeons	3 or 3¼	3¼	1⅛
Quail	3 or 3¼	3¼	1 or 1⅛
Snipe, Woodcock	2¾ or 3	3	1 or 1⅛
Shore Birds	2¾ or 3	3	1 or 1⅛
Sora Rail	2¾ or 3	3	1 or 1⅛
Trap Loads	3 or 3⅛		1⅛ or 1¼

Facts that Every Dealer Should Know about Du Pont

It is a fact that tests on hundreds of thousands of shells loaded with all makes of powder show an average of 6% better pattern for "Du Pont" Powder.

Other reasons why "Du Pont" has the largest sale of any powder made:

—it gives the highest velocity.

* * *

—it develops the lowest initial pressure, which means less strain on the gun.

* * *

—it is the cleanest burning powder made.

* * *

—it is waterproof, dependable, and absolutely uniform year in and year out.

* * *

A shell is only as good as the powder it contains.

Williams' Superior Drop-Forged Hammers

Your customers, naturally, want *good* tools—tools built for service. You want to supply *good* tools, for one good tool sells another and repeat orders are the most profitable. Williams' Superior Hammers are good, dependable tools to handle, because:—

Their Heads, drop-forged from a special grade of tough steel, carefully hardened and tempered, neither crack, chip nor splinter.

They are fastened most securely and solidly to the handles—can't work loose—can't fly off.

Their Handles are made of the best grade of clear, straight-grained hickory, flared at the grip to prevent hand-slip.

The weight and length of each tool are properly proportioned to give perfect balance, and, hence, increased striking power.

All sizes and patterns. Catalog on request.

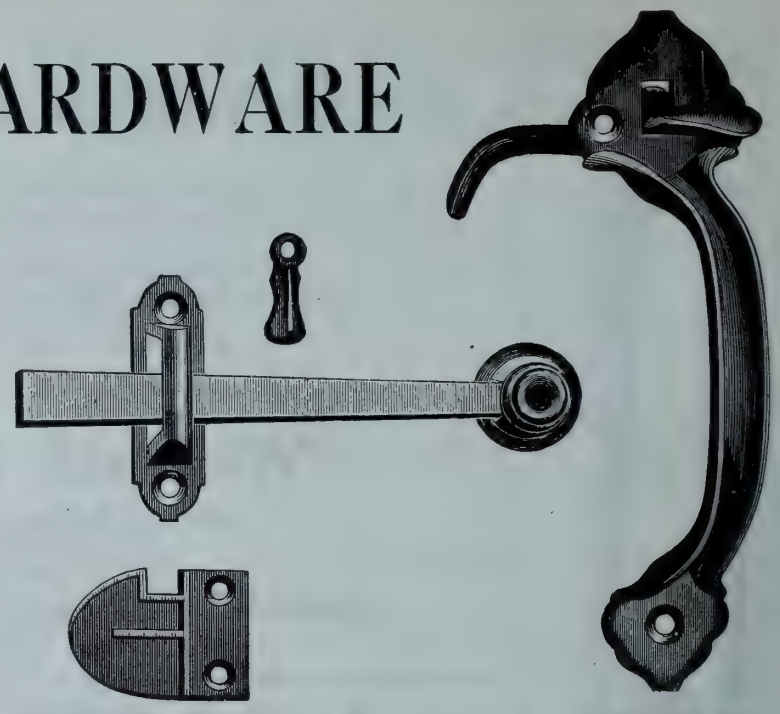
A VALVE for EVERY SERVICE

Sell Him a Valve With The Jenkins Diamond Mark

Fig. 141

You can sell your customer a Jenkins Valve with every confidence that, no matter how trying the service, it will furnish satisfactory performance year in and year out.

Jenkins Valves are made to serve. All the experience acquired since the first Jenkins was manufactured, back in 1864, is built into every "Diamond Marked" Valve. The quality of the metal, the even way in which the weight is distributed, the exacting service test to which every valve is subjected before leaving the factory—these are some of the factors that have made the Jenkins Diamond the symbol of valve satisfaction.



There's a valve for every customer's requirements in the Jenkins line. Catalog No. 8 describes the entire assortment. Write for free copy.

"Business was demoralized—I jumped in all the harder"

"In 1894," says Mr. L. S. Starrett, founder and active president of the L. S. Starrett Company, "business was demoralized, manufacturers discouraged and laborers thrown out of employment. I believed that the ebb in business would be followed by a flood tide. Therefore, instead of being discouraged, I 'jumped in all the harder,' and built an addition to my plant."

To-day, as in 1894, the Starrett program is for "jumping in all the harder."

Every hardware dealer to-day—for his own interest and the national good—should join in the Starrett policy of faith and courage—and "jump in all the harder" to hasten and heighten the tide of business in its returning flood.

Self-Fluxing Solder

Quicker, Better and Handier for Electrical Jobs

WHEN you get delicate electrical parts ready to solder, you want to apply the solder quickly with the least possible disturbance. That is just what you can do with Self-Fluxing Solder.

There's no possibility of the job getting out of control while you apply the flux--no danger of not applying enough or too much when you use

Kester Rosin-Core Wire Solder

This solder consists of a hollow core divided into tiny cells which hold just enough flux to insure a perfect bond when the solder surrounding them is melted off.

Self-Fluxing Means Fast Selling

Self-Fluxing Solder, by eliminating the trouble and loss of time attending the use of a separate flux, is building a big demand that no dealer can afford to overlook. It is made with acid-core for general work and with rosin-core for delicate electrical work. Sold in one-pound coils in cartons, and on one, five and ten-pound spools.

Send the coupon below for sample and prices. Investigate this easy-to-use, easy-to-stock, easy-to-sell solder.

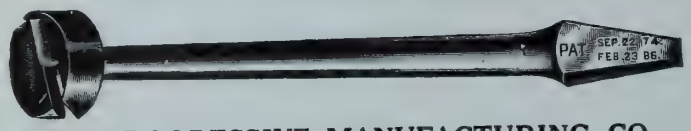
Why You Should Sell

TRADE MARK
Ventiplex
PADS



Because they can be absolutely depended upon to fully protect horses' shoulders from the effects of ill-fitting collars.

Because they are well made from a compound of Indian Rubber fibre, soft wool and hair, and equalize the strain of heavy pulling.

Because the demand for these collar pads is increasing and every sale you make means a satisfied customer and a liberal profit for yourself.

Ventiplex Pads are quick sellers—it pays to push them.

True Economy
Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take notice of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with smaller consumption of gas—that's true economy.

CURTIS AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.

2—Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.

3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.

4—Fan flywheel cools cylinder; increases capacity.

5—Inspectable valves, light weight, large area.

6—Valves cannot drop into cylinder and wreck machine.

7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.

8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.

9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks

For Air, Gas and Liquid

We make these tanks of best quality copper, steel welded throughout and thoroughly tested under Air Pressure to 300 lbs. before leaving our factory.

Write for price list and further particulars. Send names of prospective customers to whom we may mail literature.

We also make baths, steel factory equipment, gasoline tanks, truck tanks, etc.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

"The Sales Tax May be Absorbed"

Commissioner of Taxation Agrees That Sales Tax Need Not Be Shown Separately on Invoices as Formerly—Montreal and Toronto Wholesalers and Manufacturers Dissatisfied With This Ruling —U. S. Exchange is already a "Tax" so Why Tax It?

VARIOUS trade organizations are opposed to the new sales tax regulation which permits the manufacturer and wholesaler to absorb the new increased sales tax in costs and not show it separately on invoices.

Resulting from many inquiries being made to the secretary of the Montreal Board of Trade a telegram was forwarded to the Commissioner of Taxation, Ottawa, reading as follows: "Please advise if we are correct in asssuming that the omission from the budget resolution of the former provision that sales tax must be shown separately on invoices means that manufacturers and wholesalers may include this tax in overhead expenses."

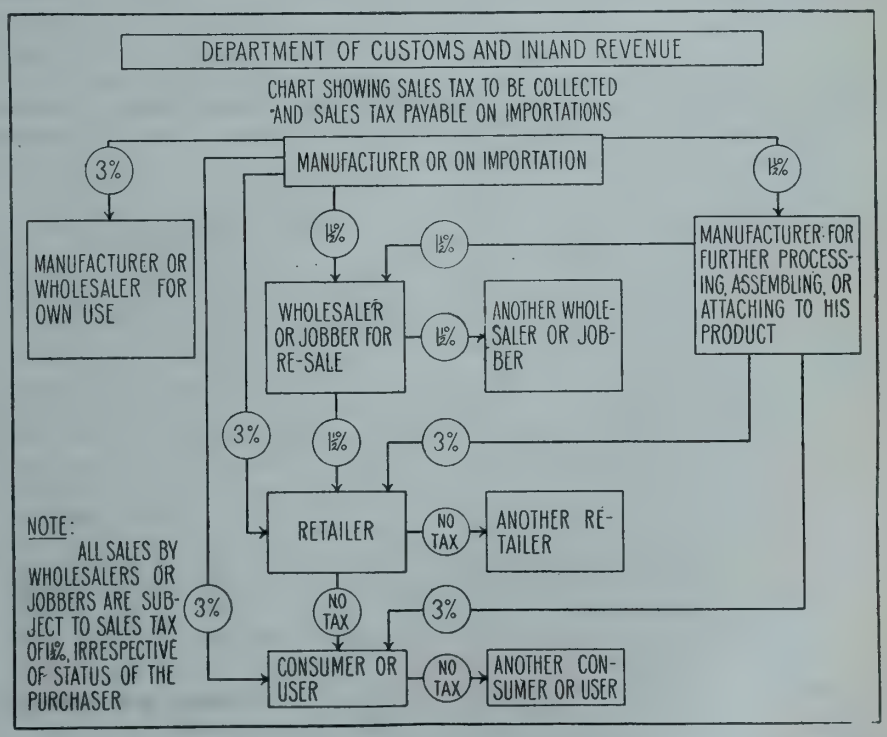
To this Mr. Breadner, commissioner of taxation, replied: "Sales tax may be absorbed by manufacturers and wholesalers."

Fear Unfair Competition

On the ground that unfair competition may follow, and where competition is keen the wholesaler will have to absorb the wholesalers' tax instead of showing it separately and collecting from the retailer, many trade organizations object to the change.

Commenting on this, one wholesaler stated to Hardware and Metal that the omission of this provision from the budget would be particularly troublesome in the cases of many staple lines in the hardware trade. For example, on wire nails, where only a small margin of profit is provided for. If the wholesaler was to absorb the tax, money would be lost on every sale. Various other lines offer the same objection to absorption of this tax.

While this is reason for a just complaint, and dealers can see no reason why such a provision was omitted, it was pointed out that the remedy seems to lie in closer co-operation among manufacturers and wholesalers. Getting together to either take some definite stand in affixing the sales tax to each invoice, or having the resale lists altered to meet the situation is the action necessary. In so far as the hardware trade is concerned, this is a matter that will no doubt find a prominent place in discussions through the Canadian Wholesale Hardware Association in the very near future.



Some Lines May Show Loss if Tax Absorbed

"If the budget proposals had made provision for making it compulsory to add the sales tax separately on each invoice, the method of obtaining the increased revenue would have been wholly satisfactory to us," is the comment of Geo. C. Davis, manager, Frothingham & Workman. "As it now stands we are faced with a situation that sales of some leading lines will show a loss if we have to absorb the tax through keen competition."

Mr. Davis named a few of the lines that would be thus affected, chief among them being wire nails. The margin of profit on these, as in many other lines where the resale price is set, is small, and if keen competition entered in on these commodities there would have to be a remedy forthcoming.

Fear Retailer May Overlook Tax if Not Shown Plainly

Discussing the new tax and tariff legislation with Hardware and Metal, a Toronto wholesale hardware merchant emphasized the necessity of showing the sales tax separately on invoices in order to facilitate the work of the wholesaler in keeping track of the amount due the

Above is a revision of the chart which formerly appeared in Hardware and Metal showing the amount of sales tax to be collected and sales tax payable on importations, as it affects all branches of the hardware trade. This is a useful chart for reference purposes.

Government each month for taxes collected, and also to make the tax very apparent to the retailer and so eliminate any confusion on his part. The retailer will then collect the tax except in certain cases, as on fixed price goods and small quantity purchases where a fraction might result.

Unwise to Tax Exchange

This wholesaler gave it as his opinion that the surtax on goods imported from the United States, such tax being based on the exchange, is an unwise measure in that the exchange is already a tax. He thought that the extra 5 per cent. against United States goods imported into Canada under the new regulations would not materially affect the sale of imported goods in this country, pointing out that Canadian importers have been paying duty on the United States prices plus the luxury taxes which prevail on some lines of hardware on the other side of the line. Canadian importers do not pay the luxury tax but duty is charged on such lines on a value which includes the amount of the tax.

This merchant still favors the turnover tax as a better solution of the problem of raising needed funds, giving it as his opinion that such a tax would be simple and would raise more money than the sales tax. Due to the fact that the trade is now thoroughly acquainted with the latter method of taxation, it was his opinion that an extension of the principle is probably better than to make any radical changes in the method.

Little Effect on Hardware Prices

New Tax and Tariff Legislation Not Expected to Affect Domestic or Imported Hardware—May Be Difficulty Enforcing Dumping Clause—Little Effect on Glass, Wares or Imported Steel Products

"WE have heard very little complaint but naturally no one 'hollers before he is hurt' and it may be that someone will be pinched in the working out of this and you may be sure if such is the case there will be a loud wail go up," said A. T. Enlow, president Dominion Sheet Metal Corp., Hamilton, Ont., discussing the new tax and tariff legislation.

"It would appear to us that the proposition is worked out on a very fair basis as proposed in the new budget and the main difficulty from our viewpoint will be to enforce the dumping clause if it is made effective, due to the fact that it is difficult for the customs authorities to get proper information when the market is changing frequently but nevertheless the clause is to our mind a very good one, as well as the clause adding the United States exchange to the valuation for duty, because the exchange is a part of the cost.

"It is all well enough for those who never wander from their own fireside to view with complacency the conditions which have made the exchange rate so favorable to the United States brought about largely by purchases unnecessarily on our part, but their attitude might change if they went to the other side occasionally and attempted to pass Canadian money.

"It is a fact to-day that in Cleveland Canadian currency is not only unacceptable but it is a source of ridicule and the butt of jokes and will not be taken by the average business man at even 50 per cent. discount, while the larger merchants arbitrarily deduct 20 per cent. regardless of what may be the ruling rate of exchange at the time.

"I think that we should back up the Minister of Finance to the extreme limit and, however painful it might be to curtail foreign purchases at least for a few years, we would find that Canadian currency would be at a premium instead of a discount because there is no country so blessed with all the fundamental elements of prosperity as Canada."

Effect on Importer of Steel Products

The new legislation affects the importers in that they will now have to pay the increased tax on all imports, but according to Mr. Hutchinson, of Drummond, McCall & Co., Ltd., Montreal, importers of steel products, the increased cost of approximately 5 per cent. on American imports will add that protection to Canadian manufacturers but will have little effect on the cost to the consumer as the importer will absorb the extra tax or add it to the cost of the material and show the 1½ per cent. sales tax on each invoice.

What is looked upon with greater interest by the above firm is the introduction into the House of Commons of the bill determining the value of currency for duty purposes, and the provisions for making the anti-dumping law more effective.

Will Not Greatly Affect Prices

"We do not think that the new taxation, as outlined in the budget, will affect the prices on domestic or imported hardware to any great extent, and we are of the opinion that the Government has done very well in increasing the taxes to pay our national debts," said H. G. Wright, president E. T. Wright Co., Ltd., Hamilton, Ont., to Hardware and Metal.

"Taxes are always a very tough proposition, and are welcomed by nobody, but the fact remains that we have to raise an enormous amount of money to pay our debts.

"The writer would be glad to see the Government levy the turnover tax, then everyone would do their fair share, and I believe that the Government would raise a very great revenue from this source.

"There are thousands of small businesses that pay no tax to amount to anything, and the cry put up about the hardship of tax on food is all nonsense. There is no more hardship on food than there is on the 'Wrico' boiler.

"If the average family buys $10 worth of groceries, with a 2 per cent. turnover tax, they pay 20 cents. Then there are the barbers, shoe shine parlors and hundreds of other businesses like these. If they would all pay the 2 per cent. tax it would bring in an enormous amount of money and be the least felt of any tax that could be levied."

W. R. Hobbs, manager of the Consolidated Plate Glass Co., in discussing the new budget taxes, and the result of the change in value for duty on window glass, stated that owing to the exchange value of the Belgian franc making substantial gains in recent weeks, window glass is at present little affected, the franc having now reached well up to

(Continued on page 41)

NEW TAXES EFFECTIVE FROM MAY 10

Much confusion has been caused in some quarters by the publication in certain newspapers of the statement that the new taxation announced by the Budget is effective from May 12. The correct date of May 10 appeared in the report outlined by Hardware and Metal and the Collector of Customs and Inland Revenue, Toronto, confirms this date. This error in certain reports has caused some manufacturers a good deal of trouble in order to collect the extra tax. In some cases the individual firms may have to foot the bill because of someone's error, according to the statement made to Hardware and Metal by one manufacturer.

Unique Display Idea Pulls Business

H. Wolfhard & Co., Hardware Merchants, Kitchener, Ont., Arrange Series of Displays Showing Goods as They Appear in Actual Use in One Window and Display of Smaller Accessories for That Line in Other Window—Co-operate With Plumber in Showing Complete Bathroom Set

One of the series of window displays being arranged by H. Wolfhard & Co., Kitchener, Ont., showing various lines of hardware as they appear in actual use. The bathroom takes up one window, while other accessories are shown in the other window. This display soon brought a generous demand for bathroom small fixtures. The arrangement in the case of plumbing goods is worked in conjunction with a plumbing and heating firm in order to give the bathroom effect. Other displays in the series included the showing of a complete dining-room in the one window, with an arrangement of tableware in the other. A laundry display followed, with a laundry shown on the one hand and a display of smaller accessories on the other. Furniture in some cases is borrowed from other stores to make the setting complete. Others in the series included a kitchen display, and an interior painting display contrasting the effect of the use of paint.

EFFECTIVE window display, coupled with seasonable and well-planned demonstrations of various lines are the principal selling features to which the H. Wolfhard & Co., hardware, of Kitchener, Ont., attribute the even tenor of their trade. For several weeks the firm devoted considerable time to the planning of co-operative window display and according to the statement made to Hardware and Metal by W. K. Weber, manager of the store, the effort has been well rewarded with sales returns.

In the accompanying illustration will be seen a bathroom display which is one of a series of room displays the firm has found especially effective. Both of the large windows devoted to the display are designed to attract attention first to the general room effect and next to the particular needs of the room as can be supplied from various hardware lines. The room takes up one window, while the separate bathroom fixtures are displayed in the other. Mr. Weber declared, when questioned regarding the results, that the display had not been in the window a day when a generous demand for bathroom small fixtures began to be reported by the clerks.

Dining-Room Outfit Shown

Previous to the bathroom display which is at present occupying the space of both of Wolfhard's windows, a dining-room was shown in the east window, while the west window was devoted to an excellent arrangement of tableware, both cut glass and silver. The effect of this was identical with that of the bathroom display—an immediate demand for tableware of all kinds. Mr. Weber stated that he found the dining-room window an excellent medium for the display of casseroles, jardinieres and other such lines required in the appointment of a well-ordered dining-room.

A Laundry Display

The dining-room window was followed by a laundry display which was equally attractive, and which had equal results in creating demands for the smaller accessories as well as the larger items, such as washing machines and stationary tubs. In connection with the bathroom and laundry windows the G. Ruppel Company, plumbers and heaters, who are associated with the Wolfhard Company, in this department, co-operated in the display. They profited equally by the co-operation.

Borrow Furniture

Mr. Weber in relating the success obtained through the use of these special windows stated that in the kitchen and dining-room display, his firm was not the only firm to profit. He explained that several items of furniture were borrowed from local furniture dealers. There were actual cases in which these displays sold some of the articles of furniture loaned by the contributing stores.

Interior Painting Display

The next window which the firm planned was an interior painting display. This consisted of an interior scene showing a room in which the finished wall was contrasted with the unfinished. This display was a source of inspiration to customers, as it showed their interior

decorating problems from a new angle.

Minor Repair Requirements in Demand

Speaking of trade generally, Mr. Weber stated that Kitchener, as far as his store is concerned, is in an unusually fortunate situation from the viewpoint of trade. The population of the city has always had a reputation for thrift. This reputation has been well borne out in the present depression. While there are many home-owners idle at present owing to unemployment, they are by no means in a state of penury. This is evidenced by the unusually brisk trade that has been done by Wolfhard's in all lines that contribute to minor repairs in the house.

The home-owning element in Kitchener are said to have well kept bank balances and these have played an excellent part in sustaining trade. Mr. Weber thinks the hardware trade reflects this condition more than any other. Paints for interior work and even exterior work have had a large call during the period of depression which other lines have felt. This is taken as an evidence that the men out of work are spending their idle time beautifying their homes and making many small repairs around their houses, the supplies for which naturally bring them to the hardware store.

Novel Advertising For Hardware Store

J. & P. Davignon, Hardware Merchants, Montreal, Adopt Use of Miniature Wagon on Which Advertisements of Various Hardware Lines Appear

THE latest addition to the establishment of J. & P. Davignon, hardware, 1030 Ontario St. East, Montreal, is in the form of an advertising scheme comprising a team of carefully groomed ponies, with glittering harness, hauling a miniature covered wagon closely resembling a house and including "Tom Thumb," the miniature driver. This conveyance may be seen almost every day on the streets of Montreal, and while a great attraction for the kiddies, has also proved a unique method of letting the public know that this firm is carrying on a hardware business at the corner of Ontario and Dorion streets.

The small wagon is really a work of art, with its highly polished finish, but apart from this the advertising feature is brought out on sides, back and top. Both sides and back are of wall board and easily removed and replaced by another scene. The top, or roof, is also lettered, reading the household needs that are specialized by this hardware store.

Featuring Hardware Lines

For the initial trip of the conveyance, stoves are featured on one side (the combination gas and coal range), an electric washing machine on the other, while a vacuum cleaner adorns the rear. In each case a lady is shown operating. When looking at each display, especially from the curb, a very realistic appearance of the inside of a kitchen or laundry room is given, so carefully have the designs been painted. The different points of the article are brought to attention by an arrow pointing to the feature and naming it both in English and French.

"Our next panels to be inserted will advertise perhaps refrigerators, bicycles and oil stoves, or other lines that are seasonable," said Mr. Davignon.

Don't Allow Appearance to Become "Stale"

It is needless to mention the number of articles that can be featured. Suffice to say there are enough lines in the hardware store to keep this wagon busy every week in the year, not allowing the appearance on the streets to become "stale" to the public, at the same time making sure the articles are seasonable and saleable.

That results have been obtained, enough to warrant the expenditure, is the firm belief of Mr. Davignon, claiming that money spent on advertising and featuring certain store sections has brought their store to the standard it now holds.

Miniature wagon, driven by "Tom Thumb" and used by J. & P. Davignon, hardware merchants, of Montreal, as a novel advertising scheme. The panels in the sides and back of the wagon can be changed to feature various lines of hardware. The innovation is said to have not only interested the kiddies, but to have brought response from adults as well. Returns are said to have justified the outlay in assisting the other methods of advertising the store departments.

Yesterdays Are Passed

The problems of to-day require plans of to-day.

Re-adjusted minds must of necessity precede a reconstructed commerce.

We must stop depending on the past and begin to penetrate the present in order to anticipate and participate in the future.

Trying to solve present problems with past plans is about as effectual as attempting to compete with electricity with the tallow candle—it spells failure.

Many of our todays are failures because we are using yesterday's methods.

What are we all doing in the way of changing our methods.

It will not do to watch for business to come back. We must run after it, grab hold of it, turn it around and force it back—with better methods.

It seems to the writer that the trouble with this country is that a great many people are sitting around waiting for prosperity to start. They have not made the proper effort of changing stale methods, nor to secure new tools. As I see it, prosperity has not got any self-starter. You have got to do the starting.

F. E. MUTTON,
Vice-President International Business Machines Company, Ltd.

Active Trade in Hardware Specialties

Conditions in Building Trades in Some Parts of Country Look Promising—Export Trade in Hardware Is Good

COL. ARTHUR F. HATCH, general manager of the Canada Steel Goods Co., Ltd., Hamilton, Ont., stated this week that he and other officials had reason to be optimistic regarding the future, for the reason that the company with present prices 20 per cent. less than they were one year ago had done a volume of business during the year that was considerably greater than the year before.

Col. Hatch said that conditions in the building trades in Hamilton, Sarnia, Windsor and the province of Quebec looked particularly promising.

"It is the export trade, however," said Col. Hatch, "that is most gratifying at present. We have found this trade to be fairly good, and have experienced no difficulty in getting our money. We have found good markets for our wares in Cuba, Panama, India, New Zealand and Australia. South America does not appear to be quite normal yet, as the large ports, I understand, are congested with merchandise, which no one can buy because the banks refuse to lend any money."

While several other local plants are running on short time the Canada Steel Goods Co., Ltd., has kept its staff fully engaged. Its steel mill is operating day and night, and a large forging plant is likely to be erected at no distant date.

FACTORY CLOSING HELPS GARDEN TOOL TRADE.

Kingston.—The hardware dealers in Gananoque are looking for a record year in the sale of garden tools. The factories in the town are only working three and four days a week, and there is a campaign on to boom gardening, so the workmen will save the expense of buying vegetables and thus relieve their living expenses for the year.

Ottawa Merchants Stop "Donation" Nuisance

Donations in Various Forms a Serious Inconvenience and Financial Loss to Merchants—Agreements to Refuse Such Future Demands

CLAIMING that the importunities of those who are in the habit of conducting tombolas, euchres, concerts, etc., for charitable and other purposes seeking prizes and donations, is a serious inconvenience and financial loss to the merchants, the Ottawa branch of the Retail Merchants' Association of Canada has launched a campaign to put a stop to it. At a special meeting of the branch the following resolution was unanimously adopted:

"Whereas, the merchants and manufacturers of the city are beset from time to time with requests from the public for donations, tombola prizes, advertisements to church magazines, purchases of tickets, floor and window space in stores, be it resolved that petitions be circulated amongst the merchants and manufacturers asking them to pledge themselves to refuse such demands in future."

It was pointed out by some of the merchants that the indiscriminate canvassing of merchants and manufacturers for donations of different descriptions had reached such a pitch that it had become a nuisance, and something had to be done. As a result of the meeting it was decided to appoint twenty teams, comprised of members of the association, who will conduct an active canvass of the merchants and manufacturers of Ottawa for the purpose of having them sign agreements against giving donations in the future.

Are You Observing Half-Holiday or Early Closing?

AS IN past years HARDWARE AND METAL will assist travellers and merchants by providing detailed information concerning the observance of half-holidays or early closing in all towns and cities in Canada.

To make this list as complete as possible this information is desired from every retail hardware merchant. Please fill in attached coupon and forward to

Editor, Hardware and Metal
143 University Ave., Toronto, Ont.

Are the merchants of your town adopting a half-holiday this year? .....

If so, what day has been chosen? .....

During what months is this holiday in effect? .....

Have you early closing regulations? .....If so, at what time? .....

(Please give all details as to evenings and hours at which hardware stores close) .....

Are you observing Daylight Saving? .....If so, for what period? .....

(Sign)—Name of firm .....

Town or city and province .....

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, MAY 21, 1921

IN THE FIRST comments by Hardware and Metal on the Budget the danger of not compelling manufacturers and wholesalers to show the amount of the sales tax separately on invoices rather than to include it in costs, was emphasized. Action has been taken by Boards of Trade and other bodies during the past week to have this point cleared up.

* * *

A NUMBER of Canadian retail merchants have, in recent weeks, been murdered in cold blood by hold-up men who have found it necessary to resort to extreme measures for their own protection. It is a sad fact that in the majority of cases the murderers have escaped the penalty of the law. This recent leniency may soon reach the stage where a bounty will be placed on the heads of our peace-loving merchants and others.

* * *

IT IS contended by some merchants that the firearms legislation, even with the amendments as recently outlined, will have considerable effect upon Canadian tourist traffic. Visitors from the U.S. who visit Canada's hunting grounds will be able to get a hunting license but may have much difficulty getting a license to carry a gun, as only British subjects are exempted under certain provisions. Tourist traffic from the U.S. means much to Canada each year and it is not to be discouraged.

* * *

THE ANNOUNCEMENT that Canadian goods will be exempted from the Key Industries Protection Bill introduced in the British Parliament and which proposes a protective tax of 33 1-3 per cent. has been received with gratification by Canadian manufacturers as the original proposal did not exempt Canadian imports. This duty is for five years and, among other things, applies to scientific glassware, porcelain and instruments, magnetos, tungsten and its by-products, colors, coloring matter and fine chemicals.

Should Show Tax Separately

THE first week of the new taxes brought forth little protest with the exception of the effort being made to have it compulsory to show the amount of the sales tax separately on invoices from the manufacturer to the wholesaler and from the wholesaler to the retailer. The mere fact that the new regulations made no mention of the necessity of showing this tax separately left a question in the minds of some as to whether the plan outlined in the Budget of last year would be continued. Apparently there are some who will take advantage of the situation by not showing this tax separately and therefore a definite ruling on the matter is desirable. In this connection Commissioner of Taxation Breadner has ruled that manufacturers and wholesalers may absorb the tax, which leaves it optional whether the sales tax is shown separately or not.

There will be much confusion unless one definite line of action is followed, for one wholesaler may include the tax in his costs and not charge it at all; another may absorb it in his charge to the retailer and revise his lists to include the tax, and still another may show it separately from the invoice cost of the goods. From the wholesalers' standpoint the separate showing of the tax should be an advantage in providing a definite record of the amount due the Government on this account. Representations are being made to have this ruling altered and it will facilitate matters for the hardware trade if this is adjusted along the lines suggested.

The Value in Dollars and Cents

RETENTION and economy are perhaps the keynotes of many trade situations at this season, and because of this, dull periods in various business conditions have been reported.

The paint industry as a whole is an outstanding example of where trade is not only enjoying a brisk season, but is practically an isolated case of where the volume of turnover is, according to some maufacturers, exceeding previous records.

This condition is attributable to the recognition of paint as a preservative, and to the general practice of economy in connection with the various methods of paint application and use. The present paint activity is more than the ordinary seasonable demand, and the countrywide movement to repair, instead of buying new; to patch up in preference to expanding; to retrench on present equipment rather than invest in more up-to-date appliances, is accountable for the popularity of the "paint up" idea.

Automobile colors are prominent as regards volume of sales this year, and the cause of this is not hard to find. Automobile finishes are selling better than ever before, because more cars are being rejuvenated in this manner. Car owners have found this easier and more economical, than trading in old cars on the purchase price of new. Business in second-hand autos has also increased, and it is naturally recognized that higher prices prevail when these cars have been made attractive-looking through the application of fresh colors.

Country trade in ready-mixed paints and paint products is the backbone of the present unusual demand, and this is noteworthy from an economical viewpoint. The situation is somewhat unique in consideration of the fact that the buying power of the farmer has recently declined, because of the reductions evident in the prices of dairy products. It would therefore seem as though some farmers have been quick to realize the economy of using paint generously.

In connection with reports of local Clean Up Paint Up campaigns, as reproduced from all parts of Canada in this issue, it will be noted that the increased value of property through being adequately protected with paint, is one of the chief arguments. This increase in value has been reduced to a dollars and cents basis in some cases and presents an important argument which every merchant can use to good advantage to further the sale of paint for preservative as well as beautifying effect.

News of Western Canada

Western Hardware Merchants Optimistic

Active Bicycle Trade Expected Throughout West, Says J. W. Gibson, General Manager Canada Cycle & Motor Co., Toronto—U. S. Money May Help Conditions in B.C.

J. W. GIBSON, general manager Canada Cycle & Motor Co., Toronto, has returned from a four weeks' trip through the West, in which he also visited Pacific coast points. In conversation with Hardware and Metal, Mr. Gibson stated that all through the West there was a feeling of optimism in business circles. This is stated to prevail in some sections, notably Saskatoon, where for the last three or four years the crop has been a failure and where already difficulties have been experienced this year due to high winds. In many instances the farmers are said to be still holding their wheat and thus tying up capital. Conditions in British Columbia were said to be not quite so good, due to the slackness in the province's chief industries. The lumber cut is said to be only 40 per cent. of normal, little is being done in the salmon fisheries, as there are sufficient supplies ahead to do for some time. The low price of copper has resulted in a curtailment of mining operations. British Columbia is expecting a considerable inflow of U. S. money for various purposes during this year and if this materializes it may help the situation somewhat.

Mr. Gibson stated that bicycle dealers are expecting a big resumption of business and efforts toward that end are now being made in all sections. Hardware merchants are active in the sale of bicycles in the West, particularly in the smaller cities and towns, and it is stated that while their orders are smaller than in past years, they are being received more frequently, a careful buying policy being followed.

Western Notes

Margaret, Man.—A. M. Campbell, hardware, has been succeeded by P. R. Campbell.

Bruederheim, Alta.—H. Strong is commencing hardware business.

Business Papers at Washington

Secretary of Commerce Hon. Herbert Hoover has arranged to meet with business paper editors at Washington at regular intervals for the purpose of discussing in what way these papers can best serve the interests of the nation.

Mr. Hoover recognizes that these papers have a real field and that they are performing a real service. It is the part of good politics for him to take advantage of their columns.

The plan of meeting with these editors gives the latter a new and vital interest in affairs at Washington and they are far more likely to give intelligent assistance to a government department that is ready to meet with them and give them the facts than with one that leaves them to dig for what they can find.

The fact that Hon. Herbert Hoover considers it worth while to confer with business paper editors shows the standing the business press has attained in the United States.

When the Secretary of Commerce at Washington links up with the 500 business papers of the States and through them gets to the millions of people that these papers reach in the business world, he has placed his department in line with a force that is going to be of real assistance to him.

Little Effect on Hardware

(Continued from page 36)

50 per cent. of normal value, when showing at 9½ cents. When the exchange rate was around 7 and 7¼ cents this would have a great effect, but the gain of over 30 per cent. has greatly strengthened this situation. Of course the glass importer is burdened with the 2½ per cent. importers' tax, but this also will have little result on the market at present considering the unsettled conditions that now exist.

The 1½ per cent. sales tax will be shown on each invoice, but at present the additional cost will have to be absorbed. Plate glass is now on the basis of the pound sterling but Mr. Hobbs is doubtful whether this will continue.

"We suppose the Government has adopted that form of tax which would be least objectionable to the public and yet produce the revenue required. All taxes of this kind are objectionable because an interference with trade, but the Government seems to have adopted that with least resistance," said John Fennell, hardware merchant, Kitchener, Ont.

"The public dislike the luxury tax. Many of us thought the turnover tax would have been the least objectionable but it has strong opposition from the manufacturers. We think the wiser course has been adopted."

Hardware retailers in discussing the new tax legislation with Hardware and Metal generally express satisfaction with the new taxation, and believe it to be a very fair method of collecting the needed extra revenue, realizing also that their business will be little interfered with. In discussing whether the sales tax should be shown separately on invoices it is quite obvious that the majority are for the separate item and are not looking for the unfair competition to be brought to their hands through dealers having the option of either placing or omitting the tax. They believe that if the tax is not shown separately it will be included in some form and no benefit will be derived by the merchants themselves.

There are some, however, who are of the opinion that a better form of taxation would have been to tax only the importer or manufacturer, but as one person stated, "We are fortunate to have only an increase in present taxes levied upon us, and the abolishing of the luxury tax alone is reason enough for us to consider the budget wholly satisfactory."

Increase in Cost of U.S. Goods in Canada

"During past years with the exchange adverse to Canada, it has been our custom as well as of many other American manufacturers enjoying a large Canadian trade to absorb the exchange," said F. J. Macdonell, manager Victor Saw Works, Hamilton, Ont., to Hardware and Metal.

"Under the new taxation the consumer pays, of course. The Government have seen fit to collect this difference in exchange through taxation, and as we see it, it is going to mean an increased cost of goods such as our own line which are not and cannot be manufactured in Canada at a profit at the present time."

Events in the Trade

Business Changes

St. Johns, Que.—Marchessault & Frere, hardware, have dissolved partnership.

The hardware firm of Ryan & Co. at Amherstburg, Ont., has been dissolved. Mr. Ryan is going into business as a sanitary and heating engineer.

H. Ferguson, of Harrietsville, Ont., has purchased the business of A. F. Freeborn at Denfield and has commenced stock-taking.

R. A. Cowan, of Courtright, has sold his hardware business to Garrie Hoskin, of Strathroy.

NEW FIRMS

Birchcliff, Ont.—Rush Bros. have commenced hardware business.

Toronto.—E. D. Linstead has commenced hardware business at 1920 Danforth Ave.

Gordon Frame, of Forest, Ont., has purchased the tinsmithing business of Garrie B. Hoskin, at Strathroy. Mr. Hoskin leaves this week for Courtright where he is starting in the hardware business.

FIRE LOSS

E. H. Graham, general merchant at Cromarty, Ont., sustained a serious loss in the destruction of his store and dwelling by fire. It is understood that he will rebuild.

Obituary

Robert L. Bridgman, New England, representative of the L. S. Starrett Co., Athol, Mass., is dead.

J. H. Hickman, general merchant, of Dorchester, N.B. and president of the J. Hickman Co., Port Elgin, N. B., died at his home in Dorchester.

T. S. Jardine, general merchant, died at Palmyra, Ont. Prior to locating in Palmyra he was in business at Wallacetown, Ont.

J. W. Spaulding, of Frothingham & Workman, Ltd., Montreal, died at his home this week. Mr. Spaulding has been connected with the above firm for the past forty years, and will be greatly missed.

Personal

Roy M. Wolvin, president British Empire Steel Corporation, has returned to England to keep in touch with British interests in connection with plans of the steel corporation.

Among the recent visitors to Moncton were: Thomas F. Kelley, Hamilton, N.B. Dominion sales manager for the Hoover Suction Sweeper Co., of Canton, Ohio, and C. H. Whitelock, Maritime representative. They were calling on their local agents, Sumner Co., Ltd.

E. A. Adams, advertising manager for the Fairbanks-Morse Co., has resigned from that position after some years of service. He is now Canadian representative for the Lovejoy Shock Absorber Co. Mr. MacGruder is the successor to Mr. Adams at the advertising department of the Canadian Fairbanks-Morse Co., at the Montreal office.

Capt. C. W. Wiggs, treasurer of the Mechanics Supply Co., Limited, Quebec, accompanied by his sister, Miss Edith Wiggs, have returned from a visit to England and France. Capt. Wiggs had the pleasure of visiting many of his old friends in France, where he had seen four years' service during the war. They also took the opportunity of visiting the battle fields. Another of their pleasant experiences was an aeroplane trip from London to Paris by "air-liner."

Howard Hill, of the firm of J. W. Hill & Son, hardware merchants, Tabor, Alta., was a visitor at the Toronto office of Hardware and Metal this week. Mr. Hill has been visiting parts of the United States and is of the opinion that conditions generally are being readjusted more effectively in this country than in the United States. Crop outlook in the West, from the standpoint of the number of acres seeded, is said to be good.

The following, who were connected with iron and steel operations in the United States and Canada, were elected to membership in the Iron and Steel Institute at the annual meeting in London last week: Robert Montgomery Bird, metallurgist, Bethlehem, Pa.; Herman A. Brassert, consulting engineeer, Chicago; Robert Hobson, president Steel Co. of Canada, Hamilton, Ont.; J. D. Jones, general manager Algoma Steel Corporation, Saulte Ste Marie, Ontario; George V. Luerssen, Metallurgist, Carpenter Steel Co., Reading Pa.; H. A. Morin, general manager Nieu Steel Corporation, Ltd., Welland, Ontario; Roy M. Wolvin, president Dominion Steel Corporation, Montreal.

Mr. and Mrs. J. P. Seybold will celebrate their golden wedding on May 25. While Mr. Seybold has been actively connected with the Independent Cordage Co., Ltd., for a past number of years, he still remains a member of the board of directors of Starke-Seybold, Ltd., of Montreal. In spite of their now mature age, Mr. and Mrs. Seybold are quite able to enjoy a trip to St. Catharines and Welland, Ont., to celebrate their long term of married life.

C. J. Brown, buyer at Lewis Bros., Ltd., Montreal, is confined to his bed with a severe attack of gall stones.

Joseph Hopper, of Coatsworth, Ont., and his daughter, Miss Florence, left on Wednesday for Montreal and sail on the steamer Victoria for England, where they will spend the summer.

INCORPORATIONS

Walkerville, Ont.—Walker Twist Drill & Tool Co., Ltd., has obtained Dominion charter.

The Auto Rim Co., Ltd., has been incorporated in Ontario, with capital of $250,000, head office in Toronto, to manufacture automobile rims, automobile parts, etc.

Keele & Moore, Ltd., has been incorporated in Ontario with capital of $80,000, head office in Toronto, to manufacture automobiles, cyles, bicycles, motors, engines and accessories.

Fraser Hardware Co., Ltd., has been incorporated in Ontario, with capital of $40,000, head office in Galt, Ont., to carry on both wholesale and retail hardware business.

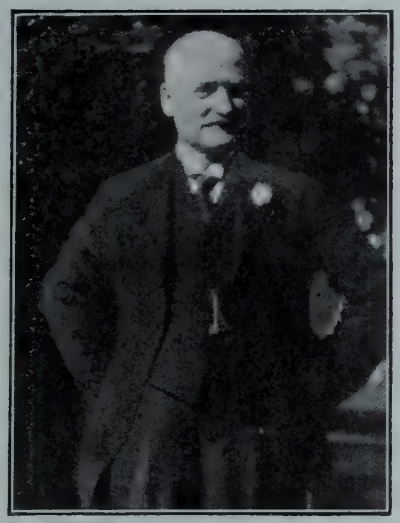
Jack Frost Ice Machine Co., Ltd., has been incorporated in Ontario with capital of one million dollars and head office in Toronto, to manufacture laundry machinery, refrigerating machinery, refrigerators, pumps, furnaces, stoves, ranges, boilers, lavatories, baths, heaters, sinks, toilet wares, pipes for water, gas, sanitation and drainage, household implements and utensils.

Hardware Store Robbed

Montreal. — Sporting goods valued at $1,000, including rifles, fishing tackle, baseballs, bats, gloves, etc., were taken by burglars last week from the store of Omer DeSerres, 204 St. Denis Street.

Adds Hardware Stock

A full line of hardware is being added to the business by W. B. Chambers, plumber and tinsmith, of Welland.



Mr. Chambers was formerly a hardware merchant in this town.

Hardware Man Heads New R. M. A. Branch

J. S. Moir, Hardware Merchant, of Arnprior, Ont., Elected President of New Branch—E. M. Trowern Outlines Advantages of Association

THE Retail Merchants' Association of Canada has been further strengthened by the formation of a branch at Arnprior, Ont. In the organization proceedings the local officials were assisted by Messrs. E. M. Trowern, secretary of the Dominion Board; Frederick Perrott, assistant secretary of the Dominion Board, and J. C. Campbell, secretary of the Eastern Ontario and Ottawa District branch, who motored from Ottawa for the occasion. To a hardware merchant, in the person of J. S. Moir, fell the honor of being elected unanimously the first president. Mr. Moir is one of Arnprior's leading citizens and business men, who has always taken a keen and active interest in the affairs of the town, having been responsible for the introduction of several measures which have advanced the welfare of both the municipality and its citizens.

The other officers of the new branch: First Vice-President, E. D. Osborne; Second Vice-President, E. C. Almond; Secretary, T. S. Church; treasurer, P. Gardner.

J. S. MOIR,
Hardware merchant, Arnprior, Ont., elected first president of a new branch of the R.M.A., established locally.

Upholds Budget Announcement re Taxes

In his usual enthusiastic manner E. M. Trowern outlined the many advantages which had accrued to retail merchants in every part of Canada through their connection with the association. He said there were very few towns in the Dominion worthy of the name where there was not an active and flourishing branch of the association. He strongly emphasized the importance of co-operation and asserted that it was only through unity of action that the retail merchants could hope to secure favorable Government legislation in the past. While the provisions of the budget had not been made known at that time, he expressed confidence that they would be more or less favorable to the retail trade.

Writing to J. C. Campbell at Ottawa, the day after the budget announcement was made, the president of the new branch said: "I think the Retail Merchants' Association is to be congratulated upon the success it has attained in having the sales tax apply at the source. This will be a great source of satisfaction to merchants all over the country."

Western Ontario Notes

George Ratz & Sons, hardware merchants, at Mitchell, Ont., have purchased new and larger premises and will obtain possession next spring.

The old Royal Hotel building at the corner of Main and Goderich Sts., Seaforth, Ont., has been purchased by H. Edge, hardware merchant, who plans to remodel it into a modern store.

London, Ont.—This district had another bandit scare when Claude Shaw and his brother Orville were rounded up in a thick bush near Bothwell. They are charged with robbing several Bothwell stores including Dent's hardware.

E. V. Buchanan, general manager of the Utilities Commission at London, Ont., wants prices immediately on well drilling outfits and equipment.

The Canadian Oil Company, of Petrolea, Ont., contemplates erecting a new boiler house and making plant improvements that will cost $35,000.

BRITISH MANUFACTURERS REPRESENTATIVES VISITING CANADA

A pilgrimage of British manufacturers' representatives towards Canada has set in. Numbers of them have been arriving on almost every boat, both by Canadian and New York routes. Generally speaking, they have come to investigate the possibilities of doing business with Canadians. Intelligence reaches Toronto that many more are coming, and this year promises to be a banner one in this respect. Lines represented include pressure-gauges, disinfectants, door furniture, sporting goods, toys, traveling leather goods, bicycle accessories, lamps, etc.

Addresses New Division R. M. A.

MONTREAL.—M. Lapointe, Quebec provincial secretary of the Retail Merchants Association of Canada, addressed the organization meeting of the new division which has been formed at Hull, Que., to be known as the Hull and Quebec District. The organizing of this new division is encouraging to the Quebec executive of this association, as it is keenly felt that closer co-operation should exist among the merchants of this province. It is hoped the convention in Montreal on June 7, 8 and 9 will greatly assist the formation of other divisions, by forcing home to the delegates the utmost need of the closest co-operation

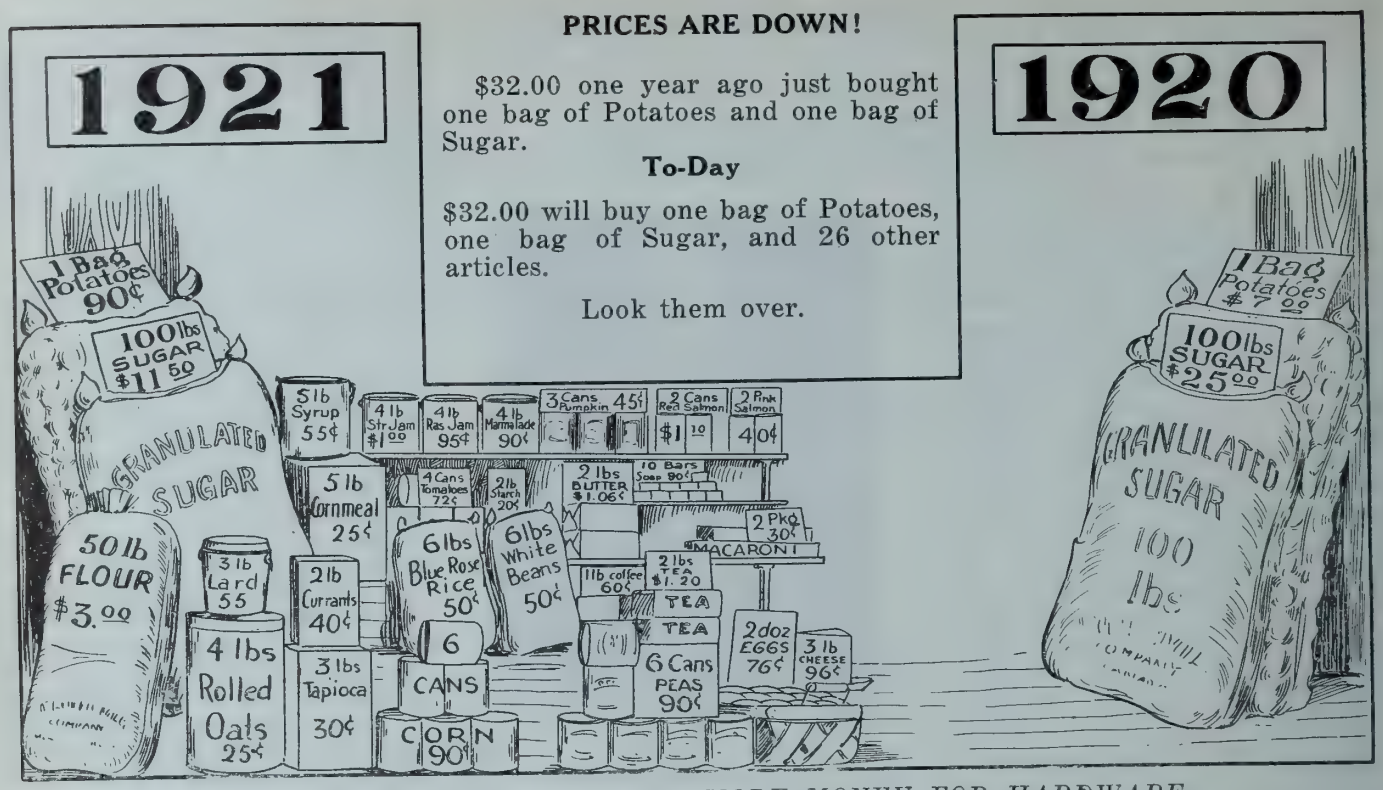
American Iron, Steel and Heavy Hardware Ass'n Convention

MONTREAL.—The American Iron, Steel and Heavy Hardware Association will hold their annual convention in Montreal this year on June 7, 8 and 9. Previously this convention has always been held in United States centres, and Montreal dealers are very anxious for a successful three days.

From present indications this will be a gathering both large and well representative of the iron and steel industry, both in Canada and the United States, at least from a jobbing standpoint. About 300 delegates will attend from the United States, including heads of the largest jobbers of heavy hardware, also representatives of the big steel mills. Invitations in the form of a circular letter are being sent to all Canadian manufacturers and wholesalers engaged in the steel industry, also an invitation to the members of the Board of Trade to attend the opening session. Sir George Foster is also invited to attend the gathering on the opening day. The programme for the three days will soon be available.

Canadians at Southern Hardware Jobbers' Convention

James Hardy, secretary and treasurer, and Col. Robert Starke, president Canadian Wholesale Hardware Association, were in attendance at the Southern Hardware Jobbers' Association, held in Atlantic City, which is associated with the American Hardware Manufacturers' Association.



The principal topic of the session was the present and future possibilities of better business, it being generally agreed that while there were indications of business improving, it would be a very slow recovery. On Thursday discussions were called for on the following subjects:

1. How soon will buyers' strike be broken?
2. Have prices touched bottom?
3. Necessity for or wisdom of guaranteeing prices against decline.
4. Name definite prices at time of purchase.

Opinions to the foregoing seemed to be:

1. Buyers' strike is broken.
2. Questionable.
3. Not necessary or desirable.
4. This should be done.

Discussions also took place with manufacturers on the following subjects: Screen Door and Window Situation, Nail and Wire Situation, Hame Situation, Axe Situation, Chain Situation, Hoe Situation, Bolt Situation.

THE HOUSEWIFE WILL HAVE MORE MONEY FOR HARDWARE

A window display suggestion made by a sister publication, Canadian Grocer, serving to illustrate the purchasing power in groceries of the dollar of to-day compared with last year at this time. This is an interesting point to the hardware merchant, as it indicates that the housewife, who is daily becoming a larger purchaser of hardware, will have more money to spend in the purchase of such lines as enamelware, aluminumware, washing machines, wringers, electrical appliances, paints and varnishes, cutlery, silverware, chinaware, vacuum cleaners, household brushes, mops and polishes, and the many other requirements which the housewife is desirous of owning and which might heretofore have not been purchased because the buying power of the dollar has been all too limited.

Hardware Merchant Wins Dayton Scale Contest

H. F. Prelipp, Hamilton Hardware Co., Wins First Prize; J. Robinson, Robinson Hardware Co., Toronto, Wins Second Prize—Many Hardware Merchants Among 372 Prize Winners

THE hardware trade was well represented among the winners and runners-up in the International Dayton Scale "Word" Contest as recently carried out by International Business Machines Co., Toronto. H. F. Prelipp, Hamilton Hardware Co., 316 King St. W., Hamilton, Ont., won the first prize of $300, followed by J. Robinson, Robinson Hardware Company, 195 Royce Avenue, Toronto, winner of the second prize of $200. A. D. MacIntyre, hardware, Woodville, Ont., won third prize of $100. W. Spooner, Edmonton, Alta., won fourth prize of $75; Anne R. Manning, Winnipeg, won fifth prize of $50; and J. E. Manning, Winnipeg, won sixth prize of $20.

Other prizes included thirty prizes of $15, twenty-five prizes of $10; 111 cash prizes of $5 and 200 prizes of $2.50 each. There were 372 cash prizes in all. These prizes were given to the contestants making up the largest list of words which could be constructed from the letters D-A-Y-T-O-N S-C-A-L-E-S, the contest ending on March 15.

The contest was open to retail merchants and their clerks in Canada and Newfoundland of the five kinds of stores that use any type of scale or other fixture as made by this company. It was a regulation that all the words should be in English and such as could be found in any standard dictionary, and that they be arranged in alphabetical order in columns. No "ties" were considered in the contest for the reason that each list was numbered consecutively on a numbering machine as it was received and of two lists of the same number of words the one with the earliest number as registered was first considered.

Winners of the $15 and $10 prizes were as follows:

$15.00 PRIZES

J. R. Campbell, Parry Sound, Ont.; H. W. Burnett, Winterbourne, Ont.; G. B. Wake, London, Ont.; R. P. Clifford, Toronto, Ont.; Miss J. Oliver, Toronto, Ont.; John Campbell, Parry Sound, Ont.; C. G. Summers, London, Ont.; Geo. Lumsden, London, Ont.; J. Bennet Hackey, West Bathurst, N.B.; John A. Drake, Bristol, N.B.; James Jensen, Vancouver, B.C.; P. J. Kennedy, Kensington, P.E.I.; Henry Nadeau, Grand Cascapedia, Que.; Reg. Hendy, Billings Bridge, Ont.; J. A. McIntosh, Kerrobert, Sask.; J. D. Allen, Bathurst, N.B.; A. J. Esser, Grimsby, Ont.; Monique Martin, Grand Falls, N.B.; C. P. Routcliffe, Toronto, Ont.; H. Pepper, Toronto, Ont.; Sidney Srobell, Peterborough, Ont.; I. H. Johnson, Melaval, Sask.; W. J. Johnson, Melaval, Sask.; Miss L. Pease, Vancouver, B.C.; F. O. Hicks, Walkerville, Ont.; N. H. Johnson, Melaval, Sask.; Rita Boyd, Prescott, Ont.; J. J. Smith, Clair, Sask.; L. A. Craig, Edmonton, Alta.; Lottie A. Craig, Edmonton, Alta.

$10.00 PRIZES

P. J. Tappin, Grenfell, Sask.; Lilly Bursey, Parry Sound, Ont.; Mrs. E. E. MacIntosh, Edmonton, Alta.; H. Collie, Enchant, Alta.; Miss I. Knowland, Winchester, Ont.; M. R. Forshner, Wallace, N.S.; R. N. Easton, The Pas, Man.; J. E. Best, Coutts, Alta.; Mrs. Eliz. Best, Coutts, Alta.; Cleona T. Best, Coutts, Alta.; L. Blanch Fulton, Truro, N.S.; Miss R. Nadeau, Grand Cascapedia, Que.; J. E. H. Easton, London, Ont.; Ernest Frost, Lomond, Alta.; Michael Kelly, St. John, N.B.; W. A. Relyea, Perth, Ont.; P. L. Frost, Travers, Alta.; L. J. Disch, Galt, Ont.; B. J. Radigan, Galt, Ont.; Annie Dyck, Hague, Sask.; Paul L. Doig, London, Ont.; H. C. MacLellan, Stellarton, N.S.; Nettie Dyck, Hague, Sask.; I. McDowell, Brandon, Man.; R. E. Fisher, Dundas, Ont.

ANNUAL MEETING OF HARDWARE ASSOCIATION OF U.S.

The tenth annual meeting of the National Hardware Association of the United States will be held in Cleveland Friday and Saturday, June 3 and 4.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of May 11, 1901:

"W. A. Drummond, who until recently has been manager of the hardware department of the Robert Simpson Co., Ltd., Toronto, has left for London, Ont., where he is to fill a responsible position at Wood's Fair."

* * *

"C. J. McLennan, Henry Mackey and F. A. Lane and others have been incorporated under the style of the McLennan Paint Co., Toronto, to acquire the business of the McLennan-French Paint Co."

* * *

"A Halifax despatch stated that the Nova Scotia Steel Co. has bonded their property to an English and American syndicate for 14 days for an exceedingly large figure."

* * *

"Thomas Ellin, of T. Ellin & Co., Sylvester Works, Sheffield, England, is in Toronto this week. It is two years since he last visited Canada."

* * *

"A. A. McMichael, of Toronto, vice-president and general manager of James Robertson & Co., Ltd., and also president of the Robertson-Godson Co., is paying a visit to Vancouver."

* * *

"The Canada Hardware Co., Montreal, have this week made their first delivery of supplies on account of the 52 car Government contract for the Maisonneuve wharf awarded them last fall. The first shipment consisted of six carloads."

* * *

"The Acme Can Works, Montreal, are now settled in their new quarters on Ontario Street and in full operation."

* * *

"Some quotations from the current markets in this issue are as follows: Barbed wire, 100 lb., $3.45; wire nails, 30 to 60 dy, $3; bar iron, $2.50 basis; sheet iron, black, 10 to 20 gauge, 100 lb., $3.50; pig lead, $6 per 100 lbs.; rope, sisal, 7-16 and larger, $10; cotton rope, all sizes, lb., 16c; turpentine, pure, in barrels, 63c; linseed oil, raw, 70c; white lead, pure, per cwt., $7.25; prepared paints, pure, liquid colors, $1.30 to $1.90 per gallon."

Canada's Trade During April

Imports Still Heavier Than Exports—Iron and Steel Exports Decline 50 Per Cent., Also Imports.

CANADA'S external trade in the new fiscal year commencing in April is following much the same pace as in the final months of the preceding year. Exports during April totalled $43,280,735 and imports were valued at $65,310,827, making an unfavorable trade balance of $23,030,000. As compared with April of last year exports decreased by $10,000,000 and imports fell off to the extent of nearly $33,000,000. Lower prices of all commodities account for a portion of the decreases. Agricultural exports are holding up best.

As compared with last year, exports of iron and steel, etc., declined more than 50 per cent. to $2,537,552; other ores, metals and metal manufacturers dropped from $2,917,418 last April to $1,356,982 for the month under review. Non-metallic minerals were exported to the value of $1,365,848, against $2,007,187 for April, 1920.

The importation of iron, steel and manufactures thereof dropped from $3,462,289 free and $15,102,494 dutiable in April of last year to $1,390,677 and $10,099,356 in the current report. A considerable amount of other decreases is accounted for by price declines.

Solve Problems of Incorporation

Decision of Privy Council Makes It Advisable for Companies Operating in More Than One Province to Have Dominion Charter

THE decision recently rendered by the Privy Council marks the conclusion of over twelve years' effort on the part of the Canadian Manufacturers Association to secure a solution of a number of difficult questions surrounding the incorporation and licensing of companies. Ever since Confederation, both the Dominion and the provinces have followed the practice of incorporating companies, but there has always been grave doubt as to their respective jurisdiction. There was doubt whether a provincial company was competent, under any circumstances, to carry on business outside the incorporating province. There was no doubt that a Dominion company was competent to carry on business in every province, but the question was whether such a company could be compelled to comply with the provincial laws requiring it practically to become incorporated in every province in which it sought to carry on business.

Dominion Companies' Status Upheld in Consolidated Appeal

The Privy Council, in the present consolidated appeals, holds that the Ontario, Manitoba and Saskatchewan Acts, in so far as they purport to apply to the Dominion Companies in question are ultra vires of the provincial legislatures, and that these companies are not, by reason of not having been licensed or registered under those Acts, precluded from carrying on business and exercising their powers in the three provinces and are not liable to the penalties prescribed for having so carried on business and exercised their powers.

The provinces which have such acts are Ontario, New Brunswick, Nova Scotia, Manitoba, Saskatchewan, Alberta and British Columbia. The District of Yukon has a similar ordinance.

The Act of the Province of Quebec specifically excepts Dominion companies, but companies incorporated in other provinces and other countries are required to become licensed in Quebec, as in the other provinces.

Practical Results

The practical results of the cases may be summarized as follows:—

1. Companies proposing to carry on business in more than one province should be incorporated under a Dominion charter.

2. Companies now carrying on business in one or more provinces not provincially chartered and licensed, may continue so to operate until it is desired to begin business in any additional province, when it will be expedient to take out a Dominion charter, rather than an additional provincial license.

3. Dominion companies should apply for a "License in Mortmain" from the Province of Ontario and British Columbia. The terms on which such licenses will be granted, it is understood, are at present under consideration by the authorities of the provinces.

The present decision of the Privy Council is far-reaching and interesting in that it upholds the corporate status of Dominion Commercial Companies, and in that it also clarifies a most disconcerting situation created by varying Acts and numerous conflicting decisions; without, however, encroaching upon the rights of the provinces to create companies with provincial objects.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

NEW FLUID SOLDER

What is claimed by the manufacturers to be an entirely new product for the soldering of all kinds of metals is Wyatt's fluid amalgam. This preparation is being handled and placed on the market by Wyatt's Products, of 225 Richmond street, Toronto, Ont., and the following are some of the claims made for it by the producers.

Amalgam is free from acid, is non-corrosive, non-explosive and non-inflammable. It has no poisonous fumes and will solder any metal or combination of metals, with the exception of aluminum. With it, in conjunction with solder, repairs of any kind can be made. It is said to be specially adaptable for repairing leaky pipes, boilers (domestic), radiators, farm implements, automobile parts, electric and other wire connections.

The mending of band saws has generally been considered a difficult task to properly perform. This the manufacturers claim amalgam will do without affecting the temper of the steel. Being practically harmless, it may be handled with impunity. The product is put up in bottles up to 8 oz. sizes, and in tins from pints to gallons. Free samples are being distributed.

"LITTLE JEWEL" SWEEPER

The Bissell Carpet Sweeper Company announce that the success of their "Little Daisy" and "Little Queen" models has been such that they are developing a larger and even finer pattern to be named "Bissell's Little Jewel." This new model is expected to be ready by August, with shipments following soon after in ample time for the Christmas trade.

ADJUSTABLE GEAR SHIFT EXTENSIONS

The M. & H. Novelty Co., 1466 W. 28th Street, Los Angeles, Cal., have recently put on the market a reversible extension lever by means of which it is claimed the driver of a car can, without changing position or leaning forward, with a single movement shift the gears easily and rapidly. The Hughes (Mellin's) adjustable gear shift extensions, as they are called, can be attached in a minute and adjusted to any position by simply setting the lock nut tight. They are said to take the strain out of gear shifting and give the stock car the conveniences which a custom built body is supposed to afford. All makes and styles of cars can be fitted.

DRILL BLOCKS AND CLAMPS

To meet the demand for an accurate set of V-blocks to be used in connection with the surface plate, angle iron, etc., a new set of drill blocks and clamps has been made by the L. S. Starrett Co., Athol Mass. The blocks are made of tool steel and hardened and ground throughout and the Vs are ground central, parallel and square with ends and sides, it is stated. The blocks are numbered in pairs so that the Vs in each block are always in alignment. Each

"Starrett" Drill Blocks

block is about 1¼ inches square, 1⅝ inches long, and has a clamping capacity of 1-inch diameter.

JOHNSTON CLEAR RAY REFLECTOR

The Johnston clear ray reflectors are stated to be a simple and efficient way to make headlights legal. The reflectors are made of aluminum, and the illustration shows how they are installed in the headlights. They are claimed to give most powerful driving light, and to be unbreakable, do not get out of alignment, and can be installed in two minutes. The makers state that with these reflectors ordinary plain glass fronts can be used, which, should they get broken, can be replaced at a cost of 30 cents, and further, auto lamps are usually made for thin glass and if a thick and irregular surface glass is used invariably dust and water get in, clouding the glass and rusting the reflector and reducing road illumination.

Johnston Clear-Ray reflectors, it is stated, avoid these disadvantages. They are made by the D. F. Johnston Mfg. Co., 587 Yonge St., Toronto, Ont.

KNAPP LIMO-SEDAN FAN.

A new electric fan has been put on the market by the Knapp Electric & Novelty Co., 511-513 West 51st St., New York, N.Y., and though it has been specially designed for automobile use in closed cars, ambulances and cabins of motor boats, it can be used in many other places. The Knapp "L.S." fan can be easily fastened to the ceiling of the car or any other part of the tonneau. A few feet of connecting cord and a control switch placed at a convenient point in the line connects fan to the storage battery of the car. The current consumption when running is 1 1-2 amperes, and as the storage battery is charged from the generator the cost to maintain is very small. The fan is finished in nickel, and bracket has a double joint with set pins for adjusting the fan at different angles.

APOLLO SPARK PLUGS

The Apollo spark plug manufactured by the Apollo Plug Mfg. Co., Birmingham, England, is now on the Canadian market and is being handled by the British Canadian Distributors, Ltd., 128 Queen Street, Ottawa, Ont., who are the sole distributors for Canada. The Apollo No. 1 super mica plug has been specially designed for high speed and high compression engines. It is insulated with mica throughout and is recommended for power, speed and reliability by the makers. The L.C.B. Ford model is stated to be a popular and reliable plug, clean to handle and will not rust. Apollo plugs are guaranteed to stand up well under strenuous tests and abnormal working conditions.

SENCA

The Geneva Cutlery Corporation of Geneva, N.Y., manufacturers of Genco razors, announce a new safety razor which they are placing upon the market.

One claim of the new razor is that of simplicity, there being but one part in addition to the blade.

The ease with which the blade can be inserted and removed, the firmness with which it is held in the razor and the construction of the guard are the other features that the Genco people hold for their razor.

The razor is made of brass heavily nickel-plated and packed in a black box lined with purple plush. There are small cartons for sharp and dull blades.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

CONTRASTING sharply with the recent declines in the hardware markets is the increase announced this week on rope and cordage.

Also prominent among this week's quotations is the increase of another 2 cents on linseed oil, while turpentine prices are unsettled. Rosin and shellac have also registered higher levels. The paint industry is experiencing a remarkable period of full activity.

Advances in the price of tin and lead are also evident in the ingot metal markets. Solder quotations are 2 cents per pound higher and zinc products show a slight price increase.

Range boiler prices are unsettled with a tendency to reduced quotations. Reductions are noted on one line of safety razors, taps, snow shovels and furnace scoops, and some lubricating oil prices are slightly lower. The primary markets remain generally unchanged; bar iron and steel, sheets and plates, pipe and fittings, brass goods, corrugated sheets and lead products all maintaining previous levels. Dealers announce a fairly satisfactory movement of summer lines, while collections are good. A prediction that the markets show signs of returning to a more normal tone has been based upon an increased volume of inquiries. The belief is prevalent that trade is generally developing a firmer trend with expectations of improvement for fall business.

Montreal Markets

MONTREAL, May 19.—Featuring the hardware market reports this week are both advances and declines. The chief advance is on rope quotations; the based price change on pure and manila is 1 cent per pound, while on sisal and lath yarn the advance is ½ cent per pound. In the lead products' report solders of all grades are 2 cents per pound higher. The chief among the declines is the reduction on auto tires and tubes, there are now quoted approximately 10 per cent. lower. Range boilers are now under a new price list, the reduction being from 10 to 27 per cent. on the different sizes.

In the smaller wares the Ever-Ready safety razor is now quoted at $9 per dozen, hammock hooks having also been reduced. The Penberthy line of valves, cocks, etc., are under a revision, also tools of Butterfield & Company manufacture. Richard- Wilcox barn door track and hangers now show new lower prices. Sheets and plates, corrugated sheets, boiler tubes, iron and steel, pipe and pipe fittings all remain unchanged in price, with a limited demand reported upon each of these lines. In the scrap market ferrous metals are reduced, these markets showing a very light demand. Ingots this week show slight fluctuation but mostly of an upward tendency.

Wholesalers generally report an active demand on the many seasonable lines that move at this time, particularly in the case of screen doors and windows.

Steel Snow Shovels Down

Montreal.

A reduction has been made in steel snow shovels for fall delivery. The new net prices were not available at time of going to press, but will be shown next week. This applies to such lines as the King, Queen and Prince.

Ever-Ready Razors $9 Dozen

Montreal.

At the commencement of the present month a new list was issued on Ever-Ready safety razors, and jobbers are now quoting $9.00 per dozen. The retail price will be $1.00. Blades will now cost 32 cents. in packages of six, and 64 cts. per package of twelve.

Penberthy Goods Revised

Montreal.

Lower quotations are given through a revision of the Penberthy line of valves, petcocks, ejectors, etc. Following are the discounts on some of the best sellers: Injectors, 50 off; ejectors, 60 off; petcocks, 33 1-3 off; and re-grinding globe and angle valves, 20 per cent. of list.

Sulphite Sheathing

Montreal.

Through a revision made in sulphite sheathing it is now selling at $5.75 per 100 pounds.

Screen Doors Sell Well

Montreal.

Jobbers report an active season in screen doors and windows. With fly time now well at hand dealers who had not placed their orders earlier are now having their supplies forwarded. Screen wire cloth is also moving in good volume. No change in price has been made on any of these lines.

Hammock Hooks Reduced

Montreal.

New lower prices are given on hammock hooks, No. 38 is now quoted at $2.15 per dozen pairs, and No. 48, $1.70 dozen pairs.

Taps and Dies Reduced

Montreal.

A new discount sheet has been issued for the catalogue of Butterfield & Co., makers of various lines of tools, revising many lines to lower levels. Following are the new discounts on their best known lines:

Reece's screw plates	35%
Ordinary machinists hand taps, 1-16 to 15-64	65%
¼ to ⅜	55%
Machine screw taps, No. 12 and smaller.	65%
Do., No. 14 and larger	55%
Pipe taps, right hand, up to 1 inch	70%
Do., 1¼ to 2 inch	65%
Do., 2¼ to 3 inch	45%
Do., 3¼ to 4 inch	30%
Stove bolt taps, 3-16 inch	65%
Do., ¼ in. and larger	55%

Hangers and Track Revised

Montreal.

Barn door track and hangers made by Richards-Wilcox are revised, a new price list being issued. Trolley track is quoted at 22½ cents per foot; No. 321 hangers, $22.80 dozen pairs; brackets, $2.20 dozen.

Rope Prices Advance

Montreal.

Following a continued firmness through the month of April, accompanied by advances in raw materials, rope now shows an advance in prices. In

The Power of the Paint Brush

The Dealer who carries B-H Products has a tried and trusted weapon of defence against every form of natural deterioration and decay.

Every structure, whether of wood or metal, will show, in time, the inevitable effect of wear and tear, and to counteract these elements there is a recognized and reliable surface-saver.

The general public is being educated on all sides that to paint is to preserve as well as to beautify, and a larger demand is the natural outcome.

Write for the B-H Agency Proposition

BRANDRAM-

MONTREAL, HALIFAX, St JOHN, TORONTO, WINNIPEG

If interested tear out this page and place with letters to be answered.

B-H Quality Sells Itself

The widespread publicity which we ourselves give to all B-H Products would avail us nothing were it not for the wonderful quality which goes into every can bearing our name.

A high-quality paint means a host of satisfied customers, so that B-H Quality is really the actual selling force and the Dealer's Store is the distributing point.

Do you get your share of the profits on this ever-increasing volume of business?

If not—

Write for the B-H Agency Proposition.

HENDERSON LIMITED

MEDICINE HAT, CALGARY, EDMONTON, VANCOUVER

If interested tear out this page and place with letters to be answered.

the primary markets manilla has advanced from 1 to 3 cents, sisal 1 cent per pound. Pure manilla and Beaver or New Zealand hemp has been advanced one cent per pound, sisal and lathyarn one-half cent. The new quotations are the following: Pure manilla, 25½ cents base; Beaver or New Zealand, 21 cents; sisal, 18½ cents; lathyarn, 18½ cents.

The demand has improved in April and up to the present materially over the quiet months previous, but it still below expectations for this season of the year.

Small Activity in Sheets

Montreal.

Quotations on sheets and plates show no change and are still quoted with a range. Prices vary among the different sources and buying continues light for this season. Although different factors have recently come to light that would tend towards lower prices, the opinion is expressed among many dealers that present quotations are likely to remain unchanged for some time. Building construction naturally has a bearing on the movement, but up to the present this has not stimulated buying to any extent. The main reason for inactivity seems to be that dealers will only buy as they require. Following are the current quotations:

PLATES—		
10 gauge	5 25	6 25
12 gauge	5 30	6 30
14 gauge	5 45	6 45
16 gauge	5 55	6 55
BLACK SHEETS—		
14 gauge	5 45	6 45
16 gauge	5 55	6 55
18-20 gauge	6 15	7 15
22-24 gauge	6 25	7 25
26 gauge	6 35	7 35
28 gauge	6 50	7 50

.. Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANIZED SHEETS—		
U.S. Standard—		
10¾ oz.	8 75	9 75
28 gauge	8 25	9 25
26 gauge	8 00	9 00
22 to 24 gauge	7 85	8 85
20 gauge	7 65	8 65
18 gauge	7 65	8 65
16 gauge	7 50	8 50
14 gauge	7 50	8 50
12 gauge	7 50	8 50
English Standard—	Queen Head	Fleur-de-Lis
28 gauge	10 00	9 25
26 gauge	9 75	9 00
24 gauge	9 15	8 60
22 gauge	8 80	8 15
18 and 20 gauge	8 10	8 00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Corrugated Sheets Unchanged

Montreal.

Corrugated sheets are now selling under the new list, as stated in last week's Hardware and Metal. Even with a reduction shown on all gauges, this has not stimulated trade to any extent. Dealers still report business very light and express themselves as feeling that little increased activity will be shown until building construction is greatly improved from what it is at present. Locally the unsettled feeling that existed a few weeks ago still exists, and even the lower prices have not had the effect that was hoped for among different jobbers and wholesalers. Whether this will improve in the near future is doubtful, but present figures are considered as well down to the bottom. Following are the quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Ferrous Metals Revised

Montreal.

Iron and steel scrap has been generally revised to lower levels, but conditions as a whole are unchanged, very little improvement being shown. Wrought iron, pipe scrap, stove plate and machinery cast are now quoted $1.50 per ton less, dealers being adverse to offering the higher prices. Non-ferrous metals, with the exception of lead, are very inactive. Lead has a little better demand and the price has again been raised one-half cent. Foreign markets are reported as stagnant, and until these improve, little betterment is hoped for by local dealers. Following are nominal quotations:

DEALERS' BUYING PRICES.	
Automobile tires	0 75
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 04½
Light copper	0 07¾
Lead, tea	0 02
Heavy copper	0 10½
Wrought iron, R. Rd., No. 1, per gr. ton	10 50
Malleable scrap (ton)	10 50
Pipe scrap (ton)	7 00
Stove plate, per ton	14 50
Heavy melting steel	6 50
No. 2 busheling	4 00
Boiler plate	10 00
No. 1 machinery cast, per gr. ton	22 50

Auto Tires Lower

Montreal.

A reduction of approximately 10 per cent. has been made on automobile tires and tubes. The rubber market has been easier for the past few weeks and manufacturers announce the above decline, keeping in line with the raw product situation. Following are quotations on a few of the best selling sizes:

AUTO TIRES—	Plain	Non-skid	Corded
30 x 3½	$15 00	$17 00	$23 00
32 x 3½	19 50	21 50	36 00
34 x 4	27 50	30 25	46 50

Iron and Steel Unchanged

Montreal.

No change is made in quotations on the different iron and steel bars, although the conditions surrounding these lines do not seem settled by any means. Some buying sources are of the opinion that lower prices will follow when the wage reductions through the different mills become effective. The demand is still light, and dealers are satisfied that little activity will be shown until conditions generally are improved and on a more settled basis. Current quotations are as follows:

IRON AND STEEL BARS	
Common bar iron, 100 lbs.	3 70
Refined iron	5 20
Iron finished machinery steel	3 75
Mild steel	3 70
Band steel	3 70
Single reeled machinery steel	5 75
Spring steel	5 00
Sleighshoe steel	3 70
Tire steel	3 90
Toe calk steel	4 60
Harrow tooth steel	3 85
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE.—Refined iron is aproximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

Pipe Fittings Steady

Montreal.

No change of importance is to be reported on pipe fittings. The many lines are holding steady, with the demand fair. Unchanged prices follow:

PIPE FITTINGS.	
Cast iron fittings	20%
Bushings, cast	30%
Do., malleable	30%
Flanges	27%
Plugs	22½%
Flange Unions	20%
Malleable Unions	40%
Dart Unions, black	29%
Do., galv.	8%
Nipples, ⅛ to 4 in. close and short	40%
Do., long	50%
Do., 4½ to 8 in., close and short	30%
Do., long	40%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 10%.

Wrought Pipe Dull

Montreal.

List No. 51 on wrought iron and steel pipe will be found on the current market pages, this being the present selling basis.

Business is quiet among the jobbing houses on pipe, merchants doubtless having their stocks now well sorted to meet the small consuming demand that exists at present. Although new lists have been issued quite often since the beginning of the year, the future of piping, as regards even lower prices, is doubtful.

Gasoline and Coal Oil Steady

Montreal.

Gasoline and coal oil is held at the decline of two weeks ago, gasoline selling at 37 cents for motor, and 42 for the higher grade. Coal oil is quoted at 24 cents.

Solders Raised in Price

Montreal.

Bar solders of all grades have been advanced 2 cents, wire solder 2½ cents per pound.

This is the result of a continued firm tendency in the lead and zinc markets, and with this continuing it would not be surprising if other lines of lead products follow in line with higher prices ruling in the near future. On the primary markets lead is again very firm, the slight easing at the close of last week being fully recovered. Zinc also continues to make gains with a fairly active demand. Added to these conditions a scarcity is becoming apparent in the above mentioned metals. Tin remains firm owing to a scarcity of English supplies, thus causing the manufactured lead products to have a very firm outlook. Following are quotations:

Lead pipe	0 12½
Lead waste	0 13½

Note.—Lead pipe is subject to a discount of 10%.

CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½

Do., wire, lb.	....	0 37½
Zinc sheets, casks	....	0 13
Do., broken lots	....	0 13½

Range Boilers Show Decline

Montreal.

A new price list is now issued on range boilers, showing a reduction on all sizes. The amount of the reduction varies from 10 to 27 per cent. on the different sizes and weights. One local manufacturer stated to Hardware and Metal that the lower range was beyond expectations and below what the actual value warranted, but owing to the recent unsettled market and price cutting the following list was adopted.

There is not yet time to determine whether the lower prices will stimulate business to any extent, but this seems doubtful as dealers do not feel disposed to purchase in any quantities, but rather confine buying to actual needs. The 30 gallon boiler is practically the only size selling, and these are moving in small orders compared with other years. Reduced quotations follow:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	8 75	11 25
35 gallon	11 25	.....
40 gallon	13 50	16 00
52 gallon	20 00	.....
66 gallon	28 00	.....
82 gallon	35 00	.....
100 gallon	45 00	.....
120 gallon	54 00	.....

Ingots Quiet but Steady

Montreal.

There has been a little fluctuation in prices of ingot metals this week, but mostly of a slightly upward nature. Present indications are for a quiet, but steady market, and until the demand improves no great change can be expected.

TIN. — Opinions vary toward this metal, but London holds fairly well in spite of the light consuming demand. The market locally remains firm owing to the scarcity of supplies from England. Quotations are advanced to 40½ cents.

COPPER.—Copper is higher both in London and New York and appears very strong at the moment. Whether this will last or not is hard to determine, and a reaction would not be surprising. Electro is quoted at 18 cts., casting 17½ cts.

SPELTER.—This metal is slightly easier in the U.S.A., but holds firm in London. The German production is doubtless piling up, and when released may have a depressing effect on the market. Local price unchanged at 8½ cents.

LEAD.—After the sharp and sustained advance in this metal a reaction was not surprising, and it eased off toward the end of the week. This has recovered, however, to some extent, and a firm market may be expected for the month at least. 7½ cents is the local price.

ANTIMONY.—This metal is reported quiet and has not responded to market fluctuations as some of the others have. No change is made in quotations, Chinese at 7¾ cents, high grade English 8½ cents.

ALUMINUM.—No change is reported in aluminum, it remaining dull on the market at 34 cents.

Toronto Markets

TORONTO, May 19.—In contrast to the general trend of reductions which have recently been prevalent is the increase announced this week in the prices of rope and cordage. Pure and beaver manila have advanced 1 cent per pound, and sisal rope and lath yarn are ½ cent higher.

Some minor price reductions are again evident, however, these including motor oils, snow shovels and furnace scoops. The basic materials remain practically unchanged, but while buying is fairly good, due to activity in seasonable lines, any future reductions in the price of staple commodities are calculated to increase demand. Range boiler prices are unsettled.

Dealers report a good movement of all summer lines, with more inquiries indicating a pending return to a brisker phase of activity than was apparent throughout the winter months. Trading in ingot metals is still light, with tin showing an advance of 2 cents over previous quotations, and lead also shows a slight increase. Collections continue to be fairly good, and the belief is spreading that trade will steadily improve, and that autumn business will be substantially better.

Rope and Cordage Increased

Toronto.

An advance is noted this week in price quotations on rope and cordage. Pure manila and beaver manila show an increase of one cent per pound, while sisal rope and lath yarn have been advanced one-half cents per pound.

According to the manufacturers and distributors of rope and cordage, the increases are attributed to the gradual rise in the price of fibre, the raw material market having registered an advance of over two cents per pound. While the present season is not considered opportune for corresponding increases, yet dealers report that they are forced to show a slight proportionate advance, owing to purchases of smaller quantities resulting in higher handling costs.

Although the new budget tax of 2½ per cent. on imports affects the rope and cordage industry, no importance is attached to this factor by distributors, who point out that hemp and fibre have both recently increased 2 or 3 cents, according to the various grades.

Prices are also holding well on cotton twines. This market has stiffened considerably, and raw cotton advanced one cent during the last two weeks. This has a tendency to at least prevent further declines in cotton cordage, but, according to local reports, advances in price of cotton products are not yet anticipated.

The revisions on manila rope and lath yarn are contained in the current market quotations.

Iron and Steel Bar Unchanged

Toronto.

Business in bar iron and steel has been far from large, but market reports indicate that prices are not yet being cut to any extent, either locally or in foreign markets. Except for current small orders, buyers are still adopting a waiting policy, and the demand is generally very slack.

Slight reductions have been reported from some quarters, but these are not general, and indicate only individual cuts. Conditions are still very unsettled, chiefly owing to the uncertainty of steel markets generally, and whether present steel prices will be either maintained or reduced.

The foreign metal market continues to be moderately active, but in local circles inactivity continues to be evident. The view is held by some that one reason why declines are not generally occurring is because business is so dull that there is no incentive for sellers to further reduce prices. It is not evident where increased demand would be developed by such reductions. If there were activity in the general markets, it would automatically encourage industrial inclinations.

A more generous list of inquiries for steel has given rise to a hopeful outlook from other quarters, and expressions of opinion appear to differ as to future prospects. A cautious attitude is prevalent, but a local increase in structural steel demands is expected by some dealers. Activity in the automobile trade has been the mainstay of the southern steel markets for some time. But the amount of future selling is likely to be governed by the consumer demand for steel products. Current quotations follow:

STEEL AND IRON		
Mild steel, 3-16 in.	....	4 50
Do., ¼ in. and heavier	....	4 00
Bar iron, 3-16 in.	....	4 50
Do., ¼ in. and heavier	....	8 75
Angle base	....	4 00

Spring steel	10 75	12 75
Crucible cast sheet steel	30 00	35 00
Mining drill steel	....	23 00
Common cast tool steel	....	20 00

Sleigh shoe steel	4 10	4 50
Norway iron	....	15 00
Toe caulk iron	5 40	6 00
Hoop steel	....	6 00

Boiler Prices Unsettled

Toronto.

The range boiler situation appears to be temporarily unsettled, and local quotations are very indefinite. Some cutting was reported to have taken place last week, and due to this keen competition among dealers, boilers are said to have been quoted at much below the current list. Market values indicate that any marked reductions would bring the prices below cost. The present nominal list is as follows:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	12 00	15 00
35 gallon	15 00	17 00
40 gallon	17 00	19 00
52 gallon	24 00	28 00
66 gallon	32 00	38 00
82 gallon	40 00	50 00
100 gallon	50 00	60 00
120 gallon	60 00	70 00

Boiler Tube Prices Unchanged

Toronto.

Prices on boiler tubes remain unchanged this week; the new lower quotations recently in effect on lapweld tubing still holding. A slow sorting movement is apparent on both seamless and lapweld. Following are the current quotations:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	$26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	$25 00
2 inch	29 25	22 00
2¼ inch	33 00	25 00
2½ inch	41 75	27 00
3 inch	49 25	35 00
3½ inch	63 50	40 00
4 inch	85 00	50 25

House Brooms Reduced

Toronto.

Reductions are announced in the prices of house brooms and the declines average from 35 cents on the more popular grade to a reduction of $1.05 on the higher values. Present stocks are reported to be ample, while a slackening in demand is apparent. The new quotations are contained in the current market pages.

Corrugated Prices Steady

Toronto.

Corrugated sheets remain at the lower quotations shown last week, and the market conditions also continue unchanged, with just a slight tendency towards seasonable improvement. Present price list follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Activity in Range Sales

Toronto.

Ranges and stoves of various kinds have recently increased in demand. Chief among these items reported to be selling well at this time are electric ranges, oil stoves, gas ranges, oil stove ovens and similar products.

Solder Prices Advance

Toronto.

A firmer tone continues in lead and zinc products, and the outlook is reported as brighter. A fair quantity of small orders is being received, but no exceptional business is expected. Lead is quoted as very strong on the primary markets, and another advance in price developed. Increases in solder prices have resulted, the new quotation being 2 cents per pound higher than the previous level. Other quotations remain unchanged.

LEAD AND ZINC GOODS

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½

Warm Air Furnace Enquiries

Toronto.

Dealers report that there has been a noticeable increase in the number of inquiries for warm air furnaces.

Compression Prices Hold

Toronto.

The readjustment in quotations on standard compression work, announced last week, still remains in effect. No direct change in market conditions is apparent and the following prevailing quotations are expected to hold:

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	29%
Do., Fuller	25%
Flatway stop and waste cocks, standard	40%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%

Quick opening No. 3633	37%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

No Change in Belting

Toronto.

Conditions show a very slight improvement on leather belting and laces, but the market is still below normal, and little immediate improvement can be expected. Dealers are still purchasing according to present requirements only. No changes in prices are anticipated until next fall, when some reductions or readjustment on a lower basis are looked for in some quarters. Future revisions are, however, not generally quoted, as the market in hides is uncertain.

Snow Shovels Reduced

Toronto.

Reductions are quoted for fall delivery on some lines of snow shovels. The new prices are announced as follows:

SNOW SHOVELS — Long handle, per doz., $7.85; D. hanndle, $9.50; D. King or equal, $10.50.

Malleable Fittings Revised

Toronto.

General conditions with regard to pipe fittings are reported as unchanged. Price quotations remain steady with the exception of malleable fittings, where a slight revision is shown in classes B and C. Following are the current figures:

PIPE FITTINGS

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 24	0 34
Class C	0 15	0 24

Oil Prices Lower

Toronto.

Reductions are announced in the current prices of Polarine oils and in the various grades of Gargoyle Mobiloil. The changes are due to the general market conditions prevailing, and follow on the recent declines in gasoline and coal oil. The quotation on Polarine has been reduced 25 cents per gallon and on Gargoyle Mobiloil from 15 to 25 cents on the different grades. The new figures will be found on the current market pages.

Electric Goods in Demand

Toronto.

A brisk demand for electric irons and electric toasters is now in evidence. Allied lines are also moving out well.

Eavetrough Prices Steady

Toronto.

The new discount quoted last week on conductor pipe and eavestrough still remains in effect. Except for the development of a more optimistic tone among dealers, there has been no apparent change. Industrial activity is looked for in some quarters with the advent of summer weather, and this is expected to create a slightly better demand for these products. The following are current prices:

TROUGH (Eave)

O. G., Square Bead and half round. Size in girth:

Per 100 ft.		Per 100 ft.	
8-in.	$15 90	15-in.	$28 80
10-in.	17 70	18-in.	36 50
12-in.	21 20

6 inch, list	29 00

Less 55 per cent.

Barn Door Track Prices

Toronto.

The price of barn door tracks, 1¼-inch size, is announced as $10.85 per 100 feet.

Slight Change in Sheets

Toronto.

Galvanized sheets show a lower revision of prices on the 10¾-ounce and the 28 gauge. This is taken in some quarters as an indication of the market tendency, but can also be attributed to the keen competition in sheets and plates among dealers. Stocks are reported to be ample for present demands, and little fresh business is evident, the majority of orders being small. Current quotations are as follows:

PLATES

10 gauge	from $5 00 to $6 00
12 gauge	5 05 6 05
14 gauge	5 10 6 10
16 gauge	5 20 6 20

BLACK SHEETS

14 gauge	5 10 to 6 10
16 gauge	5 20 6 20
18-20 gauge	5 75 6 75
22-24 gauge	5 80 6 80
26 gauge	5 85 6 85
28 gauge	6 00 7 00

Prices shown are for full cases. An extra charge of from 25c per 00 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo	
10¾ oz.	8 40 to 9 40
U. S. 28	8 00 9 00
U. S. 26	7 90 8 90
22 and 24	7 75 8 75
18 and 20	7 60 8 60
16	7 45 8 45
12 and 14	7 40 8 40

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Furnace Scoops Lower

Toronto.

Furnace scoops for fall delivery are now listed at $7.85 per dozen. This is a reduction compared with previous prices.

Waste Prices Unchanged

Toronto.

Prices on scrap remain nominally unchanged this week. No large amount of trading has been in evidence, but dealers evidently expect business to gradually develop. White metals were slightly more active, but no change in prices resulted.

Non-ferrous wastes have been practically at a standstill, but quotations have remained firm in view of the stronger tone in virgin metals. Following are prices for fair-sized quantities:

WASTE MATERIAL

No. 2 busheling	....	$13 00
Stove plate, per ton	18 00	19 00
Yellow brass	6 50	7 50
Red Brass	....	10 00
No. 1 machinery cast	22 50	23 50
Heavy melting steel	13 50	14 50
Heavy Copper	10 50	11 00
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	3 00	3 50
Overseas lumbermen's rub. boots	2 00	2 50
Auto tires	0 50	1 00
Tea lead	2 00	2 50
Solid tires	0 75	1 25
Tea lead	2 00	2 50

Ingot Tin Price Increases

Toronto.

Another advance of two cents per pound in the local price of tin, and a slight increase in the quotation on lead, are the chief features of the ingot metal markets this week. The price on copper is at present stationary, and it is reported that copper has many admirers, but few buyers are in evidence.

Germany is reported as seeking to adopt active measures to regain the prewar ascendancy in the non-ferrous metal markets of the world, which that country was automatically forced to concede to her opponents during the conflict; and Germany's plans for taking this step—particularly as regards zinc—are only delayed pending the final settlement of the reparations question.

TIN.—Activity in foreign markets, which followed the favorable outcome of the reparation negotiations, led to a further advance in the price of tin. This is reflected locally by another two-cent rise, the quotation now being 40½. Although the tone is stronger, local activity is reported to be quiet.

COPPER.—United States sources report that a strong tone prevails in the copper market. Prices still trend upward under an improved sentiment and strengthening conditions. The foreign situation is reported as decidedly better, with domestic consumers relaxing. Local indications are practically unchanged, with many admirers reported, but few actual buyers. Quotations remain at 18 cents.

LEAD.—The advance in the price of lead was not surprising nor unexpected, in view of the tight situation as regards supplies. Some of the foreign reports indicate that only 25 per cent. of the average mine capacity was in operation last month and a stronger demand has consequently developed. Local prices are now $6.75, an increase of 25 cents over last week's figures.

SPELTER.—The market has been dull and somewhat easier. Buying in spelter is reported to be very light, and local prices are unchanged at $7.50, which includes the slight increase quoted last week.

ANTIMONY.—Very little activity has been recorded in antimony and the quiet spell continues. Current prices were maintained at from 8 to 10 cents.

ALUMINUM.—A steady feeling has been evident in this market, but only small selling is reported. The price of 30 cents is still in effect locally.

London Markets

LONDON, May 19.—Several small reductions are in effect again this week, but prices on the bulk of staple hardware remain firm. Local reports show no further change in the price of turpentine, which remains at $1.15 per gal.; but quotations on linseed oil have again advanced 8 cents per gal. Prices are now 85c for raw, and 88c for boiled, on one to two barrel lots. Manila rope prices increased one cent per lb., with sisal rope and lath yarn showing an advance of half cent. Business continues to be good, with a steady demand for seasonable lines which should be stimulated with the arrival of warmer weather.

Linseed Oil Prices Show Increase

London, Ont.

The expected advance in the price of linseed oil referred to in last week's market quotations has materialized. The increase amounts to 8 cents per gallon, which brings the price of raw to 85 cents and the quotation on boiled to 88 cents for 1 to 2-barrel lots. The market is very firm, with a good demand in evidence. The new prices are as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels. Imp. gal.	0 85	0 88
3 to 5 barrels, Imp. gal.	0 84	0 87
6 to 9 barrels, Imp. gal.	0 82	0 85

Less barrels, add 15 cents per gal.
5 gal. jacketed cans, $1.25 each.

Rope Prices Advance

London, Ont.

Pure manilla and beaver manilla rope has advanced in price one cent. per pound. Sisal rope and lath yarn have also registered an increase of one-half cent per pound. Following are the new prices:

ROPE—Pure Manila, 25½c per base; Beaver Manila, 21c; New Zealand Hemp, 21c; Sisal, 18½c; Lath Yarn, 18½c.

London, Ont., May 19—All quotations on solder have been withdrawn and a sharp advance is expected immediately. New quotations will be issued next week.

Turpentine Prices Firm

London, Ont.

Turpentine continues to be in strong demand. The increased prices announced last week are still in effect, and the higher quotations do not appear to have restricted sales. Further increases are stated to be likely; but some authorities do not consider the higher figures to become permanent, but look forward to a gradual levelling of values in the future. Present prices are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

White Lead in Demand

London, Ont.

An excellent sale for white lead in oil is reported locally. While not large in

proportion, orders are considered fairly numerous. The demand is seasonable, and well up to expectations. Following are the market quotations:

WHITE LEAD IN OIL

	Tons.	Less Tons.
Pure, per 100 lbs.	$14 95	15 30
Elephant, per 100 lbs.	15 45	15 80

Compression Bibbs Reduced

London, Ont.

A reduction of 5 per cent. is announced in the discount on compression bibbs, the new quotation being 37 per cent. off list.

Tack Discount Lower

London, Ont.

Tacks and capped goods are quoted on a lower range this week, the new discount being 70/15 per cent. off list.

Nail Demand Fair

London, Ont.

A gradual increase is developing in the quantity of orders for nails, but the demand has only reached fair proportions. The local quotation on wire nails is $4.65, base, and on cut nails $5.75, base.

Lower Prices On Shovels

London, Ont.

New summer prices are in effect for fall booking on snow shovels and furnace scoops; but the exact quotations have not yet been received. It is understood, however, that the reductions are very substantial.

Wire Screen Sales Good

London, Ont.

There is a good local demand for screen wire cloth. This seasonable line is selling at $3.50 per 100 square feet for the black painted wire screen.

Brisk Tool Demand

London, Ont.

Garden and harvest tools are reported to be experiencing a fairly good demand at present. The quotations remain unchanged at 50/10 per cent. less list.

Spades Selling Well

London, Ont.

Reports from local dealers indicate a brisk movement in sales of spades and shovels. These are quoted at list, less 35 per cent.

Seasonable Demand for Screen Doors

London, Ont.

The anticipated demand for screen doors and windows is now apparent, and merchants report stocks in these lines to be moving nicely. Following are the prevailing prices on doors of the Sanderson-Harold make:

SCREEN DOORS—

No. 1, grained only, per doz.	$23 25
No. 3, grained, filled and varnished, doz.,	38 00
No. 21, grained, filled and varn., doz.	35 00
No. 8, grained, filled and varn., doz.	41 00
No. 28, grained, filled and varn., doz.	42 00
No. 80, combination storm and screen	80 00

Door Hinges Active

London, Ont.

With the steady movement in screen doors, a corresponding increase in sales of screen door spring hinges is noticeable. Prices are as follows: No. 20 and No. 200, japanned, $2.50 dozen; No. 44, loose pin, $3 dozen.

Screen Door Catches in Good Demand

London, Ont.

Screen door catches are also in good demand, the present quotations being as follows: Superior, per dozen, $1.90; Mallory Marvel, per dozen, $1.80.

Ice Cream Dishers Selling Well

London, Ont.

It is noticeable that ice cream dishers are selling fairly well. The prices prevailing are as shown below: Nickel plated, automatic, $2.15 each; capacity, 16, 20 and 24 to quart.

Hammock Sales Fair

London, Ont.

There is a fairly good demand for hammocks, with prospects of activity in this line developing an increase with the advent of summer weather. Prices range from $30 to $125 per dozen.

Demand for Paris Green

London, Ont.

Booked orders on paris green have all been filled, and although repeat business has not yet started, this line is experiencing a fair demand. There has been no change in the following current quotations:

PARIS GREEN—1 lb. pkts., 50c per lb.; ½ lb. pkts, 52c; 25 lb. drums, 48c; 50 lb. drums, 46c; 100 lb. drums, 46c; 250 lb. kegs, 44½c.

Garden Hose Active

London, Ont.

A seasonable number of sales are evident in rubber lawn or garden hose. This is now quoted as follows:

RUBBER HOSE—3 ply, ½ in., 11½c ft., ⅝ in., 14c; ¾ in., 15½c. 4 ply, ½ in., 13c; ⅝ in., 16c; ¾ in., 17c. 5 ply, ½ in., 15c; ⅝ in., 17c; ¾ in., 19c.

Corrugated, ½ in., 19c per ft.; ⅝ in., 21½c; ¾ in., 25c.

Less 5% in 500 ft. reels corrugated.

Hose Fittings In Demand

London, Ont.

Corresponding with the brisk activity in rubber hose, a seasonable demand is evident for lawn hose fittings. Following are the current prices:

BRASS COUPLINGS—½ in., $2.65 doz.; ⅝ in., $3.00 doz.; ¾ in., $3.00; 1 in., $5.75.

GALVANIZED CLAMPS—½ in., 36c doz., ⅝ in., 48c; ¾ in., 48c; 1 in., 75c; 1¼ in., $1.40.

CAST MENDERS—½ in., 70c doz.; ¾ in., $1.

BRASS MENDERS—½ in., $1.15 doz.; ⅝ in., $1.15; ¾ in., $1.15.

BRASS NOZZLES—Canadian Gem, $9.00 doz.; American Gem, $13.00 doz.

Coaster Wagons Popular

London, Ont.

Auto wheel coaster wagons are selling well at this time. The quotations remain at list, less 35/10 per cent.

Roller Skates In Season

London, Ont.

The roller skating season is in full swing and local dealers report strong activity in this line. Prevailing prices are as follows:

ROLLER SKATES—No. 3, plain steel wheel, $1.60 pair; No. 5, ball bearing wheel, $3.65 pair.

Fair Sales in Clocks

London, Ont.

Fair sales are reported in alarm clocks, with present supplies more plentiful. There have been no changes shown in current prices, however, which remain as follows:

ALARM CLOCKS—Good Morning, $1.90 each; Lookout, $2.35; Sleepmeter, $2.50; Big Ben, $4.00; Baby Ben, $4.00.

Winnipeg Markets

WINNIPEG, May 19.—Hardware commodities for the most part have remained firm during the past week, and the few reductions made are only of a minor nature. The principal declines evident this week are on clay picks, which have dropped $2 per dozen, and a few lines of small tools, such as wrenches, screwdrivers, planes, and levels. Linseed oil has advanced 5 cents per gallon and it is expected that turpentine is also due for an advance.

Pipe and fittings remain steady at last week's prices. Rope is firm and unchanged. Paints and varnishes are moving well and sales in paint products have been very satisfactory. Business in general is only fair, and seasonable lines are reported as moving slowly during the past week, due to the bad weather.

Increase in Linseed Oil Prices

Winnipeg.

Linseed oil prices have been advanced 5 cents per gallon and are now quoted at $1.10 per gallon for raw and $1.13 for boiled in single barrels.

Turpentine Prices Unsteady

Winnipeg.

The price of turpentine remains the same as last week, but an advance is expected. The present price is $1.20 per gallon in barrel lots. Less than barrels 10 cents per gallon extra. Containers 25 cents per gallon extra.

Range Boilers Show No Change

Winnipeg.

No change is noted in quotations on range boilers. Sales are limited to small quantities. Following are the nominal prevailing prices:

RANGE BOILERS—30 gallon, $13; 35 gallon, $15; 40 gallon, $17; 52 gallon, $24; 66 gallon, $32; 82 gallon, $40; 100 gallon, $50; 120 gallon, $60.

Clay Picks Reduced

Winnipeg.

Prices have been reduced on clay picks and following are this week's quotations: 5 to 6 pounds, $10.25 per dozen; 6 to 7 pounds, $11.25 per dozen; 7 to 8 pounds, $12.25 per dozen.

Tack Prices Lower

Winnipeg.

Prices on tacks have been reduced 5 per cent. with the exception of double pointed tacks, which have been advanced. Following are this week's quotations:

TACKS—Wire, 72½% off; Bill Posters, 72½%; Cut, 72½%; Upholstering, 72½%; Carpet, 72½%; Double Pointed, 60%; Cheese Box, 72½%; Gimp, 72½%; Lining, 72½%.

Zinc Prices Reduced

Winnipeg.

Prices on perforated zinc have been reduced and quotations are as follows: 1-64 inch, 35 cents per square foot; 1-32 inch, 35 cents per square foot; 1-16 inch and larger, 25 cents per square foot.

Rope Sales Disappointing

Winnipeg.

Booked orders for rope this year have been very disappointing, but the sorting up demand is now more favorable. There is a better feeling in the rope markets now than there was during the earlier part of the year, with a firmer tendency on the outside markets. Binder twine is held unchanged at quotations given in March. For prevailing Western prices see the current weekly market pages.

Carriage Clamps Decline

Winnipeg.

Reductions are announced this week on carriage makers' clamps, and quotations are now as follows:

CARRIAGE CLAMPS—4 in. opening, $13.20 per doz.; 5 in. opening, $16.80; 6 in. opening, $21.60; 8 in. opening, $33.60.

Reduction in Clout Nails

Winnipeg.

The price of clout nails has been lowered and they are approximately 5 per cent. lower. The discount quoted this week is 72½ per cent. off list.

Machinists' Hammers Reduced

Winnipeg.

Included among the minor hardware price reductions this week are quotations on Maydole machinist hammers. Following are the new prices:

MAYDOLE, MACHINISTS'—No. 71, $24.25 per doz.; No. 72, $22; No. 74, $18.85; No. 76, $16.

Change in Farriers' Pincers

Winnipeg.

Prices on Hellers' farriers' pincers show a lower range, and following are the new quotations: 12 inch, 40 per cent. advance; 14 inch, 40 per cent. advance.

Pittsburgh Markets

PITTSBURGH, May 19.—In reviewing production of steel ingots in the United States during last month, some illuminating figures are observed. Although the average operation in April was only around 30 per cent. of capacity, comparison with pre-war estimates gives a much more favorable impression. This is especially so when figures for the year 1902 are unearthed and marshalled alongside present production.

PITTSBURGH, May 19.—Production of steel ingots in the United States in April, as may be estimated somewhat closely from the partial report of production issued by the American Iron and Steel Institute, was at the rate of about 16,000,000 gross tons a year, or between 30 and 31 per cent. of the capacity, which is approximately 52,500,000 tons a year. The independents averaged an operation of 22 or 23 per cent. and the Steel Corporation ran at between 40 and 41 per cent. Production at the present time is if anything a shade lower than the average of April, perhaps 20 per cent. by the independents and 37 or 38 per cent. by the Steel Corporation, or between 27 and 28 per cent. for the industry as a whole, say 14,500,000 or 15,000,000 tons a year.

It seems like an extremely small production for the industry to be running at 30 per cent. of capacity or less, but in actual tonnage the comparison is somewhat different. Taking the output at 15,000,000 tons a year, two comparisons can be made. By far the heaviest tonnage years before the war were 1912 and 1913, each year showing an output just a shade above 30,000,000 tons, and 15,000,000 tons is one-half that. Again, in 1902 there was what was considered an extremely heavy demand for steel. Everybody was buying. The railroads were buying cars, locomotives and rails very freely, large bridges and buildings were being erected and there was much activity in all classes of machinery. Practically every ton of steel was made that could be made, and the output was only about 14,500,000 tons. Yet the steel industry of 1902 was regarded as a very big thing.

To consider the matter in another way, the production of steel is large considering that nearly all business is stagnant, while some consumers, and perhaps quite a large proportion, are drawing upon stocks previously accumulated, and are consuming more steel than is being produced. At 15,000,000 gross tons of ingots a year the production of finished rolled steel is close to 250,000 net tons a week, and that looks like a great deal of steel if one tries to pick out the lines in which it is being consumed. Yet this amount of steel, and probably more, is being consumed from week to week.

Steel Prices

The equalization of steel prices as between the Steel Corporation and the independents, by the independents advancing their prices on most products and the Steel Corporation reducing its prices, was completed by April 15, and the question since then has been whether the new prices would hold, or for how long. The real test would hardly come at the outset, since while the independents were withdrawing their previous low prices they allowed buyers to cover for as much as they wished, provided they would supply actual shipping orders. By this means all the loose business in sight was gathered up, and for two or three weeks afterwards there were reports of fresh bookings being taken at the old prices on the basis—or subterfuge—that the old price had been kept open. Naturally there has been little new business in the market in the past fortnight, and so the new prices have not had much of a test. The buying in no case ran beyond May, and thus it is necessary now both for the mills to effect some more sales and for consumers to buy some more material. The real test of prices is now to be made, and it will be seen whether the independents will shade prices as they began doing in February. As the summer is always considered a dull period, it is thought that if prices hold to the middle of June they will stand unchanged through the summer.

Of course it is well understood that the present steel prices cannot be expected to last indefinitely. If there were a full demand for steel, or even a demand to engage 75 per cent. of the steel making capacity, the mills would be quite willing to sell at lower prices, and competition would cause them to do so, whether willingly or not. When demand is so light operating costs are very high and there is no real profit even in the present prices. The mills are convinced that lower prices would not make greater demand at this time. When buyers show that they would buy more freely if prices were lower the mills will meet them half way or more than half way.

While pig iron is declining, it is declining very slowly, and cannot be far from bottom for the next few months. Later, of course, there may be such reductions in the freight cost of assembling raw materials as to bring about a further decline. Pig iron can hardly get to $20 with present freights and wage rates, which make a big difference. Just before the war basic iron sold at $12.25, that being considered a very low price. On the other hand, at the top last August foundry iron was $50, valley, and Bessemer and basic $48.50. Striking an average of all the important pig iron districts, the market declined about $5 a month during the last three months of last year, about $3 a month during the first three months of this year and about $1.50 in the month of April, while since the beginning of this month the average has gone down only about 50 cents.

Connellsville coke has weakened somewhat further. No sales of furnace coke to blast furnaces are reported, but what has been called standard furnace coke has sold to other consumers at $3.25. The market may be quoted easy at $3.25 to $3.50. As to foundry coke, it has lately been quotable at $5 to $5.50, there being ordinary brands available at $5, while one favorite brand has been $5.25, selling in a limited way, and two at $5.50, selling in a very limited way, but in the past few days it appears some standard coke, though not perhaps of the best quality, has sold at $4.75 or possibly even $4.50.

Gradual Reduction in Hardware Prices

Readjustment of Prices Should Constitute Forerunner of Recovery to Normal Trade Conditions—Summary of Items Showing Decline During Recent Months—More Optimistic Viewpoint Developing.

IN reviewing the market situation on hardware commodities, the outstanding feature is the gradual but continuous decline to a more even scale of prices which has been taking place during the past few months. This tendency to reduce is not an indication that the hardware trade is due to suffer from a depression, but rather that the lowest depths are being gradually reached and that the subsequent readjustment of prices will bring with it a recovery to normal conditions.

The circle which operated when prices and wages were both constantly advancing is now being exactly reversed. But the revision is noticeably slower, with the reaction of each movement circling in an ever widening eddy of effect. Thus the curtailed purchasing power of the consumer sychronized with the height of those difficulties which confronted both the manufacturer and the merchant.

Buying With Great Care

The recovery is expected to be gradual because the greatest caution is being used in purchasing. Orders are coming in but naturally the orders are not in the same bulk as previously. Smaller quantities are being requisitioned and very few of them are for stock, as purchases generally are only being made for immediate requirements.

The turn in the road is thought to have been reached in many lines, and as the cost of production is being lessened, the corresponding reduction in prices becomes slowly evident. It is here that the viewpoint of the retailer and that of the manufacturer differ. The retailer is only purchasing according to the consumer's needs, but the manufacturer is supplying from stock. These stocks were made when the cost of raw material was high, and it is because the factories cannot afford to make or produce merely for stock alone that they have been working on short time.

Surplus Stocks Reduced

The retailer is also in the possession of stocks which he acquired when rates were on the rise. At that time, it was difficult for the retailer to get his needs supplied. When he ordered, there was no guarantee for delivery, and as a consequence he became anxious to obtain anything in the line of stock for which he thought there might develop a reasonable call. But conditions changed; people suddenly became critical with regard to prices; and adopted a waiting policy. The artificial position which the trade has experienced was the result, and not until stocks held alike by the retailer and manufacturer are either liquidated or shrink considerably, can there be anything suggesting the old time activity.

Practically every branch of the hardware trade has seen depression, but now that surplus stocks are being reduced and others can generally be secured at more reasonable prices, an even flow of orders should gradually develop in the future.

Optimism Developing

One healthy sign in this respect is the optimistic viewpoint returning throughout the trade. Overhead charges have mostly been reduced and this should bring a material improvement in every phase of the situation. These facts, coupled with a fairly good demand for seasonable articles, have recently placed the hardware trade upon a more satisfactory basis.

The primary markets have naturally been prominent when related to production costs, and declines in these markets have been felt in many hardware lines. Some marked changes to a lower basis have been noted recently, and the list of those articles which have been reduced since the beginning of the year would indeed be lengthy. Chief among them are ingot metals; cordage and cotton goods; fuel and lubricating oils; solders, lead products and pipe fittings.

Items Recently Reduced

Other items that have been marked down within the past few months are: building papers and roofings; galvanized sheets; corrugated sheets; conductor pipe and eavestrough; tubing; axle and cup grease; Canada plate; waste materials; leather and harness parts; some lines of woodenware; a large variety of tools, including garden, farriers, carpenters' and pipefitters' specialties; standard compression work; wood handles; galvanized ware, including pails, tubs and cans; ammunition; rule and level goods; range boilers and valves; vacuum bottles and garden hose; carpet sweepers and wheelbarrows, glass butter churns; lantern globes and lamp chimneys, candle wick and oakum.

Declines are also shown on hot water boilers and radiators; smaller styles of pumps; carriage hardware; Paris green; sash weights, and meat choppers; soldering coppers and copper rivets; rubber and canvas belting; wire; shelf brackets; butts and staples; strap and tee hinges; nails, bolts, screws and rivets; nuts and jack chain, capped goods and tacks; night latches and padlocks; barrel churns and washers. Ready-mixed paints; white lead in oil, and putty, are now marketed on lower levels.

Basis of Price Comparisons

While linseed oil, turpentine, and window glass are on the upward trend, yet these products had previously experienced some solid price cuts. The rope market is showing a firmer tone; and in addition to these items, three others have recorded increases this year, namely:—Arsenate of lead, common sad-irons, and veneered chair seats. Some metals have lately shown signs of higher quotations, among them lead, copper and tin.

When business is satisfactory and dealers are hoping for some signs of improvement, it is generally claimed that merchants must have, or develop, confidence. This does not mean that they shall arbitrarily change their minds and become confident in immediate conditions, or that those conditions will suddenly assume normal proportions. It only implies that abnormal conditions cannot remain permanently, and that merchants are therefore justified in having confidence of future betterment.

One reassuring fact in this direction is that the gradual decline of prices forces the comparison of present quotations with their pre-war levels. This is a fundamental necessity for any readjustment plane. There was a time when pre-war comparisons were considered as absurd, but that sensitiveness has largely disappeared. It is now recognized that there must exist some standard of comparison; and furthermore, that there is no other method available. The reference is being made simply for comparative purposes, and as a basis or guide to justifiable valuations.

None Working—No Strike

One of the most remarkable statements made in connection with the May Day strikes, or rather the lack of them, was by one union official who stated that owing to the large number of their men who were out of work there would be no strike.

In other words, had things been going on as usual and had their members been making a decent living, instead of nothing, they would have staged a strike.

But now that they had very few members at work the strike had been passed up for this year.

It would seem, then, that the proper way to avoid strikes is to have plenty of unemployment.

Helps for the "Save the Surface" Dep't

How Definite Application May Be Made of Preservative Value of Paint, Varnish, Etc.—Keeping in Touch With Prospects—Staff Conferences Bring Out Good Suggestions—Where the Banker Comes in—Reaching the Farmer Between Seeding and Harvest

THE surface of the shingles on the roof must be preserved or the whole house will be ruined. Shingles perform a distinct service to the property owner and provide a good possibility for business for the hardware merchant selling shingle stains. Just at this time of year when summer homes are being reopened for the season is a good time to point out to customers the value of applying shingle stain to the exposed parts of the roofing. The preservative service of shingle stains relative to their cost greatly exceeds their decorative value and places them among the forefront protective lines of the trade.

Both in service and makeup, shingle stains are primarily a preservative medium. The largest single element in their makeup is creosote oil, with sufficient coloring pigment to give the desired shade. They can never replace paints but shingle stains possess greater penetrating power and sink deeper into the pores of the wood, killing the destructive fungi that destroy wood cells.

THE FARMER AND "SAVE THE SURFACE"

Upwards of two-thirds of the hardware and paint business in Canada is directly or indirectly dependent upon farm trade. The farmer has recently become more businesslike in the administration of his business and is therefore in a better position to appreciate the value of paint. In between seeding time and harvest the merchant has a good opportunity to approach the farmer and point out the economy of painting buildings and implements in the interests of longer service. With a realization that his farm buildings are an investment from which the maximum interest earning capacity should be earned, paint as a preservative and as a means of prolonging that earning capacity should appeal to him as one of the necessities for proper upkeep and the reduction of overhead charges over a term of years.

"SAVING THE SURFACE" OF THE FLOORS

A floor paint week can be arranged to good advantage about this time of year. The winter months are over and the rainy season is about at an end so that floors can now be attended to knowing that their new finish will be preserved for some months. The wearing qualities of floor finishes is the big point to demonstrate. A show card can be used to show how many thousands of times boot heels beat up a floor section of flooring. This section can be finished with your floor varnish or paint and on it place a number of worn-out boots well down at the heel. On a card below this section place a caption to the effect that your floor finishes will outwear the shoes that try to wear them out.

Getting action into the display a roller skate with a 50-pound weight can be pulled forward and backward over a section of flooring by a motor attached to a wheel. The time when the motor was set in motion can be stated and the number of trips per minute up and down can be outlined. The wearing qualities of good floor finishes can be demonstrated in this way and the action always draws a crowd.

WIDENING THE FIELD OF "SAVE THE SURFACE"

In considering the field for paint sales it is wise for the merchant to get in the habit of thinking in large quantities. In merchandising to-day it has become necessary to think in bigger numbers, with bigger ideas, with broader viewpoints and with deeper comprehension of what possibilities exist about us. In this connection the paint dealer should remember that he is selling ideas about goods rather than the goods. First the prospect must be sold the ideas that will make him realize he needs the goods. Secondly he must be sold the ideas of possession. Therefore the prospect should be led to a realization that the value of paints and varnishes rests entirely in the service rendered rather than the actual cost of the goods. The salesman should endeavor to bring about a conviction that paints and varnishes are needed for preservation and protection. When this has been done 85 per cent. of the sale has been made.

OUTSIDE WORK IN INTERESTS OF "SAVE THE SURFACE"

The hardware merchant need not be tied down to the counter of his paint department in order to make sales. On the other hand larger business will result if he goes to his prospects in person and points out where they can use paints, varnishes, etc., to good advantage. The merchant has plenty of convincing arguments for paint and it is therefore a question of getting it to the prospect. The delivery boy in a certain hardware store turned into definite orders the casual inquiries made of him by customers while on his rounds. Many of these inquiries were for paints, varnishes and specialties for finishing household articles. The boy secured a knowledge of the line required, method of application, etc., and subsequently proved his worth in boosting the store sales. The store work should not be neglected but there is much of the store routine which can be attended to by junior clerks while the merchant can establish better connections with his prospects.

STAFF CONFERENCES HELP "SAVE THE SURFACE" DEPARTMENT

The plan of holding conferences of the sales staff at least once a week is a good one for bringing out valuable suggestions which can be put to good use. Every department of the business can be taken up, of course, but the paint department will find a good share of attention. Occasionally a representative of some firm will be found to give some information to these gatherings which will be helpful. The hardware merchant can watch for all information which would be helpful in paint selling and pass it on to the staff at these conferences. Tests can be made and a general discussion held. Salesmen can present problems which confront them and suggestions can be made for the improvement of the department and the efficiency of the selling methods. Much information is to be had concerning the use and application of various paints, varnishes, etc., and conferences are a good means of extending valuable pointers on this subject to all members of the staff.

BANKERS AND "SAVE THE SURFACE"

After all there is some connection between high finance and paint. The banker in any town can give the merchant some interesting cases of where on the one hand a farmer who has kept his buildings well painted and preserved can raise a loan on them where the farmer who neglects such preservation has difficulty raising money. The latter is not only an indication that the farmer fails to realize the value of his property but it indicates a negligence which might well be found in other branches of his business and the bank cannot afford to take such questionable security. A banker recently made the statement "as a man is so are his buildings, his farm and the general conduct of his business affairs." Bankers, too, are often consulted by prospective purchasers of farms. All other things being equal which of the two farms described would the banker recommend?

What Hardware Merchants Say
In Their PAINT ADS

FOLLOWING are some excerpts from recent advertisements used by Hardware merchants in local newspapers, indicating how definite arguments for the use of paint and varnish are being advanced:—

"HOME PRESERVATION. May month is paint month. Save the Surface and you save all," is the heading on a recent ad by O. B. Henry & Co., Drayton, Ont., which states:—"We carry the products for every surface and for every purpose guaranteed to best fulfil the use for which it is made. Pure house paint for interior and exterior, all colors. Floor paint inside and outside, all colors."

* * *

"CLEAN UP," says an ad by W. H. Wilson Co., Ltd., hardware, Peace River, Alta., which continues:—"The travelling public acknowledge that Peace River has the best type of citizens of any town in Northern Canada. Let us get the name of being the cleanest town in the north. You can do it. We have all the tools at the right prices."

* * *

"GOOD PAINT AND VARNISH WILL 'SAVE THE SURFACE' INSIDE OR OUT."—Heading on paint ad by Ashdowns, Calgary, Alta.

* * *

"ASK QUESTIONS," states an ad by Manitoba Hardware and Lumber Co., Ltd., Virden, Man., continuing:—"We have been selling paints and varnishes for a great many years and experience has taught us that you cannot be too careful in your selection of material for painting or varnishing. Remember it takes just as long to put on the wrong article as to put on the right one, so it would be wise to ask questions about anything you want to do over. We will gladly give you the benefit of our long experience in this line."

* * *

"THERE IS SO MUCH CONTROVERSY—about which is the best to use that it is hard for anyone not a paint expert to arrive at a decision. Here it is in a nutshell:—

"Cheap mixed paint is a poor buy—it's cheap, it's shoddy, it won't wear or give satisfaction. So it isn't worth considering.

"Hand-mixed lead and oil is good as far as it goes, but it is impossible for anyone with a paddle and bucket and working by rule of thumb to make as good a paint as that which is worked out on a strictly scientific formula and mixed and ground by powerful machinery."—Owen & Birmingham, Campbellford, N. S.

* * *

"EVERY MONTH BRINGS A NEED FOR PAINT," says an ad by Emerson & Fisher, Ltd., St. John, N.B., continuing:—"Those who think painting is governed by seasons are far behind the times. True, some exterior painting must be done in dry weather, but the big bulk of interior painting and varnishing can be done any time—just when you have the time or can get the painter. There is a special paint or varnish for every job—our line is complete."

Under the heading "Say Folks" an ad by Mills Hardware Co., Hamilton, Ont., dealing with paints and varnishes, says: "Is your home ageing? Is the surface coating wearing away and giving rot and rust a chance to get in its destructive work? When you think that a painted or varnished surface will successfully stand exposure to sun, rain, snow or wear, surely the absolute necessity for keeping the surface protected is apparent. 'Save the Surface and you save all' is the most common sense idea in the world."

* * *

"IT IS YEARS SINCE PAINT, white lead, oil and turpentine have been so cheap. They are about back to pre-war prices," says an ad by Sumner Co., Ltd., Moncton, N.B., continuing:—"If you have put off painting up your property on account of the high price of material, you can do it this spring at a figure lower than you had ever expected to again be able to. All the popular shades mixed ready to put on. Save the surface and you save all."

* * *

"THE PAINT FOR THE PURPOSE WILL SAVE THE SURFACE," says an ad by Crawford & Son, Shelburne, Ont., continuing:—"It is true economy to use a paint or varnish of known merit and property owners everywhere have learned by experience that ——— products are thoroughly dependable. Before purchasing get our prices. ———paint covers 425 feet (2 coats) per gallon."

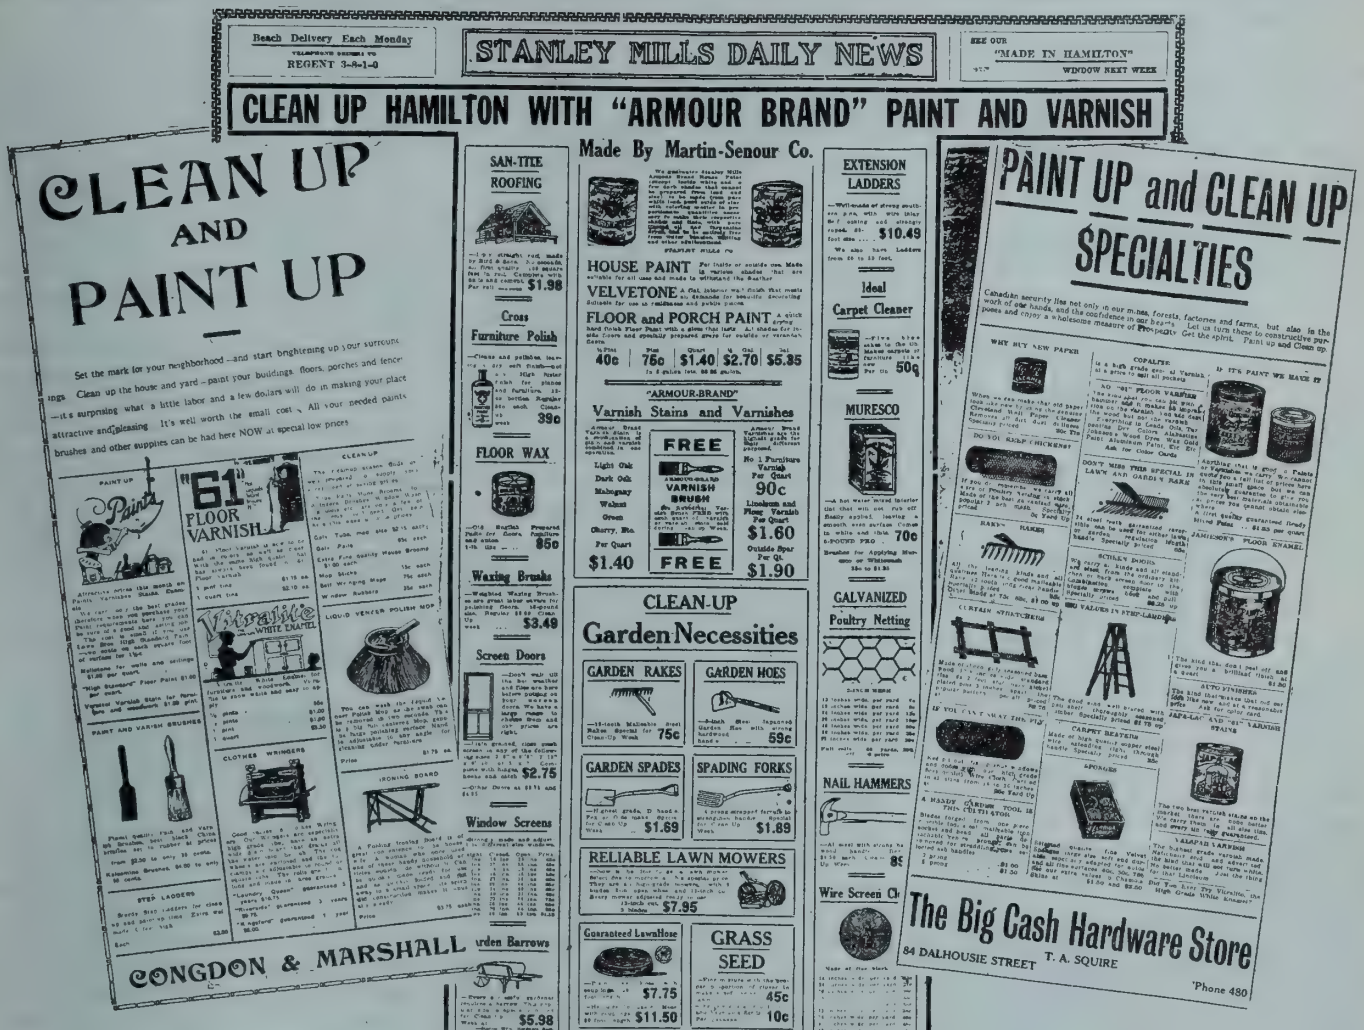
* * *

"FOLLOW NATURE'S EXAMPLE," says an ad by Turnbull & Cutliffe, Ltd., Brantford, Ont., which continues:—"Paint is to the house as bark is to the tree 'Save the Surface and you save all.' We carry a complete stock of colors. Ask to see them."

* * *

"HALT THERE, MR. FARMER—Just look and see if your house, barn or silos do not need a fresh coat of paint. Also take a look at your machinery, implements and wagons. Prepare to paint them now and you will find you never spent money with more gratifying results and you will also be better able to obtain insurance on them."

* * *



"AND NOW, MR. TOWNSMAN. What about your house, barn, garage, fence, etc? As there has been very little painting done during the past four years some of them must need paint badly. If you don't do it you will need to renew the woodwork also, and you know what that will cost."—Collingwood Hardware Co., Collingwood, Ont.

* * *

"PROTECT YOUR HOME," says an ad by Hendershot Hardware, Mt. Forest, Ont., continuing:—"What clothing is to men, paint is to property. Unprotected houses and barns, wagons and machinery cannot resist exposure to sun, wind, frost and rain. Rust and decay cost more than paint and varnish—that's why the use of good paint is wise economy."

"Clean Up, Paint Up" Sentiment Extends

From St. John to Vancouver Hardware Merchants Find Local Sentiment Aroused by Clean Up, Paint Up Campaigns to Help Trade in Paints, Varnishes, Etc.—Vancouver Clean Up Adds $500,000 to Value of Property—Winnipeg Mayor Emphasizes Paint Value

HARDWARE merchants in Canadian cities extending from St. John, N.B., to Vancouver, B.C., are reported by representatives of Hardware and Metal to be taking advantage of local sentiment aroused by the Clean Up, Paint Up Campaign. Some of the plans being worked out by these merchants and samples of their advertising are shown herewith.

W. H. McBride, manager of Messrs. W. H. Thorne & Co., Ltd., paint and glass department, St. John, N.B., in an interview with Hardware and Metal, stated that the paint and clean up advertising campaign, carried on for the last few weeks by St. John hardware merchants, was bringing forth very satisfactory results. Mr. McBride stated that they were selling a large amount of paint to householders, who had evidently decided to follow out the advice of the advertisements, urging the public to paint up. Although the St. John painters have few big jobs ahead of them, they are getting all the work they can handle in the way of small jobs from property owners and householders. It is impossible to get a painter in less than ten or fourteen days from the time of placing the order. Two or three of the city-owned buildings are to be painted this year, and contracts have already been awarded. More newspaper and window advertising of paints and varnishes has been done in St. John this year than on any former occasion. Windows have been trimmed by merchants, and also large space has been used in the local papers, coupling up with the national advertising.

* * *

A Clean Up, Paint Up week was recently held in Hamilton, Ont., and good results are reported by hardware merchants. In the ads. shown in this article will be seen one by Stanley Mills Co., Hamilton, Ont., under the heading, "Clean up Hamilton with—paint and varnish." This ad. lists house paints, floor and porch paints, varnish stains and varnishes. Furniture polishes, floor wax, wall finishes, etc., are also linked up. For the clean up part of the campaign garden tools are featured.

Where Canadian Security Lies

T. A. Squire, Brantford, Ont., is another hardware merchant who links up his advertising with the clean up sentiment. In the ad. shown, Mr. Squire emphasizes the fact that Canadian security lies not only in our mines, forests, factories and farms, but also in the work of our hands and the confidence in our hearts. "Let us turn these to constructive purposes and enjoy a wholesome measure of prosperity. Get the spirit. Paint up and clean up."

Under this heading paints and varnishes are featured along with garden tools, wallpaper cleaner, curtain stretchers, screens, step ladders, sponges, etc.

Set the Mark For Your Neighborhood

Appealing to the pride of local people, the ad. by Congdon & Marshall, Dunnville, Ont., calls upon readers to "set the mark for your neighborhood—and start brightening up your surroundings. Clean up the house and yard—paint your buildings, floors, porches and fences——it's surprising what a little labor and a few dollars will do in making your place attractive and pleasing. It's well worth the small cost. All your needed paints, brushes and other supplies can be had here now at special prices."

In this ad. it will be noted that brushes are linked up prominently with the sale of paint and varnish. Clothes wringers, ironing boards, floor mops, brooms, window rubbers, etc., are other seasonable lines linked up with the campaign.

In the West the campaign is also being linked up with by hardware merchants: W. H. Wilson Co., Ltd., Peace River, Alta., advertises under the heading, "Clean Up," as follows: "The travelling public acknowledge that Peace River has the best type of citizens of any town in Northern Canada. Let us get the name of being the cleanest town of the North. You can do it. We have all the tools at the right price."

Calgary Organizes Campaign

A special campaign lasting three weeks was held in Calgary, Alta., with the slogan, "Clean Up and Paint Up." A special campaign committee was composed of members from every organization in the city. An advertising committee was formed to unify the advertising appeal of all merchants. Much publicity was given the campaign, it being pointed out that during the coming summer a large host of visitors will visit the city and many conventions will be held there, and that the good name of the city must be upheld by cleaning up all vestige of neglect. It was pointed out that after investigation it was found that old sheds fences, outbuildings and many houses in the city were in good repair, but grievously in need of a coat of paint that could be easily applied, in many cases by the owner. It was pointed out that nothing makes a city look more shabby or "down at the heel" than an absence of that freshening touch of new paint.

"Let clean up and paint up be the slogan of every citizen. A very little personal attention on the part of everybody who lives in the city will accomplish wonders in three weeks, and cause a heavy burden to fall on none," was the statement made in the publicity campaign.

Big Increase in Value

"More than $500,000 has been added to property values in Vancouver as result of 'Clean Up' week, according to estimates carefully prepared," states a report to Hardware and Metal from Vancouver. "In one case," it continues, "it was discovered that a Vancouver man who had unsuccessfully held his home for sale at $2,700 for several months easily disposed of the property for $3,000 after he had beautified the lot by setting out shrubbery, had painted the house and improved the interior by tinting.

"Spick and span exteriors to-day greet the visitors to hundreds of Vancouver homes, where last week saw drab walls with peeling paint surfaces."

The secretary of the Citizens' Committee in charge of the campaign stated that the event was not a spasmodic attempt to make a few dabs with paint brush, but the effects on the welfare of the city are permanent. "To the children of to-day," he stated, "'clean up week' and its training will last far into the future and they will accept the annual repair and brightening of homes as something that is an integral part of their lives."

1½% SALES TAX ON WHITE LEAD AND PUTTY

Invoices for white lead and putty will show only the 1½ per cent. sales tax, whether purchased from the corroder who manufactures or the paint manufacturer who jobs these two products. The matter was taken up by the Lead Grinders' Association, and through the secretary all firms were notified as above.

Winnipeg Mayor Urges Use of Paint

In connection with activities to stimulate the use of paint in Winnipeg Mayor Parnell made an inspection of the city and subsequently made a statement emphasizing the necessity of a paint-up campaign to preserve present buildings and beautify the city. He stated that he was struck with the number of buildings depreciating through lack of paint and added: "A campaign of painting would add to the life of buildings in all parts of the city and would beautify the city."

Such a statement from so prominent an official would, perhaps, cause many citizens to ponder the real value of painting in such a way as would not be the case were someone of lesser importance to give such advice.

Brockville Believes in Paint

Referring to the necessity for a local Clean Up and Paint Up campaign, the Brockville Recorder and Times, Brockville, Ont., says editorially: "Paint and varnish are mighty fine things for woodwork, steel and other exposed surfaces, but who would think of painting a dirty surface. Cleanliness is absolutely necessary before paint can be properly applied, therefore the cleaning operation comes first, after which 'paintliness' insures continued cleanliness."

Fire at Imperial Varnish & Color Co. Plant

The advantages of fire drill in preparation for any emergency were fully demonstrated recently at the Toronto plant of the Imperial Varnish & Color Company. Early this week the tar-filling shed at the company's works, Morse Place, suddenly caught fire, and for a while the blaze threatened the surrounding buildings.

The serious proportions of the conflagration were, however, considerably mitigated by the prompt and efficient action of the employees, whose organization and effort resulted in having the fire well under control before the arrival of the city fire brigade. By having fire hose on the premises, and a fair volume of water pressure, the extent of the damage was confined to the shed itself, which was, of course, totally destroyed.

Fortunately no casualties occurred; and the elimination of further damage is attributed to the resourcefulness of the firm in anticipating danger of this nature, and preparing their organization to cope with a situation of this nature. H. E. Mihill, of the sales promotion department, took an outstanding part in directing efforts to save the surrounding property.

Annual Meeting of the Glidden Company

At the annual meeting of the Glidden Co., held at the offices of the company, Cleveland, the following directors were elected: J. R. Nutt, the Union Trust Co.; Otto Miller, Hayden, Miller & Co.; F. K. Glidden, Lakewood, Ohio; E. R. Tinker, Chase National Bank; R. W. Levenhagen, the Glidden Co.; H. R. Hamilton, Nubian Paint and Varnish Co.; P. L. F. Elting, Adams & Elting Co.; O. A. Hasse, A. Wilhelm Co.; R. H. Horsburgh, the Glidden Co; S. H. Moore, Chisholm & Moore Mfg. Co.; S. C. Schorndorfer, the Glidden Co.; Adrian D. Joyce, the Glidden Co.

Following the stockholders' meeting the Board of Directors met and elected Adrian D. Joyce president, O. A. Hasse, Otto Miller and R. W. Levenhagen, vice-presidents, and R. H. Horsburgh secretary and treasurer.

Prizes Awarded by Simonds Saw Mfg. Company.

Prizes offered by Alvan T. Simonds, president of the Simonds Saw Manufacturing Company, Fitchburg, Mass., to encourage the study of economics in high schools and normal schools, of $1,000 and $500 for the two best essays on the subject, "'Present Economic Conditions and the Teachings of Adam Smith in the 'Wealth of Nations,'" were both awarded to U. S. contestants. Essays are said to have been submitted from every section of the United States and from Canada.

GLIDDEN

Sell the Genuine

Jap-a-lac has become a household word in homes throughout the Dominion. The excellent results it has given year after year have established for it an enviable position among household finishes.

There is only one Jap-a-lac and that is Glidden Jap-a-lac. The universal demand for this product has brought many imitations on the market. To be sure of a satisfactory result you must sell genuine Jap-a-lac. Its absolute reliability has been firmly established and has created for it a steady demand.

There's a Jap-a-lac finish for every household need. It comes in all the staple colors and finishes. It answers any of the numerous home requirements. Stock up now and take advantage of the unlimited possibilities Jap-a-lac offers.

Weekly Paint Markets

Montreal

MONTREAL, May 19. — While linseed oil and turpentine have featured the paint markets in recent weeks they are both reported as unchanged in price this week, although remaining very firm. Last week some houses reported that they had withdrawn their quotations on turpentine, but this week finds them again in the market and $1.20 seems to be the ruling price; linseed oil is holding at 84c for raw in one barrel lots, while a few are still retaining the price at 82c.

Shellac features the quotations this week with an advance of 25c a gallon for both white and orange in quantities and one gallon jugs. While the shellac market is much more settled than it was a few weeks previous, there is still a range in quotations in that some wholesalers have advanced their prices more than others. This is due to the fact that they have purchased new supplies at the higher prices that gum shellac has now reached, their stocks having been almost totally depleted. White lead in oil and putty are unchanged this week, but continue much firmer than a few weeks ago, due to the continued strength of linseed oil; and in the case of white lead, pig lead continues to advance in the primary market.

Paint and varnish manufacturers are very busy, due to the seasonable demands for their lines. Painting in the outside country is said to be very extensive this year and the fact that dealers have held off in their buying until now, when the busy season is on, stimulates trading to a great extent. Prices on all lines of paints, paint specialties and varnishes are holding unchanged and will in all probability continue to do so until the busy season is well over at least.

Linseed Oil Very Firm

Montreal.

Quotations on linseed oil remain unchanged generally this week. A range in prices is still shown, but the lower prices have been raised 2 cents a gallon; the sources of these lower prices having raised their quotations following the continued firmness of the seed market and the further advances expected, thus bringing oil prices once again on the same basis from all quarters.

The flaxseed market, both domestic and in Argentina continues strong, with advances from both fields made during the past week. This is said to be the result of foreign orders coming to hand, and heavy purchases were made both in Canada and the Argentine Republic.

While quotations are unchanged this week higher levels are expected at any time, the continued firmness warranting another slight advance. The latest quotations are the following:

LINSEED OIL—	Raw		Boiled	
1 to 2 barrels ...	0 80	0 84	0 83	0 86½
5 to 10 barrels ..	0 78	0 82	0 81	0 84½

Broken lots, add 10c gal.

Turpentine Holds

Montreal.

Turpentine is held at $1.20 a gallon in one barrel lots. The market is somewhat unsettled, and dealers who had recently withdrawn quotations are now on the market again, with slightly lower prices. This is not general, however, and the ruling price is a higher one, with indications of a firm tendency for the near future at least. Local stocks are not heavy, but a shortage is not yet in evidence. The demand continues fair, but not up to expectations for this time of year. Local quotations follow:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 20
2 to 4 barrel lots	1 18
Broken lots	1 30

Shellac Advances in Price

Montreal.

Shellac will now cost more, the advance being 25c a gallon on both orange and white in quantities and one gallon jugs in most cases. Gum shellac has been very firm for some little time, with gains made in prices at reasonable intervals. With firms whose stocks are not entirely sold out the above advance in prices was made, while others who found their stocks wholly depleted and forced to buy gum shellac at the new higher prices, a more substantial advance in quotations is made, but generally the following prices are given:

Orange shellac, in barrels, $3.75; in one gal. jugs, $4.05; white, in barrels, or 5 gal. jugs, $4.10; in one gal. jugs, $4.50.

White Lead Continues Firm

Montreal.

The continued strength and advances on the primary market in pig lead, and the good showing of linseed oil in recent weeks has changed the outlook for white lead in oil. This, coupled with the seasonable demand, causes this product to show a decided firmness; where a month or so ago the trend pointed decidedly to lower prices. Whether this is only a temporary tendency, or indicates an adjustment to higher prices when the busy season is passed is hard to determine at present. Stocks are by no means heavy, and the demand is well up to expectations for the present.

Through an agreement reached between corroders and paint manufacturers the sales tax of 1½ per cent. only will be shown on all invoices, no matter the sort of purchase. Quotations remain at $14.00 in five ton lots, $14.50 in one ton lots, and $14.85 in less quantities.

Putty Prices Unchanged

Montreal.

No changes are shown in putty quotations, a seasonable demand being reported. This product will in all likelihood remain steady, as indications point to the maintaining of the present prices more so than in the earlier months, linseed oil now being stronger. In the case of white lead in oil the sales tax on all invoices will be only 1½ per cent., whether purchased from the manufacturer or jobber. The following are quotations:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Window Glass Little Changed

Montreal.

The Belgian glass market eased from its steady gain toward the latter end of the week and lower quotations were available, but this was not of sufficient importance to affect the market locally. The continued strength of the Belgian franc has its results in so far as importation from this source is concerned, but the local situation is that lower prices are still made than the regular discount off Montreal list. A net list is given in many cases, and even with this, a further discount is allowed.

Other than the increase to 2½ and 4 per cent. on importations of Belgian glass, the budget has little further effect at present with the exchange rate of the franc well up to 50 per cent. of its normal value. Of course, this figure, 9½ cents, will have to be maintained, or else the new taxes will have a great effect. Although the rate of exchange is against U. S. imports, very little glass is brought in from there at present.

The demand is still light, and wholesalers are still hopeful that a more settled condition will be shown in the near future.

Paint Products Active

Montreal.

Seasonable business continues to keep the paint manufacturers very busy.

HILLCREST
A GUARANTEE OF QUALITY

Outside Gloss White

"Save the surface and you save all" *Paint & Varnish*

We particularly want you to become acquainted with this beautiful product —Hillcrest Outside Gloss White. It is a clear, uniform paint that spreads easily; it is very opaque, so that it covers exceptionally well, and lies smooth and even under the brush without laps, streaks or sagging. It dries with a most pleasing, smooth, glossy finish that is the best advertisement a merchant could wish to have on buildings in his locality.

We Also Manufacture:

Hillcrest Colors in Oil; Hillcrest Colors in Distemper; Hillcrest Colors in Japan; Hillcrest Porcelain White Enamel; Hillcrest Ebony Black; Spanish Enamel; Hillcrest Bath Enamel; Hillcrest Motor Car Enamel; Hillcrest Paste Filler; Hillcrest Crack Filler; Pearcy's Pure Prepared Paints; Hillcrest Barn Red Paint; Hillcrest Outside Gloss White; Hillcrest Inside Flat White; Hillcrest Aluminum Paint; Hillcrest Carriage Paint; Hillcrest California Gold Paint; Hillcrest Graphite Machine Paint; Liquid; Hillcrest Orange Shellac; Hillcrest White Shellac; Hillcrest Oil Stain; Hillcrest Varnish Stain; Hillcrest Shingle Stain; Cottage Shingle Stain; Hillcrest Varnishes—all kinds; Hillcrest Pure Lead; Hillcrest Bronzing Liquid.

Hillcrest Paint Products

Watch For Our Semi-Monthly Bulletin Next Saturday

If interested tear out this page and place with letters to be answered.

Orders from the outside country clearly show that much painting is being done, and with dealers holding off in the winter months makes the paint houses all the busier at the present time. With dealers' stocks low, and the painting season just commencing in earnest, it is confidently expected that a good volume of business will be kept well into the summer months.

Prices on the many lines continue firm, but unchanged; and little change is anticipated until the present season closes at least, and if turpentine and linseed oil hold at higher figures the chances for lower figures are not nearly so great as has been expected earlier in the season.

Toronto

TORONTO, May 19.—Turpentine and linseed oil quotations are again the centre of interest in paint markets this week. Local importers' stocks on turpentine are reported to be exhausted, and reluctancy to purchase at the high prices prevailing is evident. Quotations on southern markets, however, again show increases, and further corresponding advances in local prices are fully expected by some dealers.

Linseed oil quotations show another rise of two cents per gallon; while shellac and rosin also register increased prices. Prepared paints are in strong demand, and dealers in paint products report general satisfaction and strong activity. Prices on white lead in oil remain unchanged at present, but some indications point to a possible increase. Putty is also apparently headed for an advance, according to dealers, because of the rise in linseed oil markets.

The seasonable brush demand is being fairly well maintained; while the glass situation continues firm, with the Belgian franc rate strengthening from week to week. This exchange, coupled with the new tariff regulations, is stated to affect the cost of future glass shipments, and the view is expressed that higher prices are likely.

Local Turpentine Prices Appear Unsettled

Toronto.

The keynote of the turpentine situation appears to be the future of the export market. The foreign demand has slightly increased over that of last season, and the present rise has been primarily based on the strength of southern markets.

Production for the year has been somewhat larger, and should export shipments be affected in any way, and rail deliveries are normal, a surplus would become apparent. Local stocks, however, are practically exhausted. All present orders have been filled, and local importing houses have been reluctant to purchase further supplies at the high prices now prevailing.

The New Orleans tank quotations are inflated, and buying is now light; many buyers being exceedingly skeptical of the present market action, and are only making conservative commitments. This indicates that dealers look for a readjustment in the near future, and fear being caught on a decline with high stocks on hand.

Unsettlement on local prices is very evident, but no direct change has been reported Jobbers, however, contend that another increase is warranted by present costs, but are reluctant to advance more than is absolutely necessary, as many consider the prevailing strong feature as merely a flurry, with a reaction due as soon as offerings become normal.

Prevailing quotations follow:

TURPENTINE—	
1 barrel lots, Imp. gal.	$1 15
2 to 4 barrel lots, Imp. gal.	1 14
5 gallon lots, Imp. gal.	1 30

Linseed Oil Quotations Advance

Toronto.

Another increase is reported this week in the price of linseed oil, the new quotations being 87 cents for raw and 90 cents for boiled on 1 to 2 barrel lots. This is an advance of two cents over the prices shown last week, and uncertainty exists as to what range of prices will prevail here in the near future. Some further increase is expected in some quarters, but while opinions on this are not general, the average tendency shows expected fluctuations.

The demand for linseed oil continues good; and the preference for Canadian flax seed is still evident. Both the local and Argentine markets report a strong tone, and the fact that English oil is also firmer is having its influence here. A continuance in this direction will indicate that manufacturers of oil will not be confined to so close a margin in the future. New prices are as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, per gal.	0 87	0 90
3 to 5 barrels, per gal.	0 86	0 89
6 to 9 barrels, per gal.	0 84	0 87
Less barrels, add 15 cents per gal.		

Shellac Price Increased

Toronto.

The firmer tone which has been recently evident in shellac gum markets has resulted in a corresponding increase in shellac. Orange is now quoted at $3.40 per gallon on barrel lots and white shellac at $3.90. The new higher quotation are reported by dealers as reasonable, considering the present tone of gum.

Rosin Prices Advance

Toronto.

Rosin is reported to be showing a much stronger market tendency, but the local demand still remains very light. In the southern markets the price has advanced $2.00 per barrel, indicating that the distress rosins which affected the market have now been cleared.

Local prices have increased to $11 and $9.50 per 100 lbs. on barrel lots. See current market pages for revisions.

Paints Continue in Good Demand

Toronto.

Paint products continue to enjoy an exceptional season, and several dealers attribute this strong seasonable demand to the active recognition of the possibilities contained in the "Save the Surface" idea.

The opinion has been expressed that this proposition is being recognized by the consumer from the viewpoint of practical economy. Why this should be so is noteworthy at this time; and the remarkable increase in country trade reported by paint dealers substantiates this conclusion.

Strong Tendency in White Lead

Toronto.

A very strong feeling is evident on the white lead market, and while quotations on white lead in oil remain unchanged at present, yet the lead situation is apparently heading towards an increase.

Mine production of lead is reported to be relatively small, and a strong summer demand has created a firm tone. The U.S. prices on white lead show an advance, but this has not yet affected local prices, which remain as follows:

WHITE LEAD IN OIL—
$14.95 per 100 lbs. in ton lots.
$15.30 per 100 lbs. in smaller quantities.

Putty Prices Steady

Toronto.

Increased firmness in linseed oil circles continues to react in the current price of putty. While no changes have been recorded this week, yet, according to reports from some quarters, the situation contains a likelihood of a slight future increase should the rise in oil quotations remain for any length of time. Prevailing prices are as follows:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

Brush Demand Fair

Toronto.

The seasonable demand for paint brushes is being well maintained. The ordinary spring activity is considered slightly more evident this season, as previous buying was delayed, and thus merchants are sorting up stocks and making returns on the market, as spring requirements are experienced.

Glass Continues Firm

Toronto.

No change in glass quotations is reported this week, but the Belgian franc rate continues to develop strength, and the situation is of interest to dealers. Market demands continue small, with orders fair in number, but small in quantity. Business is generally not up to expectations, but the proportional effects of building activity are expected to show results in a steady movement throughout the summer and fall seasons.

The new customs regulations are expected to increase the cost of Belgian glass on local markets, and the opinion is expressed that the present quotations would be difficult to maintain on future supplies, and increases are looked for.

Paints and Varnishes

Inside and Out

"The Right Paint to Paint Right"

Since 1842 Ramsay Paints and Varnishes have maintained the leading place in the estimation of dealers and consumers. The splendid variety of the Ramsay Products offers an appropriate and dependable finish for every surface.

With the addition of the versatile and well-liked Agate Family the Ramsay dealer finds himself prepared with a reliable finish to offer customers for every use.

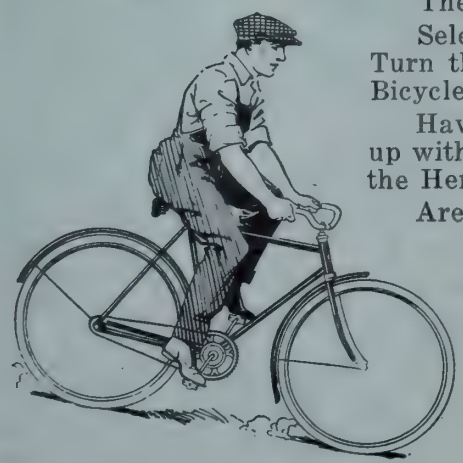
Make Bicycles A Specialty

And they'll make money for you



A CLERK who makes a specialty of vacuum cleaners or stoves—a man who understands the line—can sell far more than a clerk who is not familiar with the best talking points.

The same is true of bicycles.

Select a good, bright clerk and make him your bicycle specialist. Turn the bicycle prospects over to him and you'll find C. C. M. Bicycles a money maker.

Have your clerk write us for "pointers" and we will load him up with lots of sales-winning talk on the C. C. M. Triplex Hanger, the Hercules Brake and other features.

Are you getting "Vim," our helpful, meaty little publication?

O.P.W.

Says Ottawa Pete:

Our Paints Will

"Save the surface and you save all" Paint & Varnish

"Here's a Wallop for the Paint Slacker"

"Try it out!

"Don't spring it early in the talk. Wait till "he gets 'round to guessin' the old place'll "stand another year without paint.

"Then hand him this:

"The average life of a house exposed to wind "and weather is about twenty years, which "puts the wear and tear at 5%. And the "same house, painted regularly, would stand "a hundred years, which puts the wear and "tear at 1%.

"That four per cent. saved would buy an "awful lot o' paint. And the eighty extra "years of ownership—and he's livin' in a "house he's proud of, not a dilapidated dwell-"ing—and the value of his property. . . . "Oh! let it go at that! He's awake by now; "so put him onto the O.P.W. paints and make "yourself a real friend.

"When you sell him O.P.W. you sell him a "round trip ticket and he comes back, and "it's the repeaters that pay the rent.

"Let's get together and talk it over. Say the "word and we'll be along."

Let's All Get Together And SHOUT!

ONE little voice of one little man hasn't much carrying power, but if all the paint and varnish men will get together and shout, their voices will ring clear from Halifax, N.S., to Victoria, B.C., and the echo of their "Save the Surface" refrain will be increased sales of paint and varnish and more money in the pockets of every one of those dealers whose voice helps to swell the chorus.

The "Save the Surface" Campaign has already laid a staunch foundation for the Paint and Varnish Industry in Canada; but the full benefit of the campaign cannot be obtained without the whole-hearted co-operation of every dealer.

It's perseverance that wins in the end, so don't think that the work is all done because the "Save the Surface" Committee are doing their bit. The boost you can give will increase the selling power of their efforts and you will share in the combined results.

Think of the multitude of houses, buildings, bridges, furniture and machinery in your territory that would get a new lease of life by the simple application of a coat of paint or varnish. Think of the increased profits to you if you sold all the paint and varnish that should be applied in your district. And then go right to work and talk "Save the Surface" to your customers. Build the idea into your window displays. Feature it in your advertising—your supplier will be glad to furnish you with literature and cuts upon request. Send in your request without delay.

The Save the Surface Campaign Committee

Room 509, 107 St. James St., Montreal, Que.

TINKER TOM'S TALKS.

No. 312

Hard Times

Notwithstanding the old darkey song, "Hard times come again no more," it's going to be tough sledding for a while for the tinsmith who buys carelessly—who pays too much or gets too little value.

We guarantee you'll be safe if you buy "PREMIER" GALVANIZED STEEL SHEETS, and in doing so you are helping Canadian workmen earn a living and keeping the money where we can all get another "whack" at it.

TINKER TOM

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

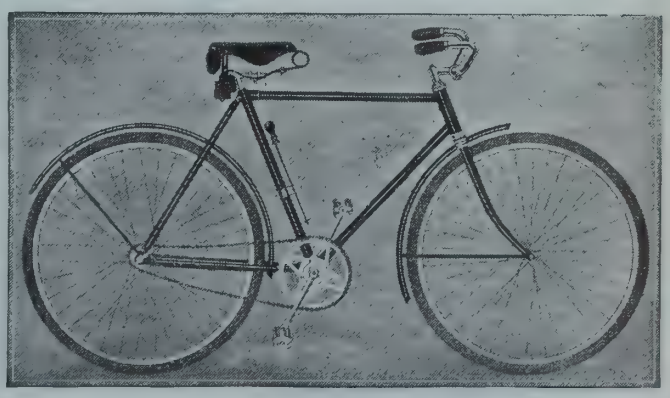
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



Tents of All Kinds

Ashdown Tents include: Wall Tents, House Tents, Wedge Tents, Pyramid Tents, Miners' Tents, etc. Consider the House Tent, for instance. This is one of the most comfortable tents for camping or living purposes. By the use of curtains it can be divided into five separate rooms. It is made with an awning that extends six feet and can be raised or lowered quite easily. Let the prospects know you can supply their needs; show them that you have tents and camp equipment.

"Garry" Bicycles are a genuine "Made-in-Canada" product. The men's model is complete with new Hercules Brake and Tool Bag. The bag contains oiler and wrenches. The brake is easy to operate and insures safety. It has given great satisfaction for years. A simple construction with few parts and very easy to remove as there is no side arm. The Ladies', Boys' and Girls' models are all equally supplied with convincing selling points that attract and hold the cyclists' interest. A bicycle always has interest and appeals strongly to the interested prospect; for that reason bicycle displays make certain sales.

"Garry" Bicycles

AN IDEA!!

22 years ago a few hardware men KNEW they were being overcharged for their fire insurance. They KNEW the cost could be considerably reduced.

The result of that idea is the HARDWARE MUTUALS of to-day. They have cut the cost of fire insurance for hardware and implement men exactly 50%. More than that, **every** year since **1908** they have charged board rates and returned at expiration of policy one-half the premium paid.

Endorsed by Ontario Retail Hardware Association and Manitoba Retail Merchants Association.

Write to-day for explanatory folders

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

Have You Received HARDWARE AND METAL Electro Catalog Yet ?

Must the Printing Industry Follow the Building Trades to Stagnation?

An unheard of condition exists in the building trades in Canada.

Everywhere there is a crying need for homes, but practically none are being built. Why?

Because the cost is considered prohibitive. Labor and materials are so high that the man who contemplates building a home for himself counts the cost, and decides that he cannot afford it.

The result, of course, is increased demand for houses to rent—and higher rents—and no one knows the end.

We don't want this stagnation to occur in the printing industry, but employers are right now faced with a demand from the International Typographical Union that the 44-hour week shall be the basis for all wage scales, and the Toronto Unions are demanding a wage of $44 per week. This will add 36 per cent. to the wage bill of Toronto job printers and publishers, other than those of daily papers.

Does anyone feel that under present economic conditions an increase from 73c per hour to $1.00 per hour for printers is justified?

Does anyone believe that the effect of such an increase in the labor cost of printed matter, can be other than harmful to the industry as a whole?

Printers can only find employment as long as users of their product continue to buy.

Will there not come a time, when—if costs keep on mounting—printers will find themselves in the same position as many highly skilled carpenters, bricklayers, plasterers, and painters are now in? They are willing and anxious to work but cannot find a market for their services.

This is a matter in which the buyers of printing—the subscribers to this and other papers—and the advertisers—are vitally concerned. An increase of 36% in the wage bill of publishers would necessarily involve an increase in subscription price and advertising rates.

That is plain.

Publishers would be very reluctant to add one cent to the present subscription price of their papers or to effect any increase in advertising rates, but they cannot possibly absorb any such addition in wage costs as is proposed, and stay in business.

An expression of the opinion of readers of this paper on the Union's proposals, involving an increase of 36% in the labor cost of printed matter, is asked. Will you not write a letter to the editor (not for publication) telling him your view of the situation?

Don't let us drive the printing industry into the condition of the building trades.

This statement is published by and has received the endorsation of the Toronto publishers who are members of the

Canadian National Newspapers and Periodicals Association

including (Hardware & Metal)

If interested tear out this page and place with letters to be answered.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Barrett Roofings, Cements Industrial Paints etc.

First Sales *Easy*—Repeat Sales *Sure*

When you handle Barrett Products you are aided by two strong selling forces:

(1) Our big national advertising campaign in the leading newspapers, farm journals and technical magazines. This advertising is creating new business for Barrett Dealers in every city, town and village throughout the Dominion.

(2) The high quality of the products themselves. This *keeps* the business. The railroads, the large industrial concerns, and many thousands of individual users know from their own experience that the Barrett trade-mark stands for sure dependability and sound economy.

Are you carrying *all* these famous Barrett Products?

Take up your pencil and check this list.

- ☐ Everlastic "Rubber" Roofing
- ☐ Everlastic Liquid Roofing Cement
- ☐ Plastic Elastigum Patching Cement
- ☐ Liquid Elastigum
- ☐ Everjet Elastic Carbon Paint
- ☐ Creonoid (Fly Oil) Lice Destroyer and Cow Spray

The demand for these products far exceeds the demand for any similar products on the Canadian market. Their sale is increasing by leaps and bounds. Don't miss the opportunity to cash in on this big and growing demand.

Do You Want Prompt Service

Close Co-operation, Well-Selected Salable Goods

From Your Jobber?

It means much to the success of retail business to be assured of goods when you want them. It pays to have standard, salable lines that you can depend on favorably to impress your customers, to close the sales, and to give perfectly satisfactory service in use.

It is such goods and such co-operation from your wholesale house that makes retail business run smoothly.

Thos. Birkett & Son Company, Limited, are fully qualified to give you prompt service, good co-operation and salable, satisfactory goods.

A trial order is the best proof. Why not write to-day?

Economy in Paint Oils

A Bowser System will soon pay for itself by its economy. Bowser Paint Oil Storage Systems are business bringers. They prevent evaporation, gumming, leaking and spilling. Oils are kept pure and clean and are measured accurately and quickly.

For economy in handling Paint Oils the Bowser Storage System is the logical purchase.

Write for illustrated literature.
